

3rd Annual

GKB CATTLE & BARBER RANCH

SPRING BULL SALE

in Desdemona

12 NOON, THURSDAY, MARCH 20, 2025

GKB Cattle Sale Facility • Desdemona, Texas

Fall Long Yearling to 2-year-old Horned & Polled Hereford Bulls

2-year-old Red Angus Bulls

GKB cattle

Barber RANCH

3rd Annual

GKB CATTLE & BARBER RANCH SPRING BULL SALE

in Desdemona

12 NOON, THURSDAY, MARCH 20

GKB Cattle Sale Facility • Desdemona, Texas

GPS Address: 7440 TX 16, Desdemona, TX 76445

lots 1–64	GKB Cattle Hereford Bulls
lots 101–130	Barber Ranch Hereford Bulls
lots 201–210	GKB Cattle Red Angus Bulls

Sale schedule

3.20.2025

The sale bulls will be at the GKB Cattle Sale Headquarters in Desdemona, Texas, for viewing beginning Monday, March 17th. If you would like to view the bulls prior to that day, please contact either GKB Cattle or Barber Ranch. You are more than welcome to view the bulls at either ranch at your convenience.

THURSDAY, MARCH 20

Doughnuts, juice and coffee will be available all morning.

Lunch will be served at 11 a.m.

Sale begins at 12 noon.

GKB CATTLE & BARBER RANCH SALE TERMS & CONDITIONS

TERMS: Cash or check. Cattle will be sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by the purchaser during or immediately following the sale and will not be released until after settlement has been made. Each animal will be at the purchaser's risk immediately after it is sold.

HEALTH: The health of the cattle selling is excellent. Each animal will be accompanied by an individual health certificate for immediate interstate shipment. ***Note:*** If bulls should go to a state that requires additional testing, bulls will be delivered to the new owner after testing is completed.

GUARANTEE: Unless stated otherwise, each bull will sell under the Suggested Terms and Conditions of his respective breed association.

BREEDING GUARANTEE: Bulls sold in this sale are fertility tested and are guaranteed by the owners to be breeders, provided they are properly handled and cared for by the purchaser. Any bull failing to breed after a trial of six months may be returned to the seller ***if in good condition***. The seller reserves the right to try said bull for six months, and if he proves a breeder to return him to the buyer at buyer's expense. If the bull proves a non-breeder, the bull will be replaced or credit will be issued for the next year's sale at the purchase price minus salvage value of the bull. Seller is not liable for bulls lost due to injury or death.

ANNOUNCEMENTS: Announcements made sale day from the auction block will take precedence over statements in the catalog or other advertising. We reserve the right to withdraw any sale lot not meeting our specifications prior to sale time.

LIABILITY: All persons who attend the sale do so at their own risk. Neither the owners nor any other persons connected with the sale assume liability, legal or otherwise, for accidents or loss of property. As the sale manager, Layton Auction Services, LLC is only an agent for the seller and has no responsibilities other than those involved in conducting the sale.

GKB Cattle and Barber Ranch reserve the right to collect, freeze and use semen within their respective herds on any bull sold in this sale. Semen collection would be done at the seller's expense and the buyer's convenience.

• • • • •

GKB Cattle and Barber Ranch reserve all cloning rights on all bulls selling.

Welcome to GKB Cattle!

GARY & KATHY BUCHHOLZ

Dear Friends,

It is with great pleasure that we welcome you to our Third Annual Bull Sale with Barber Ranch. GKB Cattle and the Barber Family have worked diligently together to create an offering that we are both proud of. We have enjoyed our friendship and partnership with Barbers over the past years and are excited to have the opportunity to team together and offer these Hereford bulls to customers. In addition to our Hereford bulls, GKB Cattle is excited to add 10 two-year-old Red Angus bulls to the lineup this year.

We are very proud of the bulls that make up this offering, as the quality runs deep. Phenotypically, they are a stout and rugged set of bulls that are ready to go to work in the pasture. The bulls have been through a stringent selection process, where emphasis is put on structural integrity, muscularity, real-world performance, and fleshing ease. It has also always remained our priority that they must start with good feet and legs.

