Auctioneer
Cody Lowderman.....309-313-2171

Ringmen
Noah Benedict.....217-372-8009
Cody Crum.....217-248-7282

Sale Manager
Kevin Babbs.....618-322-5880

Sale Day Phone
.....217-774-3939

Directions to the Sale
Go East on Illinois State Highway 16 heading out of Shelbyville. The United Producers barn is located on the North side of Highway 16.

ATTENTION JUNIORS...
While you are shopping for this year's heifer at today's sale, remember the Heart of America Hereford Association offers awards for heifers purchased out of this sale. In order to qualify, your heifer will have to win one of the following:

PRIZE MONEY
CHAMPION: ***$50***
RESERVE CHAMPION: ***$25***
CLASS WINNER: ***$15***

One show per exhibitor per show season. Please contact Kevin Babbs if you have won any of the above so we can get you paid, and we can recognize you at the sale.

Terms of the Sale
Each animal will be sold to the highest bidder. The auctioneer will settle any disputes as to bids. All cattle are to be paid for by the purchaser immediately after the sale.

Guarantee
Cattle sell under the terms and conditions of the American Hereford Association. ***EPD's are current as of 10-1-26.***

Liability
Each animal will be at the buyer's risk as soon as the animal is sold. Precautions will be taken for the welfare of the cattle sold. Neither the owner nor the sale staff can be held responsible for accidents.

Registration Certificates
It is the buyer's responsibility to give the clerks the correct name and address for transferring purchased animals. Certificates will be mailed from the American Hereford Association at the seller's expense.

Health
Health papers will be furnished for each animal sold.

Catalog Material
All announcements at the sale by the owners or the auctioneer concerning the cattle will take precedence over statements in the sale catalog.

Kevin Babbs, as sale manager, acts only as an agent for the sellers and has no responsibilities other than those involved in conducting the sale.

A stout-made, attractive Long Range son that catches your eye from the profile. He offers the kind of rugged build, shape and substance we like in a herd bull, while still maintaining plenty of eye appeal. Even more exciting is the cow family behind him – his dam traces back to one of our favorite cow families on the farm, a family we have relied on for years to produce functional, productive cattle. A bull with the look and pedigree to make an impact in the pasture and leave his mark in the replacement pen. *Consigned by J. Lidy Herefords, John Lidy, Jewett, IL, 217-821-9991.*

This coming three-year-old was the calf on the champion cow/calf at 2024 Illinois State Fair Junior show,reserve in the open and champion at Iowa State Fair where he pressed the scale down to 710# at a little over five months of age. His mother, sired by prominent, is good uddered, dark red and resides in the Brent Behrends herd in San Jose. If you are looking to add growth without increasing birth weight, look no further. I have too many closely related animals and too many bulls around my place at the moment. He's dark red, homo polled and ready to go to work this spring. *Consigned by Cole Farms, Bryan Cole, Roberts, IL, 217-249-4656.*

Stylish April heifer here sired by the KAT bull, I leased from Buddy Edenburn. Good on her feet and legs, and more than adequate from behind in terms of thickness. She, too, is long and sleek through her front one-third which something the show ring is demanding these days. Her mother is a top five cow at our place. Noah Benedict was through the other day and it didn't take him long to find her. She has produced a herd bull, a replacement and this gal. Normally, we would be feeding and showing one like this ourselves. But we are cutting back the string to account for showing pigs as well. I truly think this one will just keep getting better everyday. *Consigned by Cole Farms, Bryan Cole, Roberts, IL, 217-249-4656.*

Bred Heifers

AHA GE-EPD

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement.

Each animal tested is recognized with the AHA GE-EPD logo.

Out of a cow family we know and trust, this heifer goes back to a cow we bought at this sale that has turned into one of the most reliable females on the farm. By our Apple Ridge herd bull, she is sound, correctly constructed, and offers plenty of eye appeal. One we hate to part with. She was AI'ed to Profound 44041 on July 30, and checked safe to that date. Due May 8, 2027. *Consigned by J. Lidy Herefords, John Lidy, Jewett, IL, 217-821-9991.*

