

P&R Herefords LLC

11th PRODUCTION SALE

Monday, November 2, 2026 – 1 p.m. (CT) – Trail, Oklahoma
With Guest Consignor: Graft-Britton Ranch – Leedey, Oklahoma

Welcome to P&R Herefords 11th Production Sale!

Welcome to P&R Herefords 11th Production Sale!

Welcome to this year's sale. 2026 has been a rough year here at P&R but do not fear we shall never surrender!

It is with a solemn and heavy heart that we grieve the loss of our father Dennis Wayne Laubach.

This year's sale is dedicated to dad and his legacy as we have included more about his extraordinary life in this year's sale catalog. Dad you were the best father ever and Ross and I can never thank you enough for helping us develop P&R Herefords and instilling in us the work ethic and determination to keep carrying on this program since our youth. We are proud to present this year's offering in our 11th production sale. Thank you so much dad! We will never forget you or all you did for us!

To date, when we sent this catalog to 1881 Creative with the American Hereford Association for publishing, Okeene has had a little over 5 inches of rain-to-date, and the ranch just over 12 inches. This summer has been brutal to say the least. Drought has become more the norm than the exception around here.

All the more reason why we continue to raise Hereford cattle. In one of the most brutal summers we can remember, we have been in awe at the ability of our Hereford cattle to not only survive but to thrive in the harshest of conditions with very limited feed resources. Herefords' resilience is the real Hereford Advantage.

This year's P&R sale bulls were raised on winter wheat at Okeene and then sent to Bar G Feedyards from Jun. 1 to Aug. 18 (78 days) and have since been on hay and 20% cubes until sale day. There is no grass around

here. The bred heifers were bred on wheat pasture and have been on burnt up crab grass with 20% cubes as supplement all summer. They are all in great condition contrary to our weather.

Because of this brutal drought we are also selling all of our horned cows (regardless of age) that calved in April and May. They will sell with their calves at side as pairs. The cows and their calves have not had the benefit of any winter wheat pasture or much supplemental feed and will not only sell in their working clothes but in their bare naked drought working clothes. Pregnancy data will be available on sale day.

We thank Graft-Britton Ranch for placing an excellent set of bulls in this year's sale. Glenn has certainly been a great neighbor and mentor for many years now. We are also happy to feature my son's progeny from his ALEX Angus LLC herd. He will be selling two solid registered Angus bulls and a drop dead powerful black baldy bred heifer.

A hearty thanks to The Bank of the West, and Sheldon & Chelsie Rounds of R&R Livestock Feeds for their continued support and for providing our meal again this year. Thank you also to High Plains Bank for helping sponsor the sale.

Once again, thank you for your continued support and interest in our breeding program. We hope to see you on sale day.

*Sincerely,
Paul Laubach*

P&R HEREFORDS LLC

126 years of Western Oklahoma ranching tradition of the Craig and Laubach families!

P&R Herefords 11th Production Sale

With Special Guest Consignor: Graft-Britton Ranch, Leedey, Oklahoma

Monday, November 2, 2026 – Trail Oklahoma

Absentee Bidding

If you would like to place a bid on any sale lot but will not be able to attend the sale, please feel free to contact the sellers, or any member of the sale staff. Live bidding will also be available on LiveAuctions.tv and/or Superior Livestock.

Sale Terms and Conditions

Terms of the sale are check or cash. Every animal will be sold to the highest bidder with the auctioneer settling any bidding disputes. All cattle are the buyer's property as soon as sold and will be cared for a reasonable length of time at the buyer's cost and risk.

Guarantee

All sale cattle are, to the best of our knowledge, free of any disease or defect. Any known defects will be called at sale time, or noted in the footnotes. All cattle are guaranteed breeders. Any bred female selling is considered a breeder without further warranty. If any animal fails to breed after a trial of six months, it may be returned to the seller in good condition and in compliance with Oklahoma health regulations. The seller reserves the right to try said animal for 90 days and, if it proves to be a breeder, return it to the buyer at the buyer's expense. If the animal proves

to be a non-breeder, the purchase price will either be refunded or credited toward the purchase of an animal in the next sale at the buyer's option. No adjustments, will be made after nine months from the sale date. We assume no liability, legal or otherwise, to make any further compensation to the buyer. No other warranty or any nature is expressed or implied.

Health

Individual health papers will be provided for shipment anywhere. All bulls will be semen tested and Trich tested. Females are officially calfhood Bangs vaccinated. A licensed veterinarian will be on site sale day.

