Gary & Kathy Buchholz, owners

*Dear Friends,*

It is with great pleasure that we welcome you to our **Third Annual Fall Bull Sale**. GKB Cattle is excited to offer registered Hereford, Angus, and Red Angus bulls in this fall sale.

We are very proud of the bulls that make up this offering, as the quality runs deep. Phenotypically, they are a stout and rugged set of bulls that are ready to go to work in the pasture. The bulls have been through a stringent selection process, where emphasis is put on structural integrity, muscularity, real world performance, and fleshing ease. It has also always remained our priority that they must start with good feet and legs.

When making our selections at GKB Cattle, we continue to place a strong emphasis on the maternal aspect of our herd sire battery. We believe that every great breeding bull is backed by an even better female. Maternal stability increases performance, fertility, and longevity, all of which are essential traits of the modern day beef production cycle. Through focusing on superior sire selection, we can achieve these traits.

We are offering herd bulls for commercial operations as well as bulls designed to perform in a purebred herd. We truly believe that the individuals in the offering have a tremendous amount of potential to be sires with true impact and influence within the beef business. Come early and view what we have to offer your program. Videos of the sale bulls will be available at [gkbcattle.com](http://gkbcattle.com), [Live-Ag.com](http://Live-Ag.com) and [LiveAuctions.TV](http://LiveAuctions.TV).

Your success is our success! We want to thank all of our customers for your continued support, as we wouldn't be able to do this without you, the customer! **We look forward to seeing you in Desdemona, Texas, Thursday, October 8, 2026.**

*Gary & Kathy*

**GKB Cattle**

***All bulls are available to view at the Desdemona ranch until sale time.***

***Lunch and refreshments will be available sale day.***

**NEW THIS YEAR!**

50 head of  
F1 Tiger Stripe  
bred heifers**

## THE THIRD ANNUAL **GKB** FALL BULL SALE

### **HOTEL ACCOMMODATIONS**

Hampton Inn, 910 S Harbin Dr, Stephenville . . . . .(254) 918-5400  
 Best Western, 121 S Lockhart Rd, Stephenville . . .(254) 965-8899  
 LaQuinta Inn, 10150 I-20, Eastland . . . . .(254) 629-1414  
 Best Western, 1460 E Main St, Eastland . . . . .(254) 629-8071  
 Eastland Historic Hotel, 112 Lamar St, Eastland . . .(214) 354-7480  
 Best Western, 1505 E Central Ave, Comanche . . . .(325) 356-2300

### **AIR TRANSPORTATION**

Both the Dallas/Fort Worth International Airport, Irving, TX, and Love Field, Dallas, TX, are approximately two hours from the GKB Cattle sale headquarters.

### **SALE MANAGER**

Dustin N. Layton (405) 464-2455  
 laytond@yahoo.com  
 Chisolm Kinder (405) 747-4683  
 laytonauction.com

### **GKB SALE DAY CONTACTS**

GKB Cattle Office . . . . .(254) 440-1440  
 Gary Buchholz . . . . .(214) 537-1285  
 Jay Creamer . . . . .(254) 707-2199  
 Raymond Gushee . . . . .(207) 256-7365  
 J.C. Reno . . . . .(918) 801-6053

### **SALE STAFF & REPRESENTATIVES**

Dustin Layton, Auctioneer . . . . .(405) 464-2455  
 Chisolm Kinder, Layton Auction Services . . . . .(405) 747-4683  
 Ty Drach, *Hereford World* . . . . .(815) 822-3552  
 Jim Banner, *Southern Livestock Standard* . . . . .(210) 867-6862  
 Phil Stoll, *Weekly Livestock Reporter* . . . . .(817) 366-7332  
 Colton Pratz, *Oklahoma Cowman* . . . . .(405) 385-1054  
 Mark McClintock, Consultant . . . . .(325) 650-4223  
 Diane Johnson, Texas Hereford Assn. . . . .(817) 831-3161  
 Missy Coffelt, *Texas Hereford* . . . . .(682) 309-7555

### **ABSENTEE BIDDING**

Online bidding will be available on both the Live-Ag.com and LiveAuctions.TV websites. High-speed internet is required. You may also contact any of the above representatives to place a bid.

