

HEREFORD NIGHT

IN OKLAHOMA CITY

FRIDAY, JANUARY 8, 2027 | **6 P.M.** | BARN 3 SALE ARENA

HEREFORD NIGHT
IN OKLAHOMA CITY

Dear Hereford breeders and cattle enthusiasts,

Welcome to Hereford Night in OKC and another exciting week at Cattlemen's Congress. On behalf of the American Hereford Association, we are pleased to invite you to join us on Friday, January 8, 2027, at 6 p.m. CST in Oklahoma City for one of the most anticipated Hereford events of the year.

Each January, Hereford breeders from across the country gather in Oklahoma City to reconnect with old friends, build new relationships and celebrate the cattle and people that make this breed so special. Hereford Night in OKC has become much more than a sale. It is a tradition that showcases the strength of our breed, the dedication of our breeders and the bright future of the Hereford industry.

This year's offering is a testament to the commitment and vision of our consignors. From elite herd sire prospects and proven donor females to exciting herd picks and genetic opportunities, the cattle represented in this sale reflect some of the very best genetics the Hereford breed has to offer. Whether you are looking for your next herd bull, a foundational female or an investment in the future of your program, we believe this year's offering presents opportunities for breeders of every size and stage.

The success stories that have emerged from Hereford Night over the years speak for themselves. Many past selections have gone on to make a lasting impact within seedstock and commercial operations alike, proving the value and influence of the genetics showcased through this event.

While the cattle are certainly the centerpiece of the evening, the true strength of Hereford Night in OKC remains the people. The conversations in the barns, the friendships built over generations and the shared commitment to advancing the Hereford breed are what make this event so meaningful year after year.

As part of this year's activities, we are also excited to again host the Commercial Cattlemen's Certified Hereford Beef (CHB) Luncheon on Thursday, January 7, at 11 a.m. The luncheon provides an opportunity for cattlemen alike to enjoy a great meal, watch the pen show and recognize the value Hereford genetics continue to bring to the beef industry.

We invite you to join us in Barn 3, across from the Cowboy Bar, for an outstanding evening of Hereford cattle, fellowship and opportunity. If you are unable to attend in person, the sale will be broadcast live on LiveAuctions.TV, allowing you to view the offering and participate from anywhere.

Thank you to our consignors, buyers, sponsors and supporters who continue to make Hereford Night in OKC a success. Your commitment to the Hereford breed is what drives this event forward each year. We appreciate your support of the American Hereford Association and look forward to seeing you in Oklahoma City for another memorable Hereford Night.

All the best,

Kane Aegerter

SALE TERMS AND CONDITIONS

TERMS and CONDITIONS: The terms of the sale are cash or check payable at the close of the sale and prior to load out unless previous arrangements have been made with the owner or sale manager. Animals will be sold to the highest bidder with the auctioneer settling any disputes. Announcements at the sale by the owner, sale manager or auctioneer will take precedence over statements in the catalog. Each animal becomes the buyer's risk as soon as sold, but will be cared for by the seller until load out or for a reasonable period of time. All transactions will be in U.S. dollars.

GUARANTEE: All cattle will sell under the suggested sale terms and conditions of the American Hereford Association.

HEALTH: Health of the consignments is excellent. Individual health papers will be furnished for shipment in the United States. All animals become the property of the purchaser at the time of sale and we strongly recommend that you insure your purchases. Bulls over one year of age have been fertility tested and will guarantee semen to freeze. Bulls have been trich tested.

INSURANCE: Insurance will be available the evening of the sale.

DELIVERY: Delivery costs and arrangements of sale animals are the responsibility of the purchaser. Sale personnel, consignors, exhibitors and various reputable trucking firms will be on hand to assist with transportation arrangements.

EPDS: The EPDs reported in this catalog are reflective as of Nov. 2, 2026.

ABSTENTEE BIDS: Absentee bids by persons unable to attend the sale may be placed by phone or mail with the sale management, AHA field managers or any of the sale staff.

