EAST SIDE FARM & GUESTS

EAST SIDE FARM 9TH Annual Hereford Production Sale

Schedule of Events:

Sunday, Sept. 6, 2026 – Viewing of Cattle

Monday, Sept. 7, 2026

12 Noon Cattle sale
Lunch will be available

Sale Staff:

Gene Steiner, Auctioneer 513-616-4086
Kane Aegerter, AHA 402-641-8699
Derik Steiner 513-616-4086
Chris Wojo 540-292-0841
C.J. Furlong 717-989-8780
Colby Dull 717-965-0592

Motels: All in Frederick, MD

Motel 6 301-622-5141
Comfort Inn 301-662-0281
Hampton Inn 301-696-1565

Airports:

BWI, Dulles, Reagan National.

All approximately 45 minutes.

Directions to the Farm:

Address: 10718 Liberty Rd., Frederick, MD 21701

From Frederick: Take U.S. 15 North to Route 26 East, go through town of Mt. Pleasant. Our farm will be on the left past the Liberty Road Seafood Restaurant. Will be marked with sale signs.

From Baltimore: Take 695 to 70 West to Exit 62 (Rt. 75 North) to Rt. 26 West. Go about five miles. You will see a golf driving range on the right. Our farm is directly behind the golf driving range. Go about one block and you will see our farm sign at the end of the driveway on the right. Turn in driveway, go to split, bear right. Will be marked with sale signs.

- If you are looking for a cow that stands on a big, correct feet and legs and a lot of capacity this cow is what you should be looking for. We all say this every year, but this is a tough one for me to move but this year with a deep calf crop, I am offering up this one.
- Out of my Foundation HCC Taryen cow, she is becoming a mirror image of her grandma, and her mother is no slouch either and still in my herd.
- She is raising a real stout calf out of my High Roller son FC Conservative.
- Bred 4/30 to NJW 119E 87G Endorsement 216J. Reg # 44350513

- She is out of a real nice cow purchased from Hausners in the 2020 East Side sale and this was her first heifer born.
- If she did not have another heifer in 2026 year, I would probably keep her, but she has really come on to be an attractive yearling.
- This is another calf out of my Conservative bull that is as good as any other heifer out in my field.
- Bred May 5 to TH Adventure 143K. Passed over. Reg. #44658760

- This cow is a little more refined and will be a little easier on the feed bill but just raises a good calf and seems to out due herself each time as you can see.
- Her sire, Sleep On Sire, made her an easy birth and both of her calves were smaller at birth and take off and grow.
- She also goes back to my Renee cow family, a genetic line that has been good to me and every animal I have sold from this line, folks have been very happy.
- Observed bred again to FC Conservative 5/23/26. Reg. #44469675

- The one good thing about these Conservative calves, they are easy births, hit the ground, and are up and drinking within an hour, and she was no different.
- This calf has really come on and is really eye catching, besides the dot on her head.
- She is halter broke and can be used by juniors or a nice starter cow as well. Reg. #44773936

2025 Heifer calf out of BR 1H Sabrina 9L

- Marbens Hightide K02 is a dependable young cow with the kind of pedigree that has proven its value through productive daughters and lasting cow families, including some of our favorite's top and bottom.
- She is a sound, attractive female with the capacity and maternal strengths to make a positive impact in any breeding program. Her balanced EPD profile supports the type of functional cattle that work in both seedstock and commercial operations.
- With many productive years ahead of her, K02 represents an excellent opportunity to invest in a proven maternal line.
- Confirmed safe to Hills-Galore 44Z Rewind 147E for a breeding date of 4/26/26.

- P145 is an impressive daughter of G 83G Draftman 2135 backed by the productive Marbens Hightide K02.
- She combines added length, body, and structural correctness with the feminine look expected of a future brood cow.
- This is the kind of young female that should continue to improve with age and develop into a profitable producer.
- Her pedigree is stacked with proven maternal genetics that have earned their place in the pasture.

- The opportunity to purchase a Churchill female is always worth a close look. Lady 865F has been exactly what we hoped she would be — a consistent, hardworking cow that raises an outstanding calf every year.
- She is moderate in her design, easy fleshing, sound structured, and possesses an exceptional udder that has remained ideal throughout her production career.
- We are only offering her because we have retained daughters in production, and her son is now serving as our walking herd sire. Buy with confidence knowing this female has already proven her value and bring her sought after pedigree into your own herd.
- The seller would like to retain right to flush the cow at sellers expense and buyers convenience.
- Confirmed safe to Hills-Galore 44Z Rewind 147E for a breeding date of 6/12/26.

- Leading Lady P53 is a complete, well-balanced female that combines the eye appeal and power of Draftman with the proven productivity of Churchill Lady 865F.
- She is bold-bodied, easy doing, and built for longevity with the structure and maternal design cattlemen appreciate.
- Her pedigree offers an excellent blend of proven genetics while remaining an attractive outcross to many of today's popular bloodlines.
- We believe she has all the tools to become one of the front pasture cows in her new home.

