

The Complete Dispersal

Sunday, November 3, 2024

1 p.m. CST at the farm • Oakfield, Wisconsin

242 HEAD SELL AS 142 POLLED HEREFORD LOTS

Huth Polled Herefords

Welcome!

Maryann and I along with the entire Huth family welcome you to the Huth Polled Herefords Complete Dispersion.

There comes a time in your life when you realize that the world is going faster and you are going slower! It's time to take my foot off the gas and downshift, take some time off, and spend more time with our grandchildren.

I have decided to liquidate my quality herd of Polled Herefords in a complete dispersal on Sunday, November 3. The sale will be at our farm. The sale will be managed by Layton Auction Services, LLC. I cordially invite you to ***be with us for this special day!***

There will be a total of 242 head selling:

- 94 spring-calving cows along with their calves
- 4 spring-calving cows
- 6 top fall-calving cows selling with their calves
- 33 top replacement yearling heifers — all but one sired by H B Distinct
- 5 herd sires, including:
 - 100% interest in H B Distinct — his influence in the Hereford breed is just starting to be felt!
 - 100% interest in Huth C049 Advance F083 J006
 - 3 yearling sons of Distinct that were used to clean up after A.I. season

This offering includes the first calves and service of the exciting bull Huth CLC WF Deluxe K016. Also featured are calves sired by KCF Bennett Monument, Distinct, and GO King E33.

I have managed this herd to be in the best condition for the sale. I am very proud of this group of cattle. All cattle will have a DNA profile with the latest breed-leading EPDs posted.

Watch for additional details and updates on our website, Facebook, or from Layton Auction Services. You are invited to come by any time and take a look at the herd!

I have enjoyed the opportunity to be in a business that I love for over 60 years. Let this be an opportunity for you to jump start your program!

Respectfully,

Jerry Huth

The Complete Dispersal

11.03.24

OAKFIELD, WISCONSIN

...Hereford advocates for 62 years!

*The Hereford breed has been a big part of my life for 62 years.
Here are some highlights over the years...*

OUR HISTORY

1962

Vince and Mildred Huth needed to get their mischievous 11-year-old son a job to get him off the streets of Oakfield. Dad rented a barn from the vegetable canning factory (which he managed) and gave me the job of taking care of three Black Angus heifers. I enjoyed the work but not the wild Angus heifers. We quickly switched to Polled Herefords because of no horns, great disposition, and their pretty white heads. I showed a heifer at the county fair and stood last in class.

1964

Exhibited WBF Beauty 3 at the Wisconsin State Fair and won a class! From exhibiting cattle, friends were made for life. Precious memories of my youth are the days I exhibited at the county and state fairs.

I met Marshall Ernst, Windsor, Colorado, at the first state fair. He was helping his Craig cousins, and we became great friends. Marshall and I have been there for each other ever since. We definitely are soul brothers!

Dr. Dan Schaefer is Professor Emeritus and past chair of the University of Wisconsin Animal Science department. I met Dan at the Wisconsin State Fair. We discovered that we were going to be at the same high school, Winnebago Lutheran Academy, Fond du Lac. We quickly bonded and have been friends ever since. I value his friendship.

1965

My parents purchased our farm, and we moved from the village to the farm.

1968

Dad and I attended the American Hereford Association Type Conference in Madison, hosted by the University of Wisconsin. This was an eye opener and started the frame race! It also sparked an interest in performance testing.

1973

I graduated from the University of Wisconsin–Madison with an Animal Science degree. Dr. Robert Kaufman was my advisor and through his guidance, philosophies and work opportunities gave me an excellent education for the meat industry (and completely covered the cost of my college education). Carl Hirschinger and Dr. Richard Hauser continued to feed my interest in performance testing.

After graduation, I came back and worked on the farm, expanding the cow herd to around 100 cows.

1977

Started submitting performance records to the American Hereford Association. These included weaning and yearling weights along with frame scores. Later we added birth weight and scrotal circumference to the information.

1981

After the death of my parents, I purchased the farm and hunkered down to survive the farm crisis of the 1980s.