PAYMENT: Payment for each lot in the 2026 Hereford Night in OKC sale is to be immediately after the sale. The buyers who choose to be billed need to make payment as soon as possible after the sale. Interest will be accrued on unpaid balances starting on February 15, 2027, at the rate of 1.5% per month, 18% annually.

- This female represents breed leading phenotype and genotype to the highest degree. She is big bodied, gorgeous fronted with impeccable structure. Her dam is a valued donor at Boyd Beef. When you combine her tremendous dam with the elite carcass and maternal attributes of New Standard, the results of Myrtle are far reaching as a donor, show heifer and masterpiece cow.
- Selling full interest, retaining one (1) flush of six (6) grade one (1) embryos at the seller's expense and buyers' convenience.

- Well, who would have thought we would be offering Charlie Kirk's sister in Oklahoma City! Kane told us he wanted something special from our program for this sale, so we decided to bring one of our very best.
- This heifer is a direct daughter of Blair 3005, a Guardian daughter who, in our opinion, is quickly becoming one of the strongest donor females in our program. Blair is only a three-year-old cow, but she is already proving herself as an exceptional producer with an exciting future ahead. Lindskov's LT Ranch purchased a ½ embryo interest in her for $75,000 in our 2025 Female Sale.
- Charlie Kirk was her first calf, and he went on to bring in $310,000 at the Mile High Hereford Sale. Her first set of ET calves were sired by Lifetime, and they have certainly lived up to expectations. Lot 6 in our 2026 Female Sale sold for $72,000 to GKB Cattle Company. Her Lifetime-sired bull calf is one we believe could be among the best we have raised, and we'll offer it this February.
- Blair 3005 is an incredible young donor, but we believe this heifer calf has the potential to take things even further than her mother. She combines cow power, phenotype, genetics, and performance data that we are striving to build into the Colyer program.
- If you are looking for an opportunity to tie into the Colyer program and acquire some of our very best genetics, here she is. We believe she has all the pieces to develop into a tremendous donor female and make a lasting impact on the breed.

- BK POINT OF ORDER 6215P ET brings together two powerful maternal programs! Her sire, NJW 119E 142 Proud 35L, is quickly proving his ability to carry forward the famed NJW program's maternal strength while producing highly competitive offspring in the show ring. Her dam, HAPP Kool Aid Points 1218 ET, needs little introduction. She has produced premier herd sires like BK Red River and BK Jet Smooth, along with nine national champions and her sons and daughters are now producing national champions of their own. Here is an opportunity to own an exciting donor prospect backed by generations of proven production!

Lot 4 – WHR J338 333L BEEFMAID 963PET

- A Standout Female with Unmatched Presence, Power, and Breed-Leading Performance! This female is the complete package, combining tremendous depth of rib, deep flanks, square hips, full pigment, and red-to-the-ground color. She commands attention with her powerful phenotype and exceptional maternal strength. Her pedigree features two proven WHR donors, 659F and 593F, adding proven maternal excellence to an already impressive genetic profile.
- A true curve-bending standout, she combines a strong birth-to-weaning-to-yearling growth curve with impressive maternal performance while keeping mature cow weight in check at 81 and carcass weight at 95. Her EPD profile delivers across the board, with outstanding SCF, MM, MG, and MCW values. She boasts 18 EPD traits in the top 25% of the breed, 11 in the top 10%, and ranks in the top 1% for IMF, CHB, BMI, and BII.
- Powerful phenotype, proven maternal genetics, controlled mature size, and elite carcass merit—963P has the credentials to make a lasting impact in any breeding program!
- Homozygous Polled
- Offering ½ interest with no possession or double your money to own 100%. White Hawk will retain the rights to two (2) flushes of six (6) embryos.

- As you study this female on paper and in person, you'll appreciate the impressive set of EPDs she offers, along with her striking double-red eyes, deep body, sound structure, and square hip. 637P is a classy, feminine female with all the pieces to mature into a front-pasture cow. Her sire, Maverick 3058, has taken our program to the next level, while her dam, a daughter of BR Rip Wheeler E092 (full brother to Belle Air 6011), is a front-pasture female in her own right. When you put the genetics, phenotype, and maternal potential together, 637P checks the boxes. She's the kind of female you can build around and be proud to have in your herd. Don't miss her opportunity!
- Be sure to find her in our pen stalls.

