*On behalf of the entire Candy Meadow Farm family, I would like to welcome each of you to the 29th Annual Cowman's Kind Bull and Female Sale.*

*Candy Meadow Farms is a multi-generational operation that has been in continuous forward motion for over 70 years. We are grateful for everyone who has been a part of our journey and thankful for the many friendships we have built along the way.*

*For decades, we have maintained a strong desire to be the very best we can be in all areas that we touch—as people, cattlemen, representatives, and friends. We understand that our reputation is earned, and we strive to do the right things every time we have the opportunity to do business with you.*

*As for the cattle we are offering, it is our goal and desire that you find them to your liking. We make it a priority to continually evaluate our program with the intent of making each sale offering better than the last. We truly feel this set of cattle pushes the needle forward for both quality and value. Our focus remains on building cattle with strong EPD profiles, individual performance, structural integrity, and the ability to thrive in any environment they are placed in.*

*Your interest and support mean a great deal to us. We invite you to come early, evaluate the cattle at your own pace, and join us for lunch prior to the sale. If we can be of any assistance or answer any questions, please don't hesitate to visit with us. We sincerely appreciate the opportunity to earn your business and thank you for being a part of our program.*

Sincerely,  
Rob Helms

# The Journey

As I reflect on the past 50 years of my life in the world known as the purebred cattle industry, I can't help but think back to my childhood growing up, and that brings to mind the classic hit song *Red Dirt Road* by Brooks and Dunn.

True to the words, "*I was raised on Rural Route 3 out where the blacktop ends,*" I discovered early on, as the song continues, that there was life on both ends of that red dirt road.

I set out on a lifelong journey traveling, studying, looking, and listening just like a sponge soaking up every bit of information from the people who had been successful.

An old man told me one time, he said, "*Son, don't ever follow a wise old man.*"

Fast forward to 2026.

As I study the sea of data that we all immerse ourselves in daily to try and build a better product with each succeeding generation, I realized early on that we all basically have access to the same bulls. So, the only way to outpace the rest of the pack has to come from the female side. This is where the current CMF cow herd comes into play.

No frills, no excuses, like a finely oiled machine. She doesn't have to be perfect, but she must be productive, problem-free, and above all, environmentally adapted. By that, she must excel in the environment in which she's been dealt.

When we learned to let the environment sort the inconsistency, true production ability moves forward. We simply hold on to the fundamentals of fertility and structure.

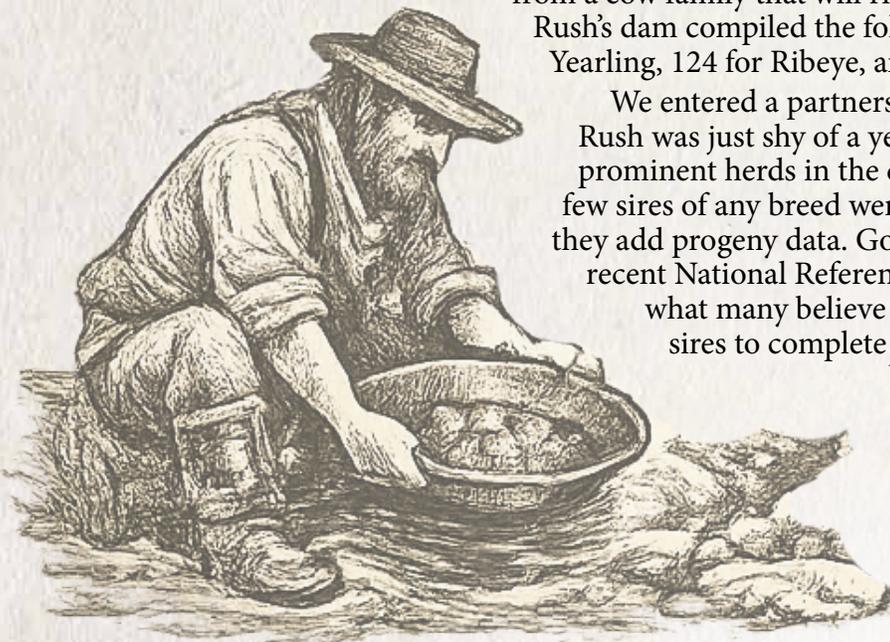

Genetic progress is a roadmap with more tools available than ever before. That process is moving at a pace faster than ever before, and the pace will only quicken when, if a mistake is made, simple common sense is applied. By that, don't waste time trying to correct it, bad genes in, bad genes out. Never backpedal, always move forward.