### **"SIGHT-UNSEEN GUARANTEE"**

To make buying easy, we offer a sight-unseen guarantee. Leave a bid...buy over the phone...buy online. If they don't meet your approval, they come home. It's that simple.

### **INSURANCE**

Livestock mortality insurance will be available sale day.  
 Sheila Jensen, Jensen Livestock Agency • (785) 262-1116

### **SALE TERMS**

Terms of the sale are cash or check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

### **HEALTH**

The health of the cattle selling is excellent. Each animal will be accompanied by an individual health certificate for immediate interstate shipment. Note: If bulls should go to a state that requires additional testing, bulls will be delivered to the new owner after testing is completed.

### **GUARANTEE**

Each bull will sell under the Suggested Sale Terms and Conditions of his respective breed association.

### **BREEDING GUARANTEE**

Bulls sold in this sale are fertility tested and are guaranteed by GKB Cattle to be breeders, provided they are properly handled and cared for by the purchaser. Any bull failing to breed after a trial of six months may be returned to the seller if in good condition. The seller reserves the right to try said bull for six months, and if he proves a breeder to return him to the buyer at buyer's expense. If the bull proves a non-breeder, the bull will be replaced or credit will be issued for a future GKB Cattle sale at the purchase price minus salvage value of the bull. Seller is not liable for bulls lost due to injury or death.

### **EXPECTED PROGENY DIFFERENCES**

Genomic-enhanced EPDs are included on all bulls selling. EPDs are updated weekly by the breed associations, so we cannot guarantee the EPDs listed in the catalog. The EPDs printed were current 8/25/26. Current EPDs can be viewed on the association website.

### **ANNOUNCEMENTS**

Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

### **LIABILITY**

All persons who attend the sale do so at their own risk. Neither the owners nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property. As the sale manager, Layton Auction Services, LLC is only an agent for the seller and has no responsibilities other than those involved in conducting the sale.

## Using EPDs as Selection Tools

Cattle Evaluations use the term Expected Progeny Difference (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait, relative to other sires in the analysis. The key word is "difference." The EPD itself does not imply "good" or "bad" performance; rather, the EPD gives a prediction of the average "difference" to expect in the performance of a sire's progeny relative to other sires in the same analysis.

The EPD for a given trait on each animal in the analysis is compared to every other animal in the analysis. The EPD is reported as a plus or minus value in the unit which the trait is measured. EPD accuracies on non-parent animals are relatively low and are not reported in this catalog. The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit indexes. AHA's genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal.

### Hereford EPDs and \$ Indexes included in this sale catalog are:

**Calving Ease Direct (CED)** Based on calving ease scores and birth weights and measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

**Birth Weight EPD (BW)** An indicator trait for calving ease, measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

**Weaning Weight EPD (WW)** An estimate of pre-weaning growth, measured in pounds.

**Yearling Weight EPD (YW)** An estimate of post-weaning growth, measured in pounds.

**Scrotal Circumference EPD (SC)** Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty.

**Sustained Cow Fertility (SCF)** A prediction of a cow's ability to continue to calve from three years of age through twelve years of age, given she calved as a two-year-old. For example, the daughters of a bull with a +30 EPD would have the genetic potential to have one more calf by age twelve than the daughters from a bull with a +20 EPD (a 10% greater chance).

**Maternal Milk EPD (Milk)** The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. This difference in weaning weight is due to total milk production during the entire lactation.

**Maternal Milk + Growth EPD (M+G)** Reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. It is equal to one-half the sire's weaning weight EPD, plus all of his Milk EPD.