Delivery & Trucking

Delivery will be provided up to 350 miles from the sale facility on all bull purchases of \$6,000 or more. Delivery on the females will be at buyer's expense, but we will help assist with the delivery of any sale animals the best we can. All sale cattle must be paid in full before delivery with no exceptions.

Registration and Transfer

Registration certificates will be transferred to buyers upon request at seller's expense. Layton Auctions Services, LLC will transfer all animals as instructed by the buyer. In addition, seller will pay for the cost of DNA test direct to the American Hereford Association for parent verification on any calves born to females that were exposed to multiple herd sires upon request.

Online Bidding

Watch live and bid! Online bidding will be available for registered bidders through LiveAuctions.tv and Superior Livestock – please see more information on how to bid online on page 4 of the catalog or call Erick Schmidt at (830) 263-0166.

Disclaimer

Any person attending this sale does so at their own risk. Neither the Sale Management, owners nor any person connected with this sale, assume any liability, legal or otherwise of whatsoever kind. Any announcements made on sale day by the owners or auctioneer will take precedence over any of the printed material contained herein.

- A Hereford maternal giant and a forever P&R foundation herd sire. Born twenty-years ago and 5110's daughters are still producing top selling bulls including Cooper's \$120,000 sale topper last spring. Easy fleshing, high volume, extra capacity, strong milking daughters are his trademark. Elite 1% of the breed for Sustained Cow Fertility (SCF), Milk (MM), and top 2% for Baldy Maternal Index (BMIS) EPDs.

- 005H is a top mandate son that has really sired some nice cattle here at P&R. Owned with Shultz Farms of Okeene. This will be his last set of calves selling at P&R and they are good. You will love these cattle phenotypically with great pigment, high volume, easy keeping and plenty of thickness and style. Top 5% of the breed for marbling with top 5% to 10% calving ease and BW EPDs while still maintaining a +89 YW EPD.

- Our pick from Cooper's 2022 bull sale. We had a hunch that 1205J would be a great maternal bull and his daughters are going to prove that, but the real surprise is how good this herd sire's bull calves are with tons of length and volume. Two generations of AHA designated Dam of Distinction (DOD) anchors 1205J's pedigree. Sired our top selling bull from last year's sale. 1205J's service and progeny sell!

- We used this P&R bred bull on heifers initially but liked his calves enough we started using him on mature cows too. Great spread between birth weight and yearling weight and he is bred super maternal. Elite 1% EPDs for sustained cow fertility and the Baldy Maternal Index. Top 2% for milk with top 1/3rd for udder and teat EPDs and marbling. Top set of sons sell!

- Husker was our selection at Van Newkirk's 50th Production Sale as we wanted to incorporate the SR Bakken 62Z bull into our genetics. Husker is a high volume rugged bull that proves you can moderate frame without giving up pay weight. Top calving ease and maternal. Preview calf or two in this year's sale and next year he will be the lead sire group.

• ACT. BW: 84 lb., ADJ. WW: 737 lb.

• Selling full possession and 3/4 interest.

• 511N has been a standout phenotypically since he was a calf. Structurally sound, hormonally correct, he has always carried the look of a herd bull. Dam is a high-volume easy fleshing cow that has maintained a 361-day calving interval on her first 7 calves. 511N's Cooper 1205J sire was the sire of our top selling bull last year. This bull could do the same this year. He has the look.

- ACT. BW: 76 lb., ADJ. WW: 845 lb.
- Selling full possession and 1/2 semen interest.
- Elite herd bull prospect. Could work for any purebred herd in the nation. We will gladly refund your purchase price if you don't like the calves. Phenotypically and genetically about as balanced as you can get. Tremendous volume and capacity, structurally sound, and hormonally correct. The spread from BW (+1.1) to YW (+96) is impressive. We will certainly keep a semen interest and will use this bull in the future. We should be keeping all of him!

Dennis Wayne Laubach

March 28, 1947 – August 12, 2026

Dennis Wayne Laubach, 79, passed away on Aug. 12, 2026 in Oklahoma City surrounded by his wife and three children after a sudden battle with lymphoma cancer.

Dennis was born on Mar. 28, 1947 in Okeene, Oklahoma to Carl Phillip Laubach and Dorothy Marie (Osmus) Laubach. He was raised on his family's farm southwest of Okeene. He graduated from Okeene High School in 1965 and earned a bachelor's degree in Agriculture Education from Oklahoma State University in 1969.