Huth Polled Herefords

<< OUR HISTORY, CONTINUED FROM PAGE 3

1993

This year marked a philosophical change in how we bred our Herefords. Listening to our customers, we started putting major emphasis on calving ease but still selected animals with excellent growth — we searched for these “Spread cattle.” EPDs were the main selection tool we used. We carry on this philosophy today.

1995

Started submitting ultrasound data for carcass traits to the American Hereford Association. I was one of Mike Stanek’s first customers for doing ultrasound in Wisconsin. I incorporated carcass traits for rib eye and marbling into our selection criteria.

1996

Purchased a breeding interest in **RRH Mr Felt 6191**. He was a bull that had a major impact on the Hereford breed. His influence in the breed is still felt today.

1996

Our first home bred bull was sold to a bull stud. Over the years, we have marketed 16 bulls to the major bull studs. Many of these bulls still have an influence in our herd and the industry today. Some of the bulls include:

- **Huth Enhancer 2D**—1996 to ABS. One of the all-time highest Hereford semen sellers for ABS.
- **Huth Prospector K085**—2002 to Accelerated Genetics. Owned with Baybrook Farms, Rodney and Barbara Philips, Virginia. K085 proved to be a popular Hereford bull in the EU community.
- **Huth Oak P017**—2005 to Accelerated Genetics.
- **Huth Progressive P027**—2006 to ABS. Owned with Ellis Farms, Illinois, and Schu-Lar Herefords, Kansas.
- **Huth Signature X083**—2011 to Accelerated Genetics.
- **Huth FTF Torque C002**—2017 to Accelerated Genetics. You will see his daughters in production. Owned with Falling Timber Farms, Missouri.

The Complete Dispersal

Our 2024 sale bulls

2007-2011

I had the honor to be elected to the American Hereford Association Board of Directors and chaired the Breed Improvement Committee. What an interesting time to be on the board – DNA testing was in its infancy for evaluating genetic merit, and the board was charged in establishing rules and policy for the testing. Looking back, we made some excellent decisions! I thank the AHA staff and the board members who I served with during this time. It was a tremendous, educational experience, and I thoroughly enjoyed my time on the board.

2007

We started extensively DNA testing and using GE-EPDs for genetic selection. In our dispersal sale, every animal has been DNA tested to give the most accurate indicator of genetic merit.

2009

I was named the Wisconsin Cattlemen of the year by the Wisconsin Cattlemen's Association.

2016

Honored to be inducted into the Wisconsin Hereford Association Hall of Fame. Over the years, we dedicated many hours of work for the best beef breed association in Wisconsin!

2021

Purchased **H B Distinct**, whose influence is deep in our dispersal sale. He has surpassed all of our expectations.

2023

We were honored to receive the National Cattlemen's Beef Association Region III Environmental Stewardship Award. We always have been trying to be good stewards of the land – just like you! If we take care of the land, the land will take care of us.

The Making of a Cattleman

by GERALD F. HUTH
Oakfield, Wis.

I first became interested in Polled Herefords in 1960 when just after my 11th birthday I joined the local Hereford Club and had to decide on a project. Living in the village of Oakfield, Wis., I thought I would have to pick something small—the insects that could rear a herd of beef cattle. We should raise from our home.

That sounded interesting to me, as I had read that time on I didn't give Dad any and on Saturdays and Sundays, we went around the country looking at beef animals. Being raised in the village, I didn't know one end of a cow from the other, and my father knew only that beef animals should be wide and stocky. That's the way the Hereford breed was.

The horses showed us a cow and calf. The horses showed me. The next farm were so wild in the pen I didn't think our father could hold them.

THIRD STOP

Our third stop was at Dr. Robert Hopp's farm near Cambridgeport. He gave me a good Polled Hereford girl and from that visit, I decided on Polled Herefords. They seemed gentle and easy to handle, and I couldn't resist those that sprang me back and my choice, and a cow-boy's partner.

Dad had the feeling that this would be a real life fancy, but I stuck with it. Even though it was work, I enjoyed it. I got the better calf ready for the county fair that fall. Everywhere I did was new. Even my Dad couldn't help me, so he got some help from my 4-H leader, and received a red ribbon.