**Udder Suspension (Udder)** Udder EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

**Teat Size (Teat)** Teat EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

**Calving Ease Maternal (CEM)** Predicts how easily a sire's daughters will calve at two years of age and measured on a percentage. For example, if sire A has a CEM EPD of +7 and sire B has a CEM EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

### Carcass EPDs

Carcass records are adjusted to an age constant endpoint. Therefore, selection based on any or all of the carcass merit EPD is comparable among cattle at the same age endpoint. For example, selection based on increased EPD for carcass weight will result in heavier carcass weights than those animals with lower EPD for carcass weights when the cattle are harvested at the same age.

**Carcass Weight EPD (CW)** Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight.

### American Hereford Assn. EPD Averages for 2024- & 2025-born calves:

| CED  | BW   | WW  | YW   | SC   | SCF   | Milk | M+G  | Udder | Teat                                                                                |
|------|------|-----|------|------|-------|------|------|-------|-------------------------------------------------------------------------------------|
| +3.6 | +2.5 | +58 | +90  | +1.1 | +17.6 | +27  | +55  | +1.3  | +1.3                                                                                |
| CEM  | CW   | REA | Marb | BMS  |       |      | BIIS | CHBS  |                                                                                     |
| +1.6 | +73  | +48 | +15  | +377 |       |      | +454 | +124  |  |

**Ribeye Area EPD (REA)** REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

**Marbling Score (Marb)** Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat (IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marb EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

### \$Profit Indexes

**Baldy Maternal Index (BMS)** The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

**Brahman Influence Index (BIIS)** The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk, which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers who use Hereford bulls on Brahman-influenced cows.

**Certified Hereford Beef Index (CHBS)** The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well, there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Ribeye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

**Genomic-Enhanced EPDs** The accuracy of breeding values in young cattle is enhanced with DNA testing. The EPDs included are genomically enhanced for the advantage of enhanced accuracy.

**Actual birth weight is included in addition to adjusted 205-day weaning weight, adjusted 365-day yearling weight, adjusted 365-day ribeye area and adjusted 365-day intramuscular fat score.**

**Actual scrotal circumference, measured in centimeters, will be available on the sale supplement.**

# THE POWER OF GENOMICALLY ENHANCED EPDS

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. To the right is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (c.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

| AHA TRAIT             | ACCURACY IMPROVEMENT | EFFECTIVE PROGENY NUMBER INCREASE* |
|-----------------------|----------------------|------------------------------------|
| CALVING EASE          | 0.09                 | 17                                 |
| BIRTH WEIGHT          | 0.12                 | 8                                  |
| WEANING WEIGHT        | 0.14                 | 12                                 |
| YEARLING WEIGHT       | 0.16                 | 9                                  |
| SCROTAL CIRCUMFERENCE | 0.17                 | 6                                  |
| MATURE COW WEIGHT     | 0.12                 | 4                                  |
| UDDER SUSPENSION      | 0.17                 | 7                                  |
| TEAT SIZE             | 0.17                 | 7                                  |
| CARCASS WEIGHT        | 0.11                 | 3                                  |
| FAT                   | 0.08                 | 2                                  |
| RIB-EYE AREA          | 0.07                 | 2                                  |
| MARBLING              | 0.10                 | 3                                  |

\* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

Each animal tested is recognized with the AHA GE-EPD logo.

## HEREFORD \$CHB ADVANTAGE

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle

Hereford Association and IMI Global to verify with superior genetics, health and management.

### REQUIREMENTS

Source and age verification | Genetic merit: *Minimum of 50% Hereford genetics and bull battery ranking in the top 50% of breed for \$CHB index (bull battery average)* | Two rounds of vaccinations prior to shipping: 2 doses of 7-way, 8-way or 9-way clostridial, 2 doses respiratory modified live | BQA certification

### BENEFITS

Genetic improvement tool | *Sire EPD and profit index summary* | Added market exposure | *Free listing at HerefordMarketplace.com* | Enrollment cost \$3.25/head (verification + eID tag)

