VIEWING OF CATTLE ALL DAY
12:30 PM - COMPLIMENTARY LUNCH
2:00 PM EASTERN - SALE TIME!

fellow CATTLEMEN,

Welcome to the 2025 offering of Innisfail Hereford seedstock! We are thankful for the opportunity to take care of God's creatures for another year. The cattle listed behind this letter have provided our families with the lifestyle that we love.

This is our largest offering to date, including every solely owned female 3 years and older. As we write this, the beef cattle industry is experiencing unprecedented markets. With no signs of the US beef cow herd rebuilding in the immediate future, those with the mama cows in inventory will continue to reap the benefits of a record setting market place.

Along with beef prices, current input costs have also risen. It is more important than ever to ask cows to do more with less. We have relentlessly culled this cow herd for years. A cow here must calve on their own, get bred back rapidly, and wean a high percentage of their mature weight with a pretty udder on solid feet. If our mother cows can't check these boxes, they make their way into the beef supply chain. The sale offering has jumped through these hoops and are sure to be beneficial additions for those focused on profit margin.

For years, we have placed emphasis on supplying consumers with a high quality product that keeps them coming back to beef! Recently, the addition of our C-Lock units have helped us to begin to select for greater profitability in the feedlot sector. We cannot change what we cannot measure and do our best to capture every phenotype possible.

FAQ the last few months:

Why are we selling all these females that we believe in so much?

We are blessed to live in a beautiful part of the world. The general public agrees. This makes it increasingly challenging to find the grass needed to expand the cow herd. This is a set of mature cows that we believe in 100%.

Are we going anywhere?

Absolutely not! The bred heifers and weaned calves coming down the pipeline look to be extremely promising. With the use of co-op herds we will continue to market 50 bulls a year. As we look at replenishing the cow herd after this sale, we will be taking a break from an annual female sale. Our young cattle need to breathe. In order to ensure we are supplying our customer base with longevity driven cattle we need to let Mother Nature apply her challenges, and let the crème naturally rise to the top.

We hope you plan on spending a Sunday with us in beautiful Madison, GA. If not, distant bidding will be available on LiveAuctions.TV. If there is anyway that we can help you, please give one of us a call!

sincerely,

WEYMAN HUNT, WHITEY HUNT AND BRECK DEBNAM

TERMS & conditions

TERMS Cash or check. Each animal to be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchasers during or immediately after the sale and will not be released until settlement has been made. Each animal will be at the purchaser's risk immediately after the animal is sold. *Innisfail Farm retains the right to two successful flushes on each female at seller's expense and buyer's convenience. Innisfail Farm retains 1/3 semen interest on all bull lots.*

REGISTRATION CERTIFICATES Registration certificates of the animals will be transferred to the buyer at the seller's expense. All calves born before the sale will be registered by the seller. All calves born after will be registered by the buyer. Each buyer must be sure to give the clerk his proper name and address for making transfers. AI certificates will NOT be furnished by the seller on females carrying the service of non-owned AI sires.

EPDS The EPDs listed herein are as reported by the AHA and are from April 3, 2025 evaluation. We will not be responsible for changes in EPDs or if these cattle do not perform as indicated by their estimated EPDs.

HEALTH All cattle selling will have interstate health charts required for shipping into other sections of the U.S. All females who are old enough are officially calfhooed vaccinated.

MAIL OR PHONE BIDS Mail or phone order bids may be handled by the owners or any of the sale staff.

ANNOUNCEMENTS Announcements at the sale ring by the owners or the auctioneer concerning the cattle will take precedence over statements in the sale catalog.

LIABILITY All persons who attend the sale do so at their own risk, and the owners and sale manager assume no liability, legal or otherwise, for any accidents which may occur. Lowderman Auction Services acts only as agents for the seller and have no responsibilities other than those involved in conducting the sale.

BREEDING GUARANTEE Animals sold in this sale are guaranteed by the owners to be breeders, provided they are properly handled and cared for by the purchaser. If any fails to breed, the seller must be notified by Jan. 1, 2026 and for open heifers by July 1, 2026, otherwise the animal is no longer guaranteed in any way. If animal is in sound, healthy condition, buyer may return it to seller, who shall have six months to test it and then, if the animal proves to be a non-breeder, a satisfactory exchange will be made or purchase price refunded. Every known blemish will be called before the animal is sold and no animal will knowingly be sold that is not sound in any way. Any changes in breeding dates will be announced sale day. Any female selling with calf at side is considered to be a breeder with no further guarantee in this regard.

INSURANCE Insurance will be available.

