WELCOME TO VALUE WORLD!

HOME RAISED STRAIGHT HEREFORD STEERS

★★ Brand New This Year ★★

In order to insure the very highest total value possible, we are identifying altitude safe and "heart healthy" protected DNA scopes on each lot selling. This is new, it is exciting, and it is valuable!

To demonstrate just how leading-edge DESERT ★ MART is, here is a direct quote from the Director of Bullseye GX, "I probably should have led with this part, but this group of (your) bulls has been the best Jumonji protection results I've ever seen." Dustin went on to say that the sale bulls offer a heart failure protection over 500% more than an average herd! We believe Dustin will be here sale day to answer any questions you may have about this breakthrough revelation.

DESERT MART

GENERAL INFORMATION

TERMS AND TRANSPORTATION

Each animal will be sold to the highest bidder and the auctioneer will settle any disputes as to bids. Terms are cash at the time of purchase or one-half down and the remaining balance due at the time of delivery. If you so desire, we will care for your purchase for up to 30 days at our risk and our expense. It is our desire to make all deliveries and receive any remaining payments prior to December 19, 2026. Free delivery on the bulls anywhere within the continental United States on total bull purchases of \$5,000. If you bring your own trailer and health certificates can be written sale day, there will be a \$125 rebate per bull you haul home. Note: Due to changing health requirements on bulls, please check your state's health requirements; if there are any questions, contact us so that we may assist you with delivery.

GUARANTEE AND LIABILITY

Customer satisfaction is our primary concern. Every effort has been made to ensure complete genetic prepotency and purity. All Sale Cattle are guaranteed free of known genetic recessives; any exceptions will be clearly identified. All coming twos and fall yearlings have been fertility tested and scrotal measured by our veterinarian. Every bull selling carries our guarantee: If a bull fails in any way to meet your expectations for two full years from time of purchase, (1) send him to the auction barn and

notify us of the salvage check; (2) then at your option we will either replace the bull; or (3) you will receive the difference between the purchase price and the salvage check as credit in our next bull sale. All cattle that have horns will be so designated. The same goes for cattle that are polled. Scurred cattle will also be identified. Bulls with scurs do not have real horns and should not sire cattle with horns any more than a smooth polled bull would. All persons attending the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents or further guarantees.

WINTERING ARRANGEMENTS

At buyer's option, all coming two-year-old bulls will be wintered at a cost of 100/head/month. All fall yearlings and weaned bull calves will be wintered at seller's expense! Since each individual carries the full 2-year guarantee, seller assumes full risk.

HEALTH

All sale cattle will be health approved to go to any state, however, certain states may require additional health tests which may not be able to be written sale day.

ACCOMMODATIONS

Excellent accommodations are available in Buffalo, Casper and Kaycee. For assistance with motels or additional travel, please call 307-738-2443.

Join the sale, FROM ANYWHERE.

This sale will be broadcast live through LiveAg.

REGISTER BEFORE SALE DAY:

1. Visit bid.live-ag.com (scan the code)
2. Create an account or log in
3. Register to bid before sale day by requesting a buyer number for this sale

DESERT ★ MART

Dear Cattle Producers,

Welcome to our 45th Annual Production Sale, the DESERT ★ MART

VALUE WORLD *Sale*

Wow! Is there ever a lot of “noise” out there in the cattle industry! It seems that whatever can distract and confuse is constantly thrown at the everyday rancher. But, we have the solution:

★★★★ Use a bull program geared for the long haul. Yes, we are nearing our 125th year of producing registered Hereford bulls. Yes, that means every cycle, every challenge has been and will continue to be met!

★★★★ Use a bull program geared for specific bull needs.

- Need a better heifer bull? ... We got 'em!
- Need an increase pigment bull? ... We got 'em!
- Need a maternal powerhouse bull? ... We got 'em!
- Need a sure-fire carcass bull? ... We got 'em!
- Need a dominant all-points bull? ... We got 'em!

★★★★ Use a bull program based on a foundation of range-toughened cows. Where cows that don't get spoiled or excused; That take care of business year after year, and only then are they considered of Great Value!