- NCC Mirror Image 3054 ET was a popular division champion in the Bred & Owned show this past summer at the JNHE. She is out of a direct daughter of the legendary STAR KKH Mirror Image 286W. Her dam, WF Mirror Image 1300 ET, was selected as the Reserve Champion Polled Hereford Female at OYE in 2023. Much like her mother, 3054 offers a captivating look and powerful build. Her sire, UPS Sensation 2296 ET, has been producing champions for the last decade, and 3054 follows right in that mold.

- NCC PSC Saylor 5030 ET is a a stylish female backed by a pedigree full of champions. Her donor dam NCC Saylor 001 ET has quickly become one of the most prolific phenotype producers in the Hereford breed. The list of high sellers and champions is becoming endless. That list includes NCC Rhea 2058 ET, the 2023 JNHE Reserve Bred and Owned Heifer. She continued her win streak at Cattlemen's Congress when she was selected the 2024 Grand Champion Polled Heifer and finished her campaign as the Tulsa State Fair Supreme Champion Junior Heifer. Other full sisters have claimed titles at the National Western, JNHE, and Reno.

- 204M x Red Hot HEIFER CALF pregnancy. Homozygous Polled mating. 204M is truly an exceptional individual and we are proud to offer this pregnancy by Red Hot. We purchased 204M from our friends at Burns Farms in the spring of 2025. We have been patiently waiting for her coming out party and decided what better place than the National Hereford Sale! Her EPD profile is unreal. She's in the top 1% in nearly ... Everything. 11 traits in the top 1%, 3 traits in the top 2% and an additional 3 traits in the top 5% or better. When you search her EPD profile you can run multiple combinations of CED, BW, WW, YW, UDDR, TEAT, MARB, BMI, CHB and she's the ONLY HEREFORD in the database, bull or female, that offers this unique set of numbers. What truly sets 204M apart though, is that she matches elite figures with top end phenotypic quality. She's the definition of a brood cow. So maternal in her appearance. Massive ribbed and extremely sound on the move. Recently she laid down and had goggle eyed dark red bull calf. Her udder quality is second to none, and her mothering ability is everything we could ask for. Red Hot is one of the most exciting young bulls in the Hereford breed. In our fall Genetic Opportunity Female Sale, the first daughters of Red Hot were a hit! Four ET daughters averaged $22,000. This mating has us fired up. Get in on the ground floor of one of the most unique opportunities to come around in some time. The recip is a 7-year-old Hereford cow with an excellent disposition. Heifer calf is due January 24, 2027.

Sire – JDH JCS RED HOT 43M ET

- Wow! This is a rare opportunity to buy a flush from the top-selling female in the record-breaking Churchill dispersion at $220.000. There have been several requests to buy a flush, and we felt the fairest way was to offer this flush in the National Hereford Sale.
- No other Hereford female has accomplished so much at such a young age. Her mother, 7098, has produced numerous top-selling offspring, and 3121L has the ability to surpass her!
- Her EPD profile offers many mating options to create the next great one!
- She has already produced young sons with the potential to make a huge impact on the breed, including Churchill Arizona, who sold for $220,000 at Churchill's last bull sale. Five sons have sold for an average of $78,000 and 5 daughters have averaged $47,600.
- A rare opportunity to tie into one of the breed's elite Hereford cows. We can't believe we are letting one flush go on her, but here we go! It has the ability to take your program to another level.

- 864L made an immediate impression this fall when she topped the 7 Oaks and Friends Female Sale, further solidifying her position among the breed's most sought-after young females when three packages of embryos averaged over $2,500 per embryo at the Ladies of the Royal Sale. A homozygous polled daughter of the 2025 AHA Sire of the Year, CMF Gold Rush, this impressive two-year-old combines exceptional phenotype, impeccable udder quality, an elite pedigree, and an outstanding EPD profile highlighted by a remarkable 0.93 Marbling EPD.
- With an impressive average of 18 embryos per flush, 864L has already demonstrated the reproductive potential to complement her genetic merit. Few young females offer this combination of maternal excellence, carcass value, eye appeal, and proven market demand. The opportunity to acquire an entire flush from a female of this caliber is seldom offered and represents a unique chance to incorporate some of the breed's most exciting young genetics into your program.

