Fellow Breeders,

It is our pleasure and honor to welcome all our friends to the annual bull sale. We feel we have a tremendous set of cattle for you this year. We are honored to have you here. We started in the polled Hereford business in 1961 with an FFA project for Keith. This small start grew from one or two bulls a year to what we now produce. We have always carried out a very rigid culling program. We cull based on profitability. Our cows must be productive, heavy milkers and trouble free. We calve the cow herd on the range with little to no help. In addition, our cows must perform and continue to perform. We have 30 Dams of Distinction — that is 15% of the cow herd that calves on time and weans a big calf every year (one of the top 10 herds in the Hereford breed). We believe that having a cow herd that breeds up fast with little cost is an economic advantage to the producer.

We now run 200 moderate framed, good doing polled Hereford cows and 60 South Devon cows. We have always based our program on the range man and strive to produce the kind of cattle that will make him money. Our goal is to produce cattle that are reasonably sized at birth and grow rapidly although some may be listed as heifer bulls in the catalog these bulls will work on any cows, the calves will have the performance you need regardless of birth weight. Performance testing has helped our customers and our program as well. We expect our cattle to be thick, easy keeping cattle that will milk heavy, raise a big calf and survive winter, with minimal feed and expense, while breeding back and raising a good calf. Our cattle are efficiency experts. Our severe environment culls inefficient poor fleshing cattle. They raise a good calf with less feed in a drought year that helps the bottom line.

We have worked for 61 years and believe that we have a cross section of cattle that you will like. Elkington cattle will produce high performing calves and easy fleshing high producing cows with depth and length that will work anywhere on less feed. Our bulls live in harsh conditions and are developed on a high roughage ration at high elevation between 5,500 and 7,500 feet elevation giving them the needed capacity to breed cows longer into their lives. Our operation has always been a family operation, as it still is. Brent and I are still partners and Layne and his son Eric are an important part of the operation.

Keith Elkington

#### Terms:

Terms of the sale are cash or check payable during or after the sale and before cattle will be released. Cattle will not be transferred until paid in full. We do understand if you need time to pay or need financing help, contact Keith. Elkington Polled Herefords and South Devons will be retaining a full revenue sharing  $\frac{1}{4}$  semen interest on all bulls, unless stated otherwise. Any semen collected will be completed prior to delivery or loading out. This does not include salvage, all salvage value is the buyers.

#### Sight Unseen Guarantee:

We guarantee you to be satisfied with your sight unseen purchase or we will replace the animal with one of equal value if possible, if not we will refund the purchase price.

#### Transportation:

Idaho Falls has a good freeway coming from Montana as well as Utah. It is also served by an airport. Delta Airlines, Allegiant Air and United serve the Idaho Falls Airport. There are cars to rent at the airport, although we would be glad to send a car to pick you up if you desire. Call 208-681-0765, 681-0768 or 208-521-1774 on your arrival. Thank you.

#### Liabilities:

All persons attending the sale do so at their own risk. The owners, auctioneers, management and staff assume no liabilities legal or otherwise for any accident that may occur.

#### Health:

The cattle are in excellent health and are run under strict health standards. All females are calf hood vaccinated for brucellosis. All sale animals will have papers to go anywhere in the U.S., on sale day. All bulls are virgin bulls unless noted otherwise. International health certificates will be done at our cost and cattle will be guaranteed to pass. Visit [elkingtonpolledherefords.com](http://elkingtonpolledherefords.com) for a list of vaccinations.

## Traits You Can Count On at Elkingtons

Our goal is to produce cattle that are reasonably sized at birth and grow rapidly although some may be listed as heifer bulls in the catalog these bulls will work on any cows, the calves will have the performance you need regardless of birth weight.

Average BW on Hereford bulls selling in this sale is 75 lb. and with most of them being out of short gestation sires with high (+CED EPDs) the calves will wean off as good as the calves that are born at 90 to 100 lb. with less complications at birth.

#### Warranties:

When the bull is sold we no longer take responsibility for death loss. Insurance will be available sale day if interested. We guarantee all animals to be breeders. All bulls have had fertility exams and are guaranteed to be fertile. If you should have a problem, please contact us and we will make it right. We do ask that you let us know within six months and that you take good care of the animal. We do reserve the right to use the bull on a healthy cow to see if she will conceive by him. If the bull does not get the cow with calf, we will replace the bull with one of equal value or credit in a future sale.

#### Delivery:

- Free delivery west of the Mississippi on a \$4,000 purchase of bulls. Pay half east of the Mississippi on bulls.
- Pay up to \$250 a head toward delivery on heifer purchases of \$2,500 or more nationwide.
- Pay half delivery costs on heifers \$4,000 or more nationwide.
- International cattle will be shipped to an agreeable port.

#### Volume Buyer Discount:

A discount of 5% will be offered if any single purchase buys 9 or more head for an average price of \$3,000 or more.

#### Pick Up Discount:

If you pick up your bull within three days of your purchase, we will discount \$50 per bull and \$25 per registered heifer lot. **This discount excludes commercial females. All bulls will be Trich tested and ready for transfer on sale day. No cattle will be loaded until the sale is completed.** You may bring your brand and brand your bull in our chute if you would like. (It might take some extra time sale day but we can try to accommodate.)