- Halter broke and ready to show.
- A polled January PCC 7009 173D Maverick 0183 ET daughter that has it all, style, good looks, eye appeal and a loaded pedigree.
- Sapphire's dam, Jewel, is a paternal sister to our HCC True Sensation herd bull, lots of performance and production in these two individuals and it shows in Sapphire.
- Maverick offspring speaks for itself, and Sapphire will continue to impress and satisfy the needs of your program. This one is worth a second look.

- I keep asking myself, "Why do I keep selling these good True Sensation daughters?" True Colors is doing a great job with her March heifer calf by JDS Excalibur is a Keeneland out of a Equinox daughter, two pedigrees from the Hausner Cattle Company program many of you are familiar with. A little bit of "you can't keep them all" and "we still have the factory" makes offering this exciting pair a little easier to live with.
- Sells exposed to C SHR 2111 Tohono 4130, 2026 NWSS Reserve Champion Polled Hereford Bull. Breeding details available closer to sale day.

- We bought this cow's dam several years ago at this sale. The dam and several calves continue to be a part of our herd, but we can't keep them all.
- Rebel was shown as a calf, so she is calm and easy to work with, and will make a great addition to any cow herd. This cow raised a nice calf for us last year and the bull calf she is currently raising shows how well she can raise them.
- We bred her back to the same bull, K MR Fortune 508 1508 (P44281362), and she was exposed to him from March 15th to June 22, 2026, and she was confirmed bred on May 8th, 2026.

- Man, if we needed another steer for next year, we would definitely keep this one.
- He is big-boned and big-bodied and after being on creep feed for the last couple of months, he has really bloomed.
- We left him a bull so if you are looking for a low-key herd bull, he is your guy, or you can take him home and steer him for next year's county fair.
- Anything will work with this guy; he is docile and will be an easy keeper which ever direction you choose to take him.

- We really like this heifer; she comes from a great cow family that plays a big part in our whole herd production.
- We are offering this stout made female that will be a great asset to any herd. And even though she never made it to the show ring, she is as calm as they come and has a real laid-back personality.
- We AI bred her to CMF 1720 Gold Rush 569G ET (44108010) on April 8th, 2026, and she was confirmed bred on June 1st, 2026.

- OCFV 5575 PATIENCE 03L ET is a productive, easy-keeping donor-bred female that has proven herself to be a dependable cow in our program. She consistently raises a quality calf with excellent growth and maternal traits.
- Patience sells open, giving the buyer the flexibility to flush her or breed her to the bull of their choice.
- Her last calf was sired by our Shorthorn bull, demonstrating her ability to produce outstanding crossbred offspring as well. In fact, we retained her Shorthorn-cross daughters in our herd because of her quality and performance. She is a sound, reliable cow with a good udder, strong maternal instincts, and the kind of disposition that makes her a pleasure to work with.
- Whether you're looking to add a productive Hereford female to your herd or invest in a proven cow with a promising registered heifer calf at side, this pair offers immediate and long-term value
- Lot 46A: Selling at side is her attractive registered heifer calf, OCFV WORTH THE WAIT, born June 6, 2026, a feminine, well-made youngster with a bright future as a competitive show heifer and then a replacement female. In fact, Patience was a show heifer that did very well for us and is still easy to halter which makes this pair a nice cow/calf show opportunity.

- OCFV MAGNOLIA 29K is a moderate-framed, easy-keeping female with an outstanding maternal pedigree. She traces back to the great H EXCELL 8051 ET on the dam's side along with strong Barber Ranch genetics, combining proven performance with exceptional maternal value.
- Magnolia has consistently produced impressive Shorthorn-cross calves and is the kind of cow that does her job year after year. She is calm, halter broke, exceptionally gentle, and a favorite to work around the farm. Her quiet disposition and excellent mothering ability make her an ideal addition to any herd.
- She has been pasture exposed to our herd sire, OCFV PROFIT AIR 08N ET (Reg. #44692412), and was confirmed bred by the vet on 7/14/26, offering buyers the opportunity for an exciting 2027 calf.
- If you're looking for a proven, productive female with excellent temperament, strong genetics, and the potential of another quality calf on the way, Magnolia is one you won't want to miss.

NOTES

Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit (\$) indexes. AHA's genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal. Animals that have a genomic profile will be denoted with a GE-EPD logo.

The current suite of Hereford EPDs and \$ indexes includes:

Calving Ease — Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average if comparably mated, sire A's calves would be born with an 8% more likely chance of being unassisted when compared to sire B's calves.

Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

Dry Matter Intake (DMI)

The Dry Matter Intake EPD predicts the daily consumption of pounds of feed. For example, if sire A has a DMI EPD of 1.1 and sire B has a DMI EPD of 0.1, you would expect sire B's progeny, if comparably mated, to consume on average 1 pound of feed less per day.

Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a .7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

Sustained Cow Fertility (SCF)

The AHA's new Sustained Cow Fertility EPD (SCF) is a prediction of a cow's ability to continue to calve from three years of age through twelve years of age, given she calved as a two-year-old. The EPD is expressed as a deviation in the proportion of the ten-possible calving's to twelve years old expressed as a probability. For example, the daughters of a bull with a 30 EPD would have the genetic potential to have one more calf by age twelve than the daughters from a bull with a 20 EPD. In other words, the daughters from the 30 EPD bull would have a 10% greater probability of having one more calf than the bull with a 20 EPD. This is equivalent to saying that the daughters are 10% more likely to remain in the herd to age 12.

Maternal Milk (MM)

The milking ability of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

Maternal Milk & Growth (M&G)

Maternal Milk & Growth reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of daughters' progeny weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull's daughters with a M&G EPD of 10 lb. (29 minus 10 = 19 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

Maternal Calving Ease (MCE)

MCE EPD predicts how easily a sire's daughters will calve at 2 years of age and is measured on a percentage. For example, if sire A has a MCE EPD of 7 and sire B has a CE EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

Mature Cow Weight (MCW)

The MCW EPD was designed to help breeders select sires that will either increase or decrease mature size of cows in the herd. The trait was developed after years of cow weight data collection and the EPD relates directly to the maintenance requirements of a cow herd. For example, if sire A has a MCW EPD of 100 and sire B has an EPD of 85, then you would expect the females of sire A, if mated to similar cows, to be 15 lb. heavier at mature size.

Udder Suspension (UDDR)

UDDR EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale.

Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a UDDR EPD of 0.4, and sire B has a UDDR EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score better udder suspension in daughters of sire A, compared to sire B.

Teat Size (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment. For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

Carcass Weight (CW)

Carcass weight is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

Rib Fat (FAT)

The FAT EPD reflects differences in adjusted 365-day, 12th-rib fat thickness based on carcass measurements of harvested cattle. Sires with low, or negative FAT EPDs are expected to produce leaner progeny than sires with higher EPDs. Ultrasound measures are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been

shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

Baldie Maternal Index (BMIS)

The Baldie Maternal Index is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

Brahman Influence Index (BIIS)

The Brahman Influence Index is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

Certified Hereford Beef Index (CHBS)

The Certified Hereford Beef Index is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows and all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. Keep in mind, this production system takes advantage of complimentary breeding with the commercial Angus cow. Although Marbling is weighted positively in this index, a positive weighting for Rib-eye Area and a negative weighting for Back Fat are a greater priority in this index to allow for optimum end-product merit. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.

TERMS and CONDITIONS:

Cash or check. Each animal will be sold to the highest bidder. The auctioneer will settle any dispute as to bids.

All cattle are to be paid for by the purchaser immediately after the sale.

Each animal will be at the purchaser's risk immediately after the animal is sold. They will be fed and cared for free of charge for a reasonable length of time after the sale, but at the purchaser's risk and will not be turned over to the buyer or shipped as he may direct. Buyers can have them insured against risk at a nominal rate.

The animals will be transferred to the buyer at the seller's expense. Cattle will not be transferred until paid in full. Each buyer must be sure to give the clerk his proper name and address for making transfers. All calves born before the sale

are to be registered by the seller; all calves born after the sale are to be registered by the purchaser. Proper breeding statements will be signed by the seller for the buyer to use in registering calves after the sale. The purchaser will be responsible for obtaining AI certificates to register calves resulting from females carrying the service of bulls not owned by the seller.

Animals sold in this sale are guaranteed by the owner to be breeders on the condition that they are properly handled and cared for by the purchaser. If any animal fails to breed and the animal is in sound, healthy condition, the buyer may return it to the seller who shall have six months to test it. If the animal proves to be a non-breeder, a satisfactory exchange will be made or the purchase price will be refunded.

Every known blemish will be called before the animal is sold and no animal will knowingly be sold that is not sound in every way. Any changes in breeding dates will be announced sale day.

Any female selling with calf at side is considered to be a breeder with no further guarantee in this regard.

Health papers will be provided.

Announcements at the sale ring by the owners or the auctioneer concerning the cattle will take precedence over statements in the catalog.

All persons who attend the sale do so at their own risk and the owners assume no liability, legal or otherwise, for any accidents that may occur.

Welcome,

On behalf of Jay and Shelly Stull and the entire group of consignors to the East Side Farms and Guest Sale, we are excited to offer this tremendous set of cattle.

The U.S. Beef Cattle product continues to be in high demand and in short supply which gives all of us in the beef production industry opportunity. The biggest mistake that we beef producers make in this strong market is that we don't maintain inventory. Without inventory, we cannot produce products to be in position to capitalize on this market. These consignors have worked hard to provide a quality set of Hereford and Hereford influence genetics for you to analyze and reap the benefits of their achievements.

Please feel free to contact any of our consignors or me if we can assist you in finding what you're looking for. Whether you're searching for herd sires, donor females, replacement females, or show-quality heifers or steers, you'll find them in this offering.

We look forward to seeing you on September 7th and spending some time with our special Hereford Family.

Sincerely,

Gene Steiner
