PRINCIPLES IN PROGRESS PRODUCTION SALE | OCTOBER 31, 2026

DEAR FELLOW CATTLEMEN

Welcome to our second annual Principles in Progress Production Sale at our farm in New Hebron, Mississippi.

This year marks 49 years that our family has been in the Hereford cattle business. Through those years, we have been blessed with many great friendships and relationships that mean far more to us than cattle ever could. To our customers, friends and fellow cattlemen who have placed their trust in our program, we sincerely thank you. To our family and friends who continue to lend a helping hand year after year, please know how much we appreciate your hard work and dedication. We certainly do not take it for granted.

We believe we are living in some of the greatest times the cattle business has seen. Demand for quality cattle and Hereford genetics continues to be strong. Cattlemen across the country recognize the value Hereford genetics bring to an operation through their docility, maternal ability, performance and ability to produce exceptional F1 baldie females.

With that in mind, we have worked hard to assemble an offering that represents the very best of our program. We are opening the gates and offering proven donors that have worked for us and helped move our program forward, along with a tremendous set of females that we believe have the ability to make an impact in your program as well.

You will also find a deep set of bulls that have been put through a thorough selection process with emphasis on structure, muscle, performance and overall quality. These bulls are stout, functional and developed to go to work. All bulls will have passed a BSE and TRICH test and have been developed on grass with supplemental hand feeding. We are also pleased to welcome Ponderosa Farms as our guest consignor, offering approximately 20 Angus bulls.

Rounding out the offering will be a quality set of commercial females, including black, black baldy and Hereford females bred to calving ease Hereford and Angus bulls. These females will be identified by service sire, allowing you to select the genetics that best fit your operation.

We invite you to join us October 30–31. The cattle will be available for viewing Friday afternoon, October 30, followed by a Mississippi catfish dinner after sunset. Come look through the cattle, enjoy a good meal and spend the evening visiting with friends.

On Saturday, October 31, lunch will be served at 11:00 a.m., with the Principles in Progress Production Sale beginning at 12:00 noon.

We hope you will make plans to be with us. Come enjoy the cattle, the fellowship and some Mississippi hospitality. We promise it will be worth the trip.

If we can be of assistance in any way, please do not hesitate to reach out. We look forward to seeing you at the farm!

Sincerely
THE MCGUFFEE FAMILY

Terms & Conditions

TERMS: Cash or check unless prior arrangements are made with the owners.

All Cattle Sell under the recommended terms and conditions of the American Hereford Assn. (www.Hereford.org) and the American Angus Assn. (www.Angus.org) and will become the responsibly for the purchaser as soon as sold.

The Right to one successful flush is retained on all females selling.

REGISTRATION CERTIFICATES: Certificates of registration are all in order and will be transferred to the new owner according to instructions given with clerks.

INSURANCE: Insurance will be available.

EPDs: EPDs are updated weekly by the American Hereford Association (AHA) and the American Angus Association (AAA). We cannot guarantee the EPDs listed in the catalog. The EPDs are current at print time from the Evaluation of the AHA and AAA.

HEALTH: Proper health papers will be available.

TRUCKING: Trucking will be at cost to buyer to central points. Buyer responsible for pickup from central points.

BIDS: The auctioneer in charge will have final say regarding all final bids. We hope everyone can attend, but those who cannot may mail or call bids to the sale manager or any of the representatives.

BULL GUARANTEE: All breeding-age bulls are guaranteed breeders. In the event a bull is determined to be a non-breeder, notification must be made to the seller in writing or by phone within six months of the sale date. Upon verification, the buyer will receive a credit, equal to the purchase price less salvage value, for use at a future McGuffee Herefords or Ponderosa Farm sale. Death Guarantee not included. Mortality insurance available.

Statements made from the auction block take precedence over printed materials.

Bid Live on both Platforms

Live internet bidding will be available to registered bidders on LiveAuctions.TV and SuperiorLivestock.com.

- What an incredible individual to lead off this special sale offering! G142 has made a tremendous impact on our program, and that influence can be seen throughout this offering in the quality of progeny she has produced.
- She is a beautifully constructed, powerful female with added pigment, tremendous maternal presence and a gorgeous udder.
- G142 has proven she can consistently generate the kind that matter, and we believe her best days are still ahead of her. If you are looking to add quality, maternal productivity and proven generating ability to your program, study this female closely. She can raise herd bulls and the front-pasture females that can move a program forward.
- Her influence is on full display in this offering – daughters sell as Lots 1A, 1B and 2, while sons sell as Lots 101, 102 and 103. Study the progeny and you will quickly see the generating power behind this great donor.

