JENSEN RANCH FEMALE SALE
AT SANDER'S RANCH, LOUISBURG, KS

The Chosen Sale

5pm
OCT. 22. 2026

JENSEN RANCH FEMALE SALE

We are excited to welcome Hereford breeders, longtime customers, friends and those joining us for the first time to the 2026 Chosen Female Sale at Sanders Ranch in Louisburg, Kansas.

We have been incredibly blessed by the many people who believe in our cowherd and program, and we always look forward to visiting with you. Join us for a social as you view the offering before the sale begins in the early evening, followed by a beef dinner and more fellowship.

Our family has worked hard to put together an offering that represents the very best of our program and genetics. Jensen Ranch has nearly doubled in size over the past year with the help of our son Brady and his wife, Allie. Brady has stepped into the management and breeding decisions, while Allie has taken an active role in promotion and bookkeeping. We are grateful for their commitment and excited to see the next generation become increasingly involved in the operation.

Around here, cattle are part of the conversation every day. We plan matings years in advance with the goal of producing cattle that combine phenotype and genotype and genetics that can make a lasting impact in your herd.

2026 has been an exciting year for Jensen Ranch. We started the year with Arrowhead being selected Reserve National Champion Bull in Oklahoma City, followed by exhibiting the Champion Pen of Bulls at the National Western Stock Show. We are especially proud that the maternal side of those champion genetics are represented in this year's Chosen Sale offering. Once again, we are also offering the Pick of our 2026 Fall-Born Heifers, which has become an anticipated selection of the sale.

This has also been a special year for our family. Last fall, Jensen Ranch was recognized at the American Hereford Association Annual Meeting for 50 years of breeding Hereford cattle. In June, we traveled to Boise for the Beef Improvement Federation meetings, where Jensen Ranch was honored as a Seedstock Producer of the Year finalist. In August, we welcomed the Kansas Hereford Tour to the ranch to celebrate our 50th year and enjoyed sharing our cowherd with so many breeders, customers and friends.

The Hereford junior program continues to be an important part of our operation. We enjoyed the Junior National Hereford Expo in Madison and are once again proud to host the National Junior Hereford Board at the Chosen Sale in support of the Hereford Youth Foundation of America. We strongly believe in investing in the next generation of Hereford breeders.

We sincerely thank Sanders Ranch, Steve Sanders, Darrin and Connie Barbour, and the entire crew for providing an outstanding sale site and helping us showcase these females.

We hope you will join us October 22 for an elite offering of Hereford females, good food and great fellowship. We look forward to seeing you in Louisburg!

OWNED WITH TWJ FARMS, NE

We are committed to continually offering our very best in The Chosen Sale and that is why the top female we have ever owned is being offered in this year's version of The Chosen Sale. Our goal is to offer genetics to Hereford breeders that can allow them to achieve their goals, and we think Cher K68 is the kind to elevate a program.

In her first two calf crops, K68 has generated \$400,000 worth of progeny and genetic sales. This year will be no exception, as she has an amazing flush of bull calves by KJ Justice gearing up for Denver and a flush to Rancher highlighted in this offering and in next spring's Bull Sale. Plus, her natural calf sired by "Lakota" is shaping up to be a top herd bull candidate with an unbelievable genetic script.

If you have followed our program, you are aware of how fond we are of this female, but it's the things beyond her progeny quality that have continued motivating our excitement. She has averaged 11 embryos per flush, bred AI 1st service each time regardless of the stress of flushing work, and she raises a top calf on her side each year (1st calf had a WW ratio of 133 and 2nd had 120, and the third appears he should excel as well) Even while being flushed multiple times, she has the marks that we look for in a dam of distinction.

Cher K68 is our model female at the Jensen Ranch and we offer her to the public in her entirety with much excitement.

A daughter of the maternal phenom Cher K68 and sired by Rancher, our calving ease female making herd sire, whose sons and daughters have been in great demand!

Cher 350P is the biggest boned and footed heifer ever offered out of this mating. She couples that with a CE and BW to YW spread that is always in demand.

We admire the Rancher line of cattle for their growth curve and moderate MCW. They are the right kind!

A homozygous polled, high indexing daughter of the maternal rockstar Cher K68. This is a big time Donor prospect with the makings of being a household name like her mother.

Her build, body, and kind nearly mimic her mother as a heifer calf. She is the kind that raises cattle to better the Hereford breed. Broody, good teats, and perfect structured.

High CE and big spread from BW to YW that is always in demand.

Her flush brothers will be in high demand in our annual bull sale due to the EPD's scripted like hers.

