BAR STAR CATTLE

WELCOME

"We do things differently."

A bull customer who has been buying bulls for almost a decade from us reminded me recently that in my first conversation with him that I said that, and that he appreciated that. What does that mean? In the nearly twenty years of breeding Hereford cattle together, Steph and I have always decided to do things our own way. We've had a determination to keep a direction in our herd and our breeding philosophies (which we feel are quite different than most outfits simply selling bulls). In genetic selection we are extremely picky on bulls that we use to generate these bulls that sell annually, and this set is a great example of that. As you look across the sire groups offered, we hope you can study the cattle and see the direction we have. We are extremely proud that we own the majority of the sires used in this year's offering.

We develop them differently. Any of you that have been to the ranch (and those that haven't are welcome any time) know that we aren't situated near a big feed pile but rather are blessed to have some good grass country and shade during the summer. We run our purebred cows as most commercial guys do (and even rougher than some commercial operations). Our fall born bulls are weaned and sent to grass once they quit bawling. This slow development over the summer helps build muscle and strong feet and leg structure, whereas some aged bulls that are sold never leave the feedlot from the time they are weaned. In the fall, once the spring calves are weaned they are all developed on a Hubbard Feeds developer pellet that is formulated to keep feet as hard as possible, and good hard muscled gain on the cattle. For dry matter they are grown on native, dryland, long stem grass hay. We develop them in a big lot where they have plenty of room to move and aren't bogged down. We heavily bed with straw as it makes my stomach due flips to see cattle with manure tags up to their tailheads, packing extra excessive weight that is hard on joints. We strive to produce bulls that hit green grass and explode and hold up after turnout.

The one thing that we haven't detoured from is "keeping a sharp knife." You will note that we are selling a few less head in the 2025. That's a double-sided sword this year in that we continue to steer those that we feel that we wouldn't use in our commercial herd. This standard of quality is something that we are proud of and that annually close to half of our male crop ends up being sent to a feedlot as steers. This year we are retaining ownership on all of those calves to further prove some of our genetics. The other side of the sword this year is that we had a larger number of embryo females which gives fewer bulls to select from but only adds to the strength of our herd going forward by propagating our top cow's genetics back into the heart of our brand.

The future is impossible to predict, but what an exciting time it is to be in the cattle business. The most important thing we feel about how things look in the big picture of the industry going forward is that the commercial cow calf sector is going to have to do more with less. The cow herd in the US, and around the world really for that matter continues to struggle to rebuild numbers. We as an industry are going to have to keep fertility and muscle in the forefront of our selection criteria because in order to meet demands of the consumer while having less head, we can't do it without it. What better time than now to tie into some stout, wide made Hereford bulls to stay ahead in the game and be staged for continued efficiency. The black baldie cow here is a great example of doing more with less. She eats 20% less than her straightbred or purebred counterparts, her brothers weaned 10-25% heavier, and she has the precedent of being the queen of fertility and longevity. Cows that stay, pay!

The future of Bar Star is dedicated to continued quality, and we hope to offer a greater number of bulls to select from in the upcoming years. Our fall calving program has finally started to grab a good hold, and we are slowly but steadily growing this part of our program. We promise this, however, we will not waiver from our commitment to providing our customers a product that we would turn out on our own cows. Please join us on or before March 20, 2025 and view the bulls. While you are here hop in the ranger or swing a leg over a horse and come look at our cows that power our operation.

Online Bidding: Online bidding will be available via **live-ag.com**

We encourage you to register 24 hours prior to the sale to make sure approval has been completed. Questions call 817-533-6699.

Phone Bidding

If you prefer to bid over the phone or leave an absentee bid, please contact Chad or any of the sale staff ahead of time so that one of the sellers, representatives of the sellers, or industry representatives can meet your needs.