That summer and fall whenever we had any more time, Dad, Mother and I took rides and planned them so we could show at a couple of Polled Hereford farms. The more I saw of them and moving the kids at these farms made

me very anxious to get going with my project.

REAL TEST

My first winter was a real test as to whether or not I would stay with Polled Herefords. Mornings and evenings I paid my milk to the farm and took care of my cattle, and when Dad had time he helped me. When spring came around, Dad and Mother helped me purchase the best and pasture, and I started a few more animals, including one hereford that was champion at the Fond du Lac County Fair that year. I took her to the state fair the following month, and a challenge and I really learned a lot seeing some of the best Polled Herefords in the state fair.

In 1961 I also showed the junior champion bull at the Fond du Lac County Fair. He is a Q Lockhart in my herd since today. That year in junior competition was a real morale booster for me. Six years, although I didn't receive any titles were near the top. I also entered again here like me. What I did was to get to know my fellow breeders from Wisconsin and surrounding states. They were always willing to give me a helping hand. I made up my mind to stay in the Polled Hereford breed.

REGULAR TRAIL

My biggest thrill of the 1960 season was taking a first on every animal I entered at the county fair, also having the grand champion cow and the junior champion bull when just four years before I didn't know how to handle an animal properly. This year I had a friend helped me with them at the fair and Dad and Mother.

My parents have gone along with my quest, and every year are more interested. We have bought a few new breed-

Jerry & Maryann at NCBA in New Orleans

Huth Polled Herefords

IN MAY 2023,

we were one of the stops for a trade team of Japanese food service representatives. The Wisconsin Beef Council, in partnership with the U.S. Meat Export Federation, hosted this group. On-farm visits helped the Japanese visitors understand the dedication to animal care, sustainability, production practices and genetics used by Wisconsin farmers in producing a high quality product.

In addition, the Japan Trade Team visited Wisconsin meat processors and restaurants to get a great snapshot of Wisconsin beef production. The trade team thoroughly enjoyed the visit and asked many interesting questions about our operation. We were even featured in one of the Japanese food magazines!

We have always been committed to helping the staff at the Wisconsin Beef Council tell the true story of the Wisconsin beef industry.

The one cow that doesn't sell.

Huth R007 VERA T013 doesn't have impressive "numbers," she is not the prettiest of cows, she never has been one that you would find unless she was pointed out to you—but she epitomizes what I define as "the ideal cow."

- She is raising her 16th calf, with every calf born from April 17 to May 19 of every year.
- No record of any medical treatments except routine vaccinations.
- She is a Dam of Distinction, just like her dam and granddam.
- 10 generations of Huth Polled Hereford breeding.
- Homozygous Polled.
- Lifetime ratios on her calves:
BW 99, WW 103.6, YW 100.7, REA 102.5, IMF 98.5%
- Excellent udder and very good feet. We never touched her.
- Excels on grass.
- Never had a halter on her or any of her offspring.
- She is in the background of many of the cattle in this sale.
- She has never been on a trailer.

HUTH R007 VERA T013

*Huth foundation herd matron, pictured at 17 years of age.
Vera T013 appears in the three-generation pedigree
of 40 animals in this sale.*

All T013 has done is give me the opportunity to make money on every one of her offspring every year. I may be getting soft, but she will never leave this farm.

The Complete Dispersal

SALE INFORMATION

Cattle are available for inspection on pasture any time before sale day. Please call in advance so we know that you are coming.

SATURDAY, NOVEMBER 2

Cattle will be on display all afternoon. Refreshments will be available.

SUNDAY, NOVEMBER 3

Cattle on display from 9:00 a.m. until sale time. Food and refreshments will be available throughout the day.

1:00 p.m. CST — Huth Polled Herefords Complete Dispersal

Cattle Load-out: Either the day of the sale or shortly thereafter. Trucking will be available at the lowest possible cost to you. Please contact the sale management or Jerry Huth for assistance in making trucking arrangements.

Note that our semen inventory will be dispersed Sunday evening, November 3rd, on smartauctions.co. Live closeout at 7:00 p.m. CST.

