SALE TERMS & CONDITIONS: Terms of the sale are cash unless prior arrangements have been made. Every lot will be sold to the highest bidder with the auctioneer settling disputes as to bids. All cattle are the buyer's property as soon as sold. All announcements made from the auction block on sale day by the owner or auctioneer will take precedence over statements in the sale catalog.

Guarantee: Every animal in this sale is, to the best of our knowledge, free from any disease or defect. All animals are guaranteed breeders. We guarantee the first 60-day breeding season, not to exceed 6 months from of delivery date. If an animal fails to breed after a period of six months, it may be returned to the seller in good condition and in compliance with Montana Health Regulations. The seller reserves the right to try said animal for six months and if it proves to be a non-breeder, either an animal of comparable value will be substituted or credit will be given in a future sale on an animal for animal basis. All pregnant females are considered breeders. No other warranty of any nature is express or implied.

Health: Each bull will pass a semen test before leaving the ranch. The health of the herds is excellent. We guarantee that all sale cattle will be able to ship to any state or Canadian province. All females are officially calf hood Bangs vaccinated. All cattle are on a pre-conditioning program and herd health program.

Feed Arrangements: Bulls will be fed until April 1 at no cost. After said date, buyers will be charged for feed until delivery, at buyer's risk

Delivery: Free delivery within 1,000 miles or purchases exceeding \$5000. Additional delivery beyond 500 miles will be charged at cost to central point's anywhere in United States. For Canadian buyers, we will deliver up to nearest points of entry. Reputable purebred livestock haulers will be contracted for delivery.

Liability: All persons attending the sale do so at their own risk. Neither the owners nor any person associated with the sale assumes any liability, legal or otherwise.

Semen Interest: L Bar W retains the right of a ¼ in-herd semen interest in all bulls selling.

Accommodation: Ask for the L Bar W Sale Rate at the Super 8, in Columbus, 406-322-4101. Numerous other accommodations available in Billings and Bozeman, Montana.

Welcome Friends,

Thank you for joining us for our tenth annual production sale. We very much appreciate all our established customers and our new ones who take the time to join us at the ranch or online. We work very hard to ensure your visit is an enjoyable and profitable one.

We are experiencing a remarkable cattle market at the present time, maybe the best we have ever seen. Pricing continues to be strong and it appears to be set to continue on its current trajectory. Now is the time to add Hereford genetics into your herd so you can benefit with the growth, carcass, and maternal traits plus the heterosis characteristics provided when you use Hereford genetics.

We are extremely proud of our 2026 bull class. It reflects the continued development of our cow herd and investments we have made in superior genetics from the leading seedstock producers in the breed. We don't focus on just one trait, but breed based on what we believe will bring the most profitability to our customers. We look for consistency in our program which will add longevity, easy calving, fast growth in that critical first year plus superior carcass traits. Overriding all of this is our belief that a premier cow herd is essential to producing a superior calf. To this end, we continue to add top end females through acquisition or our very selective ET program, plus we do not sell our top end females.

Please come early to walk through the pens. We think you will agree the quality you expect will be there. If you would like to tour our cow herd and new calves, please let us know.

Once again, thank you so much for your faith in our program and your continued support. See you at the sale.

Mike and Jeannette Walen
Carl and Denise Loyning

welcome

Developing for the Long Haul

We take great pride in developing our bulls on the ranch under conditions that closely match those of most commercial operations. This allows us to evaluate them daily for health, performance, and overall quality, ensuring we offer the best genetics. Our development program is designed to ensure these bulls perform well and remain sound in any environment. All bulls, regardless of age, are developed on a high-roughage TMR (total mixed ration) of grass/alfalfa hay, corn, water, and a 1-pound/head/day supplement grower pellet, under the guidance of Hannah Imer, Livestock Product Specialist at Purina, and Montana Feed Company of Columbus. We aim for an average daily gain of 3.25 pounds, which has proven most beneficial for their longevity.