LOEWEN HEREFORDS

- N24 and N26 are full brothers to the ever-popular Loewen Sandhill L70 ET that is jointly owned with Loewen Herefords, Sandhill Farms, Perez Cattle Co. and Harvie Ranching. Both brothers display the same characteristics as Loewen Sandhill as they are dark red in color, heavily pigmented, stout designed, big bodied, loaded with presence, have flawless structure and Homozygous Polled. They offer very balanced EPD profiles that offer moderate birth, rapid growth, maternal strength and value-added carcass merit. The daughters in production will have gorgeous udders and the sons will be highly marketable because of their build, markings and EPD profiles. John would love to keep one for a herd bull but with the overwhelming genetic influence of Loewen Sandhill and the donor dam 44J in the Loewen Herefords herd it makes it hard to implement the genetics of these two superior individuals.
- The donor dam 44J has risen to the forefront of the Loewen Herefords operation as one of the elite donors in the program. She is admired for exceptional phenotype, dark red color, pigment and has a picture-perfect udder when she is wet.

- We're kicking off 2027 in a BIG way! It's our pleasure to unveil one of the most impressive spring-born bulls we've raised, GS Custom Kelly P14 ET, as our select consignment to Hereford Night in OKC!
- A standout from day one, P14 is flawless in his skeleton, massive in his ribcage, and ties it all together with a captivating look from every angle. He combines presence, power, and practicality in a package that's awfully hard to replicate. The kind of bull that commands your attention and only gets better the longer you study him.
- Backed by a pedigree rooted in legendary cow families that continue to hit grand slams, with bulls and females alike. His full sister, GS Kellie M22 ET, valued at $90,000, secured division titles at multiple national shows throughout her career for the Colyer and GKB outfits last show season. His maternal sister, GS Kelley M30 ET, valued at $46,000, followed a similar path, ccapturing division banners at the 2026 Cattlemen's Congress and Fort Worth Stock Show for Abby Hill Farm. These sisters are now making their mark in our donor battery, and we firmly believe their greatest contributions are still ahead. His full brother, GS Reckless Kelly N25 ET, commanded $12,500 in our online sale this past spring.
- A pedigree you can trust, a phenotype you can appreciate, and a genetic package we believe in wholeheartedly. We have tremendous confidence in this mating and believe P14 has all the pieces to make a lasting impact.
- Photo taken November 5, 2026. An updated photo and video will be available at www.grimmelschaakecattle.com by January 1, 2027.

- We are proud to offer the pick of our 2027 Pen of 5 in this year's Hereford Night in OKC!
- Kane and Peyton have been on us about bringing a live lot for the National Sale and we decided that there would be no better opportunity than now with this pen of bulls. These 6 Bulls excel numerically and still possess the extras needed to compete on a national level. We look forward to the future for these bulls and are eager to see which one their new owner selects.

- Pounds bull here! 6P has been a ground pounder since he came in from the co-op and has been all gas and no brakes ever since. We love this bulls dark color pattern. Extremely clean in his joints and sets down on a big square foot. His added softness in the center portion of his skeleton has us drooling thinking about what kind of daughters he could leave behind. A full sister commanded $80,000 in our Fall Female Sale to Rowdy T in TX. Big time beef bull that checks the boxes for growth and maternal excellence.

- 9P has probably been the worst kept secret in Pikeville, all fall. Everyone that has been by, has gotten to see the pen bulls around the showbarn and the one thing everyone has asked is " What's that horned one???". We've been fortunate over the last few years to have a few horned bulls that have been successful both in the show ring that have gone on to make tremendous herd bulls for their new owners. We believe the ceiling on 9P is just as high as those great bulls. Long and extended through his neck, plants firmly down on a massive foot, soft jointed, and monster middled. What separates 9P from most is when you study his genomics. 118 at a Year, 1.3 and 1.4 for UDDR and Teat scores, with a 174 $CHB. This bull has the parts and pieces to collect hardware in the ring but is a 3 Dimensional breeding tool when he finds his first set of cows.