When making our selections at GKB, we have always placed a strong emphasis on the maternal aspect of our herd sire battery. We believe that every great breeding bull is backed by an even better female. Maternal stability increases performance, fertility, and longevity, all of which are essential traits of the modern-day beef production cycle. Through focusing on superior sire selection, we can achieve these traits.

Our program is geared toward producing cattle that are profitable for the entire industry. We have an extensive ET and AI program that gives us the ability to be very selective with our matings, enabling us to continue to produce superior genetics. We also utilize individual performance records, ultrasound and testing on our bulls to ensure that what we offer is something we can stand behind. We put a large emphasis on producing bulls with exceptional EPDs and are able to create ***a great selection of both calving ease and performance bulls*** to choose from.

Come early and view what we have to offer your program. Videos of the sale bulls are available online. We are offering herd bulls for purebred operations as well as bulls designed to perform in commercial herds throughout the United States.

We truly believe that the individuals in this offering have a ton of potential to be sires with true impact and influence within the beef business. Your success is our success! We want to also thank all our customers for your continued support, as we wouldn't be able to do this without you. We can't wait to see you in Desdemona!

Gary and Kathy Buchholz
GKB Cattle

We want to give a heartfelt thank you to ALL of our employees for giving their support and dedication to our entire operation. Without the GKB Cattle employees we could not do what we do in the cattle industry. We want to say a BIG THANK YOU! — Gary & Kathy Buchholz

HOW TO WATCH THE SALE & BID ONLINE

LiveAg PUREBRED
www.live-ag.com
(817) 533-6699

- **Go to www.live-ag.com**
  Click on the "Purebred" tab under "Auctions," located at the top right of the screen. Select the auction of choice.
- **Log in / Create an account**
  Select "log in or create an account to bid." Log in with your email and password, or click "create an account." Fill out the required fields to bid online. Agree to the terms of service and finish with the "register" button.
- **Register to bid**
  Once logged in and a sale of choice has been selected, click "register to bid." Agree to terms and conditions and click the "register" button. Pending request will be approved in a timely manner.

LiveAuctions.TV
www.liveauctions.tv
(682) 816-4900
techsupport@liveauctions.tv

- **Go to www.liveauctions.tv**
  Click"Register to Bid" on the top right corner. Fill out the required information, agree to the terms and finish with the "register" button.
- **Register for a buyer number**
  From the home page or the "all auctions" page, choose the sale. Click the "request a buyer number" button. Verify your email address. To verify your mobile number, click "send token." Follow the steps to authorize your mobile device and click "submit."
- **Bid successfully**
  You will only need to complete the two-step verification one time. You will then be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen.

Using EPDs as Selection Tools

Cattle Evaluations use the term Expected Progeny Difference (EPD) to express genetic transmitting ability of a sire for the various traits listed. An EPD is a prediction of how future progeny of a sire are expected to perform in a particular trait, relative to other sires in the analysis. The key word is "difference." The EPD itself does not imply "good" or "bad" performance; rather, the EPD gives a prediction of the average "difference" to expect in the performance of a sire's progeny relative to other sires in the same analysis.

The EPD for a given trait on each animal in the analysis is compared to every other animal in the analysis. The EPD is reported as a plus or minus value in the unit which the trait is measured. EPD accuracies on non-parent animals are relatively low and are not reported in this catalog. The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit indexes. AHA's genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal.

Hereford EPDs and $ Indexes included in our sale catalog are:

Calving Ease Direct (CED) Based on calving ease scores and birth weights and measured on a percentage. CED EPD indicates the influence of the sire on calving ease in females calving at two years of age. For example, if sire A has a CED EPD of 6 and sire B has a CED EPD of –2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight EPD (BW) An indicator trait for calving ease, measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty.

Weaning Weight EPD (WW) An estimate of pre-weaning growth, measured in pounds.

Yearling Weight EPD (YW) An estimate of post-weaning growth, measured in pounds.

Scrotal Circumference EPD (SC) Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty.

Sustained Cow Fertility (SCF) A prediction of a cow's ability to continue to calve from three years of age through 12 years of age, given she calved as a two-year-old. The EPD is expressed as a deviation in the proportion of the 10 possible calvings to 12 years old, expressed as a probability. For example, the daughters of a bull with a 30 EPD would have the genetic potential to have one more calf by age twelve than the daughters from a bull with a 20 EPD.