One of my personal goals early on has been to do business with some of the most progressive commercial cattlemen across the country. To witness them grow their herds and sell their cattle at the top of the market, while improving the maternal side of their cowherds, has been a reward for both sides.

If I had to single out just one animal in my lifetime, it would have to be the path of Gold Rush. Sired by the most dominant sire over the last decade and from a cow family that will rise to the top for generations, Gold Rush's dam compiled the following: 107 at Weaning, 115 at Yearling, 124 for Ribeye, and 107 for Marbling.

We entered a partnership with Select Sires when Gold Rush was just shy of a year old. Used by many of the most prominent herds in the country, he accomplished what few sires of any breed were able to do, improve EPDs as they add progeny data. Gold Rush dominated the most recent National Reference Sire Program at Olson Ranch in what many believe to be the strongest group of herd sires to complete the "Super Bowl" of the Hereford breed.

With all his accolades, in a way his story is just beginning. His daughters will write the next chapter, and generations after through his sons.

- **Homozygous Polled**
- There's no better bull to start the 29th Annual Candy Meadow Farms The Cowman's Kind Sale than one that truly defines it. 14M is a rare combination piece—impressive on the hoof and backed by an elite set of numbers. This Gold Rush son brings together look, muscle shape, and overall quality with a balanced profile that blends calving ease, growth, and maternal strength. He ranks in the top 1% of the breed for Marbling and \$CHB and posts ratios of 97 BW, 113 WW, 101 YW, 107 REA, and 112 IMF, underscoring his real-world value beyond phenotype alone. Raised by a productive two-year-old Houston daughter backed by a Dam of Distinction, 14M is built on a foundation of proven maternal power.

- **Homozygous Polled**
- Mighty stands out as one of the most complete and fault-free Gold Rush sons ever produced at Candy Meadow Farms. Dark red and goggle-eyed, this herd bull prospect is built right from the ground up—exceptionally sound, long-bodied, and carrying ample muscle with a smooth, functional design. He posts ratios of 107 WW, 103 YW, 114 REA, and 109 IMF, offering both performance and carcass merit. Like Lot 1, 13M is out of a productive two-year-old Houston daughter we think a great deal of, further strengthening the maternal story behind this young sire prospect.

- This Gold Rush son stands out for his overall outline and structural pattern. A true calving-ease specialist, he is exceptionally correct and well balanced while offering added strength in maternal and carcass traits. The longevity and maternal cow power behind Mastermind are worth studying, as they anchor this bull with real-world functionality. Gold Rush sons like this aren't just herd improvers—they add value where it counts most, enhancing both maternal efficiency and carcass merit to strengthen the bottom line.

- **Homozygous Polled**
- Another high-end Gold Rush son, 64M blends multiple high-quality traits while being backed by one of the most powerful cow families to ever walk the hills of Lexington, Tennessee. Mainline is a true sleep-all-night calving-ease bull that still offers added growth and next-level carcass merit. The pedigree is stacked and proven, combining reliability, performance, and long-term value in a practical herd sire package.

- Milestone is a direct Gold Rush son you can't overlook, admired for his added length of body, skeletal integrity, and overall correctness. On the maternal side, this pedigree is stacked with genetics that have proven themselves across a wide range of environments and continue to produce maternal standouts. Milestone is the kind that will sire long-bodied, thick-made calves that press the scales and add value at every stop.

- **Homozygous Polled**
- Here is a high-end herd bull prospect sired by the popular AI sire Merit. 40M is one that will be easy to find on sale day with his extra body shape, dimension, and muscle in a very attractive package. Big topped, deep ribbed, and stout from the ground up, this is a bull that combines genuine power with herd sire presence. Study him phenotypically and he's impressive, then dive into the data and he's equally legit. 40M offers a big spread from birth to yearling, backed by a highly maternal profile with herd building carcass merit while posting an impressive set of ratios of 118 at Weaning, 107 at Yearling, and 120 for Marbling. Backed by a high powered dam that has 4 @ 111 Weaning and 3 @ 108 Yearling.