Bull Viewing Before Sale

We encourage you to come look at our bulls on or before sale day, located at the ranch and you are invited to view the cow families prior to the sale day in Musselshell, MT. Videos of the bulls are available on our website and Live-AG.com

Bar Star Breeding Guarantee

All animals in the sale are guaranteed breeders. All bulls will be covered with a first breeding season guarantee for reproductive injury. Breeding season is defined as the first 60 days following the first turnout of bulls. 50% of the value of a bull that encounters reproductive injury (sheath and testicles) will be given as a credit towards a future purchase or towards a replacement bull if one is available. Any injury must be diagnosed by a seller approved veterinarian. Please notify us as soon as possible should this occur, and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2025. This is not an insurance policy, nor does it cover mismanagement, neglect, or death.

Selling:

41 Registered Hereford Bulls — Yearling & 18-Month-Old

30 F1 Black Baldy Open Replacement Females

BarStarCattle.com

**NOTE: Download Directions to Our Sale
Before You Leave Home.**

Sale Day Location: Bar Star Cattle Ranch

If you enter our address: 290 Jensen Road, Musselshell, MT 59059

If using GPS — DO NOT let it take you to Fishel Creek Road.

There is limited to no cell phone service.

Delivery

We have 3 favorable delivery options:

1. Take your bull home sale day for \$100 off purchase price.
2. Bulls will be delivered starting April 1 on scheduled loads.
3. If bulls are unable to leave sale day or by our scheduled load, we will keep your bull(s) for a fee of \$4/hd/d until you can pick them up by May 1, 2025.

Volume Discount

We do offer a volume discount. 3 or more bulls receive a 3% discount.

Bar Star Semen & Genetic Retention

We are very excited about the bulls in our program offering, therefore we reserve the right to retain a one third semen interest and/or in-herd semen use on any bulls we offer for sale. Several bulls in the sale will have a higher interest kept and announcements from the auction block take precedence. Collection will be done at the buyer's convenience and sellers expense.

Terms of Sale

Each animal will be sold to the highest bidder and becomes the responsibility of the purchaser as soon as sold. The auctioneer will settle any disputes from the auction block. The cattle sell under the standard terms and conditions as recommended by the American Hereford Association.

Insurance: Insurance will be available sale day. Any bulls left for semen collection or an extended delivery, must be insured or a waiver of liability signed on sale day.

Bull Care: Bulls are developed at the ranch on Hubbard feed bull development pellet, and dry matter is straw/long stem grass hay and bunk fed to help improve docility. Bulls are grown until delivery at no cost to the buyer. We follow a vaccination protocol developed specifically for our program based on our veterinarian and our Zoetis representative's recommendations. Bulls have to pass a breeding soundness exam before delivery.

Heifer Safe: Certain bulls in this listing are marked as safe for use on heifers. This symbol represents the bulls' data to be heifer safe.