Maternal Milk EPD (Milk) The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk + Growth EPD (M+G) Reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. It is equal to one-half the sire's weaning weight EPD, plus all of his Milk EPD.

Udder Suspension (Uddr) Udder EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

Teat Size (Teat) Teat EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

Carcass EPDs

Carcass records are adjusted to an age constant endpoint. Therefore, selection based on any or all of the carcass merit EPD is comparable among cattle at the same age endpoint. For example, selection based on increased EPD for carcass weight will result in heavier carcass weights than those animals with lower EPD for carcass weights when the cattle are harvested at the same age.

Carcass Weight EPD (CW) Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight.

Ribeye Area EPD (REA) REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

American Hereford Assn. EPD Averages for 2023- & 2024-born calves:

CED	BW	WW	YW	SC	SCF	Milk	M+G	Uddr	Teat
+3.4	+2.6	+56	+90	+1.0	+17.2	+27	+55	+1.3	+1.3

CW	REA	Marb	BMI$	BII$	CHB$
+71	+.46	+.14	+369	+445	+121

Marbling Score (Marb) Marbling EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat (IMF) based on carcass measurements of harvested cattle. Breeding cattle with higher Marb EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

$Profit Indexes

Baldy Maternal Index (BMI$) The Baldy Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed toward Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BII$) The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed toward a commodity beef market, since Certified Hereford Beef does not accept Brahman-influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk, which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake but a positive weighting on Carcass Weight, which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Ribeye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers who use Hereford bulls on Brahman-influenced cows.

Certified Hereford Beef Index (CHB$) The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well, there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Ribeye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

EPDs are updated weekly by the American Hereford Association, so we cannot guarantee the EPDs listed in the catalog. The Hereford EPDs printed are from the 2/10/25 evaluation of the AHA. View up-to-date EPDs at www.hereford.org.

AHA GE-EPD **Genomic-Enhanced EPDs** The accuracy of breeding values in young cattle is enhanced with DNA testing. GE-EPDs are included to assist you in making the best selections for your breeding program.

Actual birth weight is included in addition to adjusted 205-day weaning weight, adjusted 365-day yearling weight, adjusted 365-day ribeye area, and adjusted 365-day intramuscular fat score. Scrotal circumference will be available on the sale supplement.

Pigmentation scores are included for Left Eye, Right Eye and Scrotal.

	LE%	RE%	Scr%
Pigment:	100	100	90

THE POWER OF
GENOMICALLY ENHANCED EPDS

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. To the right is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

AHA TRAIT	ACCURACY IMPROVEMENT	EFFECTIVE PROGENY NUMBER INCREASE*
CALVING EASE	0.09	17
BIRTH WEIGHT	0.12	8
WEANING WEIGHT	0.14	12
YEARLING WEIGHT	0.16	9
SCROTAL CIRCUMFERENCE	0.17	6
MATURE COW WEIGHT	0.12	4
UDDER SUSPENSION	0.17	7
TEAT SIZE	0.17	7
CARCASS WEIGHT	0.11	3
FAT	0.08	2
RIB-EYE AREA	0.07	2
MARBLING	0.10	3

** Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.*

Each animal tested is recognized with the AHA GE-EPD logo.

HEREFORD $CHB© ADVANTAGE

An industry-changing program from the American Hereford Association and IMI Global to verify and add value to Hereford-influenced feeder cattle with superior genetics, health and management.

REQUIREMENTS

Source and age verification | Genetic merit: ***Minimum of 50% Hereford genetics and bull battery ranking in the top 50% of breed for $CHB index (bull battery average)*** | Two rounds of vaccinations prior to shipping: ***2 doses of 7-way, 8-way or 9-way clostridial, 2 doses respiratory modified live*** | BQA certification

BENEFITS

Genetic improvement tool | ***Sire EPD and profit index summary*** | Added market exposure | ***Free listing at HerefordMarketplace.com*** | Enrollment cost $3.25/head (verification + eID tag)