VISIT [HEREFORDADVANTAGE.COM](http://HEREFORDADVANTAGE.COM)  
TO GET STARTED TODAY

- GKB 267K Domino 5004 is a powerfully designed future herd bull with an intriguing pedigree. He is sired by the \$125,000-valued CL 1 Domino 267K and out of the highly productive GKB donor Churchill Lady 023H ET.
- Individually, he is a wide based, heavily constructed stud that is extra deep bodied and thick topped with impeccable feet and legs. He brings it all together in a dark red, fully pigmented, short-marked package with exceptional masculinity, style and balance.
- 5004 is a moderate birth bull with sensational growth and performance as well as strong maternal genetics, combining the legendary cow families of Dominette 719E, Lady 023H and Mercedes 11E.
- His mother, Churchill Lady 023H, was the top selling donor in the 2024 World Class Female Sale and is the mother of many exceptional sons and daughters, including the popular A.I. sire Churchill Equity; a featured \$160,000 donor from the CCC World Class Dispersal, Lady 3310L; the \$67,500 top selling bred heifer in the 2024 World Class Female Sale, 3304L; and the popular 2024 JNHE Grand Champion Cow/Calf Pair, Lady 228K.
- With breed-leading growth, impressive phenotype and a pedigree that blends elite Line One horned genetics with the influence of Churchill Lady 023H, 5004 rises to the top as one of this fall's premier herd bull prospects.
- Ranks in the top 1% of the breed for YW; top 2% for WW; top 5% for SC and CW.

- Suitable for use on heifers.
- Impressive build and phenotype in a calving ease sire that you don't have to sacrifice growth, carcass or maternal to get your heifers bred.
- 5025 is sired by the 2025 NWSS Grand Champion Polled Bull, Stellpflug Gunsmoke 222 ET, who is a Trait Leader for eight traits. His dam is a beautifully designed Loewen Grady daughter, 77 Miss Grady 60D 68H.
- 5025 is an all-around herd sire candidate that offers calving ease with curve-bending growth, strong maternal and fertility plus superior carcass genetics, supported by the third highest adj. REA in the offering.
- 5025 is an eye-appealing bull with extra length of side, a wide back with added muscle shape, a big scrotal and superior athleticism.
- Ranks in the top 2% for CHB; top 3% for REA; top 5% for Teat and Marb; top 7% for SC; top 8% for BI; top 9% for BMI; top 11% for Udder; top 16% for M+G.

- Pigmentation: LEFT EYE 100% / RIGHT EYE 100% / SCROTUM 100%
- If you value carcass traits and don't want to sacrifice maternal traits or growth, then 5141 should be on your list. He is a moderately designed, easy keeping, big topped, sound structured son of Charlie 002A. His impressive carcass traits are supported by his top 1% CHB ranking—the third highest in the sale.
- His dam is a direct daughter of the highly maternal 90U donor female, who was one of the most beautiful uddered females in the breed.
- Ranks in the top 1% for CHB; top 2% for CW; top 5% for Marb; top 7% for REA; top 8% for M+G; top 9% for Milk; top 14% for YW; top 16% for WW.

- Pigmentation: LEFT EYE 100% / RIGHT EYE 100% / SCROTUM 100%
- Suitable for use on heifers.
- Sleep-at-night calving ease bull that has tremendous maternal traits and value-added carcass traits in a fully pigmented, moderate and eye-appealing design.
- 5322 is backed by a gorgeous Endure daughter out of the prolific 4038 donor female for added maternal strength and style.
- Ranks in the top 4% for Milk; top 5% for Teat; top 8% for CED; top 10% for BW, Marb and CHB; top 11% for SC and Udder; top 13% for M+G.

- Performance bull sired by Pit Boss that is rugged and stout in his design with excellent feet and legs to get out and cover the country.
- His dam is a consistent producer that is a direct daughter of BR Bailee 1066, who has been a significant donor for the Colyer program.
- Ranks in the top 17% for CW.

