

# *Mid-Atlantic Fall Bonanza Sale*

**November 8, 2025 • 12:00 p.m.**

**Rockingham County Fairgrounds • Harrisonburg, VA**

*Hereford Weekend In Virginia*

**Saturday, November 8:** Fall Bonanza Sale Followed by Fall Round Up Showmanship

**Sunday, November 9:** Fall Round Up Junior Hereford Show

*The Virginia Hereford Association is pleased to announce the 2025 Virginia Hereford Association Honoree is*  
**Bob Schaffer**

**Congratulations to this year's  
2025 Virginia Hereford Association Honoree  
Mr. Bob Schaffer**

Bob Schaffer was raised in a city in Maryland but spent plenty of time visiting his grandfather on "The Old Homestead," which started his passion for agriculture.

After high school, Bob served in the Navy from 1968-72 and then spent 38 years in the computer-services industry, retiring in 2012 as a director for corporate program management. Inspired by his grandfather's stories, Bob established Deer Track Farm in 1979 with his wife, Shirley, and their children.

He purchased his first calves in 1993, and Registered Herefords were introduced in 1996. From the start, Bob has used the most up to date industry tools and technology to assure superior standards, including flushing high-end cows and transferring those embryos into commercial cows to help grow the herd. Five Deer Track Farm bulls have been accepted into the AHA's National Reference Sire Program. Bob is one of the original 40 Gold Whole Herd Total Performance Record (TPRTM) breeders and has been recognized as a Gold TPR breeder every year since the program's inception. Naturally, he achieved Platinum TPR breeder status in the fall of 2020.

Bob joined the Virginia Hereford Association (VHA) in 1997 and served on the board for 18 years, seven of which he held the role of president or vice president. He spearheaded and managed the VHA's Bull Development Program, which tested over 800 bulls since 2001 and has increased the marketability of Hereford bulls in Virginia. He also produced a historical video featuring original charter members of the 1968 Virginia Polled Hereford Association. He was elected to the National Hereford Board in 2020 and served a 4-year term ending in 2024.

In 2017 Deer Track Farm hosted both a VHA Field Day and a Certified Hereford Beef® Field Day, where the Sysco® sales team learned about beef production firsthand. With conservation a priority, the farm is part of the United States Department of Agriculture Conservation Easement Program to ensure land will not be subdivided and developed. Deer Track Farm was recognized with the Clean Water Farm Award in both 1994 and 2013 by the Commonwealth of Virginia's Department of Conservation and Recreation and was honored as the 1994 Conservation Farmer of the Year for Spotsylvania County.

In addition to producing high-quality female seedstock and performance-tested bulls, Bob has been a consistent and passionate supporter and advocate for the Hereford breed and for Hereford youth, helping to grow and support the Mid-Atlantic Fall Round Up Show, the Virginia Junior Hereford Association and many other programs supporting youth. To that end, he has also generously donated to the Hereford Youth Foundation of America provide scholarships to youth interested in agriculture.

We are beyond appreciative of Bob's dedication to the Hereford breed, Virginia Hereford Association and Hereford youth and are pleased to be able to honor him as this year's Honoree.

# Mid-Atlantic Fall Bonanza Sale

**Saturday, November 8, 2025 • 12:00 Noon**  
**Rockingham County Fairgrounds • Harrisonburg, VA**

- This production-oriented heifer is open and ready to breed to a bull of your choosing. She comes from an exceptional pedigree that adds pounds and dollars beef to any operation. Big-footed, sound and has the rib shape and design to be a long lasting addition to any program. We are proud to offer this heifer as a donation heifer for the Virginia Junior Hereford Association to kick off their fundraising campaign for South East Regionals.