The consistent quality across the board on EPD's and Profit indexes shows our commitment to multi-selection vs. single-trait selection.

2026 Sale Offering EPD's vs 2024 Breed Avg.

	CED	BW	WW	Milk	YW	Udder	Teat	Scr	%IMF	Rea	\$BMI	\$CHB
L Bar W Bulls Avg	3.9	2.6	61	31	96	1.26	1.33	1.29	0.27	0.44	417	142
2024 Breed Avg	3.6	2.5	57	27	90	1.28	1.29	1.1	0.15	0.48	375	124

You will find projected sale day weights for all age groups, along with carcass scan data for yearling and 18-month-old bulls, on a supplement sheet before the sale. We scanned the bulls for carcass data on January 21, 2026. Please note, the EPDs listed were current as of January 19, 2026 and do not yet reflect the new carcass data. Look for the updated EPD sheet on our website, www.lbarw.com, by February 23.

Our offering this year will give buyers the versatility to purchase from three age groups.

Yearling Bulls. This group of yearling bulls represents the top two-thirds of our 2025 calf crop, selected from our newest genetics. After breeding bulls are removed in mid to late May, bull calf pairs are grouped and moved to dryland pastures, where they must travel for feed and water. We provide creep feed for 30 days prior to weaning, which occurs in mid-August. Bulls are weaned on a grass trap for approximately 10 days, then transitioned to the development center for the remainder of their development.

Fall 18-Month-Old Bulls. These fall bulls are calved on grass from late August through September. During winter, they are turned out on hay ground and fed grass hay with their dams, along with creep feed to support them through Montana's colder months. After weaning in mid to late March, they move to grass lots and continue receiving creep feed until green grass emerges. They spend the summer grazing and growing. The bulls then join the yearlings at the development center to begin their development process. All bulls passed a Breeding Soundness Exam on January 16, 2026.

Two-Year-Old Bulls. The 2-year-old bulls are well-suited for heavy use this spring. Developed as yearlings and raised on dryland pasture, they have become rugged, athletic breeding bulls. All 2-year-old bulls passed a Breeding Soundness Exam on January 16, 2026 and are ready to work.

Lot Information

Genomically Enhanced EPDs (GE-EPDs) All bulls featuring this logo have Genomically Enhanced EPDs (GE-EPDs), providing more accurate predictions of genetic potential by incorporating genomic information into traditional EPDs, helping producers make faster, more confident selection decisions. All cattle selling have been parent verified.

Certified Hereford Beef Index (CHB) All bulls featuring this logo have a Certified Hereford Beef Index (CHB), a terminal index identifying those that maximize profitability in Certified Hereford Beef programs by emphasizing growth efficiency and carcass value. Bulls above the \$125 baseline are expected to be more profitable than average.

Baldy Maternal Index (BMI) All bulls featuring this logo have a Baldy Maternal Index (BMI), identifying those best suited to produce productive, fertile Hereford-Angus cross females, while maintaining moderate cow size and strong carcass merit. Bulls above the \$375 baseline are expected to outperform the average.

EPDs

New this year, we've included the top 50% percentile rank for each EPD

Calving Ease Direct (**CE**)
Birth Weight (**BW**)
Weaning Weight (**WW**)
Yearling Weight (**YW**)
Scrotal (**SC**)
Maternal Milk (**MM**)
Maternal Milk & Growth (**M&G**)
Udder (**UDDR**)
Teat (**TEAT**)
Ribeye Area (**REA**)
Marbling (**MARB**)
Certified Hereford Beef (**CHB\$**)

ACTUAL PERFORMANCE

Birth Weight (**BW**) – Actual weight of the calf

Weaning Weight Ratio (**WR**) – Compares the calf's weaning weight to the herd average

Yearling Weight Ratio (**YR**) – Compares the calf's yearling weight to the herd average.

Scrotal Circumference (**SC**) – Measurement of the bull's testicular size in centimeters.