TRUCKING Trucking will be available.

offering choice

OF ANY NATURAL CALF ON DISPLAY

We have decided to give you the opportunity to choose one heifer and one bull.

LOT X

CHOICE OF HEIFER CALVES AT SIDE

LOT XX

CHOICE OF BULL CALVES AT SIDE

We believe that in order to keep the cow herd moving in the right direction, and have enough bulls to market this winter, that we need to retain the calves on the side of these cows. With that being said, we have elected to display the cows with their natural calves at side to show you what they are capable of. This set of natural calves looks nothing short of incredible, and we assume there will be some inquiries in them. We have decided to give you the opportunity to own one.

In each cow's footnote, the tag ID of her calf, as well as it's sire and date of birth, will be listed to assist you in sorting through them. If you would like to leave the animal here through yearling data collection time to gather intake data as well as scan data with their contemporaries, we would be happy to arrange for that. Choice must be made by the end of the day on May 4, 2025. If you select a heifer, Innisfail retains the right to two successful flushes. If you select a bull, Innisfail retains 1/3 semen interest.

the KATE FAMILY

In the late 90's, after Weyman Hunt's time on the UGA Meat Judging team, the Hunt family began a search for a different kind of Hereford animal with industry relevance and a pedigree that appealed to a national audience. An animal with generations of accurate phenotypic data collected on economically relevant traits. An animal that originated from a no-excuses herd where functional longevity remained at the forefront. This led them to Maryville, MO - home of Felton Hereford Ranch. On July 5, 2000, Feltons Legacy 208 and Feltons Lexus 235 were purchased and headed to Innisfail Farm. This was the beginning of a long time relationship between Frank and the Hunt family.

The Felton herd was dispersed on October 30, 2003 and the nation had their first opportunity to select from the legendary set of cows. Upon completion of the sale, FELTONS KATE P26 was on her way to Madison, GA. She was the #2 IMF female in the breed, and the #1 in the breed with a positive REA EPD at the time of the sale. To this day, she remains in the top 3% of the breed for marbling. We can only hope that, as seedstock providers, we can impact our customer's time in the breed as much as Frank Felton has impacted ours thus far.

Kate P26 had a tremendously productive daughter by Lexus (R501) that went on to become a Dam of Distinction. R501 had three daughters enter production, they sport a nursing ratio of 106 across 25 calves. Her most influential daughter was T723, who would go on to be the mother of 4013, Trademark, and countless other sons and daughters that have made a positive impact nationwide. In this mature cow herd dispersal, you have the opportunity to select from nine direct daughters and twenty-nine granddaughters of the great T723.

LOT 1

I have racked my mind for months on who needs to be the Lot One animal this year. All I knew was she needed to be a cow that: displayed the carcass characteristics we pride ourselves on, left no convenience trait unchecked, was the right biological type to adapt to any part of the world she might find herself in, and offered a high degree of proof in natural calves. 1921 does this at a high level, it is just a bonus that she is a full sister to Trademark- who continues to gain popularity in the ABS lineup. Her Gunsmoke bull calf will tidy her calving interval up to 382 days, which includes grabbing one flush per year. She averages 55% of her mature weight weaned. Punch your ticket, take the ride, this thing is relevant, versatile, and consistent. She posts 3 BW@94.7, 3 WW@103.3, and 12 IMF@102.1. MPPA of 102.

Sells open, ready to flush. Homozygous Polled.

Bull calf at side - Tag 22M, born 9/18/24, sired by Stelloflug Gunsmoke 222 ET.

LOT 2

Another full sister to Trademark! Progressive breeders across the nation have injected 1939 into their programs and he has yielded extremely positive results. 1928 is a long bodied, fault free cow with a phenomenal udder. The Broadway heifer calf in her belly will more than likely pay her off. 2 IMF@123.

Bred AI on 11/25/24 to Churchill Broadway 858F. Due 9/3/25 with a heifer calf.

Bull calf at side- Tag 27M, born 9/24/24, sired by Stellpflug Gunsmoke 222 ET.

INNISFAIL TRADEMARK 1939 ET
Full Brother to Lots 1 and 3

We were blessed with seven Broadway x 1921 heifers born in 2023. With the consistency of the flush, we only found it fair to offer up one of them. 2354 mirrors her mother in type: right ribbed, sound, fundamentally correct livestock. Broadway worked so nicely with the Kate cow family, and this bred heifer is a testament to that. She put a 128 individual IMF ratio on the board. Practical cattle with big time genomic indicators of profit potential!

Exposed to Stellpflug Published 3568 ET 12/3/24-2/10/25. Estimated due date 11/2/25.
Homozygous Polled.