2512 is exactly what we had in mind when we bred her mother to "Gunsmoke". Going back to Arlyn Rabideau's popular "World Class" cow on the bottom side, 2512 pairs her mother's maternal functionality with excellent carcass traits. She is high performing, feminine, and flexible on the move, coupled with her EPD profile makes her a versatile breeding piece. She is confirmed AI bred to On Demand due 1/3/27. *Consigned by Tjardes Farms, Jeremy Tjardes, Foosland, IL, 217-417-5014.*

This is a high quality female with time tested breeding behind her. Out of the highly popular Copper Candi bull, and our most proven donor cow. She was pasture exposed to SLC 132 New Way 14M, then Hoffman High Standard 4451. Calving date will determine for sure but believed safe to Hoffman High Standard, a past high seller from Hoffman Ranch. Approx due date end of March. *Consigned by Stumpf Land and Cattle, Lucas Stumpf, Columbia, IL, 618-830-097.*

Rose has a tremendous pedigree of some of the most influential cattle in the last few years. She brings it to you in a package that is easy fleshing and maternal. She was AI bred on 5-18-2026 to /S Profound 44041ET (44558745). This bull will sire easy fleshing functional cattle that are going to be sought after for years. She was then pasture exposed to our cleanup bull Crutchers Benton 5012 (44662234). Preg check was done too late to tell whether it is an AI or pasture bred, I feel like it is an AI pregnancy. *Consigned by Crutcher Livestock, Craig Crutcher, Montrose, IL, 815-289-2855.*

The work is done on this one! Sharona is an exciting young cow out of an up and coming donor for us from Bar A in Texas. Huge middled, big feet and super correct all wrapped up in a pretty fronted package. Everyone knows how good these Perfecto cows can be and with Catapult and Kelly from Coyote Ridge on the bottom side of her pedigree, she is built for the long haul. Make sure you check out her udder on sale day, it is picture perfect! Her September bull calf out of Churchill Sherman 4113M was born unassisted at 82 pounds and has been off to the races since day one. This cow will last a long time and produce a pile of heavy, good looking calves. *Consigned by S5 Cattle Company, Erik Stollard, Sullivan, IL, 217-358-6386.*

Catalina is a cow that will make you a great income producer for a long time. She is extremely maternal coming from one of the most famous cow families on the bottom side, Remitall Catalina 24H. Follow that by throwing in some of NJW's most famous donor cows, you have a cow that you will love to have in your pasture. Looking at this young two-year-old you can see that longevity is built into her. Sound at the ground, feminine, and an ideal udder. All of this is just a bonus if you look at her On Demand heifer calf born 9-20-2026. This heifer calf is what everyone is after genetically. The On Demand offspring have been some of the most sought after genetics in the last couple of years. I hate to let this young pair go, but you have to sell cattle that people want to buy. *Consigned by Crutcher Livestock, Craig Crutcher, Montrose, IL, 815 289 2855.*

HEREFORD $CHB© ADVANTAGE

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

VISIT **HEREFORDADVANTAGE.COM** TO GET STARTED TODAY

REQUIREMENTS

- Source and age verification
- Genetic merit
  - *Minimum of 50% Hereford genetics*
  - *Bull battery ranking in the top 50% of breed for $CHB index (bull battery average)*
  - Two rounds of vaccinations prior to shipping
    - *2 doses of 7-way, 8-way or 9-way clostridial*
    - *2 doses respiratory modified live*
- BQA certification

BENEFITS

- Genetic improvement tool
  - *Sire EPD and profit index summary*
- Added market exposure
  - *Free listing at HerefordMarketplace.com*
- Enrollment cost $3.25/head (verification + eID tag)

Thank you to all the buyers and bidders in our annual sales.

We appreciate your support!

THE POWER OF

GENOMICALLY ENHANCED EPDS

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. To the right is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA TRAIT	ACCURACY IMPROVEMENT	EFFECTIVE PROGENY NUMBER INCREASE*
CALVING EASE	0.09	17
BIRTH WEIGHT	0.12	8
WEANING WEIGHT	0.14	12
YEARLING WEIGHT	0.16	9
SCROTAL CIRCUMFERENCE	0.17	6
MATURE COW WEIGHT	0.12	4
UDDER SUSPENSION	0.17	7
TEAT SIZE	0.17	7
CARCASS WEIGHT	0.11	3
FAT	0.08	2
RIB-EYE AREA	0.07	2
MARBLING	0.10	3

** Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.*

Each animal tested is recognized with the AHA GE-EPD logo.