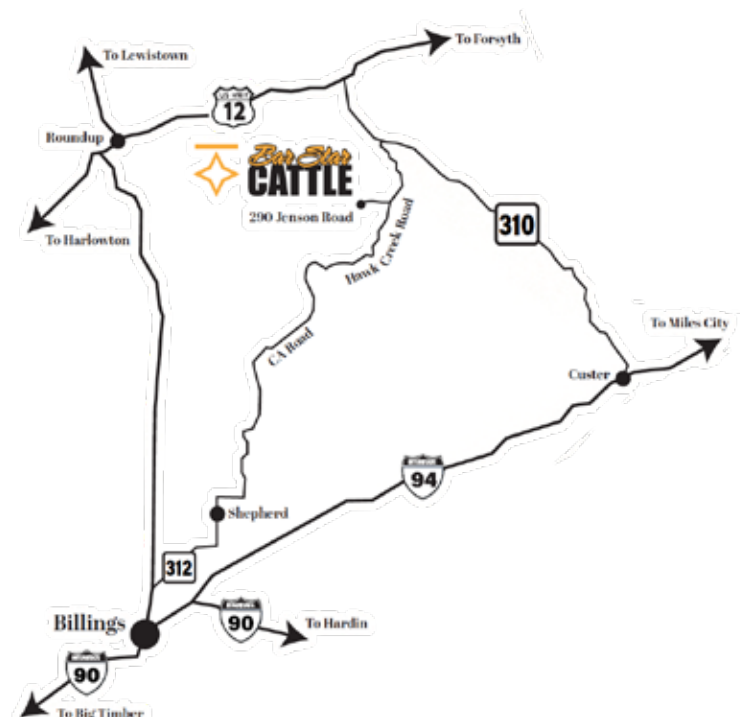

RANCH DIRECTIONS / See note above in yellow box.

From Forsyth: (1 - ½ hour drive time) Take HWY 12 to Musselshell. From Musselshell go south on HWY 310 for 6.5 miles to Hawk Creek Road. Turn right on to Hawk Creek and follow for approx. 7 miles to Jensen Road. Turn at the Bar Star sign into our driveway.

From Custer: (1 hour drive time) Take HWY 310 to Hawk Creek Road. Turn left to Hawk Creek and follow for approx. 7 miles to Jensen Road. Turn at the Bar Star sign into our driveway.

From Billings: (1 - ½ hour drive time) Take HWY 87 to Roundup, then HWY 12 to Musselshell.

From Musselshell: Go south on HWY 310 for 6.5 miles to Hawk Creek Road. Turn right on to Hawk Creek and follow for approx. 7 miles to Jensen Road. Turn at the Bar Star sign into our driveway.

A unique bull for the breed out of one of the legendary Hereford cows and a sire that's red hot. We bought a portion of his sire in 2019 as a yearling and the bull resold through Huth's dispersal in November for \$75K as a coming 5-year-old!

With a DISTINGUISHED proven pedigree on both sides for maternal quality, and a scripted EPD profile as complete and well written as any with unique highlights of top 1% teat and udder while still being top 10% carcass, top 3% \$CHB and a top 20% \$BMI, we feel this bull can make a major impact in the breed. Without any Revolution, Endure, 10Y, 8Y, M326 ... the list goes on and on ... this one can be used on a lot of bloodlines.

Member of our 2025 Spring Bull Calf Champion Pen at the NWSS 2025. He's not just big numbered and unique pedigreed, he's the Bar Star Kind for muscle, moderation, and build. Homozygous polled with a herd bull head and a set of pigmented tucked in eyes. We will be using him heavily in our own program.

Terms to be announced sale day.

Act. BW ET; Adj. WW 704 lbs.

Lot 2 — BAR STAR 0183 MAVERICK 3142 ET

It's no secret that we like them big middled and stout. Well this one is like we have never made before or really even seen. His dam, 410, has placed over a dozen herd bull sons in registered operations and many sons that went to commercial cattlemen all across America. She's affectionately known as the herd bull producer. Is this the most unique son she has produced yet? We will let you be the judge on sale day!

Terms to be announced. We'd like to incorporate him into our program in one form or another due to his unique combination of power and EPD profile. Top 15% WW, 17% YW, 7% SC, 17% SCF, 21% Milk, 2% and 4% U/T, 12% REA and top 1% on \$BMI and \$CHB. Rarely do you get all this while being top 24% for smaller mature cow size. Act. BW ET

Lot 3 — BAR STAR 410 MAVERICK 3137 ET

A double red eyed looker here. Awesome hip and a huge stifle.

He's got great feet, sturdy bone, and the angles of his structure are impeccable. A black tailed bull that the old timers would say equates to fertility, I'll trust his fertile type and big perfectly shaped testicles first.

Good enough for a purebred producer but built to work any direction he's asked.

Top 21% WW, top 27% YW, top 11% REA, and top 8% \$CHB! We will stack him up phenotypically with just about anything.