Sustain's mama! A bold bodied, stout featured Leader daughter that you can depend on to raise a high quality calf year after year. She is the kind that keeps the bills paid- with daughters in inventory and sons that our commercial clientele fight over. With a 359 day average calving interval and a 102 MPPA she completes everything we can ask a beef cow to do. Last year, she raised Innisfail WS Sustain 27L, a Function son who was the high seller of our 2024 bull crop to Weiss and Sons of Manning, Iowa. He performed very well on the C-Lock and we are excited to see what he can do for both of our operations. 3 WW@102.3

Exposed to Pyramid Function 0244 12/10/24-4/15/25.

Heifer calf at side - Tag 422, born 9/11/24, sired by KJ IF 45C Confidence 609K ET.

LOT 8

HOLY SMOKES - look at those figures. If you want to inject some pure octane into your cow herd and put a CHB index into the stratosphere, then circle Lot 8. A highly proven pedigree with some of the nation's most influential females front and center. Take note of the bull calf at her side - she's a hustler. Highest YW EPD and \$CHB in the offering.

Bred AI on 11/25/24 to Churchill Broadway 858F. Due 9/3/25 with a heifer calf.
Bull calf at side- Tag 17M, born 9/17/24, sired by KJ IF 45C Confidence 609K ET.

LOT 9

The dam to Harvest 23K! Big, stout, burly York daughter. She has perfect feet, a tidy udder, and a lot more miles to keep rolling on her odometer. Her son, Innisfail Harvest 23K, was the superstar of our inaugural feed efficiency test and sold to Five J's Farm and NC State in last year's sale. Conversion is heritable and we believe she will make a unique tool to make the next generation of highly efficient Hereford seedstock. Most importantly, at nine years old she maintains a 100 MPPA and 355-day calving interval.

Homozygous Polled. Bred AI on 11/25/24 to KJ IF 45C Confidence 609K ET. Due 9/3/25.

Heifer calf at side - Tag 434, born 9/29/2024, sired by Innisfail Endorse 4021 1838 ET.

INNISFAIL HARVEST 23K
Son of Lot 9 at 5Js and NCSU

LOT 10

This was the first year that we ran our heifers through a feed efficiency trial. Once placed on a high roughage diet, to best mimic how they would be developed every other year, 346 rose as the undisputed winner. She ranked first for both RFI and conversion in a contemporary group of 63. This DBF King daughter is no slouch in terms of squareness of build, look, and balance. It is exciting to see these high quality cattle find their way to the top of these trials. She posted individual ratios of 104 for WW, 109 for YW, and 103 for REA. Dialing in our input costs and maintaining gain is the next frontier of the beef business, the purchase of Lot 10 will put you in the driver seat with legitimate data in hand. **Highest WW EPD in the sale offering.**

Exposed to Innisfail Conjunction 1L from 12/10/24-2/1/25. Estimated due date 10/28/25.

Homozygous Polled.

daughters OF 723E

723E was the highlight donor lot in last year's sale. She now resides at P & J Farms and is doing Andy Smith a great job. They don't make Hereford cows with udders like hers everyday. She was intensely line bred, making her uber consistent. She puts up 5 BW@93.8, 4 WW@100.8, and 23 IMF@109.3. Her Dam of Distinction mother has a nursing ratio of 105.5 on 8 calves. This is as solid and consistent as a cow family gets.

This cow checks the Bonsma boxes of angularity and femininity. U-necked, brisket pleats, scapula rotation - the whole nine yards. To me, she proves Bonsma's theories because she is always quick to cycle back and get pregnant. I love this kind of cow, they will still make you a living if we cut all their tags out and the computers crashed.

Bred AI on 11/25/24 to Churchill Broadway 858F. Due 9/3/25.

Heifer calf at side - Tag 425, born 9/17/2024, sired by Pyramid DJF Influence 9156.

The CEO bull at EF Beef did some interesting things. One of the most notable was producing Thomas County. The cattle were stout featured, and had muscle, mass, and marbling. 2120 is cut from the same cloth and she is a calf raising unit. Her first natural calf, by Masterplan, posted a WR of 107, and IMF of 107.

Exposed to Pyramid Function 0244 12/10/24-2/1/25. Estimated due date 10/12/25.

Bull calf at side - Tag 15M, born 9/12/24, sired by KJ IF 45C Confidence 609K ET.

daughters OF 723E

LOT 13

723e was a huge embryo producer and they are sticky. She stands on the bottom side of a large portion of our ET calf crop this year. With our current inventory, we felt comfortable in sharing what we think are a pair of exciting ET heifer calves. Victor 2E is the full brother to 45C that is working at Rausch Herefords. Hoven, South Dakota is an absolute data hub where 2E has 207 WW@101.1, 28 REA@104.9, and 28 IMF@115. He has 30 daughters raising 66 calves for a 103 nursing ratio. Look for these heifer calves to be extra productive. I think they will be a lot of fun to breed on.