- 4G son we use AI on the heifers and turn him out with bigger birth weight cows to correct birth weights. We have several calf crops from him and they have super pigment and low birth with superior growth. On 105 calves Pathfinder 842B has a BW ratio of 97%, a weaning ratio of 104%, and a yearling ratio of 105%. His calves are born light and grow extra good. With WW and YW numbers in the top 5% of the breed his calves put the weight on. A great moderate 4G son that excels in economic traits and pigment to produce excellent calves. We have calved 11 of his daughters out and they have awesome udders with perfectly placed teats and great milk flow.
- Trait leader for CE, BW, WW, YW, MM, M&G, CW, REA, CHB
- Semen available from Elkington Polled Herefords

- This is the longest bull with the best depth of body we have ever seen. His calves are born light with great vigor and grow like crazy. Averaging over 100 calves, his calves average 82 lb., at birth. We love how long and thick his calves are, and he throws awesome power. His daughters' milk like crazy with good upright udders and little teats.

- A great son of Sure Bet. He is put together extremely well.
- We love his first calves. We got 100 calves out of him with an average weight of 67 lb. We never touched a calf, and they had great vigor.
- He is AI bred to some of these heifers.
- Several sons sell, and several heifers are AI bred to him.

- This is a bull we feel will replace his sire. He has super performance with a 68 lb. birth weight. His calves are just awesome with pigment being dark and thick. Stock Broker 005C has had 50 calves born to him with a BW Ratio of 97, Weaning Ratio of 105, and yearling ratio on those calves of 102. A great heifer bull with a CE number and BW number in the top 1% of the breed. Stock Broker has spectacular carcass numbers and his bull calves have ratios on REA of 107% and marbling ratios of 125%. Stock Broker excels in making producers extra money with numbers in the top 5% of the breed in all of the indexes.
- Semen available from Elkington Polled Herefords

- 999G is the future of the Pathfinder line at Elkington Polled Herefords. He puts it all together and his calves really show it. He is athletic, his calves are small at birth and grow incredibly fast. He's a Trait Leader in five traits with a BW number of 0 and a YW of 115 he shows great spread and so do his offspring.

- We raised this bull and when we lost 419E, in mid-season, we turned Elker out. His calves are born small and grow very fast. We have been pleased with them you will like the style and longevity this bull will add to your program.

- When we ran out of semen on 705T, this bull is his replacement. His calves are super easy calving with a great amount of growth. You will be impressed with his calves and the udders on his future daughters. We have sold 1,000 straws of commercial semen on this bull with positive feedback of very few assisted births.

VIEW ONLINE:

Real-time bidding is available via the Internet for this sale. Live audio and live video will allow buyers to bid on animals just as if they were present at the sale. Buyer account must be created prior to the sale. Please visit [www.liveauctions.tv](http://www.liveauctions.tv) to create an account and request a buyer number.

Contact Katie Colyer at 208-599-2962

*These South Devon bulls are great this year. We believe you can get all the advantages of a continental without the problems that often come with them. They have enormous ribeye's and great thickness it's been a pleasurer watching this calf crop grow. Come look them up, they are meat wagons!*

**POLLED HEREFORD HEIFERS**

These heifers have been culled at weaning, yearling and breeding time. This is a good set of heifers. They all are of the caliber we strive to produce. They should produce good calves for their new owners for many years to come. They have never been pushed in their lives just foraged developed, no silage and very little grain mostly oats. They were raised in high altitude pastures on the open range, not on irrigated pastures. They will continue to grow for several years. They were vaccinated with Breed back 10, 8-way, and Multimin 90 last spring before breeding. This fall they received Dextomax injectable, Clean UP 2 pour on, 8 way and Guardian, to prevent scours in their calves. They will need one more dose of Guardian before calving. They are pregnancy checked and are guaranteed safe in calf. Some of the heifers were AI bred then cleaned up with EPHR ELKER LEADER 321J from 6/15/24 to 9/20/24 and some were pasture exposed to two bulls, Lot 580L, EBS ELKER EXTRA 580L, Black South Devon; and Lot 526L, EPHR ELKER BROKER 526L, Polled Hereford bull from 7/1/24 to 9/24/24 these heifers should not start calving until April 10, 2025.

- Bred on 6/1/24 to 705T, then pasture exposed to 156H from 6/15/24 to 9/20/24.
- BW 70 lb.
- Weights: WW 700 lb.; YW 955 lb.

EBS MISS ELKER ETREEM 506L

We are excited to offer this outstanding group of heifers for sale. They are high-quality animals, and we believe they will provide buyers with long term profitability. They have depth, length and style, just the kind we need. These heifers were AI bred on 6/1/24 to either CIMARRON TRIUMPH 705T (192390) or EBS ELKER EZCALVER 156H (217891) both top-five bulls in the breed for calving ease, then pasture exposed to EBS ELKER EZCALVER 156H (217891) or to Lot 580L, EBS ELKER EXTRA 580L, Black South Devon and Lot 526L, EPHR ELKER BROKER 526L, Polled Hereford from 7/1/24 to 9/24/24.
