

23rd *Annual*
FEMALE SALE

OCTOBER 5, 2024

23rd Annual FEMALE SALE OCTOBER 5, 2024

at the ranch, Bruneau, Idaho

The first Saturday in October is always a special day for us because we are able to offer an elite set of females from our long-established program. A program that is based on the female and her ability to produce offspring that fits all segments of the industry. The sale also is a time when all family members work together to produce a top-notch event. Also, without our tremendous crew, none of this would be possible. It is also a time to reconnect with so many of our good friends and customers. We pride ourselves in building relationships with the greatest people and cattle people.

We offer a diverse group of females. It includes some of the best show prospects as well as young open heifer calves with the genetics and numbers to become future donors. The bred heifers are always a group that is extremely popular. All our replacements with heifer calf pregnancies sell. The cow calf pairs are selected because they are nursing our best A.I. show prospects. These cows have been one of the best values every year and many sell at very reasonable prices.

The frozen portion of this sale includes some of our freshest genetics. It includes a very diverse group of embryos and semen.

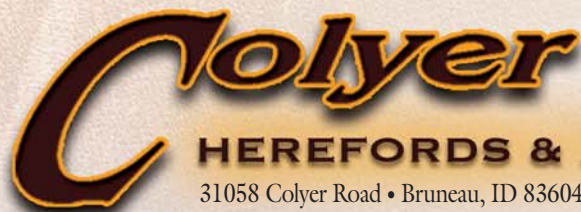

As you go through the catalog and cattle, we believe you will be impressed with the phenotype as well as the impressive data set that goes with these cattle.

We hope that you are able to attend the sale, but the cattle can be viewed anytime. If you have any questions or comments, do not hesitate to contact us.

SALE TERMS & CONDITIONS

TERMS ... Terms of the sale are cash unless prior arrangements have been made. When making settlement, please leave specific instructions in writing for transfer and delivery.

SALE CONDITIONS ...

- Each animal will be sold to the highest bidder. The auctioneer will settle any disputes as to bids, and decisions on such matters will be final. Each animal will be at purchaser's risk as soon as sold and will be turned over to the purchaser as soon as practicable after settlement. All announcements made from the auction block on sale day by the owner or the auctioneer will take precedence over statements in the catalog.
- Colyer Herefords will precondition and wean heifers prior to shipment.
- Buyers have the option of leaving females at Colyer Herefords and having them exhibit the heifers at the national shows.
- Buyer must insure their purchase while being in the care of Colyer Herefords.
- The total cost of exhibiting the heifer at Reno will be \$1,500 and OKC, Denver, or Fort Worth will be \$1,800 per show. This includes entries, show preparation and related show expenses.
- Due to increased feed costs, an additional \$8/day will be charged while the heifer is at the ranch, beginning November 1, 2024.
- Any banners, ribbons or hardware won will belong to the buyer.
- Buyer will take possession after the respective show and will be responsible for arranging transportation.
- Females that are sold as 1/2 interests, the costs will be split 50/50.
- Ownership choices – One-half interest vs. two retained flushes. We have found that some buyers like to own the entire animal and some like to only own one-half interest, therefore, we have come up with this concept so the buyer can choose which one they would like.
- 1/2 Interest Option: If one-half interest is chosen, the buyer will own one-half of the animal. The buyer will pay one-half of the show cost. It is the same as it has been every year on cattle where we have retained one-half interest. We will keep the female and breed her and when flushed, send half the eggs to the new owner. Colyer Herefords will

pay maintenance costs of the female after her show career. Buyer will pay for their portion of the flush cost when embryos are sent to them or we will alternate every other flush with the new owner, attempting to get equal amounts for each party. If the buyer has the ability to flush the female at their location, they can take possession of the animal and we will assume the opposite position and take one-half the embryos or alternate flushes.

- **Retain Two Flush Option:** If this option is chosen, the buyer will take possession of the heifer after her show career is complete. If shown, the buyer will pay full show expense. Colyer Herefords will retain the right to flush the female twice after she is in production, at the buyer's convenience, for a minimum of six No. 1 eggs.
- Colyer Herefords retains the right to one flush on all females in the auction.

GUARANTEE ... All cattle are guaranteed to be breeders. In case an adjustment is required, it will be made with a replacement animal of equal value to the animal in question or credit on the purchase of another animal.

