No cattle will be transferred until paid for in full.

Guarantee: All cattle will sell under the terms and guarantees recommended by the American Hereford Association.

Liability: Each animal will be at the purchaser's risk immediately after the animal is sold. They will be fed and cared for, free of charge, for a reasonable length of time after the sale, but at the purchaser's risk. Cattle must be paid for before they leave the farm. All persons who attend the sale do so at their own risk. Boyd Beef Cattle assumes no liability, legal or otherwise, for any accidents that may occur.

Heifer sexed semen: When sexed semen is used, a heifer calf results 95% of the time.

Health: Every female born at Boyd Beef Cattle has been calfhood vaccinated for Brucellosis. In addition, each female is vaccinated annually, after calving and prior to breeding with IBR, BVD, P13, 4-way Lepto and Vibrio. They are wormed and poured for grubs each fall. All calves are vaccinated for Blackleg, Pasturella and Malignant Edema. All cattle selling will have interstate health charts required for shipping into other sections of the United States.

Registration Certificates: Registration Certificates will be transferred to the buyer at the seller's expense. Each buyer must be sure to give the clerk his proper name and address for making transfers. All calves born before the sale will be registered by the sellers. Information will be provided by the seller for the buyer to register unborn calves.

AI Certificates: There will not be any certificates provided on bulls not owned by the seller for females selling bred AI.

Bids: If you would like to place a bid on any lot but will not be able to be with us, we would be happy to handle mail or phone bids for you. Please direct to the owner, auctioneer or any of the sale staff.

Fellow Hereford Breeders,

It is a pleasure to welcome you to Mayslick, Kentucky for the 2024 "Breeders Cup" sale. All involved thank those from past sales who have invested their time, energy and finances so that this continues to be a major breed event. We look forward to seeing all of you whether it is your first time here or one who comes regularly. Each program represented strives to present only their best and know the cattle have to excel for the new owners to have continued success. Our goal is to only sell cattle that offer superior quality, genetics and performance.

We are excited to offer a large number of females sired by and mated to proven, recognized, popular breed leading A.I. sires. Blueprint, Power Surge, Birdwell Dynamic, KCF Monument, Innisfail 4013, Houston D287 H086, Mandate, Gold Rush 569G 1720. Longest Yard, Fresh Prince, Deluxe K016, Manifest, Kool Profit are all leading bulls across North America. This is an excellent investment opportunity for those who have limited AI opportunities.

Special features include the walking rights on the popular Select Sires Boyd Power Surge 9024, the right to flush 3 of the breeds leading donors... Lana 76E, Megan 231J and Mallory 405B. There are also several unique embryo mating's along with direct daughters of the famed donors Rita 31Z and Lana 76E. This year's offering is loaded with genetic power and diverse opportunities.

Most of the cattle selling have GE-EPDs available or will have by sale time. We know we must use all tools available to document our cattle for the traits that are so important to our bottom line.

As always, we appreciate the Boyd family for being our host and thank them for all the extra work involved to do so.

Respectfully,

Dale Stith

- What a tremendous genetic opportunity that is second to none. When it comes to proven success, it is hard to find a female in the Hereford breed that rivals Lana 76E. Whether it be to produce a donor quality female, a bull stud level sire, or offspring that can excel in the show 76E has done it all. If you're looking to add overall bone, power, and extreme growth Lana brings it all to the table.
- Offering an IVF flush with a guarantee of six (6) transferable embryos, and two (2) pregnancies. The flush will be available either immediately upon purchase or in the spring of 2025. 76E averages 26 embryos per IVF flush.