**HOW TO WATCH THE SALE & BID ONLINE**

www.live-ag.com  
(817) 533-6699

- **Go to www.live-ag.com**  
Click on the "Purebred" tab under "Auctions," located at the top right of the screen. Select the auction of choice.
- **Log in / Create an account**  
Select "log in or create an account to bid." Log in with your email and password, or click "create an account." Fill out the required fields to bid online. Agree to the terms of service and finish with the "register" button.
- **Register to bid**  
Once logged in and a sale of choice has been selected, click "register to bid." Agree to terms and conditions and click the "register" button. Pending request will be approved in a timely manner.

www.liveauctions.tv  
(682) 816-4900  
techsupport@liveauctions.tv

- **Go to www.liveauctions.tv**  
Click "Register to Bid" on the top right corner. Fill out the required information, agree to the terms and finish with the "register" button.
- **Register for a buyer number**  
From the home page or the "all auctions" page, choose the sale. Click the "request a buyer number" button. Verify your email address. To verify your mobile number, click "send token." Follow the steps to authorize your mobile device and click "submit."
- **Bid successfully**  
You will only need to complete the two-step verification one time. You will then be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen.

# Angus Bulls

Lots 93–114

## American Angus Assn. Selection Tools

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. All Angus EPDs in this catalog are genomically enhanced to give you increased reliability.

Angus EPDs and \$Value Indexes included in our sale catalog are:

**Calving Ease Direct (CED)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

**Dockility (Doc)** expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockility in a sire's offspring compared to another sire.

**Heifer Pregnancy (HP)** is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

### Carcass EPDs

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

## American Angus Assn. Fall 2026 EPD Averages for non-parent bulls:

| CED | BW   | WW   | YW   | SC   | Doc | HP    | CEM  | Milk |
|-----|------|------|------|------|-----|-------|------|------|
| +7  | +1.2 | +69  | +122 | +.90 | +19 | +11.6 | +9   | +27  |
| CW  | Marb | RE   | SM   | SW   | \$F | \$G   | \$B  | \$C  |
| +57 | +.81 | +.73 | +68  | +67  | +96 | +51   | +159 | +275 |

## \$Value Indexes

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving dockility, foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

**Feedlot Value (\$F)**, expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

**Grid Value (\$G)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

**Combined Value (\$C)**, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

EPDs are updated weekly by the American Angus Association, so we cannot guarantee the EPDs listed in the catalog. The Angus EPDs printed are from the 8/22/26 evaluation of the AAA. View up-to-date EPDs at [www.angus.org](http://www.angus.org).

**Genomic-Enhanced EPDs** The accuracy of breeding values in young cattle is enhanced with DNA testing. The Angus EPDs in this catalog are genomically enhanced, indicated by the AGI GE-EPD symbol.

- We lead off the Angus division with a powerful, performance-oriented Poss Winchester son. He is backed by a tremendous female sired by the Pathfinder Sire Bar R Jet Black 5063.
- 5048 is a stout made, big ribbed bull that is very athletic and masculine. He offers moderate birth with curve-bending growth, excellent foot scores and superior carcass traits that are highly sought after.
- No. 1 \$C bull in the offering.
- Ranks in the top 1% for Doc; top 2% for \$F; top 3% for RADG; top 4% for CW; top 5% for \$B and \$C; top 10% for WW and YW; top 15% for Angle and \$G.

| Dollar Grid Carcass Index (\$G) | +55.0 |

There's more data than ever available on today's sire prospects. As commercial producers try to balance numerous traits in sire selection, this logo helps you easily find Angus bulls with added carcass value. The Targeting the Brand™ logo does the math, simplifying the selection process. This logo is designed to highlight registered Angus bulls with greater genetic potential to produce calves meeting the most challenging specifications of the Certified Angus Beef® brand. Bulls must meet the minimum genetic requirements of +.65 Marbling EPD and +55 \$Grid for non-parent Angus bulls to qualify for use of the Targeting the Brand™ logo. Sire-identified carcass data in the American Angus Association database show these minimum thresholds for Marbling and \$G achieve an average of 50% CAB acceptance. While a sire's genetic potential only accounts for a portion of marbling performance in a calf crop, these benchmarks provide commercial cattlemen a starting place to identify genetics that will go on to bring performance premiums on quality beef grids. To make more significant carcass advancement or for those already achieving 50% or higher CAB acceptance, breeders may set bull selection criteria above Targeting the Brand™ baselines.

