DELIVERY

The buyer is responsible for all shipping costs unless other arrangements are made between the buyer and seller. Delivery is not part of the sale agreements.

PERFORMANCE INFORMATION:

All EPDs are current according to the official AHA record as of November 1, 2026; and are subject to change.

It is with great excitement to welcome you to the 2027 edition of the Hereford Eve at Mile High Sale. One of the biggest changes you'll notice is the new location and date for this event, as we have moved this sale back to Hereford Headquarters at the Renaissance in Denver.

We would especially like to thank the outstanding breeders and consignors that have dug deep into their respective arsenals to put together a power packed sale offering. Year in and year out, this sale has proven to be the platform to present the freshest and hottest genetics within the Hereford breed as there have been multiple success stories from purchases right through this event. With the fast-paced ever-changing world we live in, the importance of utilizing the most elite, dominant, proven, and top tier genetics is more imperative than ever before. We strongly feel you will find just that kind of quality and opportunities while flipping through this catalog, with genetics that are sure to add value to your program and bottom line. We thank those who have supported and purchased from this sale and invite everyone to attend for what is sure to be an exciting event. We would like for you to study your operation's needs and future goals and highly encourage your inspection and attendance Thursday evening. Thank you in advance for your consideration, as always, if we can be of any assistance, please do not hesitate to contact us.

Respectfully,

Justin B. Stout *American Hereford Association*

- What a heck of a run this great young Herd Sire has had! Tohono was Katelyn's choice after sorting through the Range Bull pens at Colyer Herefords in 2025, and from there he was off to the races. That fall he began his run as Grand Champion at the NILE, and from there he had a big Denver as he was selected Reserve Champion Polled Bull. Fall of 2026 kept the momentum rolling. He was selected as a back-to-back Champion at Billings, and coming out of the American Royal, he is a reigning National Champion.
- His young donor dam stems from a prolific line of maternal greats at the Colyer program. Her dam is a full sister to one of the great horned bulls in recent years, Belle Heir.
- The time is now where the Tohono partners have decided to sell the remaining ¼ interest in this young National Champion. With huge demand already for his semen, the revenue potential is limitless, not to mention the potential National Champions he's yet to sire. Selling ¼ semen interest, no possession.

2 RIGHT TO FLUSH HERD

- The right to flush your pick of the Brumley Farms cow herd ... without a doubt one of the most exciting opportunities we offer each year. We will hold nothing back! This is your opportunity to pick from the very heart of our program.
- This will not only include the cows already in the donor pen. We would love for you to come look through all our females, and choose from the donor pen, or choose from the best kept secrets at Brumley Farms.
- We have built a herd that focuses and stands on structural integrity, udder quality, mothering ability, and longevity. We do not focus on "just another pretty face" we focus on raising females that can raise show heifers that become real cows.
- Do not miss this opportunity, call for details.
- Selling one (1) IVF Cycle. Seller guarantees six (6) embryos and two (2) pregnancies. Anything over 10 embryos will be split between buyer and seller.
- If you choose to flush your pick to the very popular bull, Stellpflug Gunsmoke 222 ET, Brumley Farms will waive the 10 unit minimum and allow you to purchase one unit of semen for the purchased flush.

3 PICK OF DONOR FLUSH

- For the first time ever ... any sale ... any event. Colyer Herefords is opening the gates to allow one high bidder their choice to flush any of the wholly owned donor cows walking the pastures in Bruneau, Idaho. From the newest set of 2024 models to the most proven of the proven, this set of maternal greats may be unequaled in the Hereford breed. When you take into consideration the countless National Champions, all of them shared one trait ... they are backed by a cow with a C for a prefix. There are situations where you'll be able to select from a young donor, her donor dam, or her donor grandam!
- The opportunities with this choice lot are truly limitless. Select any wholly owned donor and flush her to the sire of your choosing. In addition, you will also have the opportunity to select from the great lineup of Colyer Herd Sires.
- Guaranteeing a minimum of 6 embryos with no cap.

4 BUYER'S CHOICE TO FLUSH

- An opportunity that has not come around in several years!
- Selling the buyer's choice to flush any 3-year-old and older female on the ranch!
- Choose a current donor or an up-and-coming young female in our program. We honestly have more donor-quality cows than we can get around to flushing. The females in our herd combine all the traits necessary to survive in the extreme conditions of northeast New Mexico — moderate sized, good udders, sound structured, real muscle and a good look. They produce our kind of cattle and have gone on to raise numerous winners, herd bulls, and donor dams for ourselves and other programs.
- The chosen female must be solely owned by the Copeland Family.
- Selling one IVF flush with a guarantee of 6 transferrable embryos and 2 pregnancies. Anything over 10 embryos will be split between the buyer and seller.
- If the buyer would like to flush to a Copeland owned bull that is on the open market, we will provide the semen.