GENETIC ABNORMALITIES ... Any cattle with a questionable parentage have been DNA tested and are IEF.

BREEDING INFORMATION ... Current breeding dates and calving dates are furnished in the catalog. Any changes will be announced sale day.

NOTE ... Everyone attending this sale does so at their own risk. Neither the owners or their employees assume liability, legal or otherwise, for any accidents which may occur.

DELIVERY ... Buyers are responsible for shipping expenses. We will help coordinate shipping to combine possible loads. Cattle will be kept for a reasonable length of time following the sale until delivery or pick up can be made.

ABSENTEE BIDS ... If anyone wishes to bid and cannot attend the sale, we would accept phone bids. Phone in bids with satisfaction guaranteed. We realize everyone's busy schedule and the expense of travel. Please feel free to contact Guy or Kyle for any of the sale representatives listed. The sale will be broadcast on LiveAuctions.tv for live Internet bidding.

We are excited to be able to kick off the heifer calf division this year with two direct daughters of 1311. These kind are rarely offered for sale and when they are these are the kind to build a program around. With over \$1.5 million dollars of progeny sales, 1311 has proven to be one of the breeds most elite cows with 29 sons averaging 34K and 20 females averaging 32K. Lot 3A is a sight to see. All the color and look with body and build. She will not only build show cattle but also herd sires for years to come. Her fall sister 3B is a solid female with a touch more, \$CHB and carcass values. Terms will be announced sale day.

Individually this is one of the most exciting show prospects in this offering. She is the only female we have of this mating and the first daughter of Arlo that we have to sell. Her mother is a full sister to Marksmen, who has been one of the most dominate sires in the show ring as of late. This one has the hip and hind leg with look and build to go a long way. She should be very competitive at any level.

These two sisters are incredible but the lot 5 heifer is unbelievable. I'm not sure we have ever seen one with this much shape and power, yet still has a beautiful feminine look, while blending it all together impeccably. She has been a standout all summer, as visitors never miss her and always want another look before leaving because she is truly one of a kind. Lot 6 is no slouch. She has the same pattern and without her sister she would still be a sale feature. The donor dam 0226 was the champion female at the 2022 National Western and is becoming a big time donor. The sire, Cuda Belle 2111 will have everybody's attention after you see this first crop of calves. We used him a lot and we still don't think we used him enough.

This pedigree will get the attention of many seedstock producers. She is a maternal sister to Guardian, being out of the high selling donor in last years auction, 8037. This female lost her tail in some cold weather which throws her off a bit to look at but it will not affect her production. She is way low on BW with big udder and teat values but she also has the IMF to take you to another level. We look for big things out of this young donor prospect.

Boy this one screams power. We love the mass and hip in this female. Look at the extra middle and center body with lots of bone and mass. Level topped and good hiped. This will make a really good cow with a solid set of values that are in line for every trait. Cuda Belle is going to be noticed even more after this calf crop is evaluated.

This big ribbed, cowy-made female is out of an excellent young donor that has some beautiful uddered females in her pedigree. Talk about a set of numbers that offer extra carcass traits getting to 150 \$CHB but still you have the maternal and udder quality that we are confident you will get with this mating. These are the kind that will keep you in business for a long time.

Lots of times we get asked to pick a heifer out for someone that is out of a great cow and has solid numbers that I can afford. This would be one that would fit that list. Her mother had one of the high selling fall open females in last years sale to Tuhdal in Montana and they also bought a maternal brother to her in the spring bull sale. We have a lot of confidence in this cow family.

This female is just days away from being a March and still is a little green and youthful at this hour but she should really catch up by sale time. She has an awesome pedigree that could produce an excellent show heifer. Her mother 5355C has produced many show winners for us after her show career. She would make a great entry level junior project and in the end you will have a cow to produce you one.

This female is the perfect blend of genetics and shows what Guardian can do when mated to a moderate easy fleshing donor that needed a shot more performance. Her mother 5113 lot 25 is the kind of cattle that keep you in business with so much of the real world qualities that we need. She has a great udder at 9 years of age, maintains her condition and raises calves that ratio well above average. Lot 24 has the ability to provide more power and performance and next generation carcass traits.