- The not so little, little brother to 6P and 9P here and we are big fans of him. So long from tip tip to tail yet so dense in his body shape. We love the leg set this dude has on his back two. He patterns up nearly identical to his $80,000 sister that sold in September, just with a shot more punch in his heart and fore rib. Bid in confidence here, on a big-time herd bull candidate.

- There is as much buzz on the dam behind 10P as any in the Hereford breed right now. BF POSH 12H ET has been a huge producer for both us and Double 7 Ranch in OK. The Dam of up and coming bulls like, Marvel, Chaos, and National. We think Cardinal Virtue is the next step in the legacy of 12H. This Gunsmoke son is packed full of red meat, sets down on a massive feet and legs. While still maintaining that added look and eye appeal we demand in our bulls. Study the genomics here, 10P is your Calving ease option, without sacrificing growth and performance. But where he raises the bar is when you study the 1.6 and 1.7 Uddr and Teat scores, with a 0.45 Marb EPD and packing on a 172 on his $CHB. This is a bull that we have no doubt will see heavy use for both potential new owners and across the breed in numerous herds of progressive breeders.

PÉREZ CATTLE COMPANY

18 Pick OF FALL BRED HEIFERS

- Here is your opportunity to select from **72 fall 2025-born bred heifers**, from the heart of our herd. Built on generations of maternal selection, these heifers carry the influence of legendary Hereford cows, NJW Rita 79Z and NJW Daydream 73S. Most all heifers are result of AI or ET breeding out of PCC herd sires shown below.
- PCC females are proven in the rugged Southwest — covering country, traveling miles to water, and raising calves on native grass with minimal help. They're bred to work, last and produce!
- **Here's your chance to put dependable, hard-working genetics to work in your herd.**

- Calving Ease, Power and Carcass Excellence in One Complete Package! Deep red to the ground and loaded with pigment, muscle, and performance, 820N combines low birth weight and calving ease with the kind of power that builds better cattle. He posted an impressive 153 IMF ratio and boasts a .91 marbling EPD, bringing added carcass value to the table. His dam, 4010, is a full sister to the legendary 4013 bull, adding proven cow power and exceptional genetic credibility to his pedigree. 820N offers the calving ease to use on heifers while still bringing the power and performance needed to make herd bulls and replacement females.
- Offering ¾ interest and full possession

- ELLA Jet Smooth 502 is the kind of herd sire prospect that brings together exceptional phenotype, impressive genetic predictions, and a pedigree backed by national champions. Long-bodied, big-footed and stout-muscled, 502 combines tremendous rib shape and body capacity with a smooth, attractive pattern. He comes high out of his shoulder with an impressive neck set while maintaining the correct shoulder angle and structural soundness. With an abundance of heart and boldness through his forerib and chest floor, he transitions smoothly from shoulder to loin and carries his muscle into a powerful hip. An impressive combination of substance, balance and eye appeal.
- His genetic profile is equally impressive. With an actual birth weight of 78 pounds, 502 offers outstanding growth, maternal and carcass genetics. His GE-EPDs rank in the top 1% of the breed for Carcass Weight (+110), top 2% for Ribeye Area (+1.04), top 3% for Scrotal Circumference (+1.8), and top 4% for Yearling Weight (+119), Maternal Milk & Growth (+70) and CHB$ Index (+174). His Weaning Weight (+69) and Maternal Milk (+35) both rank in the top 9%. This is an exceptional combination of performance, maternal strength and carcass merit in one complete package.
- The pedigree behind 502 is built on some of the breed's most influential genetics. His sire, BK Jet Smooth J18 ET, was the 2024 Cattlemen's Congress Grand Champion Polled Bull. Jet Smooth combines the performance and maternal influence of JDH AH Standout 16G ET with the legendary HAPP Kool Aid Points 1218 ET, one of the breed's most prolific producers of national champions and high sellers.
- Selling full possession and ⅔ semen interest