5 RIGHT TO FLUSH

- As the story of Express Ranches is coming to a close, Caprock Cattle Co. and Polzin Cattle had the opportunity to acquire the very best of the Express donors at the ranch in Yukon, Okla. This lineup of females represents the culmination of Express' time in the Hereford breed. In addition to the lineup of EXR bred donors, there are some elite females that topped various sales to create this set.
- Study your lesson and do your homework. Never before has the opportunity been presented to step in and select the very best that will carry on the legacy of Express Ranches.
- Selling 1 flush with a guarantee of 6 embryos.

6 RIGHT TO FLUSH HERD

- Talk about something rare! For years, the pick in the National Hereford Sale has been anchored by the choice of any cow walking the pastures for the Rausch family. We're putting a new twist on it. For this lot, you can walk into any gate ... pick any cow ... flush her to the bull of your choice. The number one cowherd in America for Dams of Distinction is yours to select from. With over 900 Spring and Fall calving cows to choose from, the options are virtually limitless.
- Selling one flush on any cow in the Rausch cowherd with a guarantee of 6 embryos and no cap.

- Maid of Gold has quickly earned the respect of some of the most accomplished cattlemen in the Hereford breed. During her time in the show ring, she captured back-to-back Grand Champion Cow-Calf Pair honors at the 2022 and 2023 World Beef Expo, with her calf at side earning champion heifer calf and bull calf honors in their respective years. But what truly sets Maid of Gold apart is her ability to produce cattle that excel in the show ring while possessing the kind of power, structure, and functionality that make them valuable in the real world. Her son, Sensational, was purchased by Dave Allen and GeneSource and is now working in the Bar A program in Texas. Her daughter, Rose Gold, captured her division at Junior National for Sara Harfst and the Harfst family of Wyoming before selling one-half embryo interest to Bar Star Cattle for $27,000. Rose Gold is the kind of female that stops you in your tracks. After her Junior National performance, we heard from some of the breed's most respected cattlemen, with some calling her the best Hereford female they had ever seen. She combines exceptional skeletal design, cow power, and structural correctness with the extra elegance and show-ring presence that make her truly special.
- Selling one flush to bull of buyer's choice.

- Homozygous polled mating. Gunslinger was one of the most talked about bulls at the 2026 NWSS. One-half interest sold in the National Western Hereford sale for $40,000 to Stellpflug Cattle Co. Gunslinger is Homozygous Polled and his pedigree is packed with the best bulls and females from our program in recent years. Top that off with a set of EPDs that combine acceptable BW with growth in the top 1% of the breed and 10 traits in the top 5% of the breed.
- 416 is a top Final print daughter We purchased in the South Dakota excellence sale with Fawcett's and in their first calf crop a daughter was a high seller on their online sale for $25,000. Another daughter is a highlight of our pen of three heifer this year and will be offered in the national Hereford sale. 416 offers a huge birth to yearling spread with nearly a 150 YW EPD and six traits in the top 4% of the breed. We can't wait to get these calves on the ground as they will be powerful performance cattle that offer added look, top figures and are homozygous polled!
- Selling 4 IVF embryos with a guarantee of 1 pregnancy if implanted by a certified embryologist. Embryos stored at Trans Ova, Sioux Center, Iowa.

- 1067J was our top choice this past fall at Holden Herefords to add to our lineup of donors. She's been a top producer for Jack, posting a WWR of 4@106 and YWR of 3@104. She's moderate framed, big topped and extra fancy fronted. Flushing her to 2016K was a no brainer as a full sister to this mating sold for $30,000 in the Spring 2026 Holden Spring Bull Sale.
- Selling 3 embryos with a guarantee of 1 pregnancy if implanted by a certified embryologist.

