# Welcome

Welcome to the 2026 Coyote Ridge Ranch Private Treaty bull offering. These are rancher ready bulls that will cover your needs. All are backed by the full bull guarantee and 45 plus years of producing cattle geared toward increasing your bottom line.

CRR bulls are sold **private treaty** giving you the opportunity to find what you need within your budget without the pressure of an auction. We work to help you find genetics that best suit your operation – and for a reasonable price. Complete performance data including carcass ultra sound information will be available.

We are a three-generation family operation located on the high plains of Colorado in the shadow of the Rocky Mountains. We run a real-world western range program developed to add to your bottom line. Our long-term program has a proven track record of calving ease, maternal efficiency and superior growth backed by carcass data and feedyard results. Our herd consists of dependable problem free cows that work for a living. This philosophy has enabled us to consistently provide bulls for commercial ranchers as well as genetics for reputable seedstock breeders.

The bulls are fertility tested and passed BSE done by Countryside Large Animal Veterinary Service of Weld County, Colorado. They are vaccinated as recommended and are BVD-PI free.

Bulls noted MYO were raised until weaning by Mayo Ridge Ranch, Family members Katie Cornelius and Lee Mayo of Scott City, Kansas.

Select the right bulls now and we will deliver to you in time for breeding season. Look to CRR for your source of commercial bulls in volume and herdsires. Call any time for details. We'll be here when you need us — generation after generation.

As bulls are chosen they will be noted "SOLD" on the website.

# Sale Information

## CRR PHILOSOPHY AND PRACTICES

- Bulls are not creep fed until 2 weeks before weaning so there are no artificial inflated weights.
- Bulls are developed in a 40-acre pasture on a ration of ground grass and alfalfa hay with 8 lb. of corn. They are sound, so you can expect many years of productivity.
- Bulls are backed by a problem free, excellent uddered cow herd. These mamas are hardworking and good looking.
- All cattle are backed by CRR 45 years of actual performance records and dam production records-real honest weights along with computer estimates of progeny performance (EPDs). EPDs are genomically enhanced and DNA verified.
- Performance is documented by 20 years of retained ownership and feedlot data on CRR steers – excellent weight gain, feed conversion and net profit. In real world situations our carcass data and resulting premiums have increased every year.
- CRR reserves the right to retain an interest in selected bulls as noted.

## EPDs AND PERFORMANCE

Expected progeny differences (EPDs) are computer generated statistical predictions or estimates of expected performance of future progeny, not guarantees of performance. EPDs are updated weekly by the American Hereford Association as data is entered into the system. The EPDs in this catalog are from the 2/17/2026 report. EPDs printed are genomically enhanced to increase accuracy using DNA technology and are noted as such. We selected the most relevant data to include. Complete up to date EPDs can be viewed anytime online at [www.hereford.org](http://www.hereford.org). These computer-generated predictions along with generations of actual performance records and your visual evaluation of the cattle provide the complete tools to select bulls that fit your needs.

CRR guarantees an acceptable PAP for high altitude. Because CRR is at 5,000 feet, we recommend you test bulls at your ranch after they have been at 6,000 feet for three weeks. CRR will reimburse you for cost.

## GENETICS

The bulls have been DNA tested for parentage and any genetic abnormalities identified by the American Hereford Association. Any carriers of a recessive genetic marker is noted.

## HYBRID VIGOR — CROSSBREEDING

The advantage of hybrid vigor is real — a Hereford bull on black or red angus cows will increase weaning weights 30-50 pounds per calf on average. The retained baldy females are more fertile, more efficient and last longer. The research, but better yet our customers, report an additional \$50 in net income per cow **per year** when they used Hereford bulls on Angus cows. Do the math. Can you afford to give up \$50 per cow?

## CUSTOMER SERVICE

We will take the time to learn about your operation and provide any additional information to help you find what best suits your needs and is within your budget. We will deliver the bulls in time for spring breeding season. We will try to assist you in marketing your calves through our alliance with HRC Feedyard and various programs through the Hereford association Contact Lee Mayo at HRC Feed Yards with information about your calves – (Lee) 620-874-0051, [lee@hrcfeedyards.com](mailto:lee@hrcfeedyards.com).

## GUARANTEE

The bulls are fully guaranteed for the first breeding season absent evidence of extreme neglect or abuse. The bulls are fertility tested, vaccinated and are tested BVD-PI free. An injured or deceased bull will be replaced with a comparable bull less salvage value if a bull is available. If a replacement bull is not available, you will receive a sale credit for your cost less salvage to use in the future. We appreciate your business. If you don't make money with CRR bulls, we won't make money with CRR bulls. And we understand that.

- Herd Bull Alert! The CRR Wind Rivers are the real deal. This bull is a perfect example of this sire group. He sports exceptionally well-balanced numbers from birth to yearling as well as having top end BMI and CHB indexes. In my mind he is built like a Hereford bull should be. Sound and deep with great structure. Big, well-shaped testicles. MDC

- Herd Bull Alert!
- This highly attractive short marked, heavily pigmented bull brings a lot to the table. He combines moderate birthweight with exceptional growth ratios. His pedigree reads highly maternal with top WW, YW and CHB genomics. 533 stands out in a crowd with his combination of phenotype and balanced EPDs.

# ADD VALUE

WITH FEEDER CATTLE & REPLACEMENT FEMALE PROGRAMS

## HEREFORD ADVANTAGE

An industry-changing feeder cattle marketing program through IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

## MATERNAL ADVANTAGE

A unique marketing program designed to add value to Hereford-sired commercial replacement females with added fertility, feed efficiency, profitability and docility.

## PREMIUM RED BALDY

Take advantage of hybrid vigor by maximizing the best traits of Hereford and Red Angus genetics that provide commercial producers with premium replacement females.

 CRR 4037 ECLIPSE 173 (DLP, HYP)

**SOLD**

- <https://vimeo.com/showcase/12109105?video=1164883949>
- The most unique bull in our offering. A true power bull with extra width, shape and performance. He is arrogant and proud fronted and certainly has the "look at me" attitude. He weaned at nearly 70% of his 2-year-old dam's body weight. Maternal efficiency coupled with muscle shape and performance. DBC

• CRR Baldy Maker! A calving ease bull that is backed by maternal excellence. This Homo Polled bull is the kind we love to produce. He's a highly useful bull that has the right phenotype, performance and optimal genomics to sire high end replacements. His 2-year-old dam traces back to Trixie and is already making her mark in the MYO herd. A true rancher bull.

At *Coyote Ridge Ranch* we've built a cowherd that is a model for the Hereford breed. Cow families are stacked for generations to produce high quality, functional, maternal cattle that work for the entire beef industry. Behind every CRR bull is a cow family that will stand the test of time, because we strongly believe ...