- These two females are truly peas in a pod. Sired by the calving-ease phenom C Cuda Belle 2111 and backed by the powerful G142 donor, these sisters are loaded with quality from end to end.
- They are easy fleshing, beautifully designed and offer the added pigment and maternal look we strive to produce. Both females combine power, substance, and eye appeal in one package.
- Lot 1A: Homozygous Polled. Sells Open.

- What a sale feature we have here! K93 is a direct daughter of Lot 1 and our resident herd sire, Endure 8682, who has consistently proven his ability to sire exceptional females.
- This is a no-holes female that is correct in her lines, easy fleshing, deep bodied and built with the kind of balance and functionality we demand in our cow herd. She has the look, substance and maternal presence to stand out in any pasture.
- K93 is our prototype of what a Hereford cow should be—productive, functional, attractive and built to last. A son sells as Lot 123.
- Ranks in the top 10% of the breed for 8 Traits.
- Bred AI 4/27/26 to SHF Foresight B413 F158.
- PE 5/4/26 to 8/10/26 to KRM 002H Wise One 178J L192 ET.

- N154 stands as one of the most elite females to ever leave New Hebron, Mississippi. A female we believe has the quality, pedigree and genetic potential to make a lasting impact within the Hereford breed.
- Unique in her design, N154 is long and extended, correct in her lines and exceptionally sound on the move. She is elegant through her front end, offers a beautiful sweep to her rib and carries the added pigment that completes an already impressive package.
- Sired by the ever-popular Churchill Smokey, she is backed maternally by the \$195,000-valued flush sister to C Arlo, giving her a pedigree stacked with proven value and generating power.
- N154 combines elite phenotype, pedigree and maternal potential in a way that is difficult to find.
- **Homozygous Polled.**

- J133 is a female that is just getting started, and one we believe has a tremendous future ahead of her. We made the decision to put J133 into our donor program for one simple reason—the consistent quality of calves she produces.
- She is a true producer and the kind of female that proves her value every time she has a calf.
- Sired by 8682, we simply cannot say enough about the type of daughters he continues to produce. They are functional, maternal, easy doing and, most importantly, they flat work in production. We recently weaned a set of ET calves out of J133 that will absolutely knock your socks off, further proving the generating ability this female possesses.
- Here is an opportunity to invest in a young donor that has already shown us what she can do, yet we believe her greatest impact is still ahead of her. Study J133 closely, females with proven production and this much future are hard to let go.
- Bred AI 12/29/25 to UPS Lakota ET.**
- Due to calve before sale day.**

- Another tremendous 8682 daughter that quite easily rises to the top when you study her for overall quality, functionality and udder quality. This is the kind of female that does so many things right and represents exactly what we have come to expect from the 8682 daughters.
- She is beautifully designed, easy doing and built with the kind of soundness and maternal look that should keep her productive for years to come. K98 is backed by generations of proven genetics that have stood the test of time and continue to produce cattle with real-world value. Add in her calving-ease genetics, and this female is truly the right kind for the times.
- She has the versatility and generating potential to raise herd bulls that can go out and make an impact, while producing the kind of front-pasture females you want to build a cow family around.
- Bred AI 12/29/25 to UPS Lakota ET.
- Due to calve before sale day.

- N61 is a big-time cow prospect with the kind of quality that is hard to overlook.
- Sired by the very popular Balance 107, we believe this female has the genetic foundation and phenotype to become a highly productive cow. Her combination of exceptional phenotype and genotype is what makes her truly special.
- PE 4/27/26 to 7/23/26 to CMF 636H Levi 912L. Checked Safe 4 months.

- M182 is a really nice, complete daughter of Endure 8682. His daughters are consistently stamped with a strong maternal look, dark red color, and the kind of functionality we value in productive females.
- The bottom side of M182's pedigree is loaded with maternal strength, adding even more confidence to her future as a brood cow.
- PE 4/27/26 to 7/23/26 to JW 134 F336 25056 ET.
- Checked Safe 4 months.

- What a way to lead off the bull offering!
- Sired by the ever-popular Gunsmoke, N18 has been a standout since a young age. Long made, big bodied and loaded with muscle, this young herd sire prospect combines phenotype with an impressive set of value-added EPDs.
- His pedigree is stacked with maternal strength and carcass merit from top to bottom. His dam, who sells as Lot 1, is a vital part of our program and represents the kind of cow power we strive to build around. When you combine the look, performance, numbers and maternal backing, N18 is a no-brainer herd sire prospect.
- **Full brothers sell as Lots 102 and 103.**
- **Homozygous Polled.**

- These full brothers are loaded with quality and backed by a premier pedigree.
- If you're looking to put together a set of herd bulls that will add power, look and performance while maintaining maternal strength and carcass merit, these brothers are a no-brainer.
- **Full Brothers sell as Lot 101 and 103**
- **Heifer Safe.**