- Last year in this sale, the buyer of our Pick of the Herd Flush chose 211K as his donor of choice. She has gone above and beyond everything we hoped for when we put her in the donor pen for our own program. Her Distinct daughter drew a lot of interest as part of our show string at both the Junior National and the American Royal, and she's headed for the donor pen herself. Her flush mate bulls have been standouts, both easy on the eyes and performing near the top of our upcoming private treaty bull offering.
- Better yet, 211K has an ideal set of goggle eyes that appear to be relatively heritable. Three of her four Distinct yearlings have them, along with many of the newborns just hitting the ground.
- Our goals at Barnes are simple: maternal, growthy cattle that maintain carcass merit and are easy to look at. This mating reflects that, with predicted EPDs of WW +78, YW+118, UDDR +1.55, TEAT +1.50, $BMI +459, and $CHB +167. We're proud to offer these three sexed female IVF embryos as a chance to add one of the best pieces of our program to yours.

- This embryo opportunity offers the most futuristic and progressive genetics available in the Hereford breed.
- Rita 150N was our selection as the first pick of the entire 2025 NJW heifer crop. Her dam Rita 283 is a role model cow and the main reason 150N was selected. This mating to SHF Night Hawk offers unlimited genetic horizons.
- We can only offer this opportunity since we have full siblings due later this spring. We typically do not flush heifers, but Rita 150N is a phenomenal individual back by generations of high-level production and reliability.
- Selling 3 IVF embryos with a guarantee of 1 pregnancy if implanted by a certified embryologist.

- 182J was one of our top picks out of Churchill's Dispersal last year, and she is a cornerstone breeding piece in our program. This All Around daughter is a full sister to Churchill Broadway 858F. Terrific in her indexes and Marbling EPD, she is very well balanced in her other traits. Full Count was our pick in the 2025 National Western Hereford Sale as one of the top Merit sons to come around recently. These opportunities for a straight Churchill mating will get fewer and fewer, not to mention the excellent set of numbers this mating will produce.
- Selling 4 embryos with a guarantee of 1 pregnancy if implanted by a certified embryologist.

- An opportunity to buy what will be the last embryos ever offered by Chapman Land & Cattle out of one of the true patriarchs of our donor program NJW Rita 24H. This donor, who was the top selling mature cow in the 2026 Rockin' in the South Sale, to The Last Farm LLC, has worked on just about everything we have tried, adding such an amount of bone, power, and sheer mass. The sire of these embryos, Bar JZ On Demand has been the best outside bull we've used within our program in the last half decade. The udder and teat quality on his daughters and consistency in stoutness on his sons have been more than we ever could've hoped for. Truly a mating with a high ceiling and extremely low floor.
- Guaranteeing one pregnancy of implanted by a certified embryologist.

- What a super chance to maximize some of the most proven genetics within the Hereford breed combined to some that many would consider the best up-and-coming. UPS 1050, one of the high selling females in the 2026 Rockin' in the South Sale purchased by Abby Hill Farms of Canada has been consistent as the day is long. Such an amount of rib, depth, body, and sheer do ability. The sire, a polled son of the breed changing horned bull Stanfield, will no doubt live up to his name of "Legacy". Hop on this chance to be ahead of the curve.
- Guaranteeing one pregnancy of implanted by certified embryologist.

- This Mandate daughter is a prime example of what the Coyote Ridge program is known for ... tremendous maternal prowess. A desirable EPD profile backed by real world data has led this female to the donor pen. She's posted progeny ratios of 4@110 for WW, 4@105 for YW, 4@108 for REA & 4@110 for IMF. She's also the dam of a member of the 2025 CRR NWSS Reserve Champion Pen of Bulls, CRR 156J AFFINITY 479, who is now one of the top herd sires at Pied Piper Farms. This mating to one of the newest outside sires at CRR, 323L will be the perfect match of maternal greatness with curve bending EPDs.
- Seling 6 IVF embryos with a guarantee of 3 pregnancies if implanted by a certified embryologist.

- This mating is from one of our exciting young donors coupled with the attractive young sire Stellpflug Next Step. The Next Step progeny are hitting the ground and have been highlights of many sales this spring and fall and this mating will surely not disappoint. We thought enough of this mating that 2501 is carrying a Next Step bull calf due in December.
- With at least 10 traits projected to be in the top 10% of the breed the resulting calves will be excellent both phenotypically and on paper. 2501 herself has about as strong of a pedigree as one can ask for with sires including Merit, Houston, 4013, and going back to CMF 43A Rose 235D who became a foundation for our herd when we acquired her from WMC Cattle Company.
- Selling three embryos with a guarantee of one pregnancy if implanted by a certified embryologist.

