Cattlemen's Delight

HEREFORD SALE

WELCOME

Welcome to the 6th annual Cattlemen's Delight Female Focus Sale. The Jackson County Fairgrounds location and facility work well for our group, and the consignor families have put together an even better offering this year. The sale will feature top female prospects from the heart of each breeding program. Our herds vary in size, but all 4 of the consigning families set out to bring you their best in 2026. Consignments include many examples of fresh genetics, with early opportunities to try something new. There are many high quality spring born heifer calves, including several show heifer prospects. We also dug deep in our replacement heifer pens, to bring you high quality females that represent the heart of each of our breeding programs. Many of the bred females will be confirmed bred to A.I. dates, to industry leading sires. Several heifers will carry natural service, to high caliber herd sires. We are offering a variety of calving due dates on the bred heifers, to help fit your desired calving windows. Once again by popular demand, this year's sale also features a few handpicked show steer prospects.

As cattlemen, we have seen prices of feeder cattle, fed cattle, and even market cows, reach new highs in 2026! The next few years will reward cattle folks who own young, productive females, with the best genetics. If you want to capitalize on the real opportunities in the beef business, it's time to own the cow herd factory, and build AND improve the quality of your herd. The Hereford breed continues to see tremendous demand for top end females! In addition, Herefords are being shown by young cattlemen and women at unprecedented levels! Lots of families have discovered the docility, performance, and show ring presence of Hereford cattle in recent years. The Hereford Jr. Nationals, in Madison, WI in July, 2026 was a great example of what the Hereford breed represents!

Today's Hereford cattle are also doing well in the pasture, in the feed yard, and on the rail. Hereford females are fertile, maternal in every way, with built in longevity and feed efficiency. Hereford breeders have paid attention to genomic data, and have made decisions to improve the final product immensely. If you are raising cattle for commercial use, use Hereford genetics with confidence.

You will observe diversity in the pedigrees offered, as each herd operates with different goals and resources. We believe this is an advantage for the prospective buyers, and we look forward to helping you find the cattle in the offering that will help move your herd forward. Feel free to call on any of the Cattlemen's Delight consignors with questions. More information, including individual animal videos, will be made available prior to the sale on Facebook and Instagram. Some additional genomic profiles and pregnancy check information will also be made available during late September.

We invite you to an informal social and viewing on Friday, October 2nd from 5-8 P.M. If you would like to view particular lots prior to October 2nd, please arrange that with the individual owner. Each consignor would be happy to show you the cattle ahead of the sale, upon appointment. Obviously, we want you to be able to bid and buy with confidence, so please feel free to reach out with any requests.

Thank you for your interest in our breeding programs and we look forward to seeing you at the 6th annual Cattlemen's Delight sale.

The Cattlemen's Delight Group, including the Starck, Freidrich, Reed and Boettcher families.

TERMS and CONDITIONS:

TERMS: Cash or check. Each animal sold to the highest bidder. The auctioneer shall settle any disputes as to bids. All cattle are to be paid for by purchasers during or immediately after the sale and will not be released until settlement has been made, unless other arrangements have been made in advance. No cattle will be transferred until paid for in full.

GUARANTEE: All cattle will sell under the terms and guarantees recommended by the American Hereford Association.

LIABILITY: Each animal will be at the purchaser's risk immediately after the animal is sold. They will be cared for, free of charge, for a reasonable length of time after the sale, but at the purchaser's risk.

ANNOUNCEMENTS: Sale day announcements take precedence over printed matter in the book. The consignors reserve the right to withdraw any sale lot not meeting our specifications prior to sale time. EPDs in the book were current at press time.

REGISTRATION CERTIFICATES: Registration Certificates will be transferred to the buyer at the seller's expense. Each buyer must be sure to give the clerk his proper name and address for making transfers. All calves born before the sale will be registered by the sellers. Information will be provided by the seller for the buyer to register unborn calves. Certificates for calves born to bred cattle purchased are the responsibility of the buyer.

Accident/Illness:

The sale management, the consignors and the owner of the grounds will not be responsible in any case for the condition of the grounds, the behavior of the animals or illness and disclaim any liability in the event of personal accident, sickness, or property loss.