Lot 109 – KRM K164 LETS GO 182F N38

- A calving-ease deluxe Leader son that brings big numbers and the kind of quality cattlemen depend on.
- This bull has some extra frame, plenty of power, and the ability to add those extra pounds to your calf crop.
- He ranks in the top 20% of the breed for 12 traits and the top 5% for SC, SCF, MM, MG, BMI, and BII.
- **Heifer Safe.**

Lot 110 – KRM LBB 1162Y EQUITY 28N ET

CHURCHILL LADY 1162Y ET – Dam of Lots 110-112

CHURCHILL LADY 3414 ET – \$60,000 Maternal Sibling to Lots 110-112

7.6	2.1	61	95	0.9	19.1	22	53	88	1.40	1.50	83	0.69	0.20	68

- This is a special individual and one we believe deserves serious consideration on sale day. Sired by the popular AI sire Churchill Equity 3316L ET, he represents the kind of genetic package that continues to generate excitement across the breed. Equity progeny have been rising to the top in recent sales throughout the Southeast, including the \$42,000 top-selling bred heifer at Walker Herefords.
- Adding even more confidence to this mating, full sisters to Lots 110, 111 and 112 recently commanded \$36,000, proving the consistency and quality built into this pedigree.
- Study this bull from the ground up and there is a lot to appreciate. He is big boned and stout featured, yet remains smooth made and attractive through his front one-third. He carries loads of muscle shape and power while maintaining the balance, structure and eye appeal needed in a true herd sire.
- **Heifer Safe.**

- What a unique individual in so many ways. This son of the ever-popular \$135,000 NJW Character is one you won't soon forget. He may be the youngest bull in the offering, but he certainly gives up nothing in terms of quality.
- Attractive, complete and loaded with potential, he has the kind of presence that makes you stop and take a second look. His dam is a past Lot 1 female and was also a top-selling female, selling to our good friends at Morris Herefords in Texas.
- With this kind of sire power and a proven maternal foundation behind him, Lot 134 has all the pieces to develop into a tremendous herd sire. Don't overlook him because of his age—the future is bright for this one.

- What a powerful individual to lead off the Ponderosa bull offering! 438 is a big-time calving-ease herd bull prospect sired by the breed-leading \$600,000 Basin Jameson, a sire that has made his mark in programs across the country.
- On the bottom side, he is backed by one of our mainstay donors, 876, the highly productive Raindance daughter who has consistently generated the right kind. She is well represented throughout this offering, with several high-quality sons that further prove her ability to produce herd bull prospects.
- Study 438 closely—he combines calving ease, phenotype, pedigree and maternal strength in a package built to move a program forward.
- **Heifer Safe.**

- An awesomely constructed maternal brother to Lot 161 that brings a tremendous amount of quality to the table.
- 452 is a big-footed, long-made son of Tahoe that combines added muscle, power and pounds in an athletic, eye-appealing package. He is wide based, bold through his rib and carries extra shape down his top and through his quarter. This is a big-time ribeye bull that should add carcass merit without sacrificing the maternal quality and functionality needed in today's cow herd.
- Backed by the proven 876 Raindance donor, 452 combines phenotype, performance and maternal strength in a herd bull prospect built to add value to his calf crop.
- Ratio: 108 REA and 100 IMF.

- A direct son of the time-proven and highly respected AI sire Patriarch, 476 brings together a combination of calving ease, carcass merit and maternal strength.
- He is a true calving-ease herd bull prospect that still offers the muscle, dimension and performance needed to add value at weaning time. 476 excels for ribeye while ranking among the upper percentiles of the breed for important maternal traits and posts an impressive SC of 308.
- Here is a bull designed to do more than just calve easy, he offers the genetic merit to build productive replacement females while adding carcass value and performance to his calf crop.

- Here is an eye-catching Angus x Chi Cheyenne son that combines calving ease with added power and performance.
- A sharp-looking, stout-made bull designed to put a little extra punch and added pounds into a set of calves.
- **Heifer Safe.**

Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit (\$) indexes. AHA's genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal. Animals that have a genomic profile will be denoted with a GE-EPD logo.

The current suite of Hereford EPDs and \$ indexes includes:

Calving Ease — Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Dry Matter Intake (DMI)

The Dry Matter Intake EPD predicts the daily consumption of pounds of feed. For example, if sire A has a DMI EPD of 1.1 and sire B has a DMI EPD of 0.1, you would expect sire B's progeny, if comparably mated, to consume on average 1 pound of feed less per day.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

Sustained Cow Fertility (SCF)

The AHA's new Sustained Cow Fertility EPD (SCF) is a prediction of a cow's ability to continue to calve from three years of age through twelve years of age, given she calved as a two-year-old. The EPD is expressed as a deviation in the proportion of the ten-possible calving's to twelve years old expressed as a probability. For example, the daughters of a bull with a 30 EPD would have the genetic potential to have one more calf by age twelve than the daughters from a bull with a 20 EPD. In other words, the daughters from the 30 EPD bull would have a 10% greater probability of having one more calf than the bull with a 20 EPD. This is equivalent to saying that the daughters are 10% more likely to remain in the herd to age 12.

Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth (M&G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull's daughters with a M&G EPD of 10 lb. (29 minus 10 = 19 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

Maternal Calving Ease (MCE)

MCE EPD predicts how easily a sire's daughters will calve at 2 years of age and is measured on a percentage. For example, if sire A has a MCE EPD of 7 and sire B has a CE EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

Mature Cow Weight (MCW)

The MCW EPD was designed to help breeders select sires that will either increase or decrease mature size of cows in the herd. The trait was developed after years of cow weight data collection and the EPD relates directly to the maintenance requirements of a cow herd. For example, if sire A has a MCW EPD of 100 and sire B has an EPD of 85, then you would expect the females of sire A, if mated to similar cows, to be 15 lb. heavier at mature size.

Udder Suspension (UDDR)

UDDR EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale.

Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a UDDR EPD of 0.4, and sire B has a UDDR EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score better udder suspension in daughters of sire A, compared to sire B.

Teat Size (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

Carcass Weight (CW)

Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

Rib Fat (FAT)

The FAT EPD reflects differences in adjusted 365-day, 12th-rib fat thickness based on carcass measurements of harvested cattle. Sires with low, or negative FAT EPDs are expected to produce leaner progeny than sires with higher EPDs. Ultrasound measures are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been

shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldie Maternal Index (BMI\$)

The Baldie Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS)

The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

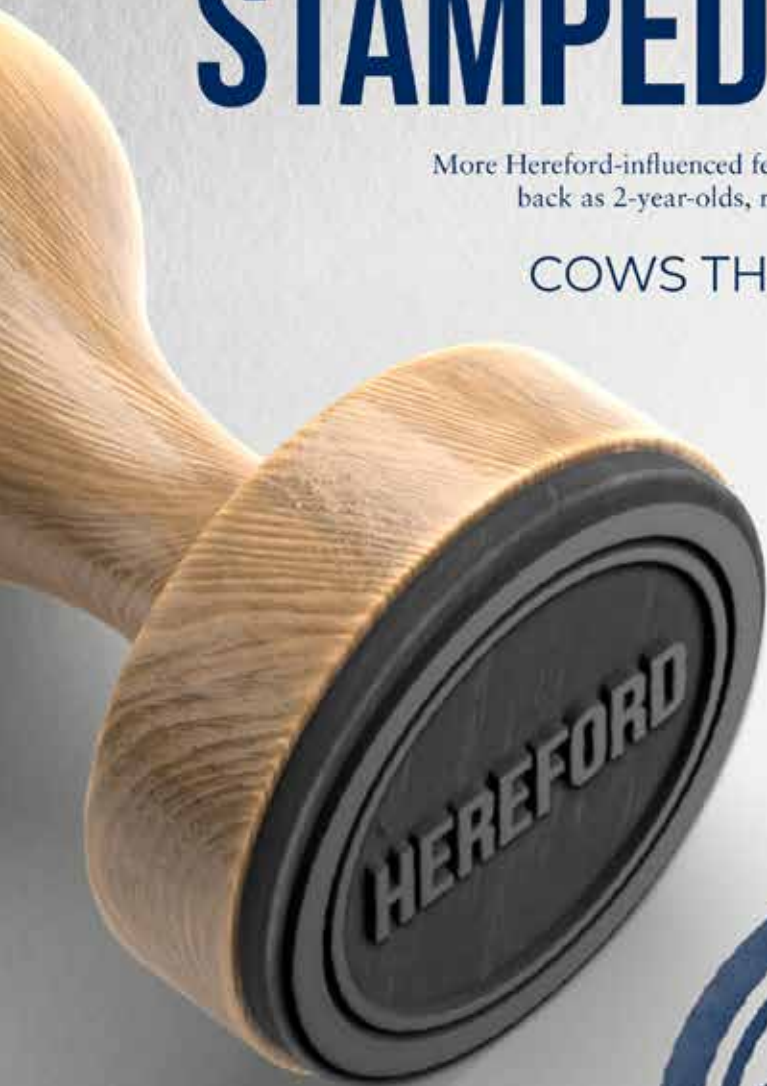

Certified Hereford Beef Index (CHBS)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

STAMPED FOR MORE.

More Hereford-influenced females wean their first calf and breed back as 2-year-olds, remaining in the herd longer.*

COWS THAT STAY, **PAY.**

STAMPED WITH
MORE **DOCILITY**,