Lot 5 — BAR STAR RAIN CLOUD 4048 ET

Here comes another chip right off the block for massive abundant muscle (maybe as big of hip on a yearling as we have EVER made), incredible phenotype, and elite numbers. Whopping 1.04 REA puts him well towards the top of the breed. Top 10% growth, big milk and a very consistent script tallies up to a top 7% SBMI and a top 4% \$CHB. Where do you find so many combo bulls that have big profitability indexes and the phenotype to hold up in big country and look good doing it... Musselshell, MT! Homozygous polled. Full brother to Lots 2 and 3. Act. BW ET; Adj. WW 662 lbs.

The only Red Cloud bull calf we had this year, and we have an incredible set of females by him. His dam we can write a book on, she's still in production at 11 and has impacted so many herds across America, Canada, and Mexico. Great big \$441 BMI and that huge rib cage on this one in a moderate dark red package will really draw your eyes to him. Homozygous polled and uniquely bred. Moderation, muscle, and profit built into a homozygous polled bull that can go about any direction. Another one that is good enough to breed purebred cows or cause a down pour of profitability in a commercial program. Everyone loves a rain cloud! Act. BW ET; Adj. WW 693 lbs.

In last year's sale the Forward sons were extremely popular and the reports from buyers post turnout were excellent.

This is the only one in this year's offering but we will once again have more in the future. You won't lack libido on this one.

He thought he was ready to breed cows all summer long. He's got the 410 herd bull look to him and a flexible, athletic, muscular build.

He's the Bar Star kind for muscle, moderation, and structure. Couple that with top 1% WW and YW EPDs and a nice top 25% combo of \$BMI and \$CHB and this one is quite useful.

Good looking Prominent son that's got a great back and hip shape. Here's something you won't read in too many black bull footnotes: Check out the MASSIVE forearm on this bull! Forearm can be directly correlated to ribeye size and that would be true for this one as he's got an amazing back and loin shape, and genomics verified this pushing him to the top 8%. He's still maternal in his build, has the corresponding top 4% \$BMI to prove it, and I'd love to see the females that this one produces. We are excited about the first set of Prominent daughters after talking to our friends the Wiese family that owns the bull. Big growth and big top 16% \$CHB. Maternal and terminal traits, YOU CAN HAVE THEM BOTH!

This one is NOT for a small breeder that only has one or two bulls. He's a cowboy bull that if you do everything on horseback you will be fine but he's not a big fan of people on the ground. He's not our typical gentle gentle cattle. Red spot on his face. Double good looking. Homozygous polled super athlete that's hot numbered. Top 6% WW, top 12% YW, Huge top 8% \$BMI and solid \$CHB. Act. BW ET

Lot 8 — BAR STAR 410 PROMINENT 3139 ET

Lot 9 — BAR STAR 2B PROMINENT ET

Lot 10 — BAR STAR VIGILANTE 4031

This one found lots of friends in Denver with his raw performance, striking good looks, great feet and legs, and massive body type.

This bull gained 7.5 lbs. a day through the month of December!

Out of a dam that will calve this spring at 11 and has produced some great cattle over the years. Incredible disposition on this one.

Member of our 2025 Spring Bull Calf Champion Pen at the NWSS 2025.

His EPD numbers match his actual performance and phenotype with an incredible top 3% WW, top 1% YW, top 16% SC and great SCF and Milk. Carcass wise he's top 1% CW, 2% REA; top 25% MARB. Add up all the good it calculates to an incredible top 1% CHB\$ and top 8% BMI\$.

Lot 11 — BAR STAR RIVAL 4071

Homozygous polled cattle are rarely built like this one.

Perfectly flexible structure with added bone and foot size, big sweeping rib cage, great balance and incredible growth numbers in the top 6% WW and top 2% YW. Carcass numbers tabulate to a massive top 2% \$CHB and still maintains that big, big \$BMI.

Out of a Smoke Stack dam makes this one even more of a breeding piece.

Member of our 2025 Spring Bull Calf Champion Pen at the NWSS 2025.