Left Eye / Right Eye Pigmentation (**LE/RE**):

Indicates the presence of pigmentation around the eyes. A value of 100% represents fully pigmented eyes, while lower percentages indicate partial pigmentation.

Pedigree

The three-generation pedigree included for each animal highlights notable traits and achievements within their lineage. Ancestors carrying {CHB} are identified, along with those recognized as {DOD} (Dams of Distinction) by the Hereford Association. This information allows buyers to quickly see animals with proven genetic merit

DOD Cows earning "DOD" consistently excel in fertility, longevity, and performance. Many L Bar W bulls trace back to these elite dams, ensuring their daughters deliver proven genetic value. Qualification requires multiple calves, early and consistent calving, strong weaning performance, and complete AHA records.

2026 Herd Health

Our health program benefits from the expertise of Dr. Lacey Fahrmeier at Stillwater Veterinary Clinic in Absarokee. On January 16, 2026, Dr. Fahrmeier conducted scrotal measurements for all catalog-listed bulls and ensured that every 18-month-old and 2-year-old bull passed a thorough breeding soundness exam.

Yearling bulls are scheduled for their own breeding soundness exams with Dr. Fahrmeier on February 12, 2026. All yearling bulls will pass a breeding soundness exam before leaving the ranch.

Bulls

Birth: Calf Guard, Alpha C&D, & Multi-Min

Branding: Inforce 3, Ultrachoice 8, Multi-Min, & Pink Eye

Pre-Weaning: Pyramid 5 Plus Presponse, UltraBac 7 w/ somubac, & Multi-Min

Post Weaning: Pyramid 5 Plus Presponse, UltraBac 7 w/ somubac, poured with Ultra saber, and drench with Valbazen.

Mid Development: Multi Min and Protectus pour on. All bulls have been vaccinated for footrot

Breeding Soundness Exam: Bovishield Gold FP5VL5

Replacement Heifers

Birth: Calf Guard, Alpha C&D, & Multi-Min

Branding: Inforce 3, Ultrachoice 8, Multi-Min, & Pink Eye

Pre-Weaning: Pyramid 5 plus Presponse, Pink Eye & Multi-Min

Post Weaning: Pyramid 5 plus Presponse, UltraChoice 8, and drench with Valbazen.

Pre-Breeding Shots: By sale time heifers will have received 2 rounds of Bovishield Gold FP5VL5 and poured. They have been freeze branded to match tattoo/tag numbers

Bangs Vaccinated November 4th, 2025 – All heifers were given a shot of Lutelyse at this time.

- 5001N our debut from the H5 9241 Advance 2132 sire line. His calves stand out for their impressive thickness, strong bone structure, and deep hips. 5001N brings exceptional carcass quality and outstanding growth potential. His lineage is anchored by his Maternal Granddam of Distinction, "7001," affectionately called Cookie Monster, who boasts an outstanding production record with a WW ratio of 106/7 and a YW ratio of 103/6.

- 5005N is an impressive bull who has stood out since he arrived. He was Noel's top pick early on and comes from an outcross pedigree that meets key industry needs like calving ease, carcass quality, growth, and fertility. He has a strong build with a big hip and deep rib, making him a great fit for any breeding program. He weighed 702 pounds at weaning, with a ratio of 103. His background is strong too—his DOD granddam "748" posted a 105/7 ratio for weaning weight, 101/5 for yearling weight, and 109/4 for IMF. With this mix of performance and pedigree, 5005N is a great choice for operations who want to experience something different.