HERE'S HOW IT WORKS

Go to www.LiveAuctions.tv. Please note that you do NOT need an account to watch the auction, but you do need to register an account and request a buyer number if you wish to bid. If you have not created a new account since September 1st, 2020 you will need to click

"Register" in the top right corner of the homepage and create a new account. Once you have completed the form on this registration page and hit the "Register" button you will receive an e-mail with a place to click on to verify you have entered a valid e-mail address. Once you have completed this registration process, find the auction you are interested in on the homepage and click on it (sales are listed in chronological order). You should then see a box that says Login. Now that you have an account with LiveAuctions just type in your E-mail Address and Password. You will now see a hyperlink at the top that says "Request a Buyer Number". The first time you request your first buyer number on LiveAuctions it will send you a text message with a verification code in it. Type the code from the text message into the area requiring it and you will then see your name along with a buyer number listed at the top of the webpage where the live video is and you will be able to bid. You will only have to complete this two-step verification process one time. After that you will be able to immediately request a buyer number on any auction without verification through an e-mail or text message again.

LiveAuctions no longer requires an app. If you wish to view/register/bid on a smartphone just type LiveAuctions.tv in whatever web browser you use. The registration process is the same as it is on a desktop computer, but the website is built mobile friendly. Click on the three lines in the top right corner to access the menus.

Bidders who are successful in making purchases will be contacted by the ranch after the auction to settle payment and discover your shipping plans.

If you need help registering to bid or to view the auction please call Technical Support at (682) 816-4900 or e-mail us at TechSupport@LiveAuctions.tv.

Starck Century Farm

Lots 1-5

STARCK CENTURY FARM

7501 280th St.
Cadott, WI 54727Rick, Jenny, Ricki,
and Ryder Starck
Rick's cell: 715-313-3234
starckfarm@gmail.com

The Starck family is grateful to be part of the Cattlemen's Delight group again this year. Starck Century Farm started long ago in 1862. Jenny and I took over the farm in 1987. We realized from the beginning using top AI sires and mapping our cattle was the fastest way to improve our genetics and increase production. We continue that same practice today in our registered Hereford herd. We exclusively use 100% artificial insemination on all our animals which allows us to match specific sire phenotype and desired EPDs to individual females to build a solid, functional animal that can be bred for replacement, production, or show,

We have been part of the whole herd DNA program since 2018 and have used that technology to provide us with valuable information that assists us with our breeding decisions. It also guarantees our cattle to be free of any known genetic defects.

We are proud of our genetic program and are pleased our past customers share the same high level of satisfaction with our cattle. We are confident in our genetics and believe our cattle will work in any herd!

Thank you for considering our cattle for your next purchase in building or expanding your herd. Give us a call with any questions or stop out and view the cattle for yourself.

mfriedrich@yahoo.com

Windy Hills Herefords was founded in 2004 in Roberts, WI, by Mark and Angie Friedrich, alongside their three daughters, Jess, Kim, and Kelley. Today, we manage a herd of 60 cows, dedicated to producing high-quality cattle that meet the diverse needs of our customers.

As our family grows, we're thrilled to have four grandchildren who are developing a love for the cattle and showing them at various events. Over the years, our children and grandchildren have proudly exhibited our cattle at county fairs, state fairs, and national shows.

We've also enjoyed hosting farm tours for our state association, college judging teams, and other various visitors. As we present our cattle in this sale, we're excited to showcase the genetics we're so proud of and are confident that you'll be just as impressed with them as we are.

- Good, growthy steer with plenty of quality and feeding potential.
- Moderate framed, deep bodied steer that carries good muscle from end to end.

Reed Stock Farm

Lots 21-32

REED STOCK FARM

10788 240th St. East
Hampton, MN 55031

Jeff and Bonnie Reed
and family
612-819-1368

jbreedstockfarm@gmail.com

In October 2025, we were recognized
as 50-year Golden Breeders at the AHA
Annual meeting in Kansas City.

Reed Stock Farm donated the heifer
for the Minnesota Gopher the Purple
sale in December to benefit the
Minnesota Junior Hereford Breeders!