- What a unique opportunity to grab ahold of some of the freshest genetics in the offering! J51 doesn't miss, plain and simple. She is a proven calf-raising machine that continues to establish herself as one of the most valuable donors in the Dry Creek Farms program. As a two-year-old, she raised a herd bull now working at Cardinal Creek Cattle Co. in Minnesota, while her second natural calf was a sale highlight, selling to White Hawk Ranch in Georgia.
- J51 continues to prove her tremendous earning power! In the 2026 Dry Creek Farms Annual Production Sale, a daughter commanded $110,000 and a son brought another $110,000! That's $220,000 generated by just two progeny of this phenomenal donor. Her embryos have been equally impressive, with 33 embryos averaging $1,945 in our Spring Frozen Genetics Sale. Consistency, predictability, and proven production! When you combine this kind of earning power with the fresh genetics of Red Hot and Red Thunder, this is a big-time opportunity to invest in one of the most proven and exciting donors in the program!
- Guarantee of one (1) pregnancy per mating if implanted by a certified. Progeny from 17A and 17B will be Homozygous Polled by pedigree.

- New River is an exciting young bull which we are pleased to partner with Sandhill Farms. He adds carcass qualities and has a great overall EPD profile. This combined with extraordinary type and kind will make for cattle that work. Take a minute to look at the projected EPD profile for this mating. You will see calf with calving ease with growth, great maternal qualities, high end carcass traits and top 1% in all the indexes.
- When you mate a powerful bull to a powerful cow you will get powerful embryos. ELZE J338 MS Society 3M has 14 traits and indexes in the top 5% of which 5 are in the top 1%. This combined with the Gold Rush profile and proven history will make for a great set of calves.
- Selling choice between the two matings, 4 IVF embryos per mating with a guarantee of 1 pregnancy per mating if implanted by a certified embryologist. Embryos stored at Trans Ova Maryland.

- A great opportunity here to invest in embryos from a young up-and-coming donor in the Harvie Ranching program. Harvie MS Unique 54M is all about production, having weaned the heaviest bull calf at Harvie Ranching this year as a two year old. Her dam 152Z was the calf at side of MS Unique 80W when she was crowned National Champion Polled Hereford Female in 2012. This also makes the dam of 54M a maternal sibling to Harvie Smoke Stack ET 195B, a bull that has had a big impact in the Topp Herefords program in North Dakota. The embryo sire Harvie Exclusive ET 43M was one of the picks of the NWSS 2025 Champion Carload selling to RSK Farms and partners — his first calves hit the ground this year and are really special. With Firefly 125Y and Unique 80W in the pedigree these embryos are bound to add performance, udder quality and maternal excellence to any operation.
- Embryos are Grade 1 conventional embryos, exportable to the US and are stored at Davis Rairden Embryo Transplants.

- Haxton is offering two matings for this year's Eve Sale that represent the newest, freshest genetics from Hoffman Ranch. The cow, Debbie 4370, continues to set herself apart from the pack. She was crowned a recent National Champion Female as she was the Grand Champion Female at the 2026 American Royal. At the 2025 JNHE she was Reserve Champion Polled Female. This is the first chance to acquire a mating from the "Next Great One" from Hoffman Ranch. The two sires represented are Arrowhead, and the newest outside Herd Sire for Hoffman Ranch, Wyomade. Wyomade was the $80,000 choice from Hoffman's & Frederickson Ranch in 2026 at NJW. His semen has been in huge demand with little being sold to date. Either choice will represent some of the newest genetics available anywhere in the breed today.
- Selling choice between the two matings with 3 IVF embryos per mating & a guarantee of 1 pregnancy per mating if implanted by a certified embryologist.

- 864L is one of the rare cows to come along in the breed for quite some time. Huge MARB & CHB figures, she's nearly solid red with a near perfect udder. Individually, she posted an IMF ratio of massive 171. The progeny from this mating to Finale will have incredible carcass numbers to go along with a curve bending set of production EPDs.
- Selling 4 IVF embryos with a guarantee of 1 pregnancy if implanted by a certified embryologist.

- This young donor from Colyer is one of the most exciting young females to come from Bruneau, ID. She is a full sister to the one and only Arlo, part of the 2023 NWSS Champion Pen of Bulls. From there he sold for $165,000 for half interest to Hoffman Ranch & Buck Cattle Co. 2138 herself was a past high seller for $195,000 for half interest in the 2022 Colyer Fall Female Sale.
- 2138's dam is one of the most prolific cows in the Hereford breed, 1311. She is responsible for over $1,500,000 in progeny sales and the dam of some of the top herd bulls in the country such as Double Your Miles, Special Edition, among several others.
- Selling choice between the two matings, 4 IVF embryos per mating with a guarantee of 1 pregnancy if implanted by a certified embryologist.