- Big time opportunities here! Time to own full or half sib embryos to one of the most winningest Herefords in Virginia, "Macy."
- She and her dam Caroline were named Supreme Champion Cow/Calf Pair at the Virginia Beef Expo where Macy was also Calf Champion. Macy was Champion Hereford at both our local county fairs last summer as a calf. 2024 VA State Fair as Champion Hereford and 4th Overall Heifer in a very competitive drive. At the VCCP 2nd Wind show she was also Champion Hereford in both ring A and B. Supreme Heifer and Champion Bred & Owned for Jack at the 2024 Mid-Atlantic Fall Round-Up. She went on to Louisville where she won her class and was Champion Bred & Owned in her division. At the Rising Star Jackpot Show, she won Champion Hereford in both ring A & B but went on to win Supreme Heifer in Ring A and was 4th Overall Heifer in Ring B.

**Special Terms:** All packages of three (3) embryos will come with a guarantee of one (1) 90-day pregnancy implanted by a certified veterinarian.

- A top-notch Blueprint daughter out of arguably our best cow family, this first calf heifer has a world of good.
- Moderate with a beautiful udder, she did a bang up job with her first calf and offers an EPD profile that balances calving ease, growth and maternal performance.
- We debated long and hard before offering this cow and her heifer calf, but we firmly believe in offering cattle that we feel will add value for their next owner and this girl is definitely that!
- Pasture exposed from 5/30 to 8/4/25 to ECR 238 Fortified 4236 (Reg. #44622301), our new herd sire and confirmed bred by blood on 9/2/25.

- Goggle eyed and fancy, you have to love the look of this end of March heifer calf out of a first calf heifer. With an EPD profile that shows 9 traits in the top 20% (6 in the top 10% or better) you can put a halter on this girl and show her or just breed her and use her to move your herd forward — you can't go wrong either way.

- Bella has been one of the mainstays in our herd.
- Sired by DTF Bellisarus a bull we leased to Accelerated Genetics. Known for his outstanding IMF he has passed this trait to his daughter, as her IMF EPD is in the top 2% of the breed.
- Bella is safe with a DTF Dauntless heifer calf due in the spring.
- See ad below. This will be the first Dauntless calf outside our herd.

- Lizzie, A KCF Homeward daughter has been a top producer in our herd.
- Solid EPD's from a solid pedigree.
- Her dam was sired by the great Revolution 4R bull.
- Lizzie sells with a KCF Dominion heifer calf at her side. If she raises this heifer calf as she has raised her other calves, you will have the buy of the sale.

- Encino is a son of the outstanding LOEWEN Genesis G16 bull that has had tremendous demand for his semen.
- Encino is dark red, short marked with large goggle eyes.
- Strong pedigree and exceptional GE-EPD's.
- If you need to remove some chrome and add color to eyes here is your chance. Beyond cosmetics he will boost the EPD's of your calf crop.

- Django, A KCF Acclaim son, has all the cosmetics, including 4 white socks, of a traditional Hereford plus goggle eyes.
- There is nothing traditional about his phenotype or his GE-EPD's. His WW, YW and MM EPD's are all in the top 1% of the breed.
- A proven pedigree with unlimited potential to make some powerful calves.
- I would say he is worth your serious consideration.

- I chose this cow because she is off my spring calving cycle, has a beautiful udder, lots of pigment, is very maternal and produces a solid calf every year.
- She is an easy keeper—one you can turn loose in the pasture without worry.
- Currently has an exceptional heifer calf at her side and you can be sure she will develop into an impressive cow.
- Pasture exposed to my herd bull (Reg. #44539011), who originates from the nationally recognized Colyer Herefords in Bruneau, Idaho.

- Lexi is a high volume, freckle-faced, deep cherry red young cow that does an exceptional job in raising a calf.
- Sells with a sporty heifer calf (Reg. #P44691626), born 9/1/25, sired by UHF 10B Powerhouse U06L. He was a 3-time National Class Winner and Division Champion at the NAILE in 2023.
- Halter broke and sells open.
- Watch for updates on Facebook as the sale approaches.

- Another Validated daughter, strong carcass data, thick bodied, very dark red with some chrome.
- Full younger sister to Lot 41..
- This young female has proven to be an excellent milker with a good udder as she raised a fat steer as her first calf (steered for smaller testicles).
- Open for fall breeding.