Image 490M was a STAND OUT calf and our lead heifer in our pen of heifers 2025 at the National Western Stock show where GKB purchased ½ interest in her because of her outstanding balance of exceptional phenotype and genotype.

As Image 490M hit production and raised her exceptional heifer calf in her first go we knew she was the kind that needed flushed on heavily.

Her unique pedigree and outlying data set herself a part as a breeding piece with tremendous mating versatility and a ton of genetic value. Plus, she has perfect teat placement with the POWER cow look it takes to be a big-time producer.

490M's mother, 623K is a flush sister to KJ Innisfail 45C Confidence 609K ET, who came back with amazing results in the National Reference Sire Program test.

We have flushed her 3 times this spring/summer and averaged 12 embryos. We have held her open to offer this flush opportunity on our top 2-year-old female.

Huge performance and carcass data with a different pedigree! Outcross to most mainstream performance cattle with a phenotype that sets her apart.

Image 263P has the makings of a power donor cow, just like her mother. Plus, she has a captivating phenotype and a data set that will launch her future progeny ahead of the pack.

I admire how big and bold her center rib is with a length and power combination that you'll really like. Additionally, she has structural build and foot quality to breed forward on.

We think 263P could be on a halter, but most importantly she should have tremendous ROI as a cow.

Flawless is the best way to describe Iris 335P. She has a near perfect build. Smooth shouldered, a deep and bold rib, and the length and levelness of hip that you find in really good Hereford cattle. She is as close to perfect in her skeleton as you'll find.

Not only does Iris 335P have a captivating pedigree and genotype but her phenotype can be showcased in the ring as well as any in this entire set.

Buy with confidence, we think she is a special kind of good.

Donor prospect! Dark red, great pigment, and homo polled with the biggest CHB figure of her sisters.

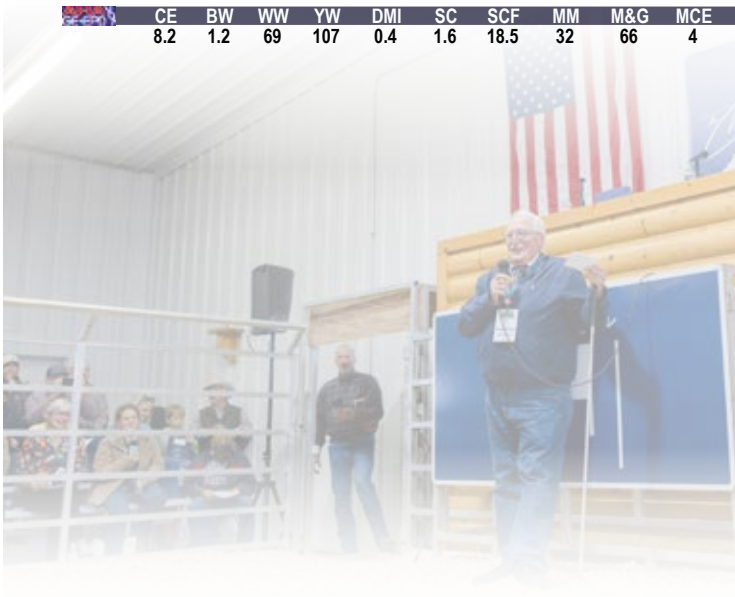

This is the power female of the three flush sisters that are ¾ sisters to KJ Justice, the ST Genetics feature!

She presents an almost ideal EPD script in our mind. Accelerated CE with an impressive growth spread and breed leading carcass strengths!

Her dam, IRIS 488G traces back to some of Kevin's favorite cows, specifically 375C. The entire IRIS line is wedge shaped, great uddered, and the look of an ideal Hereford brood cow.

A homo polled female with great data and an awesome maternal design.

This mating was done to compliment both sire and dam. Big time CE with a BW and YW spread that would entice our bull buyers. Plus, she is equipped with the carcass and maternal data to have so much potential moving forward.

In our opinion, all three of these flush sisters are donor caliber on foot and on paper, you be the judge and invest in the one that fits your program!

¾ sister to KJ Justice & the first females to be offered out of his dam, 488G!

This Element daughter is by our Up-and-Coming donor Cher J49, who had a top seller by High Roller, last year to GKB.

She's outlying for looseness of build, with an extra shot of length of front and body.

Her coloration, red on her head, and presence is easy to appreciate.

Don't miss that she reads as good as any on the sale on paper!

Kicking off a set of flush mate females by the lead show donor Chardonnay 907E is a special polled female.

We think this is the soundest, most correctly built Chardonnay to hit the picture pen ever. Plus, she sits on a stout set of feet and legs.

A perfect shoulder set, with the rib design we all seek. Much like her flush mate sisters who have came before her, she is destined to find much success in the ring.