- ROYAL DUTY x MAID OF GOLD offers the rare opportunity to purchase full-sibling embryos to Rose Gold! Royal Duty was purchased from our longtime friends at Pierce's Hereford Haven. Although he was never heavily promoted or overused, he brings a unique pedigree, tremendous length, extra bone, and the kind of build and structure we believe it takes to make exceptional females. This mating combines Royal Duty's added dimension and power with Maid of Gold's proven ability to produce champions. Opportunities to access full siblings to a female like Rose Gold are few and far between, making this a truly exciting offering.
- Selling choice between the two matings with 3 IVF embryos for the Royal Duty & 4 IVF embryos for the Arrowhead. Guarantee of 1 pregnancy per mating if implanted by a certified embryologist.

- ARROW HEAD x MAID OF GOLD combines one of the hottest young bulls in the breed with a female who has already proven she can produce at the highest level. Arrow Head offers tremendous potential when paired with Maid of Gold's proven maternal strength and ability to make both outstanding bulls and females. Her progeny are built from the ground up, with excellent skeletal design, added power, and the kind of elegance that can make them competitive in the show ring without sacrificing real-world functionality. We believe this mating has the potential to produce cattle that will make their new owners proud and leave others wishing they had invested.
- Selling choice between the two matings with 3 IVF embryos for the Royal Duty & 4 IVF embryos for the Arrowhead. Guarantee of 1 pregnancy per mating if implanted by a certified embryologist.

- The **most admired cow in our herd** for both her looks and ability to produce our top end bulls and heifers with whatever sire she has been mated to. 283H is a maternal sister to Endure and is the 79Z daughter that has taken her mothers place here at NJW! She has moved to the forefront of our program by producing ...
- 2026 High Selling Bull!
- 2025 and 2026 "Picks of NJW Heifer Calves"!
- Her first natural calf is a high-end brood cow and donor here on the ranch.
- Numerous sons are herd bulls for registered outfits across the U.S. and Canada.
- Her 2026 sons are leaders in the bull pens! She ranks in the top 1% of the breed for udder and teat, top 2% for sustained cow fertility and top 5% for BMI$. She is easy doing and fertile with an outstanding udder and feet.
- A cow to add power, soundness and breed leading looks to our selection of bulls with added carcass values.

- 125L was our $30,000 valued selection out of Atkins/Delaney 2023 Genetic Opportunity Sale. She has absolutely kicked it out of the park as a donor. Her first two daughters to sell averaged over $10,000 in our 2025 Genetic Opportunity Female Sale. Her son, JDH AH GUNSLINGER 40N ET sold for $40,000 last year the 2026 National Western Hereford Sale. In February she produced a $20,000 son & $12,000 son. Just this past fall, she produced a $10,000 high selling daughter. On paper, she puts together an elite set of figures. She is the only animal in the database with her combination of Growth, SCF, BMI & CHB. 125L also is a maternal sister to Final Print. Either sire chosen from these matings will produce progeny that will be highly sought after.
- Selling choice between the two matings, 4 IVF embryos per mating with a guarantee of 1 pregnancy if implanted by a certified embryologist.

- We were lucky enough to be the high bidder at $46,000 on this great female in the Fall of 2025. This Homozygous Polled full sister to Lincoln & Mercedes proved herself as a great producer for the Atkins/Delaney program. Elite phenotypically, & with a tremendous number profile, she's already produced a high selling son last year and a daughter sold in 2025 in the National Western Hereford Sale. Most recently, a daughter was a sale topper for Atkins/Delaney at $33,000.
- The sire of this mating is one of the new herd sires for Topp Herefords and Rausch Herefords. He offers a curve bending set of EPDs, and his first calf crop is proving themselves as standouts last Spring.
- Selling 4 IVF embryos with a guarantee of 1 pregnancy per mating if implanted by a certified embryologist.

- Breeding cattle like Rose has been our goal since the beginning. A maternal powerhouse with breed-leading EPDs and the quality to hang right with them in the show ring. She's hung her share of banners, but her story is only beginning. I have a gut feeling these Arrowhead calves will be her biggest claim to fame.
- 7119 is the definition of a cornerstone cow. Any success Running P Cattle Co. has had, she's been behind it. She's the mother of Rubble, Swagger and countless maternal, highly productive females with beautiful udders. She also has a knack for producing calves that excel genomically.
- If we hadn't run out of recips, these embryos would already be in. I have no doubt there's a herd bull in here.
- Selling choice between the two matings, 3 IVF embryos per mating with a guarantee of 1 pregnancy per mating if implanted by a certified embryologist.

