150 PERFORMANCE BULLS - 106 HEREFORDS - 44 RED ANGUS

DVAuction
Broadcasting Real-Time Auctions

WHERE QUALITY, PHENOTYPE & PERFORMANCE MEET MATERNAL

TERMS & GUARANTEES

Select now. Pay in full at selection time. Or pay half down on your bulls and at delivery time we will collect the last payment on your purchase. Bulls are guaranteed breeders. We guarantee the bulls through the first breeding season. During the second season if something happens we will work with you as much as we possibly can.

FEED & DEVELOPMENT

We believe that our livestock are here to harvest and utilize what others can't. We run our cowherd on dry land native range along with diversified tame grasses and crop aftermath. The bulls are fed on a ration to develop them into sound, functional, usable bulls for big country. They are fed to gain 2.5 lbs. per day. The ration consists of cracked corn, mix of grass hay/barley hay, and corn silage.

HEALTH

- At Birth: Vision 7
- At Branding: Vision 7, Vista Once & Nasal Gen
- Fall Preconditioning: Vision 7 with Somnus, Vista Once, Nasal Gen & Poured for Parasites
- 2 rounds of Foot Rot Vaccine and a pre-breeding shot, poured before delivery.
- Heifers are bangs vaccinated, bred heifers are ultrasound with calving dates and calf sex.
- Bulls will be semen tested and complete fertility exam completed.

DIRECTIONS

We are located 24 miles north of Circle, Montana on Hwy 13 and 5 miles east on Rd. 254. We are 5 miles south of Vida and 5 miles east on 254.

From Richey, stay on Rd 254 for 20 miles west. First 12 miles have been paved. After Red Water river the road turns to gravel. 7 miles of gravel to ranch.

ALL BULLS ARE DNA PROFILED

VIEW VIDEOS ONLINE AT WWW.DVAUCTION.COM

Welcome to our 2024 private treaty sale offering! We are extremely excited about the quality of bulls this year. We have strived hard and pride ourselves in bringing this balanced offering of bulls to you, the commercial men.

As we look back on the challenges and successes that we have seen throughout the past production year we are very humbled. Devastating things have happened to the beef industry in our area. Record numbers of cows taken out of production due to drought, shortages of feed sources, fly issues, and grasshoppers. Given these circumstances, it has created the perfect storm of high percentages of open cattle which have eliminated genetics that cannot withstand diversity. Now more than ever we as an industry need to capitalize off this perfect storm. Diversely bred black cows with an F1 Baldy calf at side is how. These Hereford bulls will do so many important things for those black cows, but the most important part is HETEROSIS. From conception to the rail a Hereford bull on these cows will be the difference. We pride ourselves in these genetics to complement the black industry. DEVELOPED and BRED to make an Angus cow better is the best way to describe what our bulls will do. With the challenges that we have seen, we can sit here and say we are proud of our cowherd. We run both our Hereford and Red Angus cows no different than you the commercial men. We demand them to breed on time and wean a profitable calf. Our cowherd bred up wonderfully with less than 2% opens and with an exceptionally large group in the first cycle again. Come evaluate the bulls and we are more than excited to go drive through these cows and show you our BEERY differences.

Our industry is orientated around a black hide. We have had discussions with order buyers about red hide issues, and most will come back and tell you it is not a red hide discount, it is a quality discount. Many of these Red Angus genetics have given up too much performance that is why they are seeing less value in them. Here at BEERY'S, we understand that our paycheck comes from pounds. Pounds at weaning or pounds on the rail and we demand these reds to perform. We are proud of the Red Angus breed and how they have complimented our foundation. We have bred a group of these Red Angus to be no different than our profitable Hereford cows. Sound, growthy, powerful genetics along without sacrificing maternal traits, which will add dollars at pay day on the baldie side or red side.