HERD HEALTH

Cattle will sell with proper health certificates for interstate shipment. Updated pregnancy status as well as cow herd and calf vaccination information will be available on the supplemental sheet sale day. For any questions about our herd health, please contact Dr. Emma Schaffel, Waupun Veterinary Service—(920) 324-3831.

GUARANTEE

This being a complete dispersal, all cattle sell as is, where is and without further guarantee. We will provide all known information about the cattle selling.

EXPECTED PROGENY DIFFERENCES (EPDs)

The EPDs printed were current as of 9/18/24. EPDs are updated weekly by the American Hereford Association, so we cannot guarantee the EPDs listed in the catalog. All EPDs that are genomically enhanced are indicated in the catalog by this symbol: The GEPO symbol is a small, stylized logo consisting of the letters "GEPO" in a bold, black font, with a red and blue graphic element to the right.

All persons who attend the sale do so at their own risk. Neither the owners nor anyone else associated with the sale assumes liability for accidents or loss of property. Livestock mortality insurance will be available sale day at the clerk's desk.

- Selling full possession and full semen interest. Sells with 500 units of semen.
- Homozygous Polled.
- We lead off the Huth Polled Herefords Complete Dispersal with H B Distinct, an American Hereford Association CHB sire who, as you will see when you study the offering, has had a huge genetic impact in this herd at only four years of age. A total of 115 direct sons and daughters are also being offered for your appraisal. Distinct is an AHA Trait Leader for 12 EPDs plus all three of the dollar indexes. When you search the AHA database and plug in Distinct's EPD minimums for CE, BW, YW, Udder and Teat, he is the only bull that surfaces in the entire database.
- Distinct is an impressive individual to appraise in person, as he offers balance, body, shape and impeccable structure with elite eye appeal. He is short marked, loaded with pigment and has big testicles, which only enhances his value.
- As you study his progeny throughout the catalog, you will see that his daughters in production have gorgeous udders with excellent milk flow and possess his same attributes from a phenotypic standpoint. The sons are built right from the ground up with calving ease built in.
- Truly a unique opportunity to acquire a young, proven herd bull of this caliber that has so much to offer to the Hereford breed.
- Owned with Avenales Ranch, Bar Star Cattle and Ernst Herefords.

- Homozygous Polled.
- H029 is the dam of Huth CLC WF Deluxe K016, the H B Distinct son currently working in the Chapman Cattle Co., Woolfolk Farms and Whispering Wind Farms progressive breeding programs. Deluxe is a direct son of Distinct that offers an elite EPD profile in a very attractive phenotypic package. To date, Deluxe has grossed just under \$150,000 in semen sales through auction.
- H029 is a powerfully constructed four-year-old that is built right from the ground up with an elite look on the profile. She offers calving ease, performance and maternal strength to complement her excellent build. A donor dam of this caliber in her prime is only offered in a complete dispersal—and to top it off, she is bred back to have a full sib to Deluxe!
- Dam sells as Lot 3. Maternal sisters sell as Lots 72 and 139.
- A.I. 7/3/24 to H B Distinct. Checked safe A.I.
P.E. 8/2/24 to 10/5/24 to H B Distinct.

- Homozygous Polled.
- This is one of Jerry's favorite females in the offering, and when you study her build and production records, it is easy to see why. She is stunning on the profile with all the added amenities in the right size package to further enhance her value. An elite producer in the program, H001 has two herd bull sons, both sired by Distinct. Huth LHF Badger K021, whose progeny and service sell in this sale, is working in the Larson Hereford Farm and S&H Livestock Enterprises programs, and Huth H001 Distinctive L008, who sells as Lot 5, has worked in the Schulz Polled Hereford program.
- H001's calving-ease herd bull prospect that sells as Lot 4A may be her best son to date. When his weaning weight is submitted, this four-year-old will become a Dam of Distinction, which will line up six generations of DOD in her pedigree.
- H001's progeny have excelled, posting average ratios of 3@93 for BW, 2@109.5 for WW, 2@110 for YW, 2@111 for REA and 2@116 for IMF.
- Here is a definite sale feature that has tremendous earning potential, as she excels in both phenotype and genotype...and the proof is in her progeny.
- Son sells as Lot 5. Dam sells as Lot 68. Maternal sisters sell as Lots 31 and 118.
- P.E. 8/2/24 to 10/5/24 to H B Distinct.