Act. BW 98 lbs.; Adj. WW 665 lbs.

If you are looking for a Nemeses that could be used on heifers, here's the deal. Top 8% CED and that low 1.0 BW EPD coupled to a huge top 6% \$BMI and a solid \$CHB, this one has a lot of bells and whistles. Double red eyed, and has an incredible phenotype to go along with it. Act. BW 80 lbs.; Adj. WW 600 lbs.

This is one good looking bull that's got a huge back, with incredible \$BMI (Top 10%) and \$CHB (Top 2%). Couple that with the fact that he's out of Harrison's beautiful 714 donor cow should mean that this one will be a very versatile bull that you can make money in the pasture, feedlot, or on the rail with his top 12% REA and top 8% marbling. There is always give and take in anything in life. This one ended up coming back a DB carrier. If he only sees black cows during his service life, there won't be any problems. On the other end of the spectrum there are elite numbers in his EPD profile and if you have some black cows that you wanted to stouten up, look in here. This thing has incredible bone and foot size, dark beautiful color and is red necked, awesome muscle and body and charts an unbelievable over \$500 \$BMI to put him in the top 2% of the entire Hereford breed! His top 1% Milk, top 10% growth, top 4% REA, all tabulate to a top 6% \$CHB. Its hard to add that much good up.

Out of our up and coming star Divergent and a first calf full sister to Fresh Prince/Rebellion etc. We LOVE efficient cattle around here and this one knocked it out of the park with her first calf, weaning close to 70% of her body weight.

While EPDs don't agree we would say this one should be safe on heifers with his actual birthweight.

We love this one's type and feed efficient build, gaining fast while on the cow and being moderate in size as he matures = profitability in all aspects of a cow calf operation.

Red cap all the way passed his poll but somehow missed his eyelids.

Act. BW 74 lbs.; Adj. WW 658 lbs.

Lot 19 — BAR STAR 2145 DIVERGENT 4007

A super heifer safe bull!
Updated EPDs should be available on sale day. Here's a super big bodied Divergent that's held up his profile in the AHA database. Regardless we know he will be heifer safe and his Distinct dam should bring plenty of carcass and profitability indexes to the table.
Act. BW 61 lbs.; Adj. WW 600 lbs.

Another Divergent with a big growth numbers in the top 10% of the breed for those EPDs. Big carcass numbers to boot. Heifer safe as well even though his EPDs ticked up a bit after genomics, we are confident this one will be easy calving with his actual weight with a good head and shoulder shape. Rarely do you find one this light on day 1 with that big of EPD profile for growth.
Act. BW 61 lbs.; Adj. WW 600 lbs.

Heifer safe.
This one has been one that the boss lady has loved since day one.
Don't let a white leg distract your eyes from all the good this one has to offer. Let the black cows take care of that.
Here is one big muscled, easy keeping, good looking bull that has a lot of parts and pieces that most bulls sold this year don't have.
Cool red spot on his head that was supposed to go over his left eye, makes him even harder to forget.
Make sure to watch the video of this bull or look him up on sale day. He was a bit camera shy due to his incredibly gentle nature. He's incredible in person.
Act. BW 70 lbs.; Adj. WW 690 lbs.

Lot 30 — BAR STAR INSURRECTION 4088

Lot 30 — BAR STAR INSURRECTION 4088

An incredibly built horned bull. Dark red and square made. For whatever reasons after we sent in the genomics his EPDs went every which direction than what we expected. What I do know is stout, structurally correct, eye appealing cattle will always bring a premium at sale time. I've never heard from a cattle buyer say that cattle were just too good looking to generate a premium. Act. BW 99 lbs.; Adj. WW 652 lbs.

Harrison has an incredible cow herd built and we really like this one! He's homozygous and his dam is a maternal sister to the 714 donor but by Smoke Stack! More traditional Hereford in his markings and great hair coat. Note he's the only son of Magnified in the sale which makes him double bred Revved Up who was an incredible female maker. He's got a ton of preweaning growth in the top 18% of the breed and a solid YW. Great carcass numbers with a top 10% marbling tabulates to a top 9% CHB.