We feel this could be one of real sleepers of the sale. When you describe a role model Hereford cow, she fits the bill. Some will overlook 5113 because of her age, but if you want to build a cowherd with today's technology she would be one to tie to. We have flushed her twice averaging 8.5 viable embryos. Progeny ratio on 6 head is BWR 96, WWR 106, YWR 100. Above breed average in 13 traits at 9 years of age. With todays young sires, she gives you an array of mating options.

This female caught our eye this spring when we were in AI season and we felt she would be an incredible show heifer for a junior. She is sleek necked and attractive but has the build and body for today's show scene. This would make a great spring and summer show heifer but also as a bred she could be wicked. When this one gets out in the picture pen and throws her head in the air what a great look she gives you.

This Arlo female would be a great addition to a herd with lots of carcass and mass. This is the kind that would work so well with our new herd sire Legion. She has tons of power and performance and will have the ability to pass that along. Producers looking to build numbers with affordable quality should look into this lot.

Take a look at the number set of this first calf female with her whole life ahead of her. She has already proved her worth with a top heifer calf at side. It is not often that you get this opportunity to buy a young female with this much potential. Sharp and angular through her front end with a big long level hip and ample rib. EPD set is awesome. Top 3% for WEPD, YEPD and CWT, 4% for %IMF and 2% for \$CHB.

Out of a first calf heifer and one of the best sets of numbers in the entire offering when you look at the big picture. She has carcass numbers with a double digit calving ease number and still near 100 yearling. We feel this is an ideal set of numbers when you can hover around this area for yearling, these cattle seem to breed back better and stay in the herd longer.

This heifer has been a stand out since birth. Tremendous donor capabilities. Freckle faced, long and level through her hip with lots of extension, extra volume and capacity. She was naturally raised by her famous mother 8019 making her a maternal sister to the popular sire Key West. 8019's teat and udder structure is superb along with her body depth and fleshing ability. Selling 1/2 embryo interest.

AI Bred 04/04/2024 to NJW 98S R117 RIBEYE 88X ET due 01/12/2025, Checked Safe Heifer calf.

If it wasn't for our commitment to selling heifers with heifer pregnancies this one would not be leaving the ranch as we feel she has a bright future. Her dam was Bill Kings pick of the first calf heifers year before last and is a tremendous young female. This one also shows the same qualifications. Top 2% for WEPD, YEPD, CWT, 4% Milk, REA, 30% IMF and 10% \$CHB. Heifer calf by 88X will be an added bonus.

Bred 05/27/2024 to SITZ DIGNITY 654L due 03/06/2025, Checked Safe - Undetermined Sex.

2247 is the second option to buy a daughter of Connealy Treasure. Her maternal line gives her added performance and cow prowess, especially in the round rib shape up top, and natural deep sweep to her underline. We think she is going to have a beautiful udder like her mother. Our Treasure sons have performed well and topped sales.

Service Sire, Sitz Dignity 654L

HEREFORD *Embryos*

TERMS FOR EMBRYOS LOTS 80-104.

If you don't achieve one pregnancy, Colyer Herefords will replace the same number of embryos of the same mating. If the same mating isn't available you will receive credit for the purchase price to use in a future sale. Most embryos are located at the ranch and can be picked up or we can help make arrangements to ship embryos. Shipping is the responsibility of the purchaser.

C NOTICE ME ET

Arlo is the 2024 Denver Champion and 2024 Fort Worth Champion Bull. This is his first set of calves to be offered and we feel he is proving himself to be the elite sire we had hoped he would be. He sires so much color and his calves have the same look and power as he does. Arlo was the lead-off bull in our Denver 2023 Champion Pen of Bulls. He was one of the most talked about young calves we have ever raised. He was the high selling bull in our 2023 sale for \$165,000 to Hoffman Herefords, Nebraska and Buck Cattle, Oklahoma. One week later we held a special auction for semen sales where he more than paid for himself in one night selling over 600 units for a gross of \$270,000. This young sire is exciting on many levels. He has the structure and build to put him in the same conversation as Miles but this one has the color and pigment along with the carcass traits to make him the next level of genetic capability. We are also selling two lots of sexed female semen. Owned with Hoffman Herefords, NE and Buck Cattle, OK.