C615 X 7111 *cowy*

This is a jam up pair of 3 year old flushmate sisters. They are moderate, angular, extra feminine and refined in their build. 7111 is a beast of a donor cow that is now at Day Ridge and P & J Farms. From the looks of it, their embryo sales out of her have been solid and steady. There are a pile of C615 daughters in this sale. He was never a member of the bull of the month club, but do not hesitate to own them. They stick around forever and offer tremendous mating flexibility.

920 was the prettiest uddered Z311 daughter I have ever seen. We lost her too soon, at no fault of her own. 158's teat size and shape parallels her mother's. I have a picture of Lot 17 calving during the hurricane this fall and taking her calf to shelter. It is one of my all time favorite images of what maternal looks like to me. She is sensible in her stature, while maintaining length of body, bold ribbed, and loose structured.

Bred AI on 12/5/24 to ECR 9170 Endure 2178. Due 9/25/25.

Homozygous Polled.

A functional, big ribbed cow that is moderate in her stature. She quietly does a great job raising maternally driven cattle like herself. 138 is in contention for one of the prettiest uddered cows in the book.

Exposed to Pyramid Function 0244 12/10/24-2/1/25. Estimated due date 9/17/25.

Homozygous Polled.

Heifer calf at side - Tag 446, born 11/2/24, sired by Innisfail 1837 1580 2235 ET.

daughters OF 4021

LOT 21

If you are looking to make swift genetic progress for marbling and the dollar indices - check this one out. The really neat part is she can still flat raise one - posting 2 BW@97, 2 WW@109, 2 YW@110.5, and 2 REA@105. The most advanced animal in the offering for IMF EPD and \$BMI. I believe one may deem her elite within the Hereford population for her numerical profile. Her mother is a member of the Endure x 4021 flush that yielded so many good ones. Nate Fredrickson purchased 1839 privately after seeing her brothers in Denver. She has done great things in Spearfish, SD - maintaining a 106.3 nursing ratio in one of the best cow herds in the nation.

Exposed to Pyramid Function 0244 12/1/24-2/1/25.
Estimated due date 10/2/25.

Homozygous Polled.

Heifer calf at side - Tag 447, born 11/4/24, sired by Innisfail 1837 1580 2235 ET.

LOT 22

We have offered one of these Endure x 4021 sisters each year in the sale. 1830 is the last one left and was the one we showed. She saw some success and made a lot of friends. 1830 is massive bodied, square built cattle that is moderate in stature and still weighs something. She possesses highly heritable marbling, putting up 3 progeny IMF@108.3. 1830 has a Broadway son doing a great job at Tore Fork Farm in TN. Her mother has 9 daughters touting a nursing ratio of 100.8 across 28 calves.

Exposed to Pyramid Function 0244 12/1/24-2/1/25.
Estimated due date 10/2/25.

Bull calf at side- Tag 34M, born 9/28/24, sired by Innisfail 1939 8170 2222 ET.

The STONEGATE 1580 FAMILY

In the summer of 2018, Weyman called me into his office and said "I found this cow on an EPD search: she is big time maternal numbered, polled, double bred 3027, and right down the road." I didn't know Bob Neliganat the time and thought "what in the world are we getting into." Little did I know that the 1580 tagged female, raising the scale mashing baldy heifer calf, would turn into one of my favorite cows that I have had the opportunity to work with. Fast forward seven years, come to find out, Bob at Stonegate Farms is a master breeder who believes in accuracy and won't ever do anything to put you in the ditch. He is a great friend, a champion for the Hereford breed in Georgia, and a strong voice for the cattlemen of Putnam, Jones, and Baldwin counties.

1580 went on to become a Dam of Distinction, and has four daughters that have raised nine calves at a 104.4 nursing ratio. She defines my personal maternal. Her daughters' udder elasticity, percent mature weight weaned, calving interval, and maternal aggression is held in high regard on Innisfail Lane. She is the dam to the second highest BMI animal in the AHA database, 2235, whose calves will be sure to impress the crowd on sale day. His full sister was a highlight of our offering last year, topping the sale at \$27,000 for ½ interest.

Unfortunately, we learned that she is a DB carrier upon the release of the defect. A large sum of her daughters were carriers as well and have entered the commercial sector of the industry. The influence that remains are cattle that I will have a difficult time watching leave, but I know that those who appreciate the same kind of cattle that I do will enjoy them for years to come.