- This April daughter sired by Red River stems back to the well-known "Caroline" cow family at Grimmel Girls Show Cattle.
- It's hard to find a Hereford heifer more sleek and neat about her neck and front end than this one.
- This heifer is green, but she has all the right pieces to be a stand-out in the showing-time and feed!

- 927 has been a great brood cow for us and should continue to raise great offspring. She has done a great job with her Dominion heifer calf.
- Bred AI on 5/25/25 to HHF Provision 5L ET, that we own with Knoll Crest Farm, then pasture exposed from 6/7/25 to 8/31/25 to his flush mate, HHF Sure Bet 3L ET.
- Safe in calf to pasture exposure, due around March 25, 2026 with a heifer calf.

- TRCC Stevie is our favorite heifer of 2025. Her dam, MRR Dixie Chick 4L (Reg. #44436015), was our pick of the fall bonanza sale last year from Montana Raye Ranch.
- Deep cherry red, stylish build, and plenty of chrome!
- She is ready to go to work for you in the field or the show ring
- Sells halter broke.

- 
- View/bid online in Real Time
  - Registration is required. Please register at least one (1) hour prior to sale time at [www.cowbuyerlive.com](http://www.cowbuyerlive.com)
  - High Speed Internet is required. Slower speed will not permit you to bid and keep pace in real time.
  - Terms: Purchasing online constitutes a legal contract and promise for payment of purchases. All purchases must be paid within five (5) days of sale date and prior to load out or delivery of cattle purchased.
  - Cowbuyer.com is a service provider and is not responsible for the activity or inactivity of any technology, internet connection at the sale site or connection and technology of the bidders.
-

## Terms and Conditions

- 1. Identification:** It shall be the obligation of the seller to determine that each animal sold carries a legible tattoo.
- 2. Bidding:** Each animal will be sold to the highest bidder. The auctioneer will settle any dispute as to bidding. His decision shall be final.
- 3. Terms:** All cattle must be paid for during or immediately after the sale and may not be moved before settlement has been made with the clerk, unless prior arrangements have been made with a member of the sale committee. Each animal will be at the purchaser's risk as soon as sold.
- 4. Corrections:** Corrections or additions of any information in the sale catalog will be announced from the auction block and such announcements will take precedence over any printed material.
- 5. Mail or Phone Bids:** May be sent to the auctioneer, sale day phone 540-333-1019 or any of the sale staff
- 6. Registration Certificates:** Certificates will be transferred to the buyer. It is the responsibility of the buyer to give the correct name and address for making transfers. Calves born after the sale are to be registered by the purchaser. AI certificates will not be given on unborn calves unless otherwise stated by the consignor or if the consignor is the owner or co-owner of the AI bull.
- 7. Health:** All cattle selling will have health certificates for interstate shipment.
- 8. Guarantee:** The laws of the State of Virginia shall govern the validity of this sale, the construction of its terms, the interpretation of the rights, duties and obligations of the buyers and sellers, the enforcement of its terms, the remedies upon breach and all other matters relating to this sale. The exclusive venue and forum for any legal disputes between the parties shall be either in the Federal District Court for the eastern section of Virginia or in a state court of competent jurisdictional defenses that each may have to the institution of such an action in such courts.
- 9. Responsibility:** All persons attending the sale do so at their own risk. Neither the Virginia Hereford Association nor the Rockingham County Fairgrounds will in any way whatsoever assume liability, legal or otherwise, for any accidents or injuries that may occur.