We were very excited to partner with GKB and Bill King on this exciting new sire. Shortly after we purchased Legion he went directly to Hoffman AI and started producing high quality semen that we were able to breed a large group of replacement females and donor cows to flush. We had incredible conception and feel this young sire will take breeding programs to another level. It is hard to find another bull in the breed that will match him in terms of genetic values. However when you study his structure and phenotype he becomes even more impressive. This is not just a bull with numbers that fails to pass the eye exam he is a bull that can be used on donors that need improvement with EPD but will not sacrifice structure and balance. We used Legion on some powerful donors and feel he will be a big piece to produce the next generation of herd sires and donors. Enrolled in the herd sire reference program. Owned with GKB Cattle, Bill King, and Sandhills.

This is the first set of calves to evaluate out of 2111 and we feel this will validate his value as a herd sire. We have used this bull a lot but we feel he needs used even harder. He is a proven heifer bull but also one you can flush some powerful donors to and end up with elite cattle. A great example is lot 5 in this auction. Cuda Belle tied with Denali as the second high selling bull in the 2023 Bull Sale, selling to Knox Brothers. His sire, Barracuda is one of the heavy used calving ease sires offered by ABS Global. Out of a great Belle Air daughter, Cuda Belle offers an excellent EPD profile ranking in the top 15% of the breed for 13 traits. Owned with Knox Brother, TX.

This full brother to Arlo and another member of that Champion Denver Pen, Denali was the second high selling bull at the 2023 Bull Sale to Duane Loy Farms for \$37,500. Denali possesses an EPD profile with more explosive growth and carcass along with high maternal numbers. He posted an individual REA ratio of 123. With nine traits in the top 5% of the breed he is poised to be an exceptional breeding piece going forward. Lots of Denali calves will be born this fall and we should have a large group of babies to evaluate by sale time. Owned with Duane Loy, IL.

The top selling bull in the 2024 Bull Sale for \$130,000 to GKB Cattle, 3125 is a true herd bull! He was the lead off bull in the 2024 NWSS Pen of Bulls, and he was the Grand Champion Horned Bull last December at the Western States Hereford Show. He has the look, color pattern and is loaded with power and performance. His dam is the mother of Belle Heir, Real Deal and Guardian. We are excited to get his first set of calves on the ground spring 2025. Owned with GKB Cattle, TX.

The second top selling bull in the 2024 Bull Sale for \$95,000 to Hurricane Hefty Ranch is one with a huge future ahead of him. Out of the foundation donor 1311 and dam of so many impactful herd bulls in the breed including Arlo. Reign Maker is the next generation to combine an elite phenotype along with an EPD profile that works in any mating. We had incredible conception with his semen breeding heifers and donors. He was over 90% on heifers and fertilization on the donors was incredible. Owned with Hurricane Hefty, OK.

High selling bull in the 2022 National Hereford Sale at \$325,000 for 1/4 interest valuation. Guardian brings the power, performance, phenotype and carcass merit unmatched in the Hereford breed. 85 lb. birthweight, 924 act. WW, 964 adj. WW with no creep and weighing 1,315 lb. at exactly 10 months. Dam is a full sister to Belle Heir with a WWR of 108 on two head. Her individual IMF ratio is 152 and her first calf scanned an IMF ratio of 152 and ribeye ratio of 105. Grandam is by the \$600,000 Miles McKee and dam is the \$117,000 89T. She boasts an IMF of 124 and ribeye ratio of 103 on 24 progeny. His progeny keep gaining popularity because of the extra power and performance but he is also making some females with extra look and style. A limited amount of semen will be sold this fall and only offered at auction. Owned with GKB Cattle, Iron Lake Ranch, Schrammel Cattle Co. and Randy Ward.

This young sire proved to be very useful when calving and breeding replacement females this spring. He is out of a first calf heifer that made it straight to the donor pen. Use this one for udder quality and calving ease but also his carcass values and look makes him a big time herd sire. Breeders around the country are excited about the calves by Key West. Owned with Jennings Land & Cattle, IL.

In Memoriam

With the recent passing of Sherry's dad Ray Shaffer, we wanted to pay tribute to these two great couples that helped guide us and supported us throughout the years. They were among what is known as the "Greatest Generation" and we certainly agree. Ray Colyer served in the Army and Ray Shaffer served in the Navy during WWII. Both couples were devoted to family and very supportive of all of us as we strived to produce quality cattle. They were always positive in our conquest and helped push us to produce the "Best of the Best". We are dedicated to keeping their legacy moving forward and appreciate all of their support through the many years.

Rest in peace. We love you.

Colyer
