

“Georgia’s Big Event”

PROGRAM SALE

MEMORIAL DAY

MAY 27, 2024

Midville, Georgia

Hello Fellow Cattle Friends,

It is with great enthusiasm that I welcome you and your family to Mead Cattle Enterprises on May 26th and 27th for the Mead Program Sale.

In an effort to align our cow numbers with land availability we are selling all of our three- and four-year-olds that have heifer calves. This is a great opportunity as nothing is held back. Dale has selected a few special lots for our ET calves, bred heifers, and yearling bulls. I don't usually brag much, but this is an awesome set of females and bulls. I encourage you to come take a look. The beef cattle business is the best it has been in many years. This is a great time to cull those unproductive cattle and upgrade your herd.

We are pleased to welcome my friend, Gary Hedrick, and the White Hawk crew as guest consigners to the sale. They offer a strong set of cattle that add genetic diversity.

Please join us Memorial Day weekend for
“Georgia’s Big Event!”

As always, if I can answer any questions or be of assistance in any way, please give me a call.

- Forecast has done a great job at THM and this one is a great example.
- His cow family is strong! His dam is also the dam of Boyd Power Surge and now is one of the lead donors at Chapman Land and Cattle in Tennessee.
- His sire is a maternal brother to NJW Journey 53D.
- Coupled with our Dahlia cow family this girl should have a very bright future.

Boyd 76E Forecast 0050 – Featured Sire

Lot 27A – THM 43J Hannah 4039

- This is the first set of calves to sell by Yellowstone 43J. We selected him as a calf to use to improve marbling and maintain maternal strength.
- We like this one and her sisters selling as they look like “cows” in the making.

- These are our first Yellowstone calves offered and a group we are very excited about.
- This one has the look of a cow, has performance and brings a bit more marbling to the table.
- We selected Yellowstone because of his higher marbling EPD and his terrific good uddered dam.

- Donor permit.
- Produced nine (9) embryos Dec. 7, 2023.
- 931J is a full sister to Arthur 240G.
- Arthur was tested at the NRSP program at Olsen Herefords and did a great job. He graded 53% prime and 100% upper 2/3 choice. He also scored a very efficient 5.73 Adj. F:G with a ratio of 93.
- With the cost of our input steadily increasing to be sustainable we must look at genetics with lower input yet also retain our maternal, growth and carcass merit.
- 931J would cover all these traits.
- WHR is retaining her bull calf, tattoo 422L, calved Sept. 5, 2023.
- Pasture exposed from 1/19 to 3/21/24 to /S Endure 00142 ET. Blood tested safe on 3/15/24.