While attending Oklahoma State University, Dennis met Paula Jean Craig and they married on Jun. 7, 1969 at the First Baptist Church at Leedey, Oklahoma.

Dennis developed a passion for farming and ranching at an early age and was especially attached to the cattle that he raised. He was particularly fond of Hereford cattle.

Dennis began his vocational agriculture teaching career at Adair-Casey, Iowa. Dennis and Paula moved back to Oklahoma after one year and he then taught vocational agriculture in Hunter for one year and at Geary for five years. While at Geary, Dennis taught many successful students and made many lifelong friends.

After seven years of teaching, Dennis took a position with Farmland Industries as a livestock feed and nutrition specialist, and the couple moved to Dennis's hometown of Okeene. At Farmland Industries, Dennis became the leading feed salesman for his tri-state territory but declined a promotion to Kansas City in order to stay close to family and to become a full-time farmer and rancher.

Dennis and Paula raised three children in Okeene: Paul, Ross, and Victoria. Their farming and ranching business grew from an initial 80-acre farm to an operation encompassing lands in Blaine, Dewey, Major, and Roger Mills counties. The operation

included Dennis's great grandfather's homestead north of Okeene, and Paula's grandfather's homestead at Trail, north of Leedey, both homesteaded in 1900.

Dennis loved his family and his work. He was well respected by his neighbors and peers for his knowledge in animal husbandry. Dennis's partnership with Paula created a real-world story of the "American dream," secured by his timeless saying, "the harder you work the luckier you get."

Dennis and Paula's accomplishments in their ranching endeavors never overshadowed their role as parents and grandparents, nor their belief that education was critical for success.

Dennis was preceded in death by his father and mother, Carl Laubach and Dorothy (Osmus) Laubach, his father-in-law and mother-in-law, Paul Craig and Nina (Cates) Craig, and a brother-in-law, Billy Joe Craig.

Dennis is survived by Paula, his wife of 57 years, three children: Paul Wayne Laubach of Okeene, Ross Wayne Laubach of Leedey and Victoria Denise Laubach and her husband Carlos Urrea Morales of New York City; two grandchildren, Alex Philipp Laubach and Sophia Marie Laubach, both children of Paul; Dennis's older brother Jerry Laubach and his wife Annette of Stillwater; his younger sister Connie McFarland and her husband Mark of Tulsa; his sisters-in-law, Sandra Strickland of Pond Creek and Janet Mathews of Elk City, and many nephews, nieces, great-nephews and great-nieces.

Funeral services were held on Friday, Aug. 21, at the First Baptist Church in Okeene with an interment service and burial at the Trail Cemetery, north of Leedey. Services were under the direction of Wilkinson Mortuary in Okeene.

Memorial donations may be sent to the Okeene Hospital Foundation, 207 East F Street, Okeene, OK 73763.

ALEX Angus LLC Lots

Consignment from Alex Laubach (Paul's son) and his ALEX Angus LLC herd. Alex's grandpa bought him a weaned open heifer calf from the 2010 Pollard Farms sale. She was AI'd to the legendary Final Answer bull and her heifer calf (ALEX Lady 202) has been the foundation of his herd. Alex owns 20 registered Angus cows.

Lot 51 — BWF BRED HEIFER

HOFFMAN RICHMOND ET

LOT 51 COW	BWF BRED HEIFER

- NO EPDS AVAILABLE
- A tremendous black Baldy heifer that is the ultimate statement of why Hereford bulls on Angus cows just plain works. Always has and always will. All you are going to be able to say when you see this beautiful heifer is wow! Her picture speaks a 1000 words too. This is what happens when you cross high maternal Hereford and Angus genetics and it is why the black Baldy reigns supreme for those rancher's that want to maximize their profits and not their feed bill. Exposed to our Hoffman Richmond polled bull owned with Genex from 3/20/26 to 6/5/2026. Pregnancy status available on sale day.

 Performance & Carcass: WW **67**; YW **96**; REA **0.89**; MARB **0.34**; CHBS **176**
- A homozygous polled bull we purchased from Hoffman Ranch in partnership with Genex. This is a bull everyone will hear more about in the years ahead. He will help move the Hereford breed. Our first calf crop out of him is just spectacular and he is a true combination of calving ease and performance with breed leading fertility, calving ease, and maternal genetics. Service sire on most of the earlier calving bred heifers in the sale.