LOT 23

In all honesty, 839 is starting to look like an old donor cow. However, if you are interested in this lot then you are looking at her for her track record. She still flushes extremely well. 839 is arguably the most popular cow that currently resides on Innisfail Lane. Her progeny that have been marketed at public auction have averaged \$24,500. She has Trademark sons working at GKB and Azure Valley Black Herefords. The 4013 mating to her is magic - we have some, Boyd Meyer has some, and Mrnaks have some. They are all damn good cattle. If you want to make them highly productive, good looking, with a progressive genomic profile, then this cow fits the bill. 839 has 3 BR@87.3, 3 WR@104.

Homozygous Polled.

Exposed to Pyramid Function 0244 2/10/25-4/15/25.

LOT 24

I just finished harping on how good the 4013 x 839s are. Here is your chance to own one. Big, stout, performance cattle. To me, she just looks like the future mother to herd sires. 2311 charts aggressive growth figures while maintaining a DMI better than breed average. There is a world of mating flexibility and opportunity in these young 4013 daughters. Lot 24 is Kacie's favorite replacement heifer, and if you know anything about my wife, it is that she is usually right.

Homozygous Polled.

Exposed to Stellpflug Published 3568 ET 12/3/24-2/10/25. Estimated due date 11/7/25.

LOT 25

124J

Full sister to Lot 24 and Dam of Lot 26

It took some arm twisting, but we got Andy convinced to let us sell one clean Masterplan x 124 heifer. 124 embodies our definition of a power cow. Her performance, substance, and mass is highly heritable. Gather up these clean Masterplan daughters, we calved a handful this fall and they are incredible uddered, stay in good rig, and are fertile as wet two year olds.

Homozygous Polled.

The STONEGATE 1580 FAMILY

LOT 26

My favorite cow that has resided on Innisfail Lane since I have. Despite her defect status, I flushed her two more times- yielding 34 embryos that were all implanted this year. An absolute hammer that the breed needs a lot more of. 2 BW@97, 2 WW@101.5, 2 YW@103.5, 6 REA@106.3, 6 IMF@105.3. She does it all!

Homozygous Polled.

Sells with heifer calf born 2/28/25 sired by Pyramid Function 0244.

Open and ready for action!

LOT 27

A dark red version of her mama with an aggressive pigment package! I talked about Lot 24 being Kacie's pick of the replacement pen this year, well 2349 is mine. When she showed up from the Co-Op herd all I could think was "We can sell a pile of Hereford bulls that are built like that!" Stout featured, athletic, loose hided, and performance driven. Yes, just like her mama, she is DBC. Regardless, I should have my head examined for letting go of these really good bred heifers in the same year as a mature cow herd dispersal.

Homozygous Polled.

Exposed to Stelloplug Published 3568 ET 12/3/24-2/10/25. Estimated due date 11/7/25.

INNISFAIL SANDMAN 1580 2156 ET
 Full brother to Lot 28

victora

the VICTRA B52 FAMILY

These cattle trace their roots on Innisfail Lane back to 1980 when Whitey bought six cows from C&H Farms in Sandersville, GA. Five of them were daughters of RWJ Victor J3 212, a Sire of Distinction. The cow with the most influence on today's population at Innisfail Farm was B52, who had a daughter in 1988: X257. X257 did everything you could ever ask a Hereford cow to do, raising 11 calves for a nursing ratio of 110.7.

907 is an impactful cow in the modern era here in Madison, GA. She never raised a bull that altered the course of Hereford history, but nobody ever asked her to. This cow family has absolutely thrived in the micro-climate that is the Piedmont soil region of Georgia. They get pregnant, raise bigger calves than their pasture mates, and stick around for a long time. Her Dam of Distinction mother displays 7 WW@106.1, with three daughters raising 18@104. Individually, 907 boasts 9 WW@104.2.

525 was an absolute powerhouse. She was insanely consistent at stamping her progeny with genuine performance, substance, and mass. Just like 907, she is a second generation Dam of Distinction. Her dam, 090X, posts 6@115.7 with 3 daughters tallying 8@109.8. 525 put 5 weaning ratios on the board 110.4 before we unfortunately lost her too soon (at no fault of her own).

368 was a long, bold, feminine cow that you could always count on calving early and bringing in a calf with balance and quality. You guessed it, just like the pair of foundation females above her, she is a second generation dam of distinction. When I started with Innisfail in 2018, her dam 166Y was one of my favorite mature females on the place.