- The high-quality individuals keep coming. Magic is a one-of-a-kind herd bull prospect. This dark red, wide based Merit son is the right kind and one that rises to the top when you study both pedigree and data. With Prime beef continuing to lead the way as the #1 source of high-quality protein, this Marbling King represents the kind we strive to produce. 25M posted an impressive 143 IMF ratio, making him a true outlier for marbling while ranking in the top 1% of the breed for CW and \$CHB.

- Scurred
- What a unique opportunity to acquire an own son of the popular Genex sire On Demand backed by a maternal sibling to Final Print. 12M offers calving ease in a high-growth, maternal package with added length, balance, and structural correctness that's built for the long haul. This is the kind that will work in a variety of environments while adding pounds at weaning without sacrificing the maternal strength needed to build a productive set of replacement females.

• **Homozygous Polled**  
 • 57M is a big growth, high-marbling individual sired by Impact that offers a balanced combination of performance and carcass merit. Ranking in the top 1% of the breed for \$CHB, this is the kind that aligns with today's value-based marketing demands. Backed by another Gold Rush daughter that continues to get it done year after year, this pedigree brings proven maternal consistency to go along with elite end-product value.

- We couldn't think of a more fitting way to kick off the Angus division than with this powerful son of Bear Mtn North Star. 408M is built right from the ground up—solid as a rock in his structure, bold in his rib shape, and consistent in his muscle pattern from end to end. He combines herd bull presence with the kind of balance and skeletal integrity that will hold up for the long haul.
- Backed by a highly maternal cow family known for productivity and longevity, 408M offers a pedigree stacked with real-world function. When you study his genetic profile, he ranks in the upper echelon of the breed for growth traits along with elite indexes for \$M, \$W, \$G, and \$C—making him a true multi-purpose sire candidate.

- A true powerhouse herd sire prospect sired by the Genex roster member North Star, 406M is a performance-driven individual that flat-out smashes the scales. This is the kind of bull that will inject serious pounds into a calf crop from day one, offering the added frame, length of body, and natural dimension needed to maximize payweight at weaning and beyond.
- Whether your goal is to push feeder cattle performance or build a stronger set of replacement females, 406M brings the genetic backing to do both. He ranks in the top tier of the breed for WW, YW, Marb, and CW—combining real-world growth with carcass merit in a balanced, usable package.

- 437N rounds out the impressive sire group of North Star sons in this offering. This high-quality herd sire prospect is built with the kind of balance, structural correctness, and natural performance that today's progressive cattlemen demand, offering the ability to inject growth, consistency, and maternal strength into a calf crop while maintaining the functionality needed to keep daughters in the herd for years to come.

- A standout son of North Star that traces back to the famed Sunset Valley Lady 4307—a mainstay donor that has influenced many of the most progressive programs across the nation. This is a cow family known for consistency, longevity, and real-world production value, and it shines through in 436N. Designed for cattlemen who demand performance without sacrificing function, 436N will add pounds at weaning while maintaining the kind of maternal strength needed to build a dependable set of replacement females.

432N is a high-quality individual that is loaded with overall quality and eye appeal. This high-octane Craftsman son has been a standout and a favorite of many who have toured the cattle, combining herd bull presence with the kind of balance and structural integrity that works in the real world. The dam, 245J, has knocked it out of the park on her first two calves—her first was the high-selling Angus bull in last year's offering and is now working in the Blazer Farms program in Franklin, TN. With proven production on the bottom side and elite phenotype on the top, 432N is one you won't want to miss on sale day.

• This Craftsman x Tahoe cross absolutely doesn't miss. 397M is a big, square-hipped, huge-bodied bull that travels with the best of them, combining athleticism with genuine power and mass. A standout for \$M, he brings loads of maternal strength and marbling to the table in a wide-based, functional package. This is the kind that can do it all—add value to your feeder calves while building a dependable set of replacement females for the future.

A powerful set of RiseAbove sons are on offer this year and 414M is certainly a standout among them. This high-growth herd sire prospect is square-hipped and extra-long bodied while still maintaining plenty of rib shape and width through his center body. An impressive individual on the hoof, 414M also reads just as strong on paper, excelling for both growth and maternal traits, making him a well-rounded option to add performance and build a productive set of replacement females.