Structure, power, body, balance, and build! She really has it all!

Another top show prospect by Chardonnay 907E and Tomahawk.

This heifer weaned off green but is coming for the sisters that are more ready because she may be built with as much intrigue and uniqueness as any in the flush.

Personally, I think her build and design is a near match of the heifer Cruz Colyer piloted to a Division Championship at Cattlemen's Congress and NWSS in Tomahawks first calf crop.

This heifer has big time features and is unlike any we have had out of this mating. She is uniquely wide built, and stout made with as big of feet and legs as you can put on a female, while still remaining sound and good at the ground.

Her dark red coloration and eye pigment complimented with her maternal first impression will fit many show judges.

Personally, I think she offers as much show ring potential and breeding value for show genetics as any in this set. I promise you won't miss her!

Many visitors this summer and myself may have this heifer ranked as high as any in the set. We all converse after looking at her that if you want to be a player in the horned show, you better take a serious look at her.

Dark red, level built and ultra captivating.

Her feet hit the ground like good ones do and she has as long of a front end and wide of a pin set as you'll find any where.

I like her picture, but she is better in person. Don't miss her.

Loaded with Balance, Quality, and a great look and presence.
I have gone back and forth all summer between her and her sister 334P (lot 19), because they are so similar and yet built to run with the best in the horned division.
This Chardonnay x Tomahawk is equipped with the essentials to show as a bred at a high, high level. Plus, I think at the biggest stages, her dark red color, eye pigment, and no hole's type is the kind that gets it done, time and time again.
Balanced type, balanced data, and dark red. Buy with confidence.

We have repeated this flush probably 7-10 times because there are so many versions of elite mixed in this mating and we hit again on this one.

She stands in the same league as some of her sisters that have won at Cattlemen's Congress, American Royal, Reno, NWSS, and Junior Nationals for the Roeder, Blankenship, and Lemenager families.

This horned heifer has "the look", the outlying structural build, and extra shot of dimension that will make her hard to miss. She has been a pasture favorite all summer.

A big-time polled female that you can't help but stop and fall in love with! We think she is built for success early, often and down the road.

Chardonnay 221P reminds me of a blend of the heifer Paige Lemenager exhibited to top honors and the heifer Mason Roeder showcased to a division winning slot this summer in Madison.

Chardonnay 907E has become a household name in the Hereford Show ring and this dark red daughter should rank among some of the very best she has produced in our minds! A super maternal, quality heifer!

A horned heifer that is built right from the ground up, sits wide at her base, with an enormous rib cage. Plus, she floats off a big and comfortable running gear.

We have long thought that Brandy 223P has the necessities to be a force in the horned shows at major events.

Brandy 223P has been a KJ favorite all summer and he's normally not wrong!

Her mother, Gemstone 181H, has quickly risen to the top of the Hereford Breed for her ability to generate BOTH, cattle that can show and possess balanced and positive data packages!

WOW! Gemstone's namesake gets passed on to this special creature!

Captivating presence, undeniable quality, and the build to show at a high, high level. The Gemstone cattle started to garner a lot of attention for the consistent quality, and this flush group continues the tradition!

This horned heifer is built uniquely, but has the right hind leg set to motor in the ring.

We know you'll find her! She's hard to miss, like the special ones are.

The lone polled Brandston out of the great Gemstone 181H!

Gemstone 321P has the neatest head and neck set of the entire offering and uniquely sets as wide and powerful from behind as any. Bold ribbed and nice back legged to boot!

This end of February has the potential down the road, read in, find her, and feed her and you'll really be glad you did!

AN ELITE HORNED SHOW FEMALE!

We could have led off the catalog with this heifer. She's domineering in her look and design, built right, and stout.

She has been a ranch favorite by all since the day she hit the ground and we think many of you will think the same.

Plus, she is pigmented, presents balanced data, and built like she can raise them too!

A Brandston out of Tomahawk mother (753D). Royally bred, stout boned, and fault free in her build and make up.

Much like her dam, she has a flexible skeleton with extra bone and a super maternal build.

This horned heifer is a low-birth-weight Brandston that had a maternal sister grab reserve division at the JNHE this summer for, Ryan Oleson.

Unique show prospect with outlying data!

Powerfully built, sound made horned show prospect out of the popular sire Brandston.

This heifer has the chrome to catch your eye, with a super flexible structure. Yet, she can stop and put together a neat profile and still has extra dimension from behind.

A maternal sister to Tomahawk! This Cher daughter has a tremendous EPD profile as well!

We have been asked each year. Do you have any ApriIs? This year, WE DO! And this one is BIG TIME!