By selling these bulls the way we do we must maintain a uniform set from top to bottom. From the first one in the book to the very last one. Along with a more uniform set of bulls they are more affordable, priced for everyone's budget and as always volume discounts. We strive to build relationships with our customers to further our knowledge of how to add value to our customers' calves year after year. Thank you for taking the time to evaluate this offering of true honest bulls bred for you the commercial cowman. As always, we invite you to come out to the ranch for a visit, select your bulls, we will finish wintering and deliver them to your operation in the spring!

Wishing everyone the best production year in 2024!

The Beery Difference

MATERNAL ADVANTAGES

- Each bull offered was raised out of his natural, proven mother.
- Fertility built-in with 98% breed-up over the last two drought-stricken years with 90% calving in the first cycle.
- Desirable calving ease and mothering ability.

PROVEN RECORDS ON PROVEN CATTLE

- **Accurate birth, weaning, and yearling weights**
- **Genomically Tested**
- **You are offered <50% of bull calves born on the ranch.**
- **The balance is being finished with data returned to us.**
 - 106 ranch-raised steers Avg birthdate 4/3/2022
 - Avg in weight on 12/21/2022 735lbs.
 - Avg out weight on 6/6/2023 1416lbs.
 - Cattle Avg 14 months of age
 - **167 days on feed with an ADG of 4.08 lbs.**
 - \$1.18 Avg cost of gain
 - Hot carcass of 904 lbs.
 - Dressed 63.84%
 - Yield Grade 3 with 75% Choice/Prime carcasses

VOLUME ADVANTAGES

- Large contemporary groups throughout our cowherd providing more uniform progeny.
- Large groups of half and three-quarter brothers offering uniformity to volume buyers.

CUSTOMER ADVANTAGES

- Exceptional disposition = lower labor inputs
- Free wintering and delivery
- Full fertility & breeding soundness exam completed before delivery
- Volume Discounts
- Fully guaranteed through the first breeding season against injury, death, or other dissatisfactions.

BULLS POLLED HEREFORD

These bulls were weaned October 12th. We pride ourselves in development and growth. Longevity and soundness is a priority. Beery Polled Herefords have more depth, spring of rib, calving ease, fleshing ability and performance with level udders and small teats - we know what makes life easier. The most affordable in the industry.

Great EPD profile very balanced. Love the dark cherry red color and one of my favorite cow families. Cows that are durable with a ton of volume and rib shape. He expresses great character and shape. If you're into making lasting replacement females or need to tone down a set of females, this bull will do it.

Thick made, deep sided calf with outstanding over-all performance! The best Houston son out of a long-bodied, beautiful uddered, high producing Sensation 028X daughter with a 107 MPPA. She is the dam to herd sires 149J and grandam to herd sire 33J. You will see a lot of her in the pedigree's of this years offering. A cow that is well respected on the ranch. Everything we have used on this cow has worked pretty well and this calf is no exception. He has the complete package. Maternal, carcass, numbers, phenotype. He will add some serious muscle and thickness without adding mature size. HERD BULL PROSPECT!

Here is COMMERCIAL bull that is long bodied, thick topped, athletic and has a great disposition and a phenotype you would appreciate. Dam has a tidy udder clean made, she is dark cherry red with plenty of length. He will produce solid Baldy females and steer calves that will have extra length with plenty of rib shape and will perform and gain in a feedlot.

241L

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animal's retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Customer service is our top priority. We provide top service with free delivery of our bulls after final semen testing. Delivery will occur upon nice weather in April or May.

RED ANGUS

This group of bulls were weaned September 27th. I expect these bulls to be versatile. Calving ease and maternal traits come to the forefront all the while maintaining the balance to be able to provide cattle with the ability to grow and be efficient in their growth. They have been bred with MATERNAL and SOUNDNESS in mind. No creep, just mother's milk, grass and a good mineral program. Honest and true.

STUB HORNED BULLS HEREFORD

These bulls were weaned October 12th. Everyone of the bulls in this offering were born, raised and weaned by their natural mothers, who bred back on time. We pride ourselves in raising these bulls in large, contemporary groups. Take advantage of these modern Herefords and all they have to offer. The "Bald Faced Truth" is that baldy females lead every female sale in the country and are the envy of neighbors. Don't forget - HEREFORD bulls have the best disposition in the business!