VISIT HEREFORDADVANTAGE.COM TO GET STARTED TODAY

- L100 is an exciting horned herd bull prospect sired by C GKB Guardian 1015 ET and out of the prolific donor BR Belle 4082 ET. Belle is the dam of the NWSS two-time Supreme Champion Hereford BR Belle Air 6011 and the Cattlemen's Congress Grand Champion Horned bull BR ER Big Country 007 ET along with many other renowned sires and dams.
- Individually, L100 is a powerfully made bull who is built correct from the ground up with an excellent skeletal design and impeccable structure that gives him a tremendous herd bull look in a dark red, short-marked and fully pigmented package. He is an eye-appealing and athletic bull with big feet and legs, wide based, big topped and long sided with excellent testicular development.
- When you study this bull on the hoof and combine that with his GE-EPD profile and pedigree, it is plain to see that L100 is an intriguing herd bull prospect that offers tremendous growth with superior maternal traits and outstanding carcass merit.
- Posted individual scan ratios of 108 for REA and 158 for IMF.
- L100 is the only bull in the entire AHA database with his combination of WW, SC, Udder, Teat, REA, Marb, BMI and CHB.
- Ranks in the top 1% of the breed for WW, Teat, REA and CHB; top 2% for Udder, CW and BII; top 3% for YW, SC and BMI; top 6% for Marb; top 7% for M&G.

+89	+.89	+.15	+531	+635	+147		100	100	100

- Homozygous Polled
- Check out the style, balance and power in this homozygous polled son of the ST Genetics roster member SHF Houston D287 H086. His dam is the prolific donor Boyd 31Z Rita 7208, the full sister to the $105,000 AI sire Boyd 31Z Blueprint 6153.
- L149 offers a huge EPD spread from birth weight to yearling weight combined with tremendous maternal traits and carcass merit. He is a deep ribbed, easy fleshing bull with extra muscle shape and impeccable structural design in an eye-appealing, dark red, short-marked, fully pigmented package.
- Ranks in the top 1% of the breed for WW; top 2% for BMI and BII; top 3% for YW, SCF, M&G and REA; top 6% for CW; top 7% for SC; top 9% for Udder.

Hughes Trailers

Building Custom Trailers and Flatbeds since 2005

25900 I-27, Canyon, Texas • (806) 499-3113

Call for Pricing or Availability

Website Updated Daily

www.HughesRanchTrailers.com

Attention, Bull Buyers

WIN A HUGHES TRAILER!

A custom built trailer will be given away at the conclusion of the sale. Your buyer number will be entered in a drawing each time you purchase a bull in this sale. The number drawn will be the recipient of a custom built trailer manufactured by Hughes Trailers in Canyon, Texas. The more you buy, the more chances you have to win! Need not be present to win.

Welcome from Barber Ranch!

Fellow Cattlemen and Cattlewomen,

Welcome to the 3rd Annual GKB Cattle & Barber Ranch Spring Bull Sale! We are excited about the set that we are bringing to Desdemona this year. We are extremely fortunate to be partners with some of the best people in the cattle industry—Gary and Kathy Buchholz of GKB Cattle. We encourage you to come out to the GKB headquarters in Desdemona, Texas, and view this set in person.

Barber Ranch has been family owned and operated for 121 years now. Three generations are currently involved in the day-to-day operations of the ranch. Our passion as a family has always been the cattle business and specifically Hereford cattle. It has remained our goal over the years to raise functional, efficient, maternal and useful cattle for all parts of the industry. We enjoy standing at the backdrop as much as anyone, but the true heart of our operation focuses on the needs of the commercial cattlemen.

These bulls in the offering have surfaced to the top through phenotype, EPDs, genotype and performance. All of the Hereford bulls selling are DNA tested and have genomically enhanced EPDs, exponentially improving their accuracy to predict how their progeny will perform before ever turning them out. In addition to their EPD profiles, all bulls have been ultrasounded to help predict carcass traits and performance on the rail. We have provided this data to make it easier to select the best genetics for your operation. Phenotypically, we have continued to select cattle with eye appeal and great phenotype. We breed our cattle to have more muscle, body, bone and style than the typical Hereford herd.

Barber Ranch bulls are developed mostly on native grass pastures and are provided a limited supplemental ration so they are in the proper condition to start working immediately. There is a variety of horned, polled and homozygous polled bulls to choose from in this offering.