## 2025 Consignors

### Breezewood Hills Farm

Matt and Stacie Hickey  
540-255-4209  
Staunton, VA  
Lot 1

### Linton Polled Herefords

Art Linton  
308-293-5816  
Front Royal, VA  
Lot 2

### Mountain Lion Meadow Farm

Todd Scott  
434-665-1224  
Concord, VA  
Lots 3, 4

### S&K Farm

R.G. and Kerrigan Bauserman  
540-481-0626  
Strasburg, VA  
Lots 5, 6

### Begoon Farm

JT, Laura Begoon & Family  
540-430-1716  
Grottoes, VA  
Lot 7

### Black Locust Livestock

Mike and Rebecca Webert  
Mike 703-906-4667  
Rebecca 540-333-1019  
Warrenton, VA  
Lot 8

### Montana Raye Ranch

Heflin Family  
717-420-6754  
Gettysburg, PA  
Lots 9, 10, 11

### Whispering Cedars Farm

Andy Tutwiler  
540-830-9490  
Mt Sidney, VA  
Lots 12, 13, 14

### Deer Track Farm

Bob Schaffer  
540-661-2229  
Spotsylvania, VA  
Lots 15, 16, 17, 18

### Bay Brook Farm

Rodney and Barbara Philips  
804-387-9447  
Dabneys, VA  
Lots 19, 20, 57

### Triple R Cattle

Riley Mae Wagner  
443-309-2095/Candice  
Kennedyville, MD  
Lot 21

### Grandview Hereford Farm

Ken and Chris Scott  
304-573-0844  
Beaver, WV  
Lots 22, 23, 24, 25, 25A

### Emerson's Short Bridge Farm

410-253-3531  
Church Hill, MD  
Lots 26, 27, 28, 29, 30

### Howling Hounds Farm

Lawson Family  
804-514-0297  
Columbia, VA  
Lots 31, 31A, 59, 59A

### Flat Patch Farm

Jason Shelton  
703-283-1522  
Kearneysville, WV  
Lot 32

### Ralph E Ullman & Son

Keith Ullman  
740-228-2253  
Graysville, OH  
Lot 33

### Churchview Farm

The Baldwins  
443-871-0573  
Millersville, MD  
Lots 34, 34A, 35, 35A, 36, 37, 38

### Dunrovin Farm

Don Richardson  
434-981-2633  
Crozet, VA  
Lots 39, 40, 41, 42

### Full Day Enterprise North

Dustin and Brittany Douglas  
724-714-4338  
Westminster, MD  
Lots 43, 44

### Ritenour Farms

Savannah Ritenour  
540-325-4605  
Fort Valley, VA  
Lots 45, 45A, 46, 47

### Hereford Hollow Farm

Joel and Amanda Blevins  
276-686-5762  
Wytheville, VA  
Lots 48, 49, 50, 50A, 60

### Twin Ridge Cattle Company

Jake Bevins  
804-937-5253  
Bumpass, VA  
Lot 51, 58

### Creek Bend Farms

Robert and Jonathan Meek  
276-698-0548  
Marion, VA  
Lots 52, 53

### Bryan Hill Farm

Allison Bryan  
540-830-3199  
Broadway, VA  
Lots 54, 55, 56

# Understanding Hereford EPDs

The American Hereford Association (AHA) currently produces expected progeny differences (EPDs) for 17 traits and calculates three profit indexes. AHA's genetic evaluation makes use of a Marker Effects Model that allows the calculation of EPDs by incorporating the pedigree, phenotypic and genomic profile of an animal. Animals that have a genomic profile will be denoted with a GE-EPD logo.

The current suite of Hereford EPDs and profit indexes includes:

## Calving Ease — Direct (CE)

CE EPD is based on calving ease scores and birth weights and is measured on a percentage. CE EPD indicates the influence of the sire on calving ease in females calving at 2 years of age. For example, if sire A has a CE EPD of 6 and sire B has a CE EPD of -2, then you would expect on average, if comparably mated, sire A's calves would have an 8 percent more likely chance of unassisted calving when compared to sire B's calves.

## Birth Weight (BW)

BW EPD is an indicator trait for calving ease and is measured in pounds. For example, if sire A has a BW EPD of 3.6 and sire B has a BW EPD of 0.6, then you would expect on average, if comparably mated, sire A's calves would come 3 lb. heavier at birth when compared to sire B's calves. Larger BW EPDs usually, but not always, indicate more calving difficulty. The figure in parentheses found after each EPD is an accuracy value or reliability of the EPD.