He is a smooth fronted, high performing bull with extra skeletal length and a larger outline. His first-calf heifer dam has developed into a big, long, nice uddered female with plenty of volume. These 149J progeny are consistently moderate in their birth-weight and calf easily, yet don't compromise length, frame and growth.

Impressive performance considering his moderate birthweight and being a heifer's first calf! He has that early developing masculinity, balance, strenght of top and muscle shape. Love his broody dam for her udder quality, huge ribcage and maternal productivity. Maternal strength on both sides of the pedigree. His sire 149J's dam is similarly long, deep with small teats and strong apparent milk. 104L (polled bull) is proof of her. Genetically, he charts impressive predictions for growth, maternal calving ease and carcass merit. We think highly of this bull and considering his build and shape. **CONSIDERING RETAINING AN INTEREST & HALF POSSESSION.**

Very attractive, stout son of the exciting horned sire: Nightcap 17J. Nightcap 17J was home raised and sold to Mrnak Herefords from Bowman, ND. This bull is high quality in his structure, with a attractive neck set, level back, muscular hip and correct hind leg. Strong maternal cow family. His grandam is a favorite of ours that lived to be 11-years-old.

Great disposition. Moderately built but has the phenotype that you would appreciate. He has plenty of thickness and has the look of his sire. Pigmentation on both eyes. Out of a smaller framed Distinction daughter, that puts everything into her calves. If you need to down size some cows he would be a great choice without sacrificing quality and performance.

Heaviest weaning weight, horned bull with a WWR of 116, performance driven 45H son out of a proven Sensation 028X daughter that weans big calves year after year. Extra length, added frame, heavy structured, stout made, very impressive beef bull that is sure to add pounds, performance and length of body to any calf crop. Dam has a 104 MPPA. A true powerhouse within the offering.

----	----	----	-----	---------	-----	----------	-----

For as young he is, he has as much visual quality as any in the offering. Curve-bending growth. Moderate birthweight without sacrificing performance. This bull has a combination of balance, structural integrity, muscle shape and center body boldness. Plus, he is really dark colored, red eyed and smooth headed. Strong trait leader for growth, carcass and maternal traits.

RED ANGUS

These bulls were weaned October 12th. We are very proud of this pen of Red Angus bulls. Growth and soundness has been a priority in developing them. Red Angus cows have been a part of our ranch for quite some time. They are expected to thrive in the same environment as the rest of our cows - working mothers who breed back on time and bring in bull and heifer calves that are in demand. The two breeds compliment each other well.

Power and punch! From the day he was born he was a brick and first thing I wrote in my calving book was: HERD BULL! This bull will sire calves that pack on the pounds efficiently, all while keeping them wide pinned and shaped right. Second highest weaning weight bull with a WWR of 121. His dam is gorgeous, the kind and type you would love to have a whole herd of females built like her of.

Great breed character in this Overtime son. He is nice in his lines, sound and balanced. He's designed to make some awesome daughters that will have volume, plenty of fleshing ability with picture perfect udders. These Overtime sons will make a difference by add performance and they have the growth to add pay weight.

KA-CHING.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Hereford bulls increase net profit by \$51 per cow per year.

That's \$20,000 in additional revenue for a typical 400-cow outfit, thanks to increased fertility and herd size.

Herefords are also the efficiency experts, proven to add value to calves in the feedyard — \$30 per head in profitability.

That's real money and real results.

COME HOME TO HEREFORD.

Hereford.org | 816-842-3757

WHOA.

MORE POUNDS. MORE CALVES. MORE PROFIT.

Herefords are known as the efficiency experts for a reason.

Herefords boost pregnancy rates by 7% and add \$30 per head in feedyard profitability in a crossbreeding system.

And Hereford genetics bring unrivaled hybrid vigor, longevity and disposition.