- The No. 1 bull in the offering for WW and YW EPDs, ranking in the upper echelon of the breed. Last time we checked, we still market feeder cattle by the pound, and the bigger they are equates to more dollars in your pocket. This Conley Iconic son offers moderate birth with explosive growth and is sure to increase your bottom line.
- Ranks in the top 1% for WW; top 2% for \$W; top 3% for YW; top 10% for Doc and CW; top 20% for \$F.

- GKB Night Moves 8724N leads off the Red Angus bull offering and rightfully so, as he is a scale mashing bull that had the most performance among his contemporaries, posting an adj. WW of 865 lbs. and an adj. YW of 1278 lbs. He also scanned one of the largest adj. REA measurements at 14.7 square inches.
- Individually, he is a dense made, three-dimensional specimen that is loaded with red meat and muscle. This herd bull prospect is ultra deep bodied and wide based with added foot and bone that supports his impressive stature with ease. He is a structurally correct individual with advanced testicular development in an eye-appealing package that has the look of a high performing herd bull. 8724N will add pounds, shape and look to your next calf crop, and the females will be big ribbed, easy doing females with added style.
- 8724N is backed by an easy fleshing Conquest daughter that is a maternal machine in the pasture and only adds to his intrigue as top herd bull prospect.
- Ranks in the top 10% for WW; top 11% for YW; top 15% for ADG.

- 485N is a tremendously eye-appealing herd bull prospect who is built correct from the ground up with excellent feet and legs. He is a thick ended, square hipped, long sided bull with abundant depth of body and rib shape.
- 485N is the youngest Red Angus bull in the offering, but with his explosive growth and impressive phenotype, it is safe to say that he has caught up with his contemporaries.
- Ranks in the top 11% for YG.

# Queens of the South

## F1 TIGER STRIPE COMMERCIAL BRED HEIFERS

F1 Tiger Stripe females are first-generation Brahman X Hereford crosses known for their red-and-white brindle color and highly valued for their maternal efficiency, longevity and hybrid vigor in Southern cow-calf operations.

### WHY THEY'RE SO HIGHLY VALUED

- 1) **Maximum Heterosis** A 50% Brahman and 50% Hereford cross maximizes hybrid vigor, supporting growth, fertility and survivability.
- 2) **Climate Resilience** Brahman genetics add heat, drought, insect and parasite resistance.  
Hereford genetics contribute docility, feed efficiency and maternal traits.
- 3) **Maternal Excellence** Known for strong milk production, maternal instincts and efficient calf weaning.
- 4) **Longevity** F1 Tiger Stripe females often remain productive for 10 to 18 years, outperforming the typical 8 to 10 years of straight-bred European breeds.

## Lots 201–250

Selling in uniform groups of 10 head with the option to roll multiple or all groups.

The F1 Tiger Stripe females selling are sired by GKB registered Hereford bulls and out of GKB registered Brahman females. They sell confirmed bred to calving ease GKB Red Angus bulls that are sons of T BarS Night Moves 107H. Due to begin calving November 1, 2026 for 60 days.

# STARBAR® INHIBIDOR™ INSECTICIDAL POUR-ON

## LARVICIDE, ADULTICIDE AND SYNERGIST COMBINE TO PROTECT CATTLE

Starbar® Inhibitor™ Insecticidal Pour-On is a ready-to-use, triple action solution to defeat insects because we know good things come in threes. By controlling parasitic flies and lice, Inhibitor™ Insecticidal Pour-On can enable more efficient production through keeping your cattle comfortable, while protecting your bottom line.

To learn more about Inhibitor™ Insecticidal Pour-On and the entire family of Starbar® products, visit [StarbarProducts.com](http://StarbarProducts.com) or call 1.800.347.8272.

# RED CHAIN FEEDS