2025 A Year to Remember

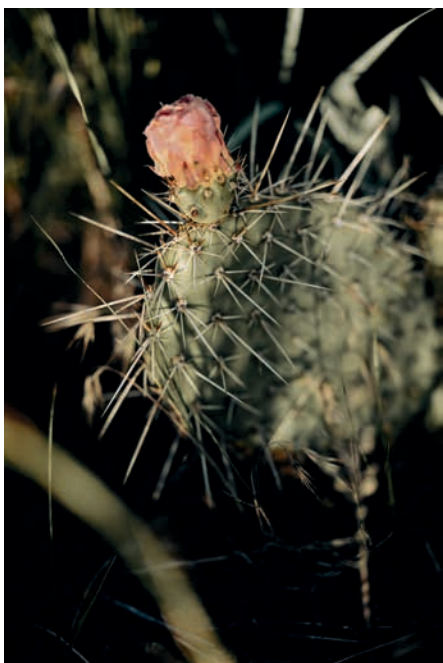

2025 YOUNG BREEDERS CONFERENCE

Sitting at a table with the next generation of Hereford leaders was a unique and invaluable experience. I was fortunate to spend four days at the American Hereford Association Headquarters with seven young breeders from across the nation, exploring the inner workings of the association, the future of the breed, and effective storytelling as breeders and innovators. The motto "Come home to Hereford" holds significant meaning. Witnessing the teamwork and commitment to the breed at the national level truly embodies this motto. Spending a day with Mark Core, Chief Marketing Officer for the Vermeer Corporation, was particularly impactful. Engaging in a one-on-one discussion about operations and strategies for advancement with someone of his expertise, as well as observing his passion for the industry, was inspiring. As I reflect on this experience, I encourage any young Hereford breeder seeking to distinguish themselves to apply for the Young Breeder Conference. You will not be disappointed. – Denise Loyning, L Bar W Cattle Company.

- 5034N will be one of our first sons of 3076L to sell this spring. We sold 3076L to VanNewkirk Herefords in Nebraska during our 2024 production sale for \$24,000 for half interest. Keeping half interest in 3076L has proven to be a smart decision. His sons show moderate birth weights, strong growth, and good eye appeal. 5034N has all these qualities, with a long spine, 100% eye pigment, and large scrotal development. His dam will turn 10 this year, but she still looks like a 5-year-old, with a great udder and easy fleshing ability. She has performed well here, with a weaning weight ratio of 104 on 7 calves and a yearling weight ratio of 103 on 4 calves.

2025 A Year to Remember

WORLD HEREFORD CONFERENCE PRE-TOUR

Hosting a tour stop and pitchfork fondue dinner for the 2025 World Hereford Conference Pre-Tour was a true highlight for L Bar W Cattle Company. On October 17, we opened our gates to 110 guests from 14 counties, filling the ranch with energy and excitement. As relatively new registered breeders, being chosen for this event was both humbling and exhilarating. Our gratitude to the American Hereford Association runs deep for trusting us to share our program and the breathtaking Montana landscape we are lucky to call home. No matter where you come from, the passion for the Hereford breed unites us all. We took great pride in presenting a handpicked group of bred and replacement heifers, promising young donors, and our standout herd sires, LW 075 Domino 3065L ET and LW 1103 Domino 3076L ET.

- Herd Bull Alert! As mentioned before, the 1128J sons are quickly becoming ranch favorites, and 5070N leads the pack. With a pedigree that shines, he dominates in 10 EPD traits and all Profit Indexes, turning heads with his striking presence. His maternal legacy boasts three generations of exceptional females: Dam WR 102/5, Granddam 106/6, and Great Granddam 104/7. Whether your operation is commercial or registered, 5070N brings unmatched potential. He truly offers the complete package.

- Here is a 075H son built to tip the scales in your favor. After being impressed by 921G's 2024 bull calf, we repeated the mating, and it delivered once again. 5071N ranks in the top 7% or better for both WW and YW, all while keeping a moderate birth weight. He weaned at 758 pounds in mid-August with a WR of 114. 5071N stands out with his length, red neck, strong top line, and easy-fleshing build. His full brother was sold at our 2025 Production Sale to John Reynolds of Rozet, Wyoming.

- Calving ease, maternal, and carcass merit are key strengths of 5077N. If you aim to moderate birth weight, reduce mature cow weight, or improve teat and udder scores, consider 5077N. He ranks in the top 25% or better for calving ease, birth weight, milk, mature cow weight, udder, teat, and IMF. His Dam of Distinction, 701E, has an impressive production record, with a birth weight ratio of 92/7, weaning weight ratio of 103/7, yearling weight ratio of 102/4, and IMF ratio of 115/3.