## Weaning Weight (WW)

WW EPD is an estimate of pre-weaning growth that is measured in pounds. For example, if sire A has a WW EPD of 60 and sire B has a WW EPD of 40, then you would expect on average if comparably mated, sire A's calves would weigh 20 lb. heavier at weaning when compared to sire B's calves.

## Yearling Weight (YW)

YW EPD is an estimate of post-weaning growth that is measured in pounds. For example, if sire A has a YW EPD of 100 and sire B has a YW EPD of 70, then you would expect on average if comparably mated, sire A's calves would weigh 30 lb. heavier at a year of age when compared to sire B's calves.

## Dry Matter Intake (DMI)

The DMI EPD predicts the daily consumption of pounds of feed. For example, if sire A has a DMI EPD of 1.1 and sire B has a DMI EPD of 0.1, you would expect sire B's progeny, if comparably mated, to consume on average 1 pound of feed less per day.

## Scrotal Circumference (SC)

Measured in centimeters and adjusted to 365 days of age, SC EPD is the best estimate of fertility. It is related to the bull's own semen quantity and quality, and is also associated with age at puberty of sons and daughters. Larger SC EPDs suggest younger age at puberty. Yearling sons of a sire with a 0.7 SC EPD should have yearling scrotal circumference measurements that average 0.7 centimeters (cm) larger than progeny by a bull with an EPD of 0.0 cm.

## Sustained Cow Fertility

The AHA's new SCF EPD is a prediction of a cow's ability to continue to calve from three years of age through 12 years of age, given she calved as a two-year-old. The EPD is expressed as a deviation in the proportion of the 10 possible calvings to 12 years old expressed as a probability. For example, the daughters of a bull with a 30 EPD would have the genetic potential to have one more calf by age 12 than the daughters from a bull with a 20 EPD. In other words, the daughters from the 30 EPD bull would have a 10% greater probability of having one more calf than the bull with a 20 EPD. This is equivalent to saying that the daughters are 10% more likely to remain in the herd to age 12.

## Maternal Milk (MM)

The MM EPD of a sire's daughters is expressed in pounds of calf weaned. It predicts the difference in average weaning weights of sires' daughters' progeny due to milking ability. Daughters of the sire with a +14 MM EPD should produce progeny with 205-day weights averaging 24 lb. more (as a result of greater milk production) than daughters of a bull with a MM EPD of -10 lb. (14 minus -10.0 = 24 lb.). This difference in weaning weight is due to total milk production during the entire lactation.

## Maternal Milk & Growth (M&G)

The M&G EPD reflects what the sire is expected to transmit to his daughters for a combination of growth genetics through weaning and genetics for milking ability. It is an estimate of the daughter's progeny weaning weight. A bull with a 29 lb. M&G EPD should sire daughters with progeny weaning weights averaging 19 lb. heavier than progeny of a bull's daughters with a M&G EPD of 10 lb. (29 minus 10 = 19 lb.). It is equal to one-half the sire's weaning weight EPD, plus all of his MM EPD. No accuracy is associated with this since it is simply a mathematical combination of two other EPDs. It is sometimes referred to as "total maternal" or "combined maternal."

## Maternal Calving Ease (MCE)

MCE EPD predicts how easily a sire's daughters will calve at two years of age and is measured on a percentage. For example, if sire A has a MCE EPD of 7 and sire B has a CE EPD of -3, then you would expect on average if comparably mated, sire A's daughters would calve with a 10% more likely chance of being unassisted when compared to sire B's daughters.

## Mature Cow Weight (MCW)

The MCW EPD was designed to help breeders select sires that will either increase or decrease mature size of cows in the herd. The trait was developed after years of cow weight data collection and the EPD relates directly to the maintenance requirements of a cow herd. For example, if sire A has a MCW EPD of 100 and sire B has an EPD of 85, then you would expect the females of sire A, if comparably mated, to be 15 lb. heavier at mature size.