The dam of Badger K021 sells as Lot 4

- Homozygous Polled by pedigree.
- M010 is certainly one of the feature future herd bulls selling from a standpoint of both phenotype and genotype. You will really like the way this herd bull prospect is constructed from the ground up, and when you study his EPD profile, it is impressive from start to finish. He ranks in the upper echelon of the breed for calving ease and offers performance with maternal strength and value-added carcass merit.
- Be sure to look up this future calving-ease herd sire sale day out of H001, one of the feature females in the offering.

- Homozygous Polled.
- "Wow" is what you will say when you appraise this female with her dark cherry red color, square hip, bone and ultra-feminine look through her front one-third. Much like her outstanding dam, M057 is elite in marbling and maternal strength. She does, however, offer more performance, REA and CHB than her time-tested dam, C049.
- This female has tremendous upside and elite value, as she possesses the attributes we talk about when discussing value. She is homozygous polled, marked right, colored right, built right and has documentation. An impressive individual for sure!
- BW 79 lbs.
- Sells open.

- Homozygous Polled.
- We begin the two-year-old first-calf heifer pair splits with an impressive daughter of Distinct that has been a favorite of many cattlemen who have visited the farm. K070 is a beautifully designed female that is dark red, short marked and fully pigmented. Built correct from the ground up, she is stout made with a phenomenal profile and comes equipped with a magnificent udder.
- K070's numerical profile is also excellent, excelling in growth and maternal traits with carcass. Females with her tremendous combination of phenotype and numerical value are hard to produce and are rarely offered for sale. Only in a dispersal could an opportunity arise to acquire a female of her stature that is destined for the donor pen. Take advantage of Jerry's decades of hard work and commitment to raising top notch Hereford cattle and let this incredible young female go to work for you.
- Granddam sells as Lot 67.

- Homozygous Polled.
- You must appreciate the power and exceptional phenotype that this Distinct daughter possesses. She has an extended and square hip design, extraordinary depth of rib from her flank to her forerib, stout bone, a pretty udder, and she is angular and feminine through her front one-third.
- Numerically, K102 offers a nice spread from birth weight to yearling weight, superior maternal traits and commendable carcass traits, especially for REA.
- A.I. 7/13/24 to RST Final Print 0016. Safe A.I.
P.E. 8/2/24 to 10/5/24 to Huth C049 Advance F083 J006.

- Homozygous Polled by pedigree.
- M038 is a Power Broker son that has incredible maternal traits and carcass merit. He is a bonafide heifer bull candidate with commendable growth.
- BW 63 lbs.

All Huth Polled Herefords.

we adhere to a philosophy of efficient cattle management. We keep our cattle well fed and living in quality surroundings while they convert the feed we provide into high-quality meat. The Hereford cows in our herd must be:

- **Fertile** A calf every year is a must.
- **Strong mothers** Able to calve unassisted and produce enough milk for her calf to reach its growth potential.
- **Docile** Have a disposition that doesn't cause danger to those who work with her.
- **Structurally sound** Have no feet or leg problems that prevent movement with the herd.
- **Efficient** Moderate in size and able to avoid excessive feed consumption.
- **Low-maintenance** Our cows never go into a barn.

We realize we're breeding for a number of antagonistic traits—genetic traits that don't necessarily go together, which is where our use of expected progeny differences (EPDs) comes in. We collect careful records on all of our cattle and use the EPD data calculated by the American Hereford Association to help us measure and balance the tradeoffs between these traits in our cattle. We achieve our breeding goals through a management plan that's based on minimizing inputs while maximizing the use of grass and grass hay in the diets of our cattle.

A.I. & Calving Management Artificial Insemination (A.I.) season starts July 15 and goes for 21 days. Historically, we A.I. over 90% of our cows by visual observation and obtain a 70% conception rate. We turn bulls out after the A.I. season and pull the bulls from the cows September 15. Our first calves are typically due April 20, and we continue to calve into June for a 60-day calving season. We calve at that time of the year to take advantage of the lush spring growth of grass, which helps to get the cow back into condition for re-breeding while getting her calf off to a fast start. We calve on pasture and supplement hay, protein and mineral until the grass growth can maintain the cow (some time between May 1 and May 15). After that, the only supplement is a high-quality mineral product.