• This big-ribbed, stout-made son of RiseAbove has always been a favorite and continues to impress with his combination of mass, shape, and structural integrity. If you're serious about adding elite genetics to your program, look no further—398M is designed to add pounds to a calf crop while enhancing carcass value and maternal strength at the same time. Study his data and you'll find he ranks in the top percent of the breed for all indexes, making him a true all-around herd sire prospect.

The number of Badger sons may be limited this year, but the quality is second to none and 401M rises to the top for overall stoutness, balance, and boldness of rib. This high-maternal herd sire prospect is backed by a cow family whose productivity record speaks for itself, giving you the option to add pounds to your calf crop or retain a strong set of replacement females. He ranks in the top percent of the breed for HP, Claw, and Angle, while posting an impressive \$M of 108—making him a practical choice for improving both function and longevity in any progressive program.

• A square-made, big-time calving ease herd bull prospect that excels for CED, BW, and Marbling. Sleep-all-night calving ease with the added carcass merit to keep daughters and market feeder calves at a premium.

A true testament to the kind of cattle produced at Candy Meadow Farms can be seen through the success of **CMF Smoking Gun 102F**.

NextGen Cattle Co. of Kansas purchased Smoking Gun for \$12,000 in a past Candy Meadow Farms Bull Sale with the intent of adding performance, consistency, and maternal strength to their program. The results have been nothing short of impressive.

At the NextGen Cattle Co. Bull Sale in the fall of 2025, **16 sons of Smoking Gun** sold to an outstanding average of **\$12,750**, with the top-selling bull from the sire group commanding **\$17,000**.

- Sale Feature
- What a truly rare opportunity to acquire a female of this caliber. If your goal is to elevate a breeding program to an elite level in short order, these are the kinds of females that make it happen. 92N combines the industry's most sought-after attributes—power, performance, and phenotype—into one dynamic package that is hard to replicate. She sets herself apart in a league of her own as the only animal in the entire Hereford database that meets minimum thresholds for WW, YW, CW, Marbling, BII, and \$CHB simultaneously. This is without question one of the most unique and progressive females ever offered through Candy Meadow Farms, and very well could be the most special to date. With limitless earning potential and the genetic credentials to influence a program for generations to come, 92N is a true difference maker.

- **Homozygous Polled**
- When you study the foundation behind the Candy Meadow program, you'll quickly recognize the influence that runs deep in the pedigree of this elite female. Sired by the popular AI sire Merit, 90N is built around generations of proven production, tracing back to the highly influential 297D—one of the most dependable cows to walk the pastures in Lexington. Year after year, this cow family has generated high-quality, working individuals that have made a lasting impact, and 90N carries that same maternal strength forward. As a maternal sister to CMF Power Broker and several other program highlights, she represents the kind of predictable genetic package breeders strive to build around. Study her EPD profile and you'll find she ranks in the top 10% of the breed for 11 traits, making her a no-miss female with the credentials to produce at the highest level.

- **Homozygous Polled**
- This is the kind that will stop you in your tracks on sale day. 97N offers a striking and unique look from the profile while still maintaining the genuine width, muscle shape, and dimension needed to be a productive brood cow. As one of the very first females to sell sired by our resident herd sire Bullseye, she represents an exciting look into the future of the Candy Meadow program. Combining an elite phenotype with a high-powered data set, she posts an impressive \$204 \$CHB, placing her in rare air among her contemporaries. 97N is the type designed to add value both in production and on paper.

- A highly productive Landmark daughter in the prime of her life, backed by a high-powered Anodyne female that adds longevity and maternal strength to the pedigree. She offers a well-balanced, functional build that's designed to simply get the job done year after year. The Bullseye heifer calf at side has been an eye-catcher since day one—combining added body and mass with an extended front third that's hard to achieve without sacrificing hip and power. This uniquely constructed female blends eye appeal with real-world functionality and performance. **Big-time breeding potential here.**

- Attractive and powerful are just a few words that come to mind when appraising 754J. This Daybreak daughter is in the prime of her productive life and is backed by the influential E914 x 51 daughter that has made such a lasting impact within the program. A proven pedigree that blends phenotype with dependable maternal strength, making her a valuable addition to any herd. Be sure to check out the big-time Gold Rush heifer calf at her side.