- Herd Bull Alert! This future standout boasts a $\frac{3}{4}$ Line 1 pedigree, enhanced by a touch of Churchill influence. Churchill genetics were in high demand last fall, and now is your chance to secure a rising star. His 5083N dam is moderate in frame with an exceptional udder, and her production speaks for itself: BW ratio 98/3, WW ratio 105/3, YW 114/1, and IMF 106/1. We are so confident in this line that we are already using a maternal brother in our own herd bull battery.

- Herd Bull Prospect! 5098N comes from the outstanding Churchill Lady 205K donor, who recently sold for \$45,000 in their dispersion sale this past fall. We were lucky to buy these embryos from 0159H a few years ago. The 0159H calves have performed very well for us, and 5098N stands out with his strong build and balanced EPDs. He truly is the real deal. This is a rare mating you won't find everywhere this spring. Don't miss your chance. Flush brother sells as 5109N. Terms will be announced on sale day.

- First Time Offering on this unique pedigree. We purchased a half-interest in the donor "1069" from Colyers at their 2023 Fall Female sale. The mating to 267Z brings us to 5103N, with dimension, style, coupled with big time growth numbers, 68 WW EPD and 111 YW EPD. This was the only bull produced from the flush. We are excited to see the females from this flush come into production.

- This is the first offering of the LW 075 Domino 3065L ET sire, which we retained from our 2024 sale. 5106N demonstrates exactly why 3065L is exceeding our expectations: desirable markings, red neck, and impressive scrotal development. 3065L received significant interest from attendees at the 2024 World Hereford Conference in October. His full sisters are quickly climbing the ranks in our herd.

- 5107N stands out as the powerhouse growth bull from the LW 175 Domino 2069K sire group. With a moderate birth weight and ranking in the top 30% for growth, he has impressive 65 WW EPD and 101 YW EPD figures, all wrapped up in a striking, functional red to the ground package. As we have often said, the 6004D and 3070A donors were truly exceptional females for our program, and this unique pairing is being offered for the final time.

- 5139N is among the youngest bulls in the sale, yet he demonstrates exceptional quality. Influenced by both Colyers and Churchill genetics and sired by our newest herd sire, 3065L, this bull exhibits sound structure; he's big middled with an impressive hip. His Granddam, 522C, possesses an impressive production record: BW Ratio 98/9, WW Ratio 107/8, YW Ratio 108/6, IMF Ratio 104/6, and REA Ratio 108/6.

- March-born calves rarely make our sale lineup, but this standout was simply too impressive to pass up as a yearling. He boasts explosive growth paired with a balanced frame. 5141N stretches as wide as a summer day is long and carries that unmistakable Hereford style. His young dam is already making her mark, posting a 104 weaning ratio with 5141N and an overall WW ratio of 106 on two calves.

A Special Thank you to Johnny

Yearling Bulls

M2402

18-month-old Bulls

Our 2026 sale features our largest and most impressive group of 18-month-old bulls yet. Every bull in this lineup offers depth, quality, and versatility, ensuring a perfect fit for any operation. These bulls are built for breeders who need reliable, hard-working sires that thrive in wide-open country. We have listened to the demand for age-advantage bulls, and this group delivers on every front. M2412 and M2418 are standout full Flush Brothers from the renowned Pedretti-bred female GB L1 Dom Prcs 5151Y, who drew attention at the World Hereford Conference Pre-Tour last October. L2414 and L2416 are also full Flush Brothers, by the exceptional LW 3006 Miss Advance 720E ET donor, which has truly elevated our program. With so many outstanding choices in this offering, you are sure to find a bull that exceeds your expectations.