## Udder suspension (UDDR)

UDDR EPDs are reported on a 9 (very tight) to 1 (very pendulous) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a UDDR EPD of 0.4, and sire B has a UDDR EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score better udder suspension in daughters of sire A, compared to sire B.

## Teat size (TEAT)

TEAT EPDs are reported on a 9 (very small) to 1 (very large, balloon shaped) scoring scale. Differences in sire EPDs predict the difference expected in the sires' daughters' udder characteristics when managed in the same environment.

For example, if sire A has a teat size EPD of 0.4, and sire B has a teat size EPD of -0.1, the difference in the values is 0.5, or one-half of a score. If daughters of sires A and B are raised and managed in the same environment, you would expect half a score smaller teat size in daughters of sire A, compared to sire B.

## Carcass Weight (CW)

CW EPD is a beneficial trait when considering the impact that pounds have relative to end product value. At the same age constant endpoint, sires with higher values for carcass weight will add more pounds of hot carcass weight compared to sires with lower values for carcass weight. For example, if sire A has a CW EPD of 84 and sire B has a CW EPD 64, then you would expect the progeny of sire A, if harvested at the same age constant endpoint, to have a 20-lb. advantage in terms of hot carcass weight.

## Rib Fat (FAT)

The FAT EPD reflects differences in adjusted 365-day, 12th-rib fat thickness based on carcass measurements of harvested cattle. Sires with low, or negative FAT EPDs, are expected to produce leaner progeny than sires with higher EPDs. Ultrasound measures are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

## Ribeye Area (REA)

REA EPDs reflect differences in an adjusted 365-day ribeye area measurement based on carcass measurements of harvested cattle. Sires with relatively higher REA EPDs are expected to produce better-muscled and higher percentage yielding slaughter progeny than will sires with lower REA EPDs. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

## Marbling (MARB)

MARB EPDs reflect differences in an adjusted 365-day marbling score (intramuscular fat, [IMF]) based on carcass measurements of harvested cattle. Breeding cattle with higher MARB EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades. Ultrasound measurements are also incorporated into this trait and have been shown to be highly correlated with the performance of slaughter progeny. All data is expressed on a carcass scale.

## Baldy Maternal Index (BMIS)

The BMIS is a maternally focused index that is based on a production system that uses Hereford x Angus cross cows. Progeny of these cows are directed towards Certified Hereford Beef. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability from finishing of non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep the harvested progeny successful for CHB. This index is geared to identify Hereford bulls that will be profitable when used in a rotational cross with mature commercial Angus cows.

## Brahman Influence Index (BIIS)

The BIIS is a maternally focused index that is based on a production system that uses Brahman x Hereford cross cows. Progeny of these cows are directed towards a commodity beef market since Certified Hereford Beef® does not accept Brahman influenced cattle. This index has significant weight on Sustained Cow Fertility, which predicts fertility and longevity of females. There is a slightly positive weight on Weaning Weight, Mature Cow Weight and Milk which accounts for enough growth but ensures females do not increase inputs. There is some negative emphasis on Dry Matter Intake, but a positive weighting on Carcass Weight which is anticipated to provide profitability in finishing non-replacement females and castrated males. Marbling and Rib-eye Area are also positively weighted to keep harvested progeny successful for a variety of commodity based programs. This index targets producers that use Hereford bulls on Brahman influenced cows.

**Certified Hereford Beef Index (CHBS)** The Certified Hereford Beef Index (CHBS) is a terminal sire index that is built on a production system where Hereford bulls are mated to mature commercial Angus cows where all progeny will be targeted for Certified Hereford Beef after the finishing phase. This index has significant weight on Carcass Weight and Marbling to ensure profit on the rail. As well there is a positive weighting for Average Daily Gain along with a negative weighting on Dry Matter Intake to ensure efficient pounds of growth in the finishing phase. In addition, there is a positive weighting for Rib-eye Area and a negative weighting for Back Fat to maintain desirable Yield Grades. This is the only index that has no emphasis on fertility. Remember that no replacement heifers are being retained.