When it comes to cattle that I am proud to be influencing the nation's cow herd with, I am glad to see bulls with B52 deep on the bottom side of the pedigree making baldy daughters. 15 lots in this offering can be traced back to Victra B52 on the bottomside of their pedigree.

These cattle do not make mistakes and are the reason people are coming home to Hereford. #invasivespecies

LOT 29

What a way to start off the B52 descendents! This cow hit the donor pen this winter and got there the good old fashioned way, by raising such good calves that you could not deny her. Her first calf was a monster of a 1943 that landed her way into our Champion Pen of 3 Sr Heifer Calves in OKC that year. She later sold to NC State and Jody Standley. Her second calf by Function is currently raising the best heifer calf in our first calf heifer group. I finally decided to flush 925 this year and she churned out 25 4013s! It is safe to say she will be in the bottom side of exciting pedigrees for years to come. Smooth, angular, and feminine- I'll take 'em like her all day long. 3 WW@114.3, 2 YW@101.5, 2 REA@115.5.

Exposed to Pyramid Function 0244 2/10/25-4/15/25.

Heifer calf at side- Tag 409, born 7/28/24, sired by Innisfail 1837 1580 2235 ET.

A rock solid, can't miss mating. The more we use 4013, the more I believe if you find an angular, feminine cow, he will do the rest. 925 is just that. These are the kind of genetic selections we will use to build back our cow numbers.

Grade 1 embryos.

The VICTRA B52 FAMILY

LOT 30

The only bull in this year's offering! Matt Morrison at NC State called and said 130's natural calf (Lot 30) did a pretty dang nice job with her first bull calf. I figured let's bring him on, he will do a great job of highlighting what 925 does 2 generations deep on the bottom of a pedigree. When he hopped off the trailer I was elated with how he looked! Dark red, good built, soft bodied, and sensibly sized! The Trade Secret cattle are as calving ease as it gets. If you are looking to inject marbling into your herd in a package that checks out for the remainder of the traits, then look in!

Homozygous Polled. NC State and 5Js retaining 1/3 semen interest.

LOT 31

929 goes by "Model Beef Cow" around Innisfail Farm. She doesn't mess up, just always does a little better than average at everything. This is proven when you look at the percentile ranks of her EPDs: ranking better than breed average for 17/20 traits, and remaining in the 50s for the other 3. She represents the kind that I like to have a lot of.

Exposed to Pyramid Function 0244 12/10/24-2/1/25.

Estimated due date 9/17/25.

Homozygous Polled.

Bull calf at side- Tag 43M, born 10/18/24, sired by Innisfail 1837 1580 2235 ET.

INNISFAIL M326 907W
Dam of Lot 32, Maternal Granddam of Lot 31

LOT 32

One moderate, huge ribbed, attractive unit. This is the kind of cow I would like to run a massive number of. She raised a monster Trademark heifer calf on her first try that posted a 113 WR. This cow combines two of the most proven animals within our program, C615 and 907.

Exposed to Pyramid Function 0244 12/10/24-2/1/25.

Estimated due date 9/22/25.

Heifer calf at side- Tag 438, born 10/3/24, sired by Innisfail 1837 1580 2235 ET.

LOT 33

Trade Secret's mama! This is a neat cow that is bold, square, and comes with some presence. We flushed her as a 4 year old because of how balanced her calves were. Just take a look at her three progeny that are selling. They are simply the right kind. 824 offers a unique balance of cutability and marbling with 3 FAT@84.7 and 3 IMF@116.7. Low input cattle with a tiny birth weight figure. Her second calf was Trade Secret who covered heifers here before going on to work for Dobbs Herefords and Lorenzen Farms. **Smallest DMI EPD in the sale offering.**

Exposed to Pyramid Function 0244 12/10/24-2/1/25.
Estimated due date 9/22/25.

Homozygous Polled.

Bull calf at side - Tag 25M, born 9/24/24, sired by Innisfail 1939 8170 2222 ET.

015 was lot 33's first natural calf. She played a large role in our decision to propagate her mother. One of the best looking 4013 daughters that we have had here. Her athleticism, femininity, and udder quality is second to none. The Harvest 23K heifer calf on her side is one of my favorite natural calves. Bred up Broadway this year! That has been a common sense decision around here for three years.

Bred AI on 11/25/24 to Churchill Broadway 858F.

Due 9/3/25.

Homozygous Polled.

Heifer calf at side - Tag 442, born 10/12/24, sired by Innisfail Harvest 23K.

LOT 38

A long bodied, refined C615 daughter of 525. These young C615 daughters bring a lot of value to the current industry. This one is awesome footed. Her 2235 bull calf will catch some attention.

Homozygous Polled.