Homozygous polled! A stout, moderate "Rebel" out of a cow we purchased out of the famous NJW program in Wyoming. He was weaned off a ten-year-old cow. Great body and balance and we can't say enough about the Rebellion females that are coming into production here. Longevity is an unspoken driver of profit that everyone selling other breed bulls don't want to talk about... but we do!

Someone got a little happy with the dehorning paste at tagging and took his antlers. I'd have loved to see this rugged and masculine bull with horns intact! Absolutely beautiful cow out of Smoke Stack that this one is out of. Should be generations of great feet stacked in here. Another solid \$BMI bull while being big hipped, masculine, square made, and dark red. Not too many horned genetics this dark out there.

We do raise a few horned ones and this one is pretty neat. He's got a great big red eye that attaches to his cheek, is red-necked and a red sheath even! Out of a beautiful uddered power cow and one of our vet's favorite herd bulls here. Does have small stubs where we didn't get him pasted that great, in the future we hope to leave the horns on all of the bulls and only paste our females. He's HUGE testicled and his daughters should be fertile fertile with that top 10% SC, top 2% Sustained Cow Fertility, combine that with elite udder and teat EPDs and a whopping top 5% \$BMI all while having solid marbling. So much good in these horned bulls without antlers.

This bull somehow missed the eye pigment and it landed on his sheath! A homozygous polled heifer safe bull that's got a lot of muscle shape, and a nice look. Big marbling and \$BMI.

Act. BW 67 lbs.

Lot 39 — BAR STAR 971 TRUSTED 3152

Lot 40 — BAR STAR 660 TRUSTED 3159

ERNST MS 195B UNIQUE DOM 660
— Dam of Lot 40

Incredible body depth and big big testicles on this stout made, good footed rascal. What's not to like about a big ribbed square made, older aged bull to turn out? Then top it off with him being out of an outstanding cow as reflected by his 2 and 1% udder and teat EPDs. It just doesn't get too much better after you look at his EPDs and see one of the biggest birth to yearling weight spreads in the entire offering. Sustained cow fertility in the top 5% of the breed with big marbling is hard to obtain. Tabulates to a top 7% \$BMI and top 24% \$CHB.

Lot 41 — BAR STAR DOUBLE DOWN 3176

I can't imagine how good this bull would look if he didn't spend 90% of his day walking the fence belling, looking for cows to breed. Big libido in a gentle, still very good looking package with ELITE NUMBERS. Homozygous polled and out of a full sister to Fresh Prince, Rebellion, etc. He's got the gene markers that turned a very good EPD profile into as good as we could have dreamed: Top 24% CE, top 30% for both light birth and big weaning, top 23% for YW all while being in the top 17% for cow fertility and top 31% for smaller cow size. It just keeps going with the top 1% of the breed for SC, good milk, and udder and teat EPDs in the top 9 and 4%. Then onto carcass with a top 14% REA and 17% marbling all tabulate to a big \$CHB in the top 12% and all that maternal kicks out to a \$BMI in the top 14%.

Act. BW 75 lbs.

Lot 40

42

10-HEAD BLACK BALDY REPLACEMENT HEIFERS

Bar Star heifers. Straight out of the heart of our herd! Nothing kept back. Developed at our friends the Stayer's in Melstone this year. Several AI sired and several out of the sires represented in the bulls that are selling. If you are looking for feed efficient cattle that eat less than a straight bred animal and convert feed to condition easily over the winter while being more fertile look in here.

43

20-HEAD BLACK BALDY REPLACEMENT HEIFERS

Bubba and Trapper Skoyen have been long time customers of ours and they continue year in and year out to buy good bulls from us. Right off the top of their replacement pen! Pasture developed and will get out and go once the grass comes.