- Similar to M2430, M2431 demonstrates impressive growth metrics while maintaining moderate birth weights. Expect M2431 to sire calves that achieve high weaning weights and continue to perform well as yearlings, providing substantial weight gains for producers

18-month-old bulls

4024M

Two-year-old Bulls

Our two-year-old division features bulls built for the rugged demands of big country, forest service, or BLM allotments. These bulls have the stamina to breed older cows and maintain their condition. With calf prices at historic highs, choosing a mature bull is a smart investment for your herd's future. For those seeking heifer bull options, consider 4035M and 4135M.

This moderate birth weight bull excels in growth, backed by a dam with a strong weaning record of 105/3. His yearling scan shows outstanding marbling, with an actual IMF of 4.34 and a ratio of 144.

Two-Year-Old Bulls

Yearling Heifers

After careful consideration, we are pleased to offer 11 registered replacement heifers this year. We are proud of the progress we have made in developing our cow herd in a short time as registered breeders. We are confident these females will be an excellent addition to any operation. This year's offering includes heifers sired by the breed's most current herd sires, along with a selection from proven older sires. The heifers were raised on pasture and fed a grass/alfalfa hay base until the first week of January. They will be ready to breed this spring.

- She is the youngest heifer in the sale and shows impressive potential. She ranks second among the heifers for WW and YW EPDs, and she is the top heifer for \$CHB at \$195. She represents the latest in our genetics.

Yearling Heifers

Pick of the Fall ET Heifers

Opportunity is knocking! It has been a while, and we are excited to present a pick of the flush, with these 2024 fall ET heifers. Each heifer is matched by a flush brother in the 18-month-old sale division, adding even more value. M2415 and M2419 are the debut daughters from the Pedretti-bred GB L1 Dom Prcs 5151Y donor, who turned heads at last October's World Hereford Conference Pre-Tour. M2407 and M2413 are maternal sisters from the remarkable LW 3006 Miss Advance 720E ET donor, a female who has taken our program to new heights. M2413 is also the full sister to LW 7131 Domino 1103J ET, the herd sire making his mark at Fawcett's Elm Creek Ranch in South Dakota. We believe these females are ready to leave a lasting legacy in any herd.

LW 3006 MISS ADVANCE 720E ET – DONOR DAM OF ET HEIFERS M2407 & M2413

35 - 40 F1 BLACK BALDY OPEN HEIFERS 3210 ANGUS

JOHN PATTERSON FAMILY | COLUMBUS, MT

As I begin this narrative I'm reminded of the phrase....."Everything old is new again!" Thinking back, years ago it seemed that the U.S. cattle herd was predominantly Hereford and Angus, with the introduction of the Continental Breeds all that changed. Our nation's herd became multi-colored, multi-breed with very little predictability. Fast forward to present day and Angus and Hereford have regained their popularity.

Last year I mentioned that our family has been in the purebred Angus business since 1982. Our herd was always based on proven genetics and we stacked generation after generation through artificial insemination and limited use of embryo transfer. We used sires that were maternal focused and based our selection on fertility, calving ease, udder quality, fleshing ability and temperament. We sold our bulls private treaty, Big Country Sale and Midland Bull Test. Our foundation stock came from Basin Angus and in recent years the Vermilion Ranch.

Like everyone, change comes to all of us and 2017 brought many changes to our ranch. The decision was made at that time to retain our purebred Angus cowherd but begin crossbreeding with Hereford bulls and market F1 calves. These heifers represent the best of the best of our 2025 crop, they have been sorted several times and never topped. We have been extremely pleased with our L bar W Bulls, they have increased our weaning weights, sired fleshing ability and wonderful disposition. Perhaps the most basic overlooked trait in selection is FERTILITY. Our cows were exposed for 60 days, ALL our calves were born in 47 days. These heifers were predominantly born in April and I've noticed them cycling since the first week of January. The heifers we sold last year became recipis for an embryo transplant program and are calving at 20 months..... FERTILITY.

These heifers were ranged calved and grew up grazing dryland pasture only. They were weaned October 24. They are bunk broke, NO BRAND, we've fed them a 15% grower pellet, free choice long stem hay and NE30 Smartlic tubs(with a full mineral package) plus salt. A complete health protocol is listed below.