Exposed to ECR 9170 Endure 2178 12/1/24-2/1/24. Estimated due date 10/2/25.

Bull calf at side- Tag 46M, born 11/3/24, sired by Innisfail 1837 1580 2235 ET.

INNISFAIL 755T 525C
Dam of Lots 37 and 38

the VICTRA B52 FAMILY

LOT 39

737 was one of the first C615 daughters to calve at Innisfail in '19. The 2017 model C615s helped solidify our decision to make him such an integral part of our operation. Lot 39 shows up in the bottomsides of quite a few animals at Innisfail. She got there the old fashioned way, by replicating her kind in production: making hard working, pretty uddered, fertile daughters. This is the kind you only pick up in a dispersal and make impactful investments. The bull calf at her side is a man. 5 WR@101, 3 YR@105, 2 REA@110.5. 360-day calving interval. That is the data that makes profit in the beef business.

Homozygous Polled. Exposed to Pyramid Function 0244 12/10/24-2/1/25. Estimated due date 9/22/25.

Bull calf at side - Tag 8M, born 9/4/24, sired by Innisfail 1837 1580 2235 ET.

the VICTRA B52 FAMILY

LOT 42

Every time we have sorted cows this spring, Kacie has said "What's that cow?" 909 just has that kind of presence, shape, and dimension. She is more than just a pretty face, having 3 WR@104.3. High quality stock bred to be productive.

Exposed to Pyramid Function 0244 12/10/24-4/15/25.
Heifer calf at side- Tag 435, born 9/29/24, sired by Innisfail 1939 8170 2222 ET.

A functional one with look, backed by generations of productive cows. She posted individual ratios of 108 at weaning and 105 at yearling. A solid option that backs up her mother's ability to make the right kind.

Bred AI on 11/26/24 to Stellpflug Published 3568 ET.
Due 9/4/25.

the JUNE FAMILY

The next two lots stem to the June cow family. June R17 was purchased as a bred heifer in the Felton dispersal. She was a phenotype standout on sale day and scanned 7.36% IMF as a yearling. R17 threw mostly bulls during her time in Madison, GA. As a result, there is not a ton of her influence around. This pair are longevity driven cattle with all the convenience traits in check.

LOT 44

Another bold bodied, square built C615 daughter. 333 day average calving interval. 942 is quick to calve and breeds back up rapidly. The right kind!

Homozygous Polled.

Bred AI on 11/25/24 to KJ IF 45C

Confidence 609K ET. Due 9/3/25 with heifer calf.

Bull calf at side - Tag 6M, born 9/3/24, sired by Innisfail 1837 1580 2235 ET.

This is a cow that I swore would never leave after we sold her dam and granddam. Stone Ridge Manor bought the pair of them that year. Thankfully, 023 has an awesome Broadway daughter in the bred heifer pen that will carry on the family legacy. This entire tribe of cattle grows fast when it matters and remains moderate as mature animals. They are good structured, good uddered cattle with density. 023 sports 2 WR@108.5 and 2 IMF@103.5. I regret not flushing her once before she leaves.

Homozygous Polled. Bred AI on 11/25/24 to Churchill Broadway 858F. Due 9/3/25 with a heifer calf.

Bull calf at side- Tag 42M, born 10/18/24, sired by Innisfail Harvest 23K.

The only 871e daughter in the offering! It is no secret what that cow did for us, Andy Smith, and Jason Day. We sold a lot of her offspring as heifer calves, mainly because they were high performing cattle with presence and it was easy to get them ready. Watching 2056 mature has made me wish we kept more. A power cow with added width and dimension! Her Masterplan bull calf posted a 109 WR last year and is now a herd sire for Lamar Ball.

Homozygous Polled. Exposed to Pyramid Function 0244 12/10/24-2/1/25. Estimated due date 10/12/25.

Big Red! Win showed this cow a bunch. She won frequently around here and ended her career being champion female at the Dixie National. 004 made a pile of friends in this part of the world. I have flushed her to our own arsenal of herd sires due to her ability to increase performance and balance in an outcross package. A $\frac{3}{4}$ sister to Liberty, who is making his own mark across the industry. She just froze 8 to the 2025 Cattleman's Congress Supreme Champion, Brandston. I am fired up to get those things in and market some show cattle out of her. I think you can mate this cow a variety of ways and yield major results.

*Homozygous Polled. Exposed to Pyramid Function 0244 3/13/24-4/15/25.
Heifer calf at side - Tag 448, born 12/1/24, sired by Innisfail 1939 8170 2222 ET.*

Past Southeast Regional champion and big time revenue producer!
983 has stood on the bottom of the pedigree of nationally competitive females and sale topping breds. Her added shape and presence is highly heritable. She offers a unique pedigree for show cattle matings without sacrificing power and look. Clay Lawrence is showing her spring natural calf from last year and it looks like she could have a strong run.

