Welcome

Welcome to the 2024 Coyote Ridge Ranch Private Treaty bull offering. These are rancher ready bulls that will cover your needs. All are backed by the full bull guarantee and 41 years of producing cattle geared toward increasing your bottom line.

CRR bulls are sold private treaty giving you the opportunity to find what you need within your budget without the pressure of an auction. We work to help you find genetics that best suit your operation – and for a reasonable price. Complete performance data including carcass ultra sound information is available.

We are a three-generation family operation located on the high plains of Colorado in the shadow of the Rocky Mountains. We run a real-world western range program developed to add to your bottom line. Our long-term program has a proven track record of calving ease, maternal efficiency and superior growth backed by carcass data and feedyard results. Our herd consists of dependable problem free cows that work for a living. This philosophy has enabled us to consistently provide bulls for commercial ranchers as well as genetics for reputable seedstock breeders.

The bulls are fertility tested, vaccinated and are BVD-PI free. Bulls noted MYO were raised until weaning by Mayo Ridge Ranch, family members Katie Cornelius and Lee Mayo of Scott City, Kan.

Select the right bulls now and we will deliver to you in time for breeding season.

Look to CRR for your source of commercial bulls in volume and herdsires. Call any time for details. We'll be here when you need us—generation after generation.

As bulls are chosen they will be noted "SOLD" on the website.

Sale Information

CRR PHILOSOPHY AND PRACTICES

- Bulls are not creep fed, no artificial inflated weights.
- Bulls are developed in a 40-acre pasture on a ration of ground grass and alfalfa hay with 8 lb. of corn. They are sound, so you can expect many years of productivity.
- Bulls are backed by a problem free, excellent uddered cow herd. These mamas are hardworking and good looking.
- All cattle are backed by CRR 40 years of actual performance records and dam production records-real honest weights along with computer estimates of progeny performance (EPDs). EPDs are genomically enhanced and DNA verified.
- Performance is documented by over 15 years of retained ownership and feedlot data on CRR steers-excellent weight gain, feed conversion and net profit.
- CRR reserves the right to retain an interest in selected bulls as noted.

EPDs AND PERFORMANCE

Expected progeny differences (EPDs) are computer generated statistical predictions or estimates of expected performance of future progeny, not guarantees of performance. EPDs are updated weekly by the American Hereford Association as data is entered into the system. The EPDs in this catalog are from the 2/19/2024 report. EPDs printed are genomically enhanced to increase accuracy using DNA technology and are noted as such. We selected the most relevant data to include. Complete up to date EPDs can be viewed anytime online at www.hereford.org. These computer-generated predictions along with generations of actual performance records and your visual evaluation of the cattle provide the complete tools to select bulls that fit your needs.

CRR guarantees an acceptable PAP for high altitude. Because CRR is at 5,000 feet, we recommend you test bulls at your ranch after they have been at 6,000 feet for three weeks. CRR will reimburse you for cost.

GENETICS

The bulls have been DNA tested for parentage and any genetic abnormalities identified by the American Hereford Association. Any carriers of a recessive genetic marker is noted.

HYBRID VIGOR — CROSSBREEDING

The advantage of hybrid vigor is real — a Hereford bull on black or red angus cows will increase weaning weights 30-50 pounds per calf on average. The retained baldy females are more fertile, more efficient and last longer. The research, but better yet our customers, report an additional \$50 in net income per cow **per year** when they used Hereford bulls on Angus cows. Do the math. Can you afford to give up \$50 per cow?

CUSTOMER SERVICE

We will take the time to learn about your operation and provide any additional information to help you find what best suits your needs and is within your budget. We will deliver the bulls in time for spring breeding season. We will try to assist you in marketing your calves through our alliance with HRC Feedyard and various programs through the Hereford association Contact Lee Mayo at HRC Feed Yards with information about your calves – (Lee) 620-874-0051, lee@hrcfeedyards.com.

GUARANTEE

The bulls are fully guaranteed for the first breeding season absent evidence of extreme neglect or abuse. The bulls are fertility tested, vaccinated and are tested BVD-PI free. An injured or deceased bull will be replaced with a comparable bull less salvage value if a bull is available. If a replacement bull is not available, you will receive a sale credit for your cost less salvage to use in the future. We appreciate your business. If you don't make money with CRR bulls, we won't make money with CRR bulls. And we understand that.

- Herd bull alert! Member of our champion pen in Denver. The best way to describe 321 is complete and fault-free. A great footed excellent structured bull that is masculine and attractive. On paper 321 has a big birth to yearling spread, excellent UDDER and TEAT values and a high CHB index. He is short marked and homozygous polled.

Phenomenal 2-year-old dam who will make her mark at Coyote Ridge.

- Herd bull alert! The anchor to our Denver pen. It is very difficult to find or breed the traits 338 brings to the table. He is a calving ease bred bull with high growth numbers, exceptional carcass values and profit indexes. His phenotype matches his genomics. A truly masculine bull that is built well and is loaded with shape and body mass. Short marked and heavily pigmented. His dam may be our best herd bull producing cow.

- 307 is a powerhouse beef bull out of a 2-year-old that weaned over 60% of her body weight. He was one of our highest ratiating bulls at weaning and yearling. Massive, masculine, and powerful in a sound moving athletic package. Keep his daughters and retain his sons at the feedyard. A true rancher's bull!
- All Baldy bulls were sired by an Angus selected from a high-altitude operation. He had a PAP of 36.

- This bull is flat good! He reads great from the ground up. Good foot, big ribbed and plenty of muscle mass and shape. He's out of an 8-year-old cow who is both stout and maternal. His paternal heifer mates are perfect uddered and epitomize why the Hereford/Angus cross is so valuable to the beef industry.

- Herd bull alert! The youngster in this year's offering that has as much upside potential as any. A high growth bull with excellent ratios at weaning and yearling. A great structured bull that has the design and build to produce high value progeny that stand the test of time. You can travel a lot of miles to find a true performance bull that is this complete and fault free.

PYRAMID CANDOR 9139

CSC 502 6209 GOLD CREEK 824

At Coyote Ridge Ranch we've built a cowherd that is a model for the Hereford breed. Cow families are stacked for generations to produce high quality, functional, maternal cattle that work for the entire beef industry. Behind every CRR bull is a cow family that will stand the test of time, because we strongly believe...