The heifers will sell by video but **WILL NOT** be at the sale site. Interested buyers are welcome to view them anytime at our ranch. Please contact Mark or John for viewing arrangements. We will deliver the heifers to L bar W for loading at the buyers convenience. We would feed and care for the heifers until April 1 for \$3.50/day. Buyer assumes all liability upon the sale.

Special THANKS to our friends at L Bar W. We so appreciate this marketing opportunity to do business with excellent breeders backed by character and integrity.

John Patterson (406) 425-3210

Mark Patterson (406) 425-2332

HEALTH PROTOCOL

8-30-25 Preconditioning Vaccine

10-24-25 Weaned, 2nd Preconditioning vaccines, Poured Ivomec

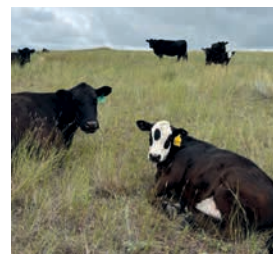

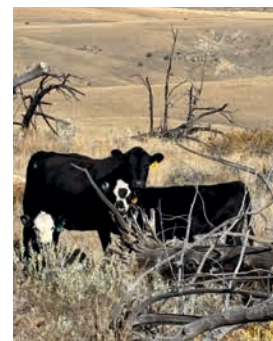

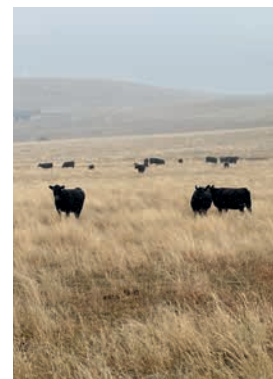

1-4-26 1st Pre-Breeding Shots. Poured Clean up

1-9-26 Bangs Vaccination & Lutalyse

Second round of Pre-Breeding shots will be given in advance of the sale.

“Baldy heifers doing good. Clients are thrilled with them so far. Beautiful udders and of course they can't say enough about their disposition.”
Jeanne Reyher purchased Patterson Heifers in 2025

These heifers are sired by bulls owned by 3210 and bred by L Bar W.

Words cannot express how deeply grateful we are for the friends who have truly become family on this journey. It takes a village to make an operation like this thrive, and while our village may be small, it is filled with immense strength and heart. Every day of the year, your willingness to help and your friendship mean everything to us. This year, we were especially fortunate to welcome Johnny Coulson and Morgan Hammans to the team this past summer—Johnny has already proven to be an invaluable asset, and we are so thankful he is with us. We also want to extend a very special thank you to Amber LeBrun and Gary Rutkowski for stepping in exactly when we needed you most this past fall. Your ability to dive right in and support our operation has truly been a blessing.

Spring 2026 Gold TPR Breeders

Fifty Hereford breeders achieved Gold Total Performance Records (TPR™) Breeder status for spring 2026.

Established in 2005, the recognition pays tribute to breeders who go the extra mile to collect data at all

levels of production and report the data in a timely manner. Gold TPR Breeders are progressive Hereford producers who have measured traits and promptly submitted performance data at all levels of production.

Take advantage of hybrid vigor by capitalizing on Hereford genetics.

The Maternal Advantage program generates females with added longevity, more docility, increased fertility and more profit per year.

Can be utilized by producers using Hereford bulls on British-based cows or Brahman-based cows in their breeding program.

Producers utilizing the program will have access to a sire EPD summary, added market exposure, replacement selection tools, genetic improvement tools and access to AHA resources, marketing and staff.

Qualifications

- Producers must verify that eligible females are sired by registered Hereford bulls with transferred ownership.
- Participating bull batteries must rank in the top 50% of the breed for Baldy Maternal Index (BMI\$) if used on British-based cows or the top 50% of the breed for Brahman Influence Index (BII\$) if used on Brahman-based cows.