Reed Stock Farm started in the Polled Hereford business in 1972 with a purchased show heifer. In 1980 Jeff and Bonnie married and continued raising Polled Hereford cattle. Our three children were very active in showing cattle as they grew up. Our now married adult children, and our grandchildren are very involved in raising and showing Hereford cattle. We have shown at many local, state and national shows. We are all very involved in 4-H and in livestock related organizations. We have sold in consignment sales but most of our bulls and females have been sold private treaty at the farm. We operate 90 registered Hereford cows featuring AI and flushing to top bulls. We also own high quality natural service sires which produce the core of our cow herd and many of the sale cattle. Our herd is built on female fertility and maternal strength, with high growth and performance. We strive to produce hard working, high performance cattle that will also perform in the show ring. All of our cattle are also bred with feedlot performance potential in mind.

- Featured Lot! 326L and her 624P heifer calf are difficult to part with! They have unique pedigrees, excellent EPD profiles, and are phenotypic standouts.
- 326L's bull calf last year was the first breeding bull sold out of the bull pen, and we believe she could be successfully mated to a variety of bulls. We are flushing her, prior to the sale day!
- AI bred to EF MF Longest Yard 192 228J ET on May 28th. Due March 7th, 2027.
- Study this pair. Lots of genetic potential, represented in both females.

The Boettcher Family
Butch 715-828-7271
Brandon 715-533-2470
Garritt 715-586-0033
Andrew Timm 507-606-1269

The Boettcher Family is honored to be part of the Cattlemen's Delight again this year. We bring an offering of powerful heifer calves and productive young females from the cow families that have built and sustained our breeding program. We have been breeding "Performance cattle with eye appeal" backed by balanced EPDs for 60 years. Our program emphasizes cattle that have the ability to generate profits in a wide variety of production systems and environments. We select proven AI sires and natural service pasture sires that best complement our cow families. Our breeding goals are substantiated through

performance measurements of birth, weaning, and yearling weights as well as feedlot performance and strict reproductive evaluation. We are humbled by the success stories of how our cattle have performed for our customers and the number of repeat buyers we see each year. Your evaluation of our offering is appreciated and we look forward to seeing you on October 3rd in Black River Falls.

- We start our offering with a perfect representation of what cattle in this sale can produce!!
- 17 N's dam was purchased from the Starck Family in the 2022 sale and has become a Dam of Distinction for us. This sharp profiling Ridge 254G daughter should have outstanding udder quality and produce calves with eye-appeal and productivity.
- Shown this summer, this heifer has the attitude and style to make a great front pasture cow.
- Bred AI on April 21, 2026, to KCF Bennett Monument J338. Vet checked safe with a heifer calf due Jan. 29, 2027.
- Imagine this potential cow/calf pair for next summer's show season!! Free of all known defects by pedigree.
- Homozygous polled & OCV.

- Nimble 67N is a dark red, powerful heifer sired by BCC Sunrise 243K.
- Her strong maternal influence is backed by the Ned and Jan Ward program thru Vaquero 25C and the Forever 25X cow we purchased as a calf in their production sale.
- Nimble was bred AI and is due to calve Feb. 12, 2027, with a heifer calf by the current breed changing sire, Bar JZ On Demand.
- This lot could be a total cow family foundation and very hard for us to sell as it represents many years of building performance cattle with eye appeal. Free of all known genetic defects by pedigree.
- OCV.

- Nadine 84N is hard to overlook, combining a feminine front end, excellent balance, and plenty of maternal value.
- This fully pigmented Perks Hero daughter originates from a low maintenance cow family with her 12-year-old granddam still in production.
- Pasture exposed to Brookview 163H Noble 09N from May 8 to July 11. Vet checked safe for a late March calf.
- Free of all known genetic defects by pedigree & OCV.

- Each year we select a young cow with a heifer calf at side to showcase 60 years of breeding Polled Herefords at Brookview Acres. It is always a cow that really hurts to sell, and this year is no exception.
- Lavender is just a 3 yr. old out of the breed legend, Victor 719T, and our Dam of Distinction, Gleam 10G, that is a Churchill Red Bull out of a Hometown 10Y dam.
- This is a breeding tool with a birthweight to yearling EPD spread of +1.4 to +100.
- Bred AI on May 7, 2026, to CMF 1720 Gold Rush 569G. Vet checked safe with a probable heifer calf due Feb. 13, 2027.
- Free of all known genetic defects by pedigree & OCV.