P&R Bred Heifers

We usually always sell bred heifers in the sale and certainly are selling one of the best sets of bred heifers we have offered as we had an unusually large percentage of heifer calves last year and the quality ran deep. The unrelenting drought this summer has also changed our plans. We were going to calve over 30 head of polled heifers next year but will now have to cut that number significantly and will have to offer some of the elite heifers we purchased from Topp Herefords in ND and a couple of the Feddes heifers we purchased from Montana. This will be a rare opportunity to purchase their genetics this far south at an open cry auction. We did leave the horns on some of our horned heifers this year as we are planning to keep the horns on our horned females moving forward. God put them there for a reason and biologically speaking the horned Hereford female is one of the toughest animals to ever grace the open range. We are also placing all of our April and May calving horned pairs in the sale. They will sell as pairs not splits so it will be a 3 for 1 opportunity. They are in their drought working clothes and will be literally just pulled from their scorched pastures.

Lot 52 — P&R MS ADVANCER 523N

We will sell two older donor cows that are just too good to haul to any sale barn as well. Pregnancy status will be provided on or before sale day on all the female lots. Most of the earlier calving heifers were bred to our Hoffman Richmond bull owned with Genex, with the exception his half brother the Masterplan 3523 polled bull snuck in with him for a couple of days around Mar. 22, 2026. We used multiple sires on the cows selling and the later calving bred heifers, as always we will cover the costs of DNA testing the calves per buyer request.

EPDs and Genetic Information by Paul Laubach

P&R Herefords has long been an American Hereford Association (AHA) Total Performance Records (TPR) member and has utilized EPDs, both conventional and genomic enhanced (GE-EPDs), and we have done extensive DNA testing on our herd. We believe in records keeping, technology, and DNA testing but we want our customers to know what we have learned about all the above over the years.

First of all EPDs are a tool to help us but and at the end of the day you don't want to be using them exclusively to make your genetic selections because the accuracy of them is not very high just like your local weather man. Very few bulls are widely used enough to reach even 90% or higher accuracy (would take 1000s of progeny), and even if they do that doesn't mean you bet the farm on these computer algorithm generated numbers. Genomics through DNA testing can identify genetic markers of individual animals that help identify certain traits yet they too are not very accurate if you are trying to make breeding decisions.

Why are they not more accurate? Simple. Genetics is so complex, and at the end of the day, only God knows how everything is going to line up when you mate two animals together.

First of all, cattle have 30 pairs of chromosomes, which means every time you mate two animals together you will see during meiosis a factor of 2 to the 30th power (over 1 billion) possible combinations of how these

chromosomes will line up from one parent alone. Nobody, no computer, no testing, could predict precisely which chromosomes will be passed on from one parent to their progeny, the possibilities are literally in the trillions.

Geneticist often speak about the "law of segregation" which means every parent has two alleles for every gene but they can only pass one to their offspring, and which allele is passed on is completely random, thus the possibilities are just not calculable for all practical purposes.

To illustrate my point better please note the picture of myself and my younger brother Ross. As you can easily

see, my brother inherited quite a bit more height, stature, and muscle mass than me, but I am naturally more intelligent and I think all would agree that I am the better looking of the two.

Thus we recommend that our customers use EPDs more for certain trends or traits they are looking for but do not try to use the numbers as actual calculations. We use EPDs to help market cattle and breed associations like them to help generate revenue but they cannot do what some people claim they do.

The following is the current AHA breed averages (2023) on the EPDs we list in the catalog and the equivalent of how many progeny records if the EPD has been enhanced by GE-EPD technology.

Calving Ease & Fertility: CE: 3.5 (17 hd); Birth Weight (BW): +2.6 (8 hd); Maternal Calving Ease (MCE): +1.6 (N/A); Sustained Cow Fertility (SCF): +17.3 (N/A)
Maternal & Mature Cow Weight: Milk (MM): +26 (N/A); Milk & Growth (M&G): +54 (N/A)
Mature Cow Weight (MCW) +89 (4 hd); Baldy Maternal Index (BMI\$): 371
Performance & Carcass: WW: +56 (12hd); YW: +89 (9hd); Marbling (MARB/IMF): +.14 (3 hd); CHB\$: 121 (N/A)

A sincere thank you to all of P&R Herefords 2025 sale buyers and attendees!