- What a great opportunity we are offering in Denver! 9195 is setting herself apart as our go to donor. She may be one of the deepest centered, longest bodied cows we have seen. She has produced top sellers in many of our sales. Daughters are working at TRM, Dry Creek, McGuffee, Burns and Underwoods. In our recent sale pick of the 9195 ETs sold for $26,000.
- Pick your sire, Cuda Belle, Dominion or Sandhills, and make your next herd bull or donor female. Embryos are stored at Trans Ova, Georgia. Guarantee one (1) pregnancy per mating if implanted by a certified embryologist.

HPH 756 LADY LUCK 5480J

- Lady Luck has quickly established herself as one of the most consistent donors at Wildcat. A Reserve Junior National Champion Cow-Calf Pair in 2024, she combines the phenotype, maternal quality and pedigree we want to build around — and her first progeny are proving she can produce at an elite level. Her daughter, Wildcat Lavender, topped our 2026 production sale at $53,000 before earning Reserve Division honors at the American Royal, while Wildcat Landman sold for $30,000 for half interest after earning Reserve Spring Bull Calf honors at OKC.
- Here is your choice of two exciting matings. All That brings the power of the reigning OKC Supreme Champion Bull and Denver Grand Champion Horned Bull, while Travis continues to build momentum as an exciting young sire whose first progeny are already making noise—including a daughter that topped the Fawcett sale at $32,000.
- These matings combine a proven young donor with two of the breed's most exciting sires. We think the resulting females could have tremendous value in the show ring—and even more when they enter the donor pen.
- Selling choice of three (3) female-sexed IVF embryos, guaranteeing one (1) pregnancy if implanted by a certified embryologist.

- This is one of the very first opportunities to acquire semen on First Class, the $70,000 high seller from the Final World Class Bull Sale for Churchill Cattle Co. To put it in Dale's own words, "First Class is an ideal Hereford bull". In the same sale, his full sister sold for $50,000. Blending great balance in his production numbers along with exceptional maternal traits, this Horned bull is one of the first sons of Next Step to acquire semen on.
- Selling semen in groups of 5 units.

- Selling, five (5) groups of five (5) five units of semen
- A true herd sire that represents a big step forward for progressive seedstock operations. Legacy is the kind that checks all the boxes, combining pedigree, phenotype and genetic value into one complete package.
- This $70,000 highlight of the Churchill Cattle Co. World Class Bull Sale offers an exciting outcross pedigree for many programs across the breed. He is a polled son of the popular $175,000 Churchill Stanfield and is backed by the $220,000 high-selling female from the historic Churchill Dispersal, stacking elite genetics on both sides of his pedigree. Legacy brings power, dimension and herd sire presence with the kind of structural integrity and balance required to make a lasting impact.
- Ranks in the top 10% of the breed for 13 traits.

- Homozygous polled, fully pigmented. Can be used on heifers or cows. This bull has a lot to offer to the entire breed. He is a big spread bull with breed leading marbling and CHB. His mother is a full sister to Churchill Lady 3121L who sold for $225,000 at Churchill's Dispersal sale. He's a big, outlined bull that's very deep, well balanced, square hipped, and useful. Top 1% $BII, Top 1% $BMI, Top 1% $CHB, Top 1% CEM, Top 1% Stay, Top 1% UIMP, Top 1% UREA, Top 2% M&G, Top 3% BW, Top 4% CED, Top 4% MCW, Top 5% UDDER, Top 10% CWT, Top 10% Milk, Top 10% TEAT, Top 10% WW.
- Selling 10 packages of 10 units of semen.

- This is the first opportunity at truly a breed changing bull, right here in Denver. Producer comes to us orginally from John Pitt. An exceptional Monument son, what makes him stand apart is the cow. In her young career in production, his Mandate dam has posted a nurse ratio of 4@104, and has become one of the top female at Pitt Farms Polled Herefords. After partnering with Waggoner Cattle Co., this will be the very first offering of semen on this new Herd Sire.
- Of the 388 Monument sons on record, Producer is ranked second for his combination of CE, WW & YW. When you combine the major economic traits of Production, Carcass and Maternal, he is unequaled among all Monument sons, ranking #1 for CE, BW, WW, YW, REA, MARB, $BMI & $CHB. Add with that he's Homozygous Polled.
- Selling semen in groups of 10 units.