CHAPMAN LAND & CATTLE

26 *Pick* OF THE 2027 FALL CALVING RECIPS

We are proud to offer the unique opportunity to allow someone to purchase a valuable breeding piece from the heart of our embryo program and the overall future of our cowherd. We believe greatly in these multiple sires that have used and even more so in the females that will be backing these genetics. All ultrasound work will be completed approximately 5/1/27 with the buyer needing to make their selection by 6/10/27. Don't miss this chance to pull from the absolute top of our operation and be able to find your herd sire or donor cow of tomorrow! This purchases sales with the guarantee of a live calf, not just a pregnancy as a showing of appreciation and peace of mind to the buyer.

- The mating of the ever-popular 77 Marvel 12H L32 ET and the up-and-coming donor Loewen Goldie F94 K35 produced the most prolific flush ever at Double Seven Ranch. A full sister, 77 Miss Marvel K35 N99 ET, to this mating led off the record breaking Big League Genetics Vol. VIII annual sale commanding $200,000. Lots 2 and 3 brought $40,000 and $17,500. N99 was the talk of the fall and certainly one of the elite individuals to sell this past calendar year. In this same flush 6 full brothers were produced and have certainly caught the eye of visitors through Double Seven Ranch this fall.
- Marvel semen has only been sold at auction and has steadily commanded $600 plus per straw. Marvel is certainly a bull that is going to make his mark in the industry as he displays phenomenal phenotype, breed leading performance with elite maternal characteristics.
- The donor dam, K35, produced three daughters by three different matings in the Big League Genetics Vol. VIII that grossed up $257,500 to average $85,833 per head. Elite and rare mating with unlimited potential.
- Selling four (4) IVF embryos with a guarantee of one (1) pregnancy if put in by a certified embryologist.
- Embryos are stored at Trans Ova.

- If improving feed efficiency has been on your mind, this cow needs to be on your radar. 2428 is one of the most intriguing young females in Madison, GA. She is a unique growth ingredient that keeps intake low. In fact, when you search the database for cattle with this level of weaning and yearling growth and limit it to a 0 DMI EPD with her level of accuracy, she is ONE of ONE. To cap it off she is captivating in her look and presence, soft in her body shape, and phenomenal in her build and structure. 2428 is extremely tidy in her udder attachment, while raising one of the largest calves in her contemporary. This complementary mating to Next Step brings another great cow into the pedigree with the ASM 708E E33 Macie 203K female. He will mellow the mature size and birth weight, while she carries the performance and pigment.
- Mating is Homozygous Polled by pedigree.
- Selling a package of four (4) IVF embryos. We guarantee one (1) 90-day pregnancy if the embryos are transferred by a certified AETA technician into quality, properly managed beef-type recipient females.

MCDONALD FARM: EMBRYOS

McDonald Farm has a long history of excellence within the Hereford breed and there is no doubt this donor exemplifies that. This dynamic full sister to Copper Candi is a perfect combination of elegance, power and balance she impresses from every angle. Get in early on some of the first genetics by her to these incredible sires!

- A member of the Champion Pen of Three Bulls at the National Western Stock Show, we are confident that Tahoe will be the perfect complement to his pen-mate, Arrowhead. Backed by Gemstone, a former Reserve National Champion Bred & Owned female, Tahoe is a perfect blend of show ring appeal and a balanced set of genomics. He offers a rugged herd bull look with unmatched balance and build quality. We are already using him heavily across our program with the belief that he will produce exactly what the Hereford breed is after.
- There's no doubt this bull will have a huge impact on the breed, and we could hardly wait to get him used within our program. These will be the first genetics by this sire and donor that we have offered to the public. Get in early you won't be disappointed.

- Brandston was selected as the 2025 Cattlemen's Congress Supreme Champion Bull. Then he was selected as the 2025 NAILE Grand Champion Hereford Bull and then slapped Supreme Champion Bull on the green chips of Freedom Hall. The first bull of any breed to EVER be selected as both the Supreme Champion at Cattlemen's Congress and the North American International Livestock Exposition.
- With his look, presence and dominance within the breed we feel very confident that this mating will have the same impact within your program.