- Herd starter right here! A very well-known pedigree going back to the great NJW program.
- Poppy exhibits a ton of potential with her length of body, boldness of rib, and femininity that tie this heifer into a complete package.
- Her hind leg set is ideal for the current show ring trends. She is "first year exhibitor tame" and ready to show.
- Halter broke, free of all known genetic defects by pedigree, & OCV.

- Penny 45P is an exciting heifer from our powerful Prominent 21G daughter that represents our highest performance cow family.
- Combine those genetics with the ABS calving ease specialist, BCC Sunrise 243K, and one gets a real breeding tool type of heifer. Don't miss her style, balance, and thickness if one likes them showy as well as productive.
- She was born twin to another heifer and was raised single on a two-year-old foster dam.
- Halter broke, free of all known genetic defects by pedigree, & OCV.

- Pixel is a fresh, attractive profiling show steer prospect with a very calm disposition that will be an enjoyable junior project.
- He offers the muscle, bone, and design of a modern show steer. He is sound in his structure and can move free and easy around the show ring.
- Halter broke.

Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit (\$) indexes. AHA's genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal. Animals that have a genomic profile will be denoted with a GE-EPD logo.

The current suite of Hereford EPDs and \$ indexes includes:

Calving Ease — Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Dry Matter Intake (DMI)

The Dry Matter Intake EPD predicts the daily consumption of pounds of feed. For example, if sire A has a DMI EPD of 1.1 and sire B has a DMI EPD of 0.1, you would expect sire B's progeny, if comparably mated, to consume on average 1 pound of feed less per day.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

Sustained Cow Fertility (SCF)

The AHA's new Sustained Cow Fertility EPD (SCF) is a prediction of a cow's ability to continue to calve from three years of age through twelve years of age, given she calved as a two-year-old. The EPD is expressed as a deviation in the proportion of the ten-possible calving's to twelve years old expressed as a probability. For example, the daughters of a bull with a 30 EPD would have the genetic potential to have one more calf by age twelve than the daughters from a bull with a 20 EPD. In other words, the daughters from the 30 EPD bull would have a 10% greater probability of having one more calf than the bull with a 20 EPD. This is equivalent to saying that the daughters are 10% more likely to remain in the herd to age 12.

Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth (M&G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull's daughters with a M&G EPD of 10 lb. (29 minus 10 = 19 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

Maternal Calving Ease (MCE)

MCE EPD predicts how easily a sire's daughters will calve at 2 years of age and is measured on a percentage. For example, if sire A has a MCE EPD of 7 and sire B has a CE EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

Mature Cow Weight (MCW)

The MCW EPD was designed to help breeders select sires that will either increase or decrease mature size of cows in the herd. The trait was developed after years of cow weight data collection and the EPD relates directly to the maintenance requirements of a cow herd. For example, if sire A has a MCW EPD of 100 and sire B has an EPD of 85, then you would expect the females of sire A, if mated to similar cows, to be 15 lb. heavier at mature size.

Udder Suspension (UDDR)

UDDR EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale.

Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a UDDR EPD of 0.4, and sire B has a UDDR EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score better udder suspension in daughters of sire A, compared to sire B.

Teat Size (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

Carcass Weight (CW)

Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

Rib Fat (FAT)

The FAT EPD reflects differences in adjusted 365-day, 12th-rib fat thickness based on carcass measurements of harvested cattle. Sires with low, or negative FAT EPDs are expected to produce leaner progeny than sires with higher EPDs. Ultrasound measures are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been

shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldie Maternal Index (BMI\$)

The Baldie Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS)

The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

Certified Hereford Beef Index (CHBS)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

Starck Century Farm
7501 280th St
Cadott, WI 54727

Cattlemen's Delight

HEREFORD SALE

Saturday, October 3, 2026

12 P.M. • Noon

Selling over 45 Registered Herefords!

Jackson County Fairgrounds — Black River Falls, Wisc.

Brought to you by:

Starck Century Farm — Cadott, Wisc.

Windy Hills Herefords — Roberts, Wisc.

Reed Stock Farm — Hampton, Minn.

Boettcher's Brookview Acres — Fairchild, Wisc.
