

Welcome

Innisfail Farm got its start in the Hereford business over 50 years ago when Whitey Hunt made a commitment to utilize data-driven decisions to be a responsible seedstock supplier. To this day, that mission remains the same. We have embraced a holistic approach to beef cattle production, identifying and balancing the traits of highest economic value to our customer. The amount of phenotypic traits we record allows us to stand behind the data that is presented to you. We continue to place an immense amount of pressure on functional longevity and eye appeal. The cattle in this listing do an incredible job of combining the cow families that thrive on Innisfail Lane, with highly progressive genomics, while still looking the part.

Our local commercial clientele are very comfortable purchasing their bulls privately, and we want to continue to provide them that bull buying experience. We believe the top end of these bulls present tremendous opportunity to likeminded producers, and we thought this format was the fairest way to offer them to the public. Along with the bull lots, we will feature two special full sisters to the bulls, bred to Stelloplug Published 3568 ET for September calves. These female lots will be positive additions to any margin minded producer's programs. We are also opening up the tank to progressive embryo and semen lots. If you have any questions, feel free to contact any of us about the offering!