When we sampled Premier, this was just what I had envisioned. Stout, good built cattle with a tremendous running gear.

She has a really soft hair coat too! She'll be a top show prospect on sale day! One of the exceptionally nice heifers in the offering!

We have been asked each year. Do you have any Aprils? This year, WE DO!
The first sire group of Premier is nothing short of impressive! We liked these prospects so much as calves, we flushed Chardonnay back that way this spring.
As loose built as you'll find out of Chardonnay 907E, with the substance and body that you always find!
Incredibly stout individual with a ton of length.

A Tomahawk daughter with the look and build to compete in the ring!

When Dustin and I toured cattle for the sale, this heifer stuck out as one of our favorites that day. She has a neat head and neck, a bold rib, and a super good hind leg.

This February polled heifer is very elegant and clean through her front 1/3. Her mother has been an awesome cow and I'd bet on her to do just that.

Bred to KJ 985L Balance 790N on 4/20/2026 44661750
DUE TO CALVE MARCH 2027

Breed leading donor in the making and a FLUSH SISTER TO ARROWHEAD!

The Tomahawk x Belle Air Lass 8037 mating in our program that we will talk about in our operation for eternity.

Dark red, red eyed, great built with a power maternal type that will generate great cattle in the future. She has a genetic script with a low birth and explosive growth, which the seedstock and commercial producers all demand!

Her brothers were the talk of the NWSS, Cattlemen's Congress, and our bull sale. Each of her 5 brothers work in seedstock herds around the country and multiple have had semen sold to other breeders. Specifically, Arrowhead has been used in USA, Canada, and Australia. With international interest continuing to grow.

Image 995N has been on my Donor watch list since she was a calf because she possessed the POWER COW look that her mother and full sister (LOT 4, 490M) possessed.

As we step into uncharted territory in the beef industry, cattle with her moderate birth and explosive growth will be in HIGH DEMAND, plus her carcass and maternal strengths indicate she can push the envelope on cattle that move the breed forward.

Image 995N is a full sister to 490M, the lot 4 Flush. We feel that this proven mating is a perfect mating for the times: outcross in nature and breed leading genotype and phenomenal phenotype.

Elite data, the RIGHT KIND plus she has eye pigment, hooded eyes, and a freckle face!

Validate 926N is a full sister to KJ ELEMENT owned with Upstream, Fawcett, and Breezewood, who was the past high selling bull in our 2024 bull sale. Element garnered attention from around the country due to his ability to combine PHENOTYPE and a high degree of carcass and growth.

926N is a dark red, feminine and extremely quality built donor candidate. For those who follow our program, I'd call her a stereotypical KJ TYPE!

A flush sister sold to Shane and Ashlie Werk in Herman, MN last year's version of The Chosen Sale. GE EPD's will be available before sale day.

We CHOOSE the very BEST to offer in the Chosen Sale and this OUTCROSS BEAUTY is a must see! Liberty 888K was a sire we sampled on heifers due to his exceptional blend of phenotype and genotype! Sam Eck purchased a son in the 2026 bull sale that was an absolute stud! Additionally, 888K, mother has a mouth-watering udder and is still producing at 11 years old. That's the kind we like! Dark red with freckles and pigment! Plus, she will strike you as the kind to raise better Hereford cattle, whether you want to focus on the best in the pasture or the ring.

The Harvester daughters will blow you away, they are incredibly consistently dark red, powerful, super uddered, and amazing mothers!

Misty 037N will trace back to the Misty 274S cow multiple times, she is truly the secret to almost all the great ones that come out of our herd. Bottomline, this female is built to be a maternal beast!

Top 1% SC, CW, 2% REA, BMI, 3% BII, CHB, 4% YW, SCF, and Top 5% MG

PIGMENT, Stacked on for generations! With breed leading growth!

A tremendous pedigree, backed by one of our top Harvester daughters and tracing back to Misty 274S.

Plus, she is a CRR Balance 107, a bull we used hard on heifers, we were very satisfied with the bulls offered out of his as well as the replacement kind of females.

A PHENOTYPE YOU WON'T MISS! THE BROOD COW KIND!

A dark red, red eyed, broody type with a super pedigree! Balance x Harvester Daughter! Plus, she is HOMOZYGOUS POLLED.

A growth spread that progressive producers, and commercial guys put in demand!

Big red eyes, in a powerful package with BREED LEADING GROWTH!

Roxy 872N was Roxy 613K's first calf, which deemed one of our top young cows! She is a superb calf raiser, who has one of our top KJ Justice calves on her side this year. Plus, 872N is bred to KJ JUSTICE, that should work!

OUTCROSS PEDIGREE for most progressive firms.
