

7TH ANNUAL

Southwest Rancher's

Bull & Female Sale

SATURDAY, APRIL 19, 2025

12:30 P.M. AT THE

WHEELER FARMS SALE FACILITY

CHICKASHA, OKLAHOMA

Registered Angus, Red Angus & Hereford Bulls

Registered Open Yearling Heifers

BRINK ANGUS • BROOKSHIRE FARMS • WHEELER FARMS

Dear Friends and Fellow Cattlemen,

Welcome to the Seventh Annual Southwest Rancher's Bull and Female Sale. The sale will be at the Wheeler Farms' Sale Facility, and on behalf of everyone involved, I want to thank Will and Nicole and their crew for hosting Southwest Rancher's and for the time and effort they have invested in preparing their facility for this event. I would also like to thank the Wheeler, Brookshire and Brink families for allowing me to be a part of marketing their cattle, and to my dad, Eddie, for the use of his facilities for pictures and videos.

This sale is the culmination of a group of breeders that are like minded in their programs and the development of their bulls coming together to offer what we feel is an outstanding set of Angus and Hereford, along with an outstanding set of registered Angus replacement heifers from Brink, just in time for green grass.

The Southwest Rancher's breeders have assembled a sound, functional set of bulls that excel in phenotype and individual performance while maintaining a strong genetic base and numerical balance and diversity. The disposition of this group of bulls is worth taking note of as well. Whether you are looking for a herd sire to use in a registered operation, a sire to promote and sell semen on, or a bull to use in your commercial operation, this sale should have a bull that will meet your needs. These bulls have been developed the right way, with emphasis on maintaining soundness and maximizing fertility and longevity.

No one understands more than we do how a bull affects their customer's livelihood. For each bull that leaves this sale, we want that customer to be satisfied. It is our hope to build lasting relationships with our customers by listening to their needs and producing a product that meets those goals. Evaluate the needs of your operation and plan to join us April 19.

For those unable to attend in person we will also be broadcasting the auction LIVE with ONLINE bidding available through LiveAuctions.tv and have phone bidding available as well. Watch for the catalog and updates on our website at www.mcsauction.com and angus.org.

Please do not hesitate to call me or any of the breeders involved with any questions or if we can help you in any way.

Sincerely

Matt c. Sims

7TH ANNUAL

Southwest Rancher's

Bull & Female Sale

SATURDAY, APRIL 19, 2025 • 12:30 P.M.
WHEELER FARMS SALE FACILITY • CHICKASHA, OKLAHOMA

TERMS OF SALE

CASH or CHECK. All cattle are to be paid for during or immediately following the sale and will not be released until after settlement has been made. Registered cattle will not be transferred until paid for in full.

ABSENTEE BIDS

If you would like to place a bid on any Lot but will not be able to attend the sale, please contact the owners, the sale manager or any member of the sale staff. Online bidding will be available to registered bidders through LiveAuctions.

HEALTH

Cattle are current on all vaccinations. All cattle will have interstate health charts required for shipping into other sections of the United States. All bulls have been Trich tested and have had a breeding soundness examination.

BULL VOLUME DISCOUNT AND TRUCKING

Buy 5 bulls or more and receive a 5% discount off the purchase price. Buy 10 bulls or more and receive 10% off the purchase price. Free delivery on the purchase of 3 or more bulls within a 200 mile radius immediately after the sale. Pick up your bull sale day and receive a \$50 per bull discount. There is no free delivery or discounts on the females but reliable trucking will be available for hire at the sale. Please work with the staff at time of settlement to supply us with good working phone numbers to contact you.

REGISTRATION CERTIFICATES

Registered animals will be transferred to the buyer at the seller's expense. Each buyer must be sure to give the clerk the proper name and address for making transfers.

INSURANCE

Insurance for your purchases will be available sale day at the clerk's desk.

ANNOUNCEMENTS

Announcements made at the sale by the owners or the auctioneer will take precedence over statements in the sale catalog. We reserve the right to withdraw any sale Lot not meeting our specifications prior to sale time.