We encourage you to invest with confidence, knowing that ***your purchases are backed by a 100% satisfaction guarantee***. With the opportunity to buy from two of the most prominent US breeding programs in one place, there is no better time to strengthen your herd. Selecting high performing, efficient bulls to sire your next calf crop is an important economic decision that ***YOU*** can control.

We are so thankful for all of our past and future customers. Please feel free to reach out to any member of the Barber family or sale staff to help make your selections. Whether you can join us in person or plan to purchase from afar, we are committed to helping you make the best decisions. We look forward to seeing you in Desdemona!

- SELLING ONE-HALF INTEREST, ONE-HALF POSSESSION.
- Homozygous Polled
- Unique herd bull prospect!
- Record-setting yearling weight at Barber Ranch: actual weight at 364 days was 1545 lbs., with an actual birth weight of 81 lbs.
- Tradewinds has an ultra-powerful build with a striking profile.
- His sire, Rare Air, may be the best calving ease bull we've raised to date at Barber Ranch and is known for the incredible daughters he sires.
- Tradewinds is out of a first-calf heifer that is ultra feminine, perfect uddered, big ribbed, and goggle eyed. She stems from the Dew Drop 3304 matriarch donor at Express Ranches that is a proven producer of quality.
- Ranks in the top 2% of the breed for WW and YW; top 4% for REA; top 6% for CW and BII; top 8% for SCF and BMI; top 9% for Udder; top 12% for Teat; top 15% for CHB; top 18% for MCW.

- 3265 is a powerful, red-necked horned bull out of a direct daughter of Amber 6089, the dam of the flushmates we showed this past year that had three different flushmates win a National show.
- Paramount has added power, bone and look in a very athletic package.
- He will add serious pounds without sacrificing carcass merit.
- Ranks in the top 2% of the breed for WW; top 3% for CW; top 5% for YW and REA; top 7% for SC and M&G; top 11% for CHB; top 16% for BII; top 19% for BMI.
- GE-EPDs should be available by sale day.

- Fire & Ice's combination of build, look, power and low birth weight makes him one of the more unique bulls in the offering and definitely one that will add quality and eye appeal to any herd.
- This Rare Air son is out of a full sister to Virginia Gaea 4073, a Hutton daughter that's been a staple of our herd for the past decade. 4073 was such a great producer that we flushed her dam, 7023, when she was 14 years old to get several full sisters to her (including 3338's dam). This bull combines some stacked genetics and offers a great blend of eye appeal and maternal traits.
- Ranks in the top 9% of the breed for DMI and Udder; top 12% for Teat; top 16% for MCW; top 19% for Marb.

- Check out the tremendous style and power in this horned son of Genesis J005.
- His dam is a maternal sister to Belle Air 6011 and Big Country and is sired by Z311. Maternal granddam, Belle 4082, has been one of the dominant donor dams for the past decade, producing multiple National Champions.
- 3326 is a big footed, big scrotaled bull with extra top and muscle shape that is athletic and structurally correct.
- Study 3326's numerical package combined with his phenotype and pedigree, and it is plain to see that he is one of the top horned bull prospects to sell this spring.
- Ranks in the top 1% of the breed for BMI and BII; top 2% for SCF; top 3% for Marb; top 5% for CHB; top 9% for CW; top 12% for Teat; top 16% for SC.

ProS	HB	GM
+106	+53	+52

ProS — Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid.

HB — HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning.

GM — GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the postweaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid.

Act. BW	Adj. WW	Adj. YW	Adj. IMF	Adj. REA
90			2.39	13.31

- Sells as a commercial bull.
- 15L3 is an impressive two-year-old Red Angus bull whose dam was the 2023 NWSS Grand Champion Red Angus Female in both the junior and open shows for Hadley Hartman. Unfortunately, this bull's sire is not parent verified, so 15L3 sells as a commercial bull.
- Take advantage of the situation to acquire a great bull who is stout made, phenotypically pleasing and athletic. Your cows will never know, and he will sire tremendous offspring.

STARBAR® INHIBIDOR™ INSECTICIDAL POUR-ON

LARVICIDE, ADULTICIDE AND SYNERGIST COMBINE TO PROTECT CATTLE

Starbar® Inhibidor™ Insecticidal Pour-On is a ready-to-use, triple action solution to defeat insects because we know good things come in threes.