Exposed to Pyramid Function 0244 12/10/24-2/1/25.

Estimated due date 9/23/25.

Full sister to Maverick's dam! The widest, squarest, boldest cow in the sale. 8170 was purchased as the Foundation Female lot in the 2020 NWSS Mile High Night Sale. She is the mother to the 2222 herd bull that you will see many high quality progeny on the side of sale cows. Lot 56 has sons at both HR Management and Rockin H Farms in Mississippi. We have a litter of Confidences coming this fall out of her that I am excited about!

Horned. Exposed to Pyramid Function 0244 12/10/24-2/1/25.

Estimated due date 10/12/25.

LOT 57

9245 was the highest marbling animal in the breed the day we bought her. She remains in the upper echelon at a 1.08 IMF EPD. She checks the boxes for both convenience traits and attention grabbing presence. Majorly progressive dollar indices in a moderate package. Her Function heifer in the breds has caught the attention of many visitors and will stick around to carry on the cow family.

Homozygous Polled. Exposed to Pyramid Function 0244 2/1/25-4/15/25.

Bull calf at side - Tag 45M, born 11/2/24, sired by Innisfail Harvest 23K.

Our Trademark son of choice! Confidence is backed by the immortal 45C cow that has done tremendous things for the Hereford breed. He is a calving ease sire with extremely progressive indices. 609K sons recently averaged \$11,500 at the Jensen Ranch bull sale. He stamps them with lots of shape and look!

0244 was brought in from the Fredrickson program to do just what his name suggests: improve feet, structure, moderation and density. He is my favorite mature bull that I have ever been around. He walked behind the majority of sale cows and will be on display on sale day. The daughter data is not in quite yet, but they are raising some monsters.

The bull that built Innisfail into the place it is today! The maternal quality he brings to the table in conjunction with top tier carcass is second to none. The cattle seem to work everywhere. This month, he was recognized as a Sire of Distinction. High accuracy, high satisfaction!

1435 WW@102.1, 854 YW@101.7, 880 REA@101.6, 880@107.9. 522 DAUGHTERS HAVE RAISED 953 CALVES FOR A 100.3 NURSING RATIO

Bob Bethel is a great bull customer. These cattle are developed on grass and polywire. He cuts no corners when it comes to herd health. Silo Creek Farm in MD bought Bob's bred heifers privately last year and they have been very pleased with the turn out!

10 F-1 RED BALDY FAIL BRED HEIFERS

9 MILE FRANCHISE 6305

JEFFRIES EMPIRE 198J

This pair originated from Wayne Tankersley. Wayne was an extension agent in Morgan county for years and does a great job managing his cow herd. They are sired by a Prominent 21G son.

Exposed to Jeffries Empire 198J (Red Angus) 12/1/24-2/1/25. Safe in calf. Should calve 10/1/25-11/1/25.

2 BWF BRED HEIFERS

LOT 102

2 BWF BRED HEIFERS (WT2, WT3)

A sweet group of black baldy factories! Functional low input Hereford heifers. We preach heterosis everyday and put it to practice. Heifers can come with registration papers. Casey Green owns their service sire, he is a sporty Rainfall x Resource and full brother to Downpour.

Due 9/3/25 to SAV Downspout 1878.

3 HEREFORD HEIFERS BRED TO
ANGUS BULL

LOT 103

3 MASTERPLAN SIRED HEREFORD BRED HEIFERS
(334-44530054, 333-44528670, 320-44530051)

SAV DOWNSPOUT 1878

Everybody loves a good red baldy female. Here is an outfit set to make some great ones next fall. Heifers can come with registration papers. Service sire is a slick, moderate, dense, calving ease Red Angus bull from the Jefferies program.

Exposed to Jefferies Empire 198J 12/1/24-2/1/25. Safe in calf. Should calve 10/1/25-10/15/25.

3 HEREFORD HEIFERS BRED TO
RED ANGUS BULL

LOT 104

3 HEREFORD BRED HEIFERS
(364-44528759, 351-44528725, 327-44528632)

These cows are 4-5 years old. They are still here because they work. Stout, powerful, fundamentally good Hereford cows that raised ET calves this year. Cows can come with registration papers. They are in good shape and could be taken in a variety of directions.

Exposed to Jefferies Empire 198J 12/1/24-2/1/25. Safe in calf. Should calve 10/1/25-11/1/25.

3 HEREFORD COWS BRED TO
RED ANGUS BULL