NOTE

All persons who attend the sale do so at their own risk. Neither Wheeler Farms, nor the sale manager assume any liability, legal or otherwise, for accidents or loss of property.

American Angus Association Selection Tools

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.

Combined Value (\$C), expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (Doc), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

For more information about these and other Angus breeding tools, go online to www.angus.org

The CAB icon will appear on the pedigree of those bulls that meet the criteria for targeting the Certified Angus Beef brand.

Targeting the Certified Angus Beef Brand

CAB Best Practices Manual identifies the following criteria to best target bulls that will sire calves likely to meet the CAB brand. Bulls in our sale book that meet the criteria have this logo on their pedigree following the animal's name.

EPD	Percentile	EPD Value*
Marbling (Marb)	Top 50%	+0.65
\$Grid Carcass Index (\$G)	Top 50%	+55.0

* EPD Values taken from Spring 2021 Sire Evaluation Non-Parent Bulls report.

Demand for Certified Angus Beef (CAB) brand has never been stronger. 1.21 billion pounds of CAB was sold in the fiscal year 2020! With packers and feedlots looking to meet this demand, the future is bright for cattlemen who have the genetics in their calf crop that can achieve high quality grades and the CAB brand's specifications.

- We lead the offering off with a son of the \$475,000 multiple-time breed leader in registrations, Home Town, that like his famous sire, offers an elite combination of phenotypic quality and numerical balance that finds 20 traits in the top 25% or better.
- Offers the third highest (tied) \$C value among the Angus bulls in this offering.
- Posts individual performance ratio of 105 for YW.
- Dam posts progeny ratios of 1@105 for YW.
- The dam of lot 1 came to Wheeler at the side of her dam, who also produced lot 2 in this offering, when Will selected the pair from the 2022 Pollard Farms Sale.
- A full sister to the third dam of lot 1 by Consensus sold to Wheeler Farms in the 2014 Denim and Diamonds Sale in Denver.
- The foundation fourth dam of lot 1 was the \$19,000 selection of ZWT from the 2016 Pollard female sale and her third-dam, Ever Entense 4038, was the \$60,000 selection of Turner Farms and Rimrock Ranches through the 2008 Limestone, LLC Sale, tracing to Ever Entense 491G, the \$320,000 one-time record-selling full interest female.
- Ranks in the top 2% for \$AXH; top 3% for \$G and \$AXJ; top 4% for MARB, \$B and \$C; top 10% for \$F; top 15% for WW, YW, CW, RE, \$W and PAP; top 20% for MILK, DOC and MW; top 25% for RADG, Angle and CEM.

- Selling 1/2 interest and Spring possession.
- Lot 83 is going to play a large roll in the future of Wheeler Farms Hereford herd after his successful show career that included being named a Division Champion at the 2024 NAILE and a class winner at the 2025 FWSS.
- The dam of lot 83 has been a top income generator for Grimmel Girls Show Cattle and is a prototypical Hereford cow.
- Full sibs to lot 83 include the \$25,000 high selling heifer in the Fall 2023 Grimmel Girls Sale that sold to Oklahoma as well as the \$10,500 second top-selling heifer in the 2025 Spring Grimmel Girls Sale and the herd sires, Landmark and Trademark. All told, maternal sibs to lot 83 have averaged \$18,000 in Grimmel Sales.
- Offers the second highest (tied) Teat EPD among the Hereford bulls in this offering.
- Dam posts progeny ratios of 5@100 for WW.
- Ranks in the top 23% for SC; top 25% for REA.

MATURE RUSTIC AND BANKROLL SONS

- This big-spread growth bull was named Grand Champion Horned Hereford Bull at the 2024 State Fair of Oklahoma in his only time shown.
- This powerful individual is sure to add pounds to any calf crop while improving phenotype.
- Offers the highest WW EPD; highest YW EPD; highest RE PED; and second highest Milk EPD among the Hereford bulls in this offering.
- Dam posts progeny ratios of 2@101 for WW.
- Ranks in the top 2% for REA, YW and MG; top 4% for WW; top 5% for MILK; top 7% for SC; top 18% for CW.