• **Homozygous Polled**

- A Homozygous Polled Hitching Post daughter that offers a big, powerful profile and brings real value to the table. Good young females are hard to find in the kind of cattle market we're experiencing today, and this is the type you need to make money. Built with the look, pedigree, and production potential to go to work and pay dividends.
- Lot 63A - Heifer Calf born 2/11/26 - BW 71lbs - Sired by: /S Profound 44041 ET

- What a way to start off the Angus female division with this impressivex Tahoe x Niagara pair. This proven cross has consistently clicked in a wide range of environments, offering the kind of maternal strength, longevity, and production value commercial cattlemen demand. She exemplifies everything you'd expect from this mating—broody in her design with the look of a cow built for the long haul. At her side is a standout heifer calf sired by the female maker himself, Fair N Square, adding even more long-term replacement value.

**Lot 112** tattoo 221J born 08/30/2021

## LOT 113-118

White Bros Farm is selling 6 Black and Black Baldie Heifers. These heifers sell checked safe in calf for a fall calf to a calving ease CMF Angus bull.

**A Note About Our Pictures:** We pictured our bulls in late October to take advantage of better weather. Our bulls have matured since they were pictured as yearlings, and we hope you can join us on sale day to see how they've grown.

**Sale Location:** Candy Meadow Farms, Lexington, TN. Follow Hwy. 412 East approximately 2 miles from the city limits of Lexington, then 5 miles South. (sale signs will be posted). GPS Address: 565 Candy Meadow Farm Rd., Lexington, TN 38351.

**Accommodations:** Days Inn, Lexington, TN 731-968-1997  
Hampton Inn 731-602-1997

**Trucking:** Free delivery up to 200 miles on purchases of \$10,000 or more.

**Fertility:** All bulls selling have been fertility tested and will be accompanied by proper health certificates.

**Herd Health:** Candy Meadow Farms is a certified and accredited herd. All cattle selling will be accompanied by proper health papers for interstate shipment. Bulls have been vaccinated for 7 way blackleg, IBR, BVD, PI3, BRSV, 5 way Lepto, Vibrio, and have been wormed with Cydectin.

**Terms and Conditions:** The cattle sell under the suggested Terms and Conditions of their respective Breed Association. Settlement must be made day of sale.

**Insurance:** Insurance for your purchases will be available at the clerk's desk through James F. Bessler, Inc.

**Lunch:** A complimentary lunch will be served.

**Liability:** All persons attending this sale do so at their own risk. Neither Candy Meadow nor any of their employees will be responsible for any accidents that occur.

**The Latest Performance Data:** Current EPDs, as of February 13, 2026, are included with each lot. Actual birth weights and adjusted 205 day weights are also included.

**Practical Bull Development:** At Candy Meadow we pride ourselves in producing professional bulls. Among other things this has to do with how the bulls are developed. We feed a high roughage ration in huge runs that insure the longevity, structural soundness, and fertility of our bulls.

Some of our seedstock development strategies:

1. We run our seedstock under the same conditions as any top commercial producer would. Result: Our cow production records are honest and reflect their true genetic potential.
2. The only calves that receive creep feed are on first calf heifers. Result: Production and Performance records are more meaningful for both us and customers.
3. We feed a high roughage ration designed for 3 pounds per head daily gain. Result: Bulls do not get over fat and maintain their body condition better when turned out and are ideally suited for grass consumption.

**“Order Your Choices Sight Unseen”:** If you can't attend the sale and you want to buy, call Rob Helms (731) 571-8213 or Locke St. John (615) 427-8979 and let us select your genetics, or bid online through LiveAuctions! Call us preferably at least a week before the sale. Describe the type of bull(s) or female(s) that you would like and your budget range.

We will bid on and purchase the best animal possible to fit your needs.

You pay only the bid price, just as if you were bidding yourself.

We will call you after the sale, and then you mail a check.

All sight unseen sales are made with a satisfaction guarantee.

**Semen Interest:** Candy Meadow Farm will retain a 1/3 semen interest in every bull selling. CMF reserves the right to collect semen at CMF's cost and at the buyers' convenience. CMF retains 1/3 of the semen revenue rights for each bull. The buyer owns 100% possession and 100% salvage value.

Candy Meadows Farm reserves the right to two successful flushes at the seller's expense and the buyer's convenience on all females selling.

### HOW TO PARTICIPATE ON

# LiveAuctions.TV

## 1 CREATE AN ACCOUNT

Click "Register to Bid" on the top right corner of LiveAuctions.tv. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

## 2 REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

## 3 BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.
