WELCOME

FELLOW CATTLE PRODUCERS,

Thank you for your interest in our cattle operation, and specifically in the bulls in our sale.

A year ago we had a full blown blizzard on sale day. Many people could not make it to the sale. But we had a good sale anyway. Our loyal customers are to be thanked for bidding in person, on the phone, and online to make the sale happen. Our thanks to our friends and neighbors for roughing the storm to help us get the bulls pushed through and help in the office. This kind of help cannot be bought.

This is a real good set of bulls. They have been developed out on pasture and fed in a way where they should be sound and be able to do their job.

If we can assist you in any way don't hesitate to reach out to us.

Thanks again for your support.

The Copeland & Sons Family

JCS PAP TEST GUARANTEE

We guarantee all bulls will pass a PAP test for those living in high altitudes. Buyer can take these bulls home to altitude and wait 30 days. That should be time enough to get an accurate pap test. Get the bull tested, if the bull fails, we will come get the bull and refund the purchase price.

RANCH VISITORS ALWAYS WELCOME 859 ROMERO ROAD NARA VISA, NEW MEXICO 88430

HOW MUCH CAN YOU AFFORD TO PAY FOR A BULL?

The slaughter bull market has been tremendous and many bulls are bringing 3,000 dollars and much more. There has never been a time when trading up to a new young bull has been this easy.

The old time ranchers have always said a new bull is worth 5 steer calves, and then he is paid for in the first year.

With this formula, 5 steers times \$1,800 is \$9,000 dollars that can be spent on a new bull.

\$9,000 for the new bull minus \$3,000 salvage on the old one makes your actual purchase only \$6,000 dollars.

\$6,000 dollars divided by 5 years you own the bull is \$1,200 a year to use the bull.

That does not include all of the genetic merit you have purchased with the bull that should increase weaning weights, increase the kind of replacement heifers he produces that also adds lots of dollars to your bottom line.

NEW TECHNOLOGY WILL CHANGE HOW RED MEAT YIELD IS MEASURED AT HARVEST

Dale Woerner and his team at Texas Tech university have developed 3D technology that looks at muscle shape, width, and dimension to give a more accurate reflection of total red meat yield versus using Rib eye area

Rib eye area measurements and red meat yield are actually drifting more apart according to Texas Tech.

The system we use now is from the 1960s era.

So to make a long story short, MUSCLE MATTERS. Cattle with visual muscle shape may be worth a lot more, perhaps as soon as 3 to 5 years.

THESE ARE THE KIND OF CATTLE WE LIKE AND HAVE BEEN RAISING FOR YEARS.

So buying bulls with width and muscle shape could benefit your bottom line in a few years because you have started ahead of the pack.

AIR TRANSPORTATION

Rick Husband Amarillo International Airport in Amarillo, TX is approximately 140 miles from the Five States Livestock Auction in Clayton, NM. We suggest you allow 2 ½ hours of travel time between locations.

TERMS & CONDITIONS

All bulls sell according to the Terms & Conditions of the American Hereford Association. Copeland & Sons Herefords will be retaining a ¼ semen interest in all bulls selling. You, the new owner, will have full use and salvage value of the bull(s). If the bull(s) is collected it will be at your convenience and Copeland & Sons Herefords expense. We are retaining all cloning rights on all sale animals.

BULL GUARANTEE

All bulls selling have passed a Breeding Soundness Examination within 30 days of the sale. They will also be trich and PI tested before the sale. If injured within the first breeding season (in case of bulls, making them functionally infertile) we will provide you a satisfactory replacement or issue a credit equal to your purchase price, minus the salvage value that may be used toward the purchase of a bull in a future Copland & Sons LLC. Demand the Brand Annual Bull Sale. Breeding season is defined as the 90-day period following the first turn out of the bull(s). If you do not intend to use the bull for some time after purchase, we suggest an additional BSE by a licensed Veterinarian to assure the highest conception rates possible. We suggest normal management practices in caring for your bulls. This fertility guarantee does not cover a bull's ability to produce freezable high quality semen suitable for artificial insemination.

- Homozygous Polled
- JDH 121G Red Cloud 43M ET is a herd bull that we recently acquired in the 2025 Delaney - Atkins Annual Bulls & Breds Sale in Lake Benton, MN. We have been searching for awhile for a herd bull that excels in both phenotype and genotype. When we found 43M he fit exactly what we had been looking for to inject into our breeding program.
- He is built right from the ground with tremendous volume and depth while still maintaining a square hip and elegant look on the profile. Dark cherry red in color all the way to the ground with big red goggle eyes and scrotal and no sheath.
- When you study his numerical profile he combines calving-ease, performance, carcass merit and maternal strength.
- He combines two of the most influential donor dams in his pedigree 45C and 7098. One unique aspect as he carries no Endure throughout his pedigree which makes him an outcross pedigree to many of the main stream genetic lines today.
- We have had several inquiries since purchasing 43M and since we do no calve in the fall we have decided to offer the fall possession and a 1/4 semen interest in 43M.
- We feel this bull has unlimited potential and is the type of beef bull the commercial ranchers are craving for.
- **Selling Fall Possession and 1/4 Semen Interest.**
- Owned with Delaney Herefords

- We begin the 2025 Demand the Brand Bull Sale with an exciting herd bull prospect sired by Makers Mark out of a tremendous two-year-old High Noon first calf heifer.
- K JCS Handsome Jack 4815 is the reigning Reserve Grand Champion Polled Bull at the Fort Worth Stock Show. He is a stout made, well-built and athletic individual with exceptional eye-appeal who is big footed, big ribbed and big hiped.
- 4815 offers moderate birth with rapid growth and a very balanced EPD profile with an impeccable structure and skeletal design.
- His dam, JCS Marie Laveau 2441 ET, was shown very successfully by Kynsleigh Krebs and was the Reserve Grand Champion Horned Female at the 2023 Fort Worth Stock Show. His Maternal Granddam, JCS Miss Buttercup 7296 also won the Grand Champion Horned Female at the 2019 Fort Worth Stock Show and is making a name for herself as a donor for us and Krebs.

- JCS High Noon 4862 is the popular 2025 National Western Stock Show Horned Spring Bull Calf Division Champion who was admired for his style, stout build and depth of body coupled with his athleticism and flexibility on the move.
- 4862 is an impressive horned herd bull prospect with an outcross pedigree that offers growth and strong maternal in a short-marked and dark red package with exceptional quality.
- It is hard to replicate the amount of true top shape, depth of rib, bone and eye-appeal that this young herd bull prospect possesses while maintaining his level of structural integrity.
- 4862 is sired by Churchill High Noon 8339F ET and out of the young up and coming donor JCS Maureen 0879, who is a full sister to JCS Miss Buttercup 7296, making him a full brother in blood to the dam of K JCS Handsome Jack 4815 who was the Reserve Grand Champion Polled Bull at the Fort Worth Stock Show and sells as lot 1.
- **Selling 1/2 interest and half possession**

- Check out the impressive look and design that this SR Rio Bravo 8029 son possesses. He is a deep bodied, wide based, and square hipped bull who is built correct from the ground up with added style and eye-appeal.
- 3716 offers calving ease with moderate birth and breed leading maternal traits.
- He is backed by an excellent donor dam, JCS Delta Dawn 5832, who raised the lot 1 bull in the 2023 Demand the Brand Bull Sale who commanded \$15,000 to Paquette Hereford Ranch.
- Ranks in the top 1% of the breed for SC and TEAT; top 2% for SCF, UDDR and BMI; top 4% for BII; top 7% for MM.