- Homozygous Polled.
- Stunning three-year-old daughter of F083 backed by the tremendous F035 female that sells as Lot 3, making J032 a maternal sister to the dam of the popular A.I. sire Deluxe, owned with Chapman, Wofolk and Whispering Wind.
- J032 is a beautiful female who is built correct from the ground up and has a gorgeous udder. She is square hipped and wide bodied and exudes femininity through her front one-third. Her GE-EPD profile offers a nice spread from birth to yearling with strong maternal traits and superior carcass merit. J032's incredible look combined with her pedigree and numerical profile elevates this young female near the top of the offering, especially for those searching for a young donor prospect.
- Posted individual ratios of 110 for WW, 108 for YW, 110 for REA and 119 for IMF.
- Dam sells as Lot 3. Maternal sisters sell as Lots 2 and 132.

HEREFORD \$CHB ADVANTAGE

An industry-changing program from the American Hereford Association and add value to Hereford-influenced feeder cattle

Hereford Association and IMI Global to verify with superior genetics, health and management.

REQUIREMENTS

Source and age verification | Genetic merit: *Minimum of 50% Hereford genetics and bull battery ranking in the top 50% of breed for \$CHB index (bull battery average)* | Two rounds of vaccinations prior to shipping: 2 doses of 7-way, 8-way or 9-way clostridial, 2 doses respiratory modified live | BQA certification

BENEFITS

Genetic improvement tool | *Sire EPD and profit index summary* | Added market exposure | *Free listing at HerefordMarketplace.com* | Enrollment cost \$3.25/head (verification + eID tag)

Huth Polled Herefords Thank You!

We have been blessed with dedicated employees throughout my life. To all who helped us out, *THANK YOU!*

We owe a special thanks to the following for keeping this ol' boy on track and the farm moving forward:

Josh Scharf Josh is a good friend of our two sons, Mike and Karl. Josh helped me when he was in high school and after college decided to come back to the farm and run this place. He is the farm manager and has an outstanding herd of Hereford/Angus-cross commercial cattle. His herd will be grazing our pastures after the Herefords are gone.

Chuck Schaumburg Chuck has been helping me out on a part-time basis for over 40 years—and before that, his father, Ed, and brother, Tipper, assisted me. All three of Chuck's children worked on the farm. A metal fabricator as his day job, Chuck can fix or make almost anything. I would not have survived this long without the Schaumburg help! We appreciate and thank you, Chuck, for your help and friendship.

Dr. Emma Schaffel, Waupun Veterinary Services Every farm should have a relationship with their veterinarian as we do with Dr. Emma and the Waupun Veterinary Services. Dr. Emma has been a good resource and guiding force for our animal care. Whether it is discussing a vaccination program, doing B.S.E. on bulls, or showing up on time for an emergency, she is always ready to go! Thank you, Dr. Emma, our D.V.M. If you have any questions about the health of our herd, contact Waupun Veterinary Services at (920) 324-3831.

Ken Montsma, Vanessa Pontiero and Bryce Buchda, Accelerated Genetics Technicians Ken Montsma has been doing our A.I. for 35 years. You can appreciate the stories that have been told by the breeding chute throughout the years—Ken watched our boys grow up! This crew hit a 75% A.I. conception rate this year. Thank you for your great service and friendship.

Josh Scharf

Chuck Schaumburg

Emma Schaffel, D.V.M.

At Huth Polled Herefords, we've been producing excellent cattle in East Central Wisconsin for over 60 years! Huth Polled Herefords is a family-owned seedstock producer and beef cow-calf operation that's been raising cattle since 1962. Over the years, we've maintained an established herd of high-quality Hereford cattle that our commercial customers know they can depend on. We provide genetics and cattle to local and national cow-calf operations as well as sell freezer beef directly to consumers in Wisconsin. *Many thanks to all our friends and customers for 62 years!*