★★★★ Use a bull program geared to radically taking great care of each and every customer!

So, study the catalog, ask us any questions you may have, and then enjoy a REAL HEREFORD BULL SALE EVENT!

In Christ,

The DESERT ★ MART Crew

DESERT MART

★ The Improved DESERT CARCASS RATIO ★

In our ongoing pursuit of providing the most accurate and practical data possible; we have updated and expanded our total approach to carcass information. To accomplish this ever-increasing valuable tool, we are now including carcass weight and carcass leanness (yield grade) into our comprehensive **DCR**. As our industry evolves into premiums offered on carcass weight while curbing excess fat, we believe this improved approach will benefit all our value-based customers. In short, you will not find a better, more accurate carcass indicator than what **DCR** offers!

This new **DCR** data is derived by assigning a whole number value to each of the five carcass EPDs. After adding these together an individual's score is compared to the breed average for the sum of the five carcass EPD measurements. Therefore, if an individual **DCR** score is 120; this simply means that individual comprehensive carcass value is 20% higher than the average Hereford. This is new, this is exciting, this is valuable!

DCR: 120

INTRODUCING BULLSEYE GX!

♥ *Each bull in the sale is scored by* ♥
**DNA testing for altitude and feedlot health/
performance. Altitude ranking stated as:**

- ▲ Not recommended for high altitude
- ▲▲ Average recommended for high altitude
- ▲▲▲ Highest recommended for high altitude

Feedlot health/performance stated as:

- P** Average protection
- PP** Above average protection
- PPP** Highest protection

REAL CATTLE WORK IN THE REAL WORLD!

All the sale cattle have been raised on native range with no creep feed. After weaning, all bulls are developed on a growth ration and long hay with plenty of exercise and exposure to all of Mother Nature's elements.

PERFORMANCE RECORDS

Our herd has been enrolled in the American Hereford Association's TPR Performance Program for over 60 years. We are putting out individual performance information except actual birth weights in the catalog expressed strictly as EPDs. While all the registered cattle have ratio information, the latest research shows that Expected Progeny Differences for young bulls may be as much as nine times more accurate for selections than ratios. Present weights and any additional information requested will be available sale day.

MATERNAL STRENGTH

It has been determined that maternal traits are the most highly valued economic traits in the cattle industry. Milk EPD is the calves' weaning advantage in pounds expected from a bull's daughters through milk production. Milk plus growth EPDs indicate the advantage in pounds that the same daughters will transmit through both their milk and growth qualities. We have been pioneers in stressing the importance of maternal strength. You are assured of superior milking replacements when using bulls with high Maternal EPDs.

CARCASS ABILITY

Possibly no herd has done more long-term documented carcass work. We had the kids 4-H steers tested and are proud to report that of the three steers we have tested by a son of Golden Achiever they have averaged the following carcass excellence:
3 Steers: Backfat: 0.3; Yield Grade: 1.9; Quality Grade: Choice; Ribeye Area: 18 sq.in. We don't believe any breed or any program can produce more superior, consistent carcasses than these!

BIRTH WEIGHT EPD

We are giving each lot an amount of stars above the birth weight EPD box to designate whether bulls can be comfortably used on different kinds of cows. This explanation is as follows:

- ★ Indicates a birth weight tendency for mature cows
- ★★ Indicates birth weight for all cows and larger heifers
- ★★★ Indicates that birth weight should be acceptable for all heifers and cows

SPECIAL NOTE:

Footnotes. Again this year, we are giving a brief description of each lot. This is to provide more insight to those folks who may not be able to attend and bid in person.

- Stop! Let's discuss Christi a minute. She is the grandam of Lot 89. Her daughter is 128 ET, and she is currently nursing her 14th calf!
- So, 18-year-old Christi and 15-year-old 128 are the kind! All those consistent trouble-free years to assist you to make money! And...we have not even discussed Rocket Fuel's still active 7-year-old mother and still active 11-year-old grandam!
